11 04 quiz contemporary voices: *Diverse Voices in Modern US Moral Theology* Charles E. Curran, 2019-02-15 In Charles E. Curran's latest book, *Diverse Voices in Modern US Moral Theology*, he presents the diverse voices of US Catholic moral theologians from the mid-twentieth century to the present. The book discusses eleven key individuals in the development and evolution of moral theology as well as the New Wine, New Wineskins movement. This diversity, which differs from the monolithic understanding of moral theology that prevailed until recently, comes from the diverse historical circumstances or *Sitz im Leben* of the authors. Each of these theologians developed her or his approach in light of these circumstances and in response to shifts in the three audiences of moral theology—the Church, the academy, and the broader society. By exploring this diversity, Curran recognizes the deep divisions that exist within Catholic moral theology between the so-called “liberal” and “conservative” approaches and acknowledges the need for greater dialogue between them, providing a deeper understanding of the methods and approaches of these significant figures. This new book from a major figure in the field will be an important resource for students and scholars of US Catholic moral theology and for anyone seeking to understand the current state of moral theology in America today.

11 04 quiz contemporary voices: From Tinseltown to Bordertown Celestino Deleyto, 2017-04-03 Close readings that look for the real Los Angeles in a selection of contemporary movies. Los Angeles is a global metropolis whose history and social narrative is linked to one of its top exports: cinema. L.A. appears on screen more than almost any city since Hollywood and is home to the American film industry. Historically, conversations of social and racial homogeneity have dominated the construction of Los Angeles as a cosmopolitan city, with Hollywood films largely contributing to this image. At the same time, the city is also known for its steady immigration, social inequalities, and exclusionary urban practices, not dissimilar to any other borderland in the world. The Spanish names and sounds within the city are paradoxical in relation to the striking invisibility of its Hispanic residents at many economic, social, and political levels, given their vast numbers. Additionally, the impact of the 1992 Los Angeles riots left the city raw, yet brought about changing discourses and provided Hollywood with the opportunity to rebrand its hometown by projecting to the world a new image in which social uniformity is challenged by diversity. It is for this reason that author Celestino Deleyto decided to take a closer look at how the quintessential cinematic city contributes to the ongoing creation of its own representation on the screen. From Tinseltown to Bordertown: Los Angeles on Film starts from the theoretical premise that place matters. Deleyto sees film as predominantly a spatial system and argues that the space of film and the space of reality are closely intertwined in complex ways and that we should acknowledge the potential of cinema to intervene in the historical process of the construction of urban space, as well as its ability to record place. The author asks to what extent this is also the city that is being constructed by contemporary movies. From Tinseltown to Bordertown offers a unique combination of urban, cultural, and border theory, as well as the author's direct observation and experience of the city's social and human geography with close readings of a selection of films such as Falling Down, White Men Can't Jump, and Collateral. Through these textual analyses, Deleyto tries to situate filmic narratives of Los

Angeles within the city itself and find a sense of the real place in their fictional fabrications. While in a certain sense, Los Angeles movies continue to exist within the rather exclusive boundaries of Tinseltown, the special borderliness of the city is becoming more and more evident in cinematic stories. Deleyto's monograph is a fascinating case study on one of the United States' most enigmatic cities. Film scholars with an interest in history and place will appreciate this book.

11 04 quiz contemporary voices: *Gender, Race, and Power* Joyce P. Kaufman, Kristen P. Williams, 2024-10-02 Kaufman and Williams present critical issues in international relations through an intersectional approach that examines race, gender, class, ethnicity, and power to arrive at better explanations for such core IR issues as war and peace, security, human rights, development and international political economy, and the global environment. Their approach builds on early calls amongst feminist IR theorists, imploring "Where are the women?" It is only fairly recently that students of IR have broadened the approach to the field to incorporate the dimensions of race, ethnicity, and class as well as gender. Kaufman and Williams help guide readers exploring questions like: How does gender matter for understanding war and peace? How does race matter? Where are the men? What is intersectionality in IR? How does an intersectional approach change or broaden our understanding of international relations?

11 04 quiz contemporary voices: *Voice and Power in Africa's Democracy* Said Adejumobi, 2017-08-16 Africa has made notable progress in its nascent democracy but with uneven performance across countries. However, across the board, challenges abound. Central to Africa's checkered democratic narrative is the weakness of its democratic institutions, participatory mechanisms and accountability platforms. This book interrogates these elements with the role and capacity of the parliament, political parties, media, freedom of information law, trade union movements, gender empowerment mechanisms and accountability methods and processes all under examination. The weakness of democratic institutions has had a corrosive effect on political accountability and limits the scope for popular participation in governance. In many countries, innovative practices, and new social and political encounters are emerging that challenge old institutional cultures, promote reforms and demand accountability from the governing elite. The book captures these varied, innovative patterns of democratic change. With first hand knowledge and expertise of the continent, the contributors analyze the issues, trends, problems and challenges in these critical areas of Africa's democratic growth. The conclusion is that strengthening democratic institutions, opening up the political space for enhanced political participation and ensuring political accountability will determine the course, prospects and quality of Africa's budding democracy.

11 04 quiz contemporary voices: *Semiotics of Rape* Rupal Oza, 2022-11-14 In *Semiotics of Rape*, Rupal Oza follows the social life of rape in rural northwest India to reveal how rape is not only a violation of the body but a language through which a range of issues—including caste and gender hierarchies, control over land and labor, and the shape of justice—are contested. Rather than focus on the laws governing rape, Oza closely examines rape charges to show how the victims and survivors of rape reclaim their autonomy by refusing to see themselves as defined entirely by the act of violation. Oza also shows how rape cases become arenas where bureaucrats, village council members, caste communities, and the police debate women's sexual subjectivities and how those varied understandings impact the status and reputations of individuals and groups. In this way, rape gains meaning beyond the level of the survivor and victim to create a social category. By tracing the shifting meanings of sexual violence and justice, Oza offers insights into the social significance of rape in India and beyond.
