10 reasons to learn a language: Teaching and Learning in Multilingual Contexts
Agnieszka Otwinowska, Gessica De Angelis, 2014-01-06 It is clearly illogical to search for one good, universal solution for multilingual education when educational contexts differ so widely due to demographic and social factors. The situation is further complicated by the motivations of learners and teachers, and by attitudes towards multilingualism and 'otherness'. The studies in this volume seek to investigate not only whether certain solutions and practices are 'good', but also when and for whom they make sense. The book covers a wide range of Western multilingual contexts, and uncovers common themes and practices, shared aims and preoccupations, and often similar solutions, within seemingly diverse contexts. In addition to chapters based on empirical data, this book offers theoretical contributions in the shape of a discussion of the appropriateness of L1-Ln terminology when discussing complex multilingual realities, and looks at how the age factor works in classroom settings.

10 reasons to learn a language: Pour Mwan Mon Lalang Maternel i Al Avek Mwan Partou Christina Tamaa Fleischmann, 2008 In the 1970s, the newly independent Seychelles government took the landmark decision to make Seychellois Creole (SC) an official language. The Seychelles thus became the first Creole-speaking country worldwide to give its Creole the status of a national language and to use it as a medium of instruction. The decision to use SC in the school system has resulted in many positive developments such as increasing rates in public literacy. Despite these advances, there are many critics who contend that formal instruction in SC interferes with the speedy and necessary acquisition of English and French, which are internationally associated with socio-economic power and prestige. This book assesses the attitudes of SC speakers towards their mother tongue, in relation to the colonial history of the country. Its objectives are twofold: firstly to shed light upon the attitudes which modern Seychellois hold towards their mother tongue and its use in the education system; and secondly to demonstrate how these attitudes may affect the achievement of the government's educational agenda. The findings of this book are directly relevant for other investigators interested in globalization, multilingual education, pluriliteracy, minority language maintenance, language policy, and teacher training. Moreover, the implications of this research are applicable to other post-colonial settings throughout Africa, Asia, Europe, and the Americas where the pursuit of sensitive yet effective multilingual educational policies remains acute.
