14 october in history: A History of Eastern Kentucky University William E. Ellis, 2021-10-21 Eastern Kentucky University (EKU) in Richmond, Kentucky, was originally established as a normal school in 1906 in the wake of a landmark education law passed by the Kentucky General Assembly. One hundred years later, the school has evolved into a celebrated multipurpose regional university that is national in scope. The school was built on a campus that had housed Central University, a southern Presbyterian institution. In its early years, ECU grew slowly, buffeted by cyclical economic problems and the interruptions of two world wars. During that time, however, strong leadership from early presidents Ruric Nevel Roark, John Grant Crabbe, and Herman L. Donovan laid the groundwork for later expansions. President Robert. R. Martin oversaw the rapid growth of the institution in the 1960s. He managed an increase in enrollment and he had additional facilities built to house and educate the growing student population. A savvy administrator, he was at the forefront of vocational education and initiated programs in nursing and allied health and in law enforcement education. His successor, J.C. Powell, built on Martin's work and saw ECU mature as a regional university. He reorganized its colleges to better balance the needs of general and technical education students and kept educational programs going despite decreases in state funding. In addition, Powell's years were a magical time for ECU's sports programs, as the Colonels captured national football championships in 1979 and 1982 and finished second in 1980 and 1981. Today, ECU continues to offer students a quality education and strives to meet the diverse needs of its student body. Three Eastern campuses, as well as distance learning programs through the Kentucky Telelinking Network, offer more options to students than ever before as ECU prepares them for the challenges of a new century. In A History of Eastern Kentucky University, William E. Ellis recounts the university's colorful history, from political quandaries surrounding presidential administrations

and financial difficulties during the Great Depression to its maturing as a leading regional university. Interviews with alumni, faculty, staff, and political figures provide a personal side to the history of the school. Reflecting on the social, economic, and cultural changes in the region during the last century, Ellis's examination of the growth and development of ECU is an essential resource for alumni and for those interested in the progression of public higher education in Kentucky and the region.

14 october in history: *A History of New Zealand Women* Barbara Brookes, 2016-02-15 What would a history of New Zealand look like that rejected Thomas Carlyle's definition of history as 'the biography of great men', and focused instead on the experiences of women? One that shifted the angle of vision and examined the stages of this country's development from the points of view of wives, daughters, mothers, grandmothers, sisters, and aunts? That considered their lives as distinct from (though often unwillingly influenced by) those of history's 'great men'? In her ground-breaking *History of New Zealand Women*, Barbara Brookes provides just such a history. This is more than an account of women in New Zealand, from those who arrived on the first waka to the Grammy and Man Booker Prize-winning young women of the current decade. It is a comprehensive history of New Zealand seen through a female lens. Brookes argues that while European men erected the political scaffolding to create a small nation, women created the infrastructure necessary for colonial society to succeed. Concepts of home, marriage and family brought by settler women, and integral to the developing state, transformed the lives of Māori women. The small scale of New Zealand society facilitated rapid change so that, by the twenty-first century, women are no longer defined by family contexts. In her long-awaited book, Barbara Brookes traces the factors that drove that change. Her lively narrative draws on a wide variety of sources to map the importance in women's lives not just of legal and economic changes, but of smaller joys, such as the arrival of a piano from England, or the freedom of riding a bicycle.

14 october in history: *A History of Ironclads* John V. Quarstein, 2007-02-28 One of history's greatest naval engagements, the Battle of Hampton Roads, occurred on March 8 and 9, 1862. On the first morning, the Confederate ironclad the CSS Virginia, formerly known as the Merrimack, sank two Union wooden warships, proving the power of the armored vessels over the traditional sailing ships. The next morning, the Virginia engaged the Union ironclad USS Monitor to a draw in a battle that significantly altered naval warfare. It was the first engagement between ironclads and ushered in a new era of warship construction and ordnance. The 25, 000 sailors, soldiers and civilians who witnessed the battle knew then what history would soon confirm: wars waged on the waters would never be the same. The seemingly invincible Monitor and Virginia were experimental ships, revolutionary combinations of new and old technology, and their clash on March 9, 1862, was the culmination of over 2, 000 years of naval experience. The construction and combat service of ironclads during the Civil War were the first in a cascade of events that influenced the outcome of the war and prompted the development of improved ironclads as well as the creation of new weapons systems, such as torpedoes and submarines, needed to counter modern armored warships.

14 october in history: *A History of Poets' Reception of Mark Twain, 1863-1936* Gary Scharnhorst, 2024-05-15 This collection of poetry about Mark Twain explores a neglected dimension in his critical and popular reception during a period of over seventy years. The three hundred and fifty published ballads, sonnets, limericks, lyrics, couplets, and quatrains, including some in dialect, run the gamut from the banal and piquant to the eloquent, from rhymes by anonymous poetasters to highbrow tributes. Organized chronologically by topic, the sections also indicate the frequency with which the poems were reprinted and the venues in which they appeared. Though they were pitched to entertain general readers, this gathering should also prove useful to teachers and scholars of American literature. In all, they trace the crests in Twain's fame and contemporary popular

reputation over the decades and silhouette his pervasive presence in literary circles around the world during the late-nineteenth and early-twentieth centuries.

14 october in history: A History of Army Communications and Electronics at Fort Monmouth, New Jersey, 1917-2007 , 2008 A History of Army Communications and Electronics at Fort Monmouth, New Jersey, 1917-2007 chronicles ninety years of communications-electronics achievements carried out by the scientists, engineers, logisticians and support staff at Fort Monmouth, NJ. Special sections of the book are devoted to ground breaking achievements in Famous Firsts, as well as Celebrity Notes, a rundown on the notable and notorious figures in Fort Monmouth history. The book also includes information on commanding officers, tenants and post landmarks.

14 october in history: *A History of Southland College* Thomas Kennedy, 2009-11-01 In 1864 Alida and Calvin Clark, two abolitionist members of the Religious Society of Friends from Indiana, went on a mission trip to Helena, Arkansas. The Clarks had come to render temporary relief to displaced war orphans but instead found a lifelong calling. During their time in Arkansas, they started the school that became Southland College, which was the first institution of higher education for blacks west of the Mississippi, and they set up the first predominately black monthly meeting of the Religious Society of Friends in North America. Their progressive racial vision was continued by a succession of midwestern Quakers willing to endure the primitive conditions and social isolation of their work and to overcome the persistent challenges of economic adversity, social strife, and natural disaster. Southland's survival through six difficult and sometimes dangerous decades reflects both the continuing missionary zeal of the Clarks and their successors as well as the dedication of the black Arkansans who sought dignity and hope at a time when these were rare commodities for African Americans in Arkansas.

14 october in history: Critical History Of Financial Crises, A: Why Would Politicians And Regulators Spoil Financial Giants? Haim Kedar-levy, 2015-11-26 We are pleased to announce that A Critical History of Financial Crises has been included in CHOICE Magazine's Outstanding Academic Title list. Only the most outstanding works have been selected for their excellence in scholarship and presentation, the significance of their contribution to the field, and their value as important — often the first — treatment of their subject. For more information on CHOICE Magazine's Outstanding Academic Title list, please visit the following link:

www.choice360.org/products/magazine/remove 'While each financial crisis is unique and has its own special features, there are a lot of similarities in the dynamics leading to a crisis and also in their resolutions. Some of the financial crises are caused by the lack of appropriate regulation, but often the regulators were ignoring the signals of imminent crises, while serving implicitly or explicitly, the financial industry. In his book, Prof. Kedar-Levy is providing a fresh look at many famous financial crises around the globe, analysing their causes and effects. The special role of regulators is highlighted, including the 'Capture Theory' in practice. This book is suitable for economist as well as for those interested in economic history, and for all those concerned with the stability of current international financial markets.' 14 october in history: History Of Australia (Volumes 3 & 4) Manning Clark, 1999-09-13 Manning Clark's six-volume history is one of the masterpieces of Australian writing. It is also one of the most passionately debated visions of Australian history, in which the struggle to realise an Australian nation is played out on an epic scale. A History of Australia: 1824-1888, takes the story of Australia through the momentous discovery of gold and the separation of Victoria from New South Wales, to the centenary of the coming of European civilisation to Australia on 26 January 1888. The story is one of destruction as well as construction-the destruction of the Aborigines and the construction of an essentially English bourgeois society and the taming of an alien and seemingly sterile land. This is not a general Australian history-it does not attempt to cover all aspects-and it is

not a definitive or quantitative analysis. It is a work of art, a living and breathing account of the remaking of a primitive continent, history come alive.

14 october in history: Victorian Labour History John Host, 2002-11-01 First Published in 2004. In Victorian Labour History: Experience, Identity and the Politics of Representation, John Host addresses liberal, Marxist and postmodernist historiography on Victorian working people to question the special status of historical knowledge. The central focus of this study is a debate about mid-Victorian social stability, a condition conventionally equated with popular acceptance of the social order. Host does not join the debate but takes it as his object of analysis, deconstructing the notion of stability and the analyses that purport to explain it. In particular, he takes issue with historical evidence, noting the different possibilities for meaning that it allows and the speculative character of the narratives to which it is adduced. Host examines an extensive range of archival material to illustrate the ambiguity of the historical field, the rhetorical strategies through which the illusion of its unity is created, and the ultimately fictive quality of historical narrative. He then explores the political contingency of the works he addresses and the political consequences of representing them as true.

14 october in history: The History of a Modern Millennial Movement Jane Shaw, Philip Lockley, 2017-05-30 A feverish expectation of the end of the world seems an unlikely

accompaniment to middle-class respectability. But it was precisely her interest in millennial thinking that led Jane Shaw to a group of genteel terraced townhouses in the English county town of Bedford. Inside their unassuming grey-brick exteriors Shaw found something extraordinary. For here, within the 'Ark', lived two members of the Panacea Society, last survivors of the remaining Southcottian prophetic communities in Britain. And these individuals were the heirs to a rich archive charting not just their own apocalyptic sect, but also the histories of the many groups and their leaders who from the early nineteenth century onwards had followed the beliefs of the self-styled prophetess and prospective mother of the Messiah ('Shiloh'), Joanna Southcott, who died in 1814. Placing its subjects in a global context, this is the first book to explore the religious thinking of all the Southcottians. It reveals a transnational movement with striking and innovative ideas: not just about prophecy and the coming apocalypse, but also about politics, gender, class and authority. The volume will sell to scholars and students of religion and cultural studies as well as social history.
