128 civics questions and answers: *A Deeper Sickness* Margaret Peacock, Erik L. Peterson, 2022-03-08 A harrowing chronicle by two leading historians, capturing in real time the events of a year marked by multiple devastations. When we look back at the year 2020, how can we describe what really happened? In *A Deeper Sickness*, award-winning historians Margaret Peacock and Erik Peterson set out to preserve what they call the “focused confusion,” and to probe deeper into what they consider the Four Pandemics that converged around the 12 astonishing months of 2020: • Disease • Disinformation • Poverty • Violence Drs. Peacock and Peterson use their interdisciplinary expertise to extend their analysis beyond the viral science, and instead into the social, political, and historical dimensions of this crisis. They consulted with dozens of experts and witnesses from a wide range of fields—from leading epidemiologists and health care workers to leaders of the Black Lives Matter movement, district attorneys, political scientists, philosophers, and more. Their journey revealed a sick country that believed it was well, a violent nation that believed it was peaceful; one that mistook poverty for prosperity and accountability for rebellion. Organized into the journal-entries along with dozens of archival images, *A Deeper Sickness* will help readers sift through the chaos and misinformation that characterized those frantic days. It is both an unflinching indictment of a nation that is still reeling and a testament to the power of human resilience and collective memory. Readers can share their story and become a contributing author by visiting an interactive digital museum, where the authors have preserved dozens of more stories and interviews. 128 civics questions and answers: Hollywood or History? Starlynn R. Nance, 2022-05-01 Teaching with film is not a new approach in the social studies classroom. Different publications, such as *Hollywood or History*, have bridged the gap with challenges attached to using historical film and engage students through inquiry, not entertainment. To continue with the *Hollywood or History* strategy, this text uses television shows (sitcoms) to bring issue-centered curriculum to middle and high school classrooms. By exploring issues in specific episodes, students can learn the history behind an issue, relate it to their lives, and develop an informed decision associated with the issue. The College, Career, and Civic Life (C3) framework is an integral part to the exploration of

issue-centered curriculum. In each chapter, the students will work through the four dimensions and develop critical thinking, reading, and writing skills. My hope is that this text can play a small role in walking practicing teachers through the C3 framework while allowing students to learn about issues that affect society and the communities where they live.

128 civics questions and answers: *Splintered* Jonathan Butcher, 2022-03-22 The problem with our nation's schools today is not just the low test scores in basic reading and math—which are an obstacle for the economy, not to mention students' futures. The challenge is that K-12 instruction has been hijacked by Critical Theorists who are “skeptical” of representative government and the freedoms we cherish. The debates over the retelling of America's past, on display in local school board meetings as well as conflicts between the New York Times' 1619 Project and President Donald Trump's 1776 Commission, involve not just historical facts, but how Americans define their nation. This battle over our national identity is a cultural battle, involving schools—cultural institutions—and the ideas we all need to share to get along with our neighbors, raise families, and pursue the American Dream. “Jonathan Butcher is one of our sharpest and most insightful analysts writing about education today. The nation owes him a debt of gratitude for work demystifying an obscure academic field, critical race theory, and fearlessly following where it leads when imposed on our public schools: abandoning the cherished belief that education can be a means of uniting our diverse country and replacing it with a pedagogy of grievance and despair.” —Robert Pondiscio, Senior Fellow, American Enterprise Institute and author of *How the Other Half Learns* “Jonathan Butcher's timely book on critical race theory addresses what I have described as the civil rights issue of our times. Too few Americans understand how this dangerous ideology and how it has seeped down into our K-12 educational system. Butcher's book is part of a collective effort to educate the American people about the infiltration and indoctrination of our educational system.” —Dr. Carol M. Swain, a former tenured professor at Vanderbilt and Princeton Universities

128 civics questions and answers: The Politics and Civics of National Service Melissa Bass, 2013-01-03 In 1933 President Franklin D. Roosevelt created America's first domestic national service program: the Civilian Conservation Corps (CCC). As part of this program—the largest and most highly esteemed of its kind—nearly three million unemployed men worked to rehabilitate, protect, and build the nation's natural resources. It demonstrated what citizens and government could accomplish together. Yet despite its success, the CCC was short lived. While more controversial programs such as President Johnson's Volunteers in Service to America (VISTA) and President Clinton's AmeriCorps survived, why did CCC die? And why—given the hard-won continuation and expansion of AmeriCorps—is national service an option for fewer Americans today than at its start nearly eighty years ago? In *The Politics and Civics of National Service*, Melissa Bass focuses on the history, current relevance, and impact of domestic civilian national service. She explains why such service has yet to be deeply institutionalized in the United States; while military and higher education have solidified their roles as American institutions, civilian national service is still not recognized as a long-term policy option. Bass argues that only by examining these programs over time can we understand national service's successes and limitations, both in terms of its political support and its civics lessons. *The Politics and Civics of National Service* furthers our understanding of American political development by comparing programs founded during three distinct political eras—the New Deal, the Great Society, and the early Clinton years—and tracing them over time. To a remarkable extent, the CCC, VISTA, and AmeriCorps reflect the policymaking ethos and political controversies of their times, illuminating principles that hold well beyond the field of national service. By emphasizing these programs' effects on citizenship and civic engagement, *The Politics and Civics of National Ser*
