

10km to half marathon training plan

10km to half marathon training plan serves as an essential guide for runners aiming to transition from completing a 10-kilometer race to successfully finishing a half marathon. This training plan focuses on gradually increasing endurance, improving running efficiency, and preventing injuries while adapting to the longer distance of 13.1 miles. Whether you are an intermediate runner or someone who has recently completed a 10k and wants to step up to a half marathon, this guide provides structured advice on workouts, weekly mileage, nutrition, and recovery strategies. The plan emphasizes a balanced approach to building mileage, incorporating speed work, and strengthening muscles to enhance overall performance. Understanding the progression from 10km to half marathon training is crucial for setting realistic goals and ensuring a rewarding race day experience. The following sections outline the key components of an effective training schedule, including weekly breakdowns, cross-training options, and essential tips for race preparation.

- Understanding the Transition from 10km to Half Marathon
- Key Components of a 10km to Half Marathon Training Plan
- Sample Weekly Training Schedule
- Nutrition and Hydration Strategies
- Injury Prevention and Recovery Techniques
- Race Day Preparation and Tips

Understanding the Transition from 10km to Half Marathon

Transitioning from a 10km race to a half marathon involves significant changes in training volume, intensity, and mental preparation. The half marathon distance is more than double that of a 10km, requiring enhanced endurance and stamina. Proper adaptation to this increased distance minimizes the risk of injury and optimizes performance. Runners must focus on progressively increasing their weekly mileage while maintaining a balance to avoid overtraining. Additionally, pacing strategy becomes more critical as the race duration extends beyond an hour for most runners.

The Importance of Gradual Mileage Increase

A gradual increase in weekly mileage is vital to building aerobic capacity without overwhelming the body. Increasing mileage too quickly may lead to overuse injuries such as shin splints, stress fractures, or tendonitis. A common rule of thumb is to increase total weekly mileage by no more than 10% each week. This conservative approach allows the

muscles, joints, and cardiovascular system to adapt effectively to longer distances.

Adjusting Training Intensity and Duration

While 10km training often emphasizes speed and tempo runs, half marathon training demands a balance between speed work and longer, slower runs to build endurance. Long runs become the cornerstone of this training phase, gradually extending from 6 to 10 miles. Incorporating interval training and tempo runs helps maintain speed and improve lactate threshold, which is crucial for sustaining a strong pace over the half marathon distance.

Key Components of a 10km to Half Marathon Training Plan

An effective training plan for moving from 10km to a half marathon includes several key components designed to improve endurance, speed, strength, and recovery. Each element plays a critical role in preparing the body and mind for the demands of the longer race.

Long Runs

Long runs are the foundation of half marathon preparation. These runs enhance aerobic capacity and teach the body to utilize energy efficiently over extended periods. Starting at approximately 6 miles, long runs should increase incrementally by half a mile to one mile per week until reaching 10-12 miles before tapering. Long runs should be completed at a comfortable, conversational pace.

Speed Work and Tempo Runs

Incorporating speed intervals and tempo runs into the training schedule improves overall running economy and lactate threshold. Speed workouts involve short, high-intensity efforts followed by recovery periods, while tempo runs consist of sustained efforts at a challenging but manageable pace, usually slightly slower than 10k race pace. These sessions help maintain leg turnover and prepare the runner for race day pacing.

Cross-Training and Strength Training

Cross-training activities such as cycling, swimming, or elliptical workouts provide cardiovascular benefits without the impact stress of running. Strength training focuses on core stability, lower body strength, and injury prevention. Exercises like squats, lunges, planks, and hip bridges enhance running form and resilience.

Rest and Recovery

Recovery days are essential for muscle repair and preventing burnout. Incorporating rest or active recovery days, such as light walking or yoga, helps maintain training consistency and reduces injury risk. Sleep quality and proper nutrition also play vital roles in recovery.

Sample Weekly Training Schedule

This sample schedule outlines a balanced approach to progressing from 10km to half marathon over an eight-week period. Adjustments should be made based on individual fitness levels and response to training.

1. **Monday:** Rest or cross-training (e.g., swimming or cycling)
2. **Tuesday:** Speed intervals (e.g., 6 x 400m at 5k pace with recovery jogs)
3. **Wednesday:** Easy run (3-4 miles at conversational pace)
4. **Thursday:** Tempo run (3-5 miles at half marathon pace)
5. **Friday:** Rest or strength training focusing on core and legs
6. **Saturday:** Long run (starting at 6 miles, increasing weekly)
7. **Sunday:** Easy recovery run or cross-training

Consistency and gradual progression are key to this plan, ensuring that the runner adapts both physically and mentally to the half marathon distance.

Nutrition and Hydration Strategies

Proper nutrition and hydration are critical components of any 10km to half marathon training plan. Adequate fueling supports energy demands during training and enhances recovery.

Pre-Run Nutrition

Eating a balanced meal rich in carbohydrates, moderate in protein, and low in fat 2-3 hours before runs provides optimal energy. For early morning workouts, a small snack like a banana or an energy bar 30-60 minutes prior can suffice.

During Long Runs

For runs longer than 60 minutes, consuming carbohydrates through gels, sports drinks, or

chews helps maintain blood glucose levels and delays fatigue. Hydration is equally important; drinking small amounts of water or electrolyte beverages every 15-20 minutes prevents dehydration.

Post-Run Recovery Nutrition

Post-run meals should include carbohydrates to replenish glycogen stores and protein to repair muscle tissue. Aim to eat within 30-60 minutes after completing a long or intense run for optimal recovery.

Injury Prevention and Recovery Techniques

Injury prevention is a crucial aspect of extending training from 10km to half marathon distances. The increased mileage and intensity require proactive measures to maintain health and performance.

Common Running Injuries and Prevention

Common injuries include runner's knee, plantar fasciitis, IT band syndrome, and Achilles tendinitis. Prevention strategies include:

- Proper footwear with adequate support and cushioning
- Gradual mileage increases to avoid overuse stress
- Regular strength training to correct muscle imbalances
- Incorporating flexibility and mobility exercises
- Listening to the body and addressing pain early

Recovery Techniques

Effective recovery methods include foam rolling, stretching, massage, and cold therapy. These techniques reduce muscle soreness and improve circulation. Adequate sleep and hydration also accelerate the healing process.

Race Day Preparation and Tips

Race day success hinges on thorough preparation, both physically and mentally. Implementing a race day plan aligned with training efforts ensures a smooth experience.

Pre-Race Routine

Establish a consistent pre-race morning routine that includes a familiar breakfast, hydration, and a warm-up jog with dynamic stretches. Arrive early to the race venue to reduce stress and allow time for final preparations.

Pacing Strategy

Start the race conservatively to conserve energy for the latter stages. Use training experience to gauge an appropriate pace that can be sustained comfortably. Avoid the temptation to start too fast, which can lead to early fatigue.

Post-Race Recovery

Post-race recovery involves gentle walking, rehydration, and consuming a balanced meal. Gradually return to easy runs and cross-training before resuming regular training to allow the body to heal.

Frequently Asked Questions

What is the ideal duration for a 10km to half marathon training plan?

The ideal duration for a 10km to half marathon training plan is typically 8 to 12 weeks, allowing gradual mileage increases and adaptation.

How many days per week should I train when moving from 10km to half marathon?

Training 4 to 5 days per week is recommended to build endurance while allowing sufficient recovery.

Should I include speed workouts in my 10km to half marathon training plan?

Yes, incorporating speed workouts like intervals or tempo runs helps improve pace and running efficiency for a half marathon.

How important is long run in a 10km to half marathon training plan?

Long runs are crucial as they build endurance and prepare your body for the longer race distance of 21.1 km.

What is a good weekly mileage target when transitioning from 10km to half marathon?

A good weekly mileage target ranges from 25 to 40 kilometers, gradually increasing to avoid injury.

Should I cross-train while training for a half marathon after running 10km?

Yes, cross-training activities like cycling or swimming help improve overall fitness and reduce injury risk.

How do I prevent injuries when increasing my distance from 10km to half marathon?

Gradually increase mileage by no more than 10% per week, incorporate rest days, and focus on strength and flexibility exercises.

What role does nutrition play in a 10km to half marathon training plan?

Proper nutrition fuels training, aids recovery, and supports endurance; focus on balanced meals with adequate carbs, proteins, and hydration.

Can I maintain my 10km race pace when running a half marathon?

Usually, your half marathon pace will be slower than your 10km pace due to the longer distance, so pacing adjustments are necessary.

How should I taper before my half marathon after training from 10km?

Reduce weekly mileage by 20-30% during the last 1-2 weeks before the race to allow your body to recover and perform optimally.

Additional Resources

1. The 10K to Half Marathon Training Guide

This comprehensive guide is perfect for runners looking to transition from 10K races to half marathons. It provides detailed training plans, nutrition advice, and injury prevention tips. The book emphasizes gradual mileage increases and includes strength training exercises to boost endurance and speed.

2. Half Marathon Training for Beginners

Ideal for novice runners, this book breaks down the essentials of moving from a 10K to a

half marathon. It features easy-to-follow weekly schedules, motivational strategies, and pacing techniques. Readers will learn how to build stamina safely and confidently tackle longer distances.

3. From 10K to 21K: A Runner's Journey

This inspiring book combines personal stories with practical training advice for runners aiming to complete their first half marathon. It covers mental preparation, race-day strategies, and how to balance training with daily life. The author's experience makes it relatable and encouraging.

4. Smart Half Marathon Training Plans

Focusing on science-backed methods, this book offers tailored training plans for various runner levels transitioning from 10K races. It includes cross-training routines, speed work, and recovery protocols. The book helps runners maximize performance while minimizing injury risks.

5. The Runner's Roadmap: 10K to Half Marathon

This guide maps out a clear path for runners moving up in distance, emphasizing goal setting and consistent progress. It includes tips on gear selection, nutrition, and mental toughness. The book's structured approach helps runners stay motivated and track improvements.

6. Half Marathon Success: Training Plans & Tips

Designed for busy individuals, this book offers flexible training plans that fit into tight schedules. It highlights efficient workouts, including interval training and tempo runs, to boost endurance quickly. Readers also get advice on race day preparation and pacing strategies.

7. Building Endurance: From 10K to Half Marathon

This book delves into endurance-building techniques essential for half marathon training. It covers long runs, aerobic conditioning, and strength training exercises. The author emphasizes listening to your body to avoid overtraining and injury.

8. The Essential Half Marathon Training Manual

A go-to resource for intermediate runners, this manual provides step-by-step guidance on increasing mileage and improving speed. It includes sample training weeks, nutrition plans, and mental strategies to overcome common challenges. The book's holistic approach supports overall runner development.

9. Run Stronger: Transitioning from 10K to Half Marathon

This book combines expert coaching advice with practical tips to help runners make a successful jump to half marathon distances. It discusses pacing, recovery, and strength training tailored to this specific transition. The engaging writing style motivates readers to push their limits safely.

10km to half marathon training plan: The Ultimate Trail Running Handbook Claire Maxted, 2021-01-07 'Filled to the brim with advice, tips and inspiration to enable you to achieve your dreams over whatever distance you want your legs to carry you' - Chrissie Wellington, OBE, four-time Ironman Triathlon World Champion From complete beginners to seasoned off-road runners, The Ultimate Trail Running Handbook has all the training and nutrition advice, skills, gear and motivation you need to become a fit and confident trail runner. There are training plans that take newcomers from 5k parkrun to first trail marathon, while for experienced runners there are sections on strength work, injury prevention and advanced training plans to boost performance up to 50k (30 miles). To keep you enjoying every step, you'll find advice on how to choose the right gear; over 20 easy, healthy recipes; inspiring stories from real trail runners; and advice from top athletes and coaches. And if you want to explore new trails, you can use the navigation and route planning section to create your own exciting off-road adventure. If you're a trail runner or would like to become one, this book is your new best friend.

10km to half marathon training plan: Marathon and Half-Marathon Running Steve Trew, 2014-06-30 Crowood Sports Guides provide sound, practical advice that will make you into a better sportsperson, whether you are learning the basic skills, discovering more advanced techniques or reviewing the fundamentals of your sport. Contents include: the history of the marathon and the myths that have grown around it; the big races and practical advice on how to enter; deciding on what type of event is right for you; correct shoes and clothing; how to form a training schedule and train progressively, building up mileage for your first event; a discussion of tapering and race preparation, and the correct nutrition and hydration for your race; tips for achieving a positive mental attitude; dealing with injury; progression onwards from your first marathon or half-marathon. Aimed at beginner to intermediate runners and superbly illustrated with over 200 colour photographs.

10km to half marathon training plan: Science of Running Chris Napier, 2020-02-04 Discover the hard science that will help you run faster, endure for longer, and avoid injury. Analyze your running style and learn how to enhance your gait for optimum efficiency and safety. Transform your performance with exercises targeting strength, flexibility, and recovery - each exercise annotated to reveal the muscle mechanics so you know you're getting it right. Understand the science behind your body's energy systems and how to train to maximize energy storage and conversion. Follow training and exercise programs tailored to different abilities and distances, from 5K to marathon. Whether you are new to running or an experienced runner, this book will help you achieve your goals and stay injury-free.

10km to half marathon training plan: Improve Your Marathon and Half Marathon Running David Chalfen, 2014-11-30 Improve Your Marathon and Half Marathon Running is an accessible, jargon-free guide for athletes committed to improving their running at either distance. It provides valuable advice in increasing competition experience and structuring more advanced training programmes and covers; training plans and principles; evolving training programmes as a runner's experience increases; methods for cross-training in other disciplines; principles for athletes to examine the biomechanics of their running to improve performance; benefits of coaching; training case histories of successful athletes. 'David has a huge passion and knowledge of endurance running. His dynamism and expertise come across brilliantly in this extremely well written, useful and entertaining book.' Dan Robinson, four times Olympic and World Championship marathoner, and 2006 Commonwealth Games marathon medallist. Fully illustrated, this practical, guide is for all marathon and half marathon runners wanting to improve their performance.

10km to half marathon training plan: The Colour-Fit Method Dr Tom Little, 2022-06-30

'Colour-Fit is an amazing resource that helped me realise one of sports greatest achievements' Wes Morgan, Captain of Leicester City Premier League winning team The Colour-Fit Method has only been available to those in professional sport - a secret weapon for athletes to optimise body shape, health and performance. Now, Colour-Fit's founder Dr Tom Little lets you in on the secret, too. The Colour-Fit Method is a revolutionary approach to nutrition and fitness. With over 120 recipes and meal plans, and multiple tailored training and nutrition plans to suit a range of goals, the simple, sustainable and evidence-based method outlined in The Colour-Fit Method will help you to look and feel better, perform at your best and lead a healthier and more active life. Dr Tom Little is a performance and health specialist with over twenty years' professional experience. His Colour-Fit method has rapidly become a revolutionising force in elite sport, having been used by many of the world's best-loved teams, including Manchester City, Arsenal, Chelsea, St Helens, Welsh Rugby Union, Saracens, Melbourne Demons, Sri Lankan Cricket and Manchester United, in addition to multiple motor sport, triathlon and combat athlete champions. 'Colour-Fit is one of the best methods I've seen in years' Tony Strudwick, Head of Performance, Arsenal Academy and Welsh FA

10km to half marathon training plan: The Complete Running and Marathon Book DK, 2014-02-06 A one-stop guide for any aspiring runner including everything you need to know, whether you're doing your first run or your first marathon. The Complete Running and Marathon Book covers all the essential topics around running, and much more, from choosing the right footwear to eating right and warming up. Are you aiming to run a race, such as a 5K, 10K, half marathon, or marathon? Train efficiently with one of the specific programs for your distance. Invaluable tips can help you to gain a vital competitive edge - whether you're competing against other runners or your own personal best - from goal-setting and motivation to running psychology and race tactics. Assess and develop your technique under clear no-nonsense guidance with detailed visuals to help you understand what your body is going through. Key pre- and post-run step-by-step stretches help you to protect yourself from injury and core and resistance-training exercises can help you to run faster and further. The Complete Running and Marathon Book is perfect for any new or aspiring runner looking to go the distance.

10km to half marathon training plan: Runner's World Run Less Run Faster Bill Pierce, Scott Murr, 2021-01-19 Finally, runners at all levels can improve their race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in Runner's World magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the 3 plus 2 program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery, injury rehab and prevention, strength training, and nutrition, this program will change the way runners think about and train for competitive races. Amby Burfoot, Runner's World executive editor and Boston Marathon winner, calls the FIRST training program the most detailed, well-organized, and scientific training program for runners that I have ever seen.

10km to half marathon training plan: The Complete Book of Triathlon Mark Kleanthous, 2016-05-23 The Complete Book of Triathlon is for all athletes who want to improve in or convert to the fascinating sport of triathlon. It shows among other things how to construct a training program, how to approach a competition and offers an Encyclopedia that covers all aspects of triathlon. This book shows the triathlete and aspiring triathlete everything they need to know about triathlon, whether a sporting novice or an accomplished athlete in another sport. It tells you how to get started, what equipment to buy, the diet you will need, how to devise a training routine and how to arrange your busy life in order to accommodate it, and then explains how to finish a race, as well as how to recover from it. The Complete Book of Triathlon will tell you how to be the best that you can

be in triathlon; not necessarily by training harder, but by training smarter. Every aspect of your life has the potential to affect your mental and physical performance, and you need to take this into account when devising your training in order to avoid both over-training and under-training. Mark Kleanthous system for monitoring training-stress levels which he has been successfully using for many years is unique to him but is revealed in this book. Use it and you can achieve your optimum performance.

10km to half marathon training plan: Runner's World Run Less, Run Faster Bill Pierce, Scott Murr, Ray Moss, Editors of Runner's World Maga, 2012-04-10 The Furman Institute of Running and Scientific Training (known as FIRST) is dedicated to make running more accessible and limit overtraining and burnout while producing faster race times. FIRST is one of the foremost experts in the world on the science of running; its authority is unmatched and the promise of training less and accomplishing more has made the first two editions of Run Less, Run Faster a solid and steady seller. With 50 percent updated content, this new edition of Runner's World Run Less, Run Faster by Bill Pierce, Scott Murr, and Ray Moss continues to promise the same tantalizing results: Readers can get stronger, faster, and better by training less. It will also include more sections for novice runners, broadening the audience appeal, as well as training plans tailored to the new qualifying times for the Boston Marathon. The quality-over-quantity approach optimizes training time and yields better performance—results runners will love no matter what distance they are racing.

10km to half marathon training plan: Marathon Running Richard Nerurkar, 2013-02-21 Written by Richard Nerurkar, Britain's most successful marathon runner of the 1990s, the fourth edition of this classic, invaluable guide will help you get the most from your distance training. From the complete beginner enchanted by the challenge of the London Marathon, to the experienced runner wishing to improve on racing strategy, its authoritative pages reveal a wealth of information on: - Structuring an effective build-up and taper - Training harder without doing too much - Improving your endurance and pace judgement - Producing your best on race-day This new edition has been fully updated to take account of the latest developments in running science and programme design. Also included are tips on how to choose a good marathon and the pitfalls of bad ones, as well as more insights from Richard and other leading runners.

10km to half marathon training plan: The Complete Book of Triathlon Training Mark Kleanthous, 2012 Covers all aspects of triathlon, from getting started, to training, to how to finish a race.

10km to half marathon training plan: Running in the Midpack Martin Yelling, Anji Andrews, 2021-02-04 '...a really, really, really good book' - Vassos Alexander 'A masterpiece' - Paul-Sinton Hewitt CBE, parkrun founder 'A lovely book... it is really simple about getting a nice relationship with your running where it helps your life and changes with your life... Very accessible.' - Paul Tonkinson, Running Commentary presenter and author A smart running book designed for the all-too-often overlooked middle-of-the-pack runner, written by Marathon Talk's Martin Yelling and Anji Andrews. Welcome to the midpack! Running pushes us, stretches us, asks us difficult questions, challenges us. It gives us space, calms us down, picks us up, boosts our energy, rewards, inspires and fulfils us. Midpack runners - those who fall between the beginners and the elite - are the heartbeat and footsteps of the running community. In this long-overdue book, Marathon Talk's Martin Yelling and Anji Andrews share their expert knowledge, first-person stories and coaching ideas to nourish the midpackers' running experience. Covering such diverse topics as 'Making Yourself Bullet-proof' and 'How to Nail Your Race', Running in the Midpack will cultivate your running progress, and help you to become a healthy, happy and successful runner. Marathon Talk is the UK's number one running podcast.

10km to half marathon training plan: Half-Marathon Jeff Galloway, Barbara Galloway, 2013-10-23 Author of the best-seller Marathon - You can do it!, Galloway now offers together with his wife a state-of-the-art book on the highly popular half-marathon distance especially for women. Jeff's trademarked run-walk-run method has helped hundreds of thousands of average people to get

off the couch, train for marathons and half-marathons without injury and has helped veterans to improve times. This book offers a step-by-step program for women that starts with setting up your training each week. Jeff and Barbara will show you how to select a realistic goal, and which workouts are needed to prepare for various performances. The book is loaded with tips especially for women on how to stay motivated, eliminate aches, pains, and injuries, with the minimum training needed to enjoy other aspects of life.

10km to half marathon training plan: Run Smart John Brewer, 2017-09-21 Renowned marathon expert and leading sports scientist Professor John Brewer reveals why many of the concepts surrounding marathon training and running are wrong - and suggests how the latest sports science research transforms the way marathons should be approached. Run Smart uses the latest scientific research to show how preparing for, and running, marathons can be made easier, and in doing so challenges many of the myths that surround marathon running. The book will draw on the author's experience as one of the UK's leading sports scientists, his extensive research background in marathon running, and his experience as a marathon runner, to provide credible advice to runners to support their preparation for a marathon. The book will challenge many current concepts, myths and ideas, and provide science-based alternatives in areas such as training and nutrition that will optimise and ease a runner's preparation for, and completion of, the 26.2 mile distance. This highly accessible book will use the latest scientific findings to support new runners training for their first marathon and help more experienced athletes improve and train smarter.

10km to half marathon training plan: Triathlon - Lifelong Training Henry Ash, Barbara Warren, 2004 This text provides clear and realistic training plans for all performance levels. It includes programs for swimming, cycling and running.

10km to half marathon training plan: Strength and Conditioning for Endurance Running Richard Blagrove, 2015-07-31 Endurance runners and coaches have tended to neglect weight training and conditioning techniques, often in the belief that they don't benefit performance, add unwanted muscle bulk, or cause excessive soreness. But as standards at elite level have improved, so coaches and runners have become increasingly keen on learning about the latest new training techniques or ways to stay injury free. No longer does the running community view strength and conditioning with scepticism, or as something that can only benefit elite runners. In Strength and Conditioning for Endurance Running, author Richard Blagrove shows how a strength and conditioning programme can directly improve running performance and reduce the risk of injury, as well as allowing an athlete to tolerate high volumes of running in the future. Fully illustrated with 312 colour images and diagrams.

10km to half marathon training plan: Marathon - Half - 10k - 5k Training Plans Jean JACKSON, 2021-09-15 In order to best prepare for your next marathon goals, this book offers a set of marathon training plans. Choosing a plan including for example 5 training sessions per week is not enough to achieve a time of about 3 hours. The target must be in full agreement with the runner's distance record or / and potential (MAS). To perfectly adjust the plan to your abilities, all you need to do is perform specific marathon sessions at the target pace on race day.

10km to half marathon training plan: Handbook of Research on Holistic Perspectives in Gamification for Clinical Practice Novák, Daniel, Tulu, Bengisu, Brendryen, Håvar, 2015-09-14 Over the past decade, the healthcare industry has adopted games as a powerful tool for promoting personal health and wellness. Utilizing principles of gamification to engage patients with positive reinforcement, these games promote stronger attention to clinical and self-care guidelines, and offer exciting possibilities for primary prevention. Targeting an audience of academics, researchers, practitioners, healthcare professionals, and even patients, the Handbook of Research on Holistic Perspectives in Gamification for Clinical Practices reviews current studies and empirical evidence, highlights critical principles of gamification, and fosters the increasing application of games at the practical, clinical level.

10km to half marathon training plan: Nutrition for Marathon Running Jane Griffin, 2012-05-01 Nutrition for Marathon Running describes how the running body works and explains why

performance in a marathon is so highly influenced by what a runner eats and drinks. The special dietary requirements of vegetarians, females, veterans and diabetic runners are all covered as well as information about running in hot and cold climates. By the end of the book, readers should be in no doubt just how important diet is in the training for, and running of, a marathon. The author addresses the following questions and many more: How can I keep hydrated on long training runs? What is the best thing to have for breakfast on the morning of the marathon? Are sports drinks really better than plain water? Why do I always seem to get a cold after running a marathon? What happens at the drinks station on route? The marathon is in the morning but I do all my training in the evening: will this matter?

10km to half marathon training plan: The Big Running Book of Training Plans Thomas Bauer Msc, 2024-09-14 With the Big Running Book of Training Plans you can access over 50 training plans. Save yourself the constant search for the perfect training plan! In this book, you'll find over 50 training plans for beginners and advanced runners! Whether your next goal is a marathon, half marathon, 10K or 5K, our training plans give you a great chance of reaching your target. Benefits: □ 57 training plans □ From 5K to marathon □ Training plans for every skill level: For beginners, experienced runners and ambitious elite athletes □ High-quality and vetted training plans □ EXTRA: Detailed explanations of all important training terms The Big Running Book of Training Plans includes plans for marathon, half marathon, 10K and 5K: 16 training plans for marathon, ranging from under 6 hours to under 2:30 hours 13 training plans for half marathon, ranging from under 3 hours to under 1:10 hours 16 training plans for 10K, ranging from under 75 minutes to under 30 minutes 12 training plans for 5K, ranging from under 40 minutes to under 15 minutes 16 Training Plans for Marathon: Finish a marathon (under 6 hours) Marathon under 5:30 hours Marathon under 5:15 hours Marathon under 5 hours Marathon under 4:45 hours Marathon under 4:30 hours Marathon under 4:15 hours Marathon under 4 hours Marathon under 3:45 hours Marathon under 3:30 hours Marathon under 3:15 hours Marathon under 3 hours Marathon under 2:50 hours Marathon under 2:45 hours Marathon under 2:40 hours Marathon under 2:30 hours 13 Training Plans for Half Marathon: Finish a half marathon (under 3 hours) Half marathon under 2:45 hours Half marathon under 2:30 hours Half marathon under 2:15 hours Half marathon under 2 hours Half marathon under 1:50 hours Half marathon under 1:45 hours Half marathon under 1:40 hours Half marathon under 1:30 hours Half marathon under 1:25 hours Half marathon under 1:20 hours Half marathon under 1:15 hours Half marathon under 1:10 hours 16 Training Plans for 10K: 10K for beginners 10K under 70 minutes 10K under 65 minutes 10K under 60 minutes 10K under 55 minutes 10K under 50 minutes 10K under 48 minutes 10K under 45 minutes 10K under 42 minutes 10K under 40 minutes 10K under 38 minutes 10K under 37 minutes 10K under 35 minutes 10K under 33 minutes 10K under 32 minutes 10K under 30 minutes 12 Training Plans for 5K: 5K for beginners 5K under 35 minutes 5K under 30 minutes 5K under 28 minutes 5K under 25 minutes 5K under 22 minutes 5K under 20 minutes 5K under 19 minutes 5K under 18 minutes 5K under 17 minutes 5K under 16 minutes 5K under 15 minutes Bonus Material / Extras: Table for immediate assessment of your performance potential Explanation of all important training terms Exercises for runner's strength training
