1950s science fiction books: The Golden Age of Science Fiction John Wade, 2020-11-12 A detailed look at the British world of science fiction in the 1950s. John Wade grew up in the 1950s, a decade that has since been dubbed the golden age of science fiction. It was a wonderful decade for the genre, but not so great for young fans. With early television broadcasts being advertised for the first time as unsuitable for children and the inescapable barrier of the X certificate in the cinema barring anyone under the age of sixteen, the author had only the radio to fall back on—and that turned out to be more fertile for the budding SF fan than might otherwise have been thought. Which is probably why, as he grew older, rediscovering those old TV broadcasts and films that had been out of bounds when he was a kid took on a lure that soon became an obsession. For him, the super-accuracy and amazing technical quality of today's science fiction films pale into insignificance beside the radio, early TV and B-picture films about people who built rockets in their back gardens and flew them to lost planets, or tales of aliens who wanted to take over, if not our entire world, then at least our bodies. This book is a personal account of John Wade's fascination with the genre across all the entertainment media in which it appeared—the sort of stuff he reveled in as a young boy—and still enjoys today. Not only a well-researched book grounded in hundreds of sources, but also an unmistakable labor of love. —New York Journal of Books

1950s science fiction books: Voyages in Time and Space Noe Torres, H. Beam Piper, Philip K. Dick, Frederik Pohl, Robert Sheckley, 2014-03-06 Noe Torres, author of *Aliens in the Forest* and *The Real Cowboys & Aliens*, has selected eight of his favorite science fiction stories from the 1950s for this outstanding collection. Included are tales that capture the essence of the 1950s, including masterpieces by Clifford D. Simak, Frederik Pohl, H. Beam Piper, Philip K. Dick, Murray Leinster, and Fritz Lieber. The impact and reach of these stories has been extensive, as all of them were adapted into radio dramas for the outstanding 1950s series “X Minus One,” which is still treasured by many today. The included stories also influenced many later literary and film ventures. For instance, Pohl's story “Tunnel Under the World” is about a character who keeps re-living the same day over and over, similar to the dilemma faced by Phil Connors in the 1993 motion picture *Groundhog Day*. Others of these stories had an obvious influence on television shows such as *Star Trek*, *Lost in Space*, and *Twilight Zone*.

1950s science fiction books: 1950s Science Fiction Films and 9/11 Melvin E. Matthews, 2007 1950s Cold War-era monsters meet 21st century terrorists: this exploration of sci-fi movies examines the similarities and differences between the political environment and popular culture of two eras. This examination and appreciation of 1950s science fiction films includes behind-the-scenes tales about their production and many quotes from those who produced and starred in the films. The author draws parallels between the Cold War fears of the 1950s and 60s and the constant terrorism alerts of the September 11th era, exploring how the politics and the psychological climate of the times influences and is reflected in this vehicle of popular culture. This book is the first of its kind, studying the pop culture genre in the wake of the September 11th tragedy. It shows that, whatever the era and whatever the challenges and crises confronting America, many entertainment themes remain the same, reflecting their respective times and the relevant issues. For instance, Godzilla, the only Fifties-era monster to remain a movie star beyond that era, could be fashioned to reflect whatever issues dominate the times, be they nuclear war in the Fifties when Godzilla originated to a Seventies Godzilla film about environmental pollution. Conceivably a Godzilla for the age of terrorism is possible. Them! the 1954 atomic mutation classic, is the spiritual ancestor of the 2002 film *Eight Legged Freaks*. The alien invaders of the Fifties signified a Russian invasion of America, while other films of the genre, such as *Invaders from Mars*, depicted aliens utilizing mind control to manipulate humans to commit acts of sabotage, signifying Communist enslavement. If such a film were made now, such invaders could be seen as terrorist masterminds using human slaves to commit terrorist acts. Finally, several Fifties films depicted the

end of the world at a time when Americans expected a nuclear war with Russia. The immediate pre-September 11th era witnessed films presenting galactic threats to mankind's existence (Independence Day, Deep Impact, Armageddon), while the early 2000s witnessed the popularity of the Left Behind Christian films dramatizing the Tribulation period in the Book of Revelation.

1950s science fiction books: *The Rise and Fall of American Science Fiction, from the 1920s to the 1960s* Gary Westfahl, 2019-10-04 By examining important aspects of science fiction in the twentieth century, this book explains how the genre evolved to its current state. Close critical attention is given to topics including the art that has accompanied science fiction, the subgenres of space opera and hard science fiction, the rise of SF anthologies, and the burgeoning impact of the marketplace on authors. Included are in-depth studies of key texts that contributed to science fiction's growth, including Philip Francis Nowlan's first Buck Rogers story, the first published stories of A. E. van Vogt, and the early juveniles of Isaac Asimov, Arthur C. Clarke and Robert Heinlein.

1950s science fiction books: *Invasions USA* Michael Bliss, 2014-07-30 Out of more than 180 science fiction films produced in the United States between 1950 and 1959, twenty were concerned with the notion of an invasion. Of these, a select number used the invasions as metaphors of issues that were of importance to America at the time, such as assaults upon individuality and marriage and debates about the supremacy of the human race. The invasion may be real (The Day the Earth Stood Still and War of the Worlds), dreamed (Invaders from Mars), or the result of a mental breakdown, as seems to be the case in Invasion of the Body Snatchers. Real or not, all of these massive disturbances to the status quo convey the same anxiety: In the 1950s, many Americans felt that things in their world weren't quite right, and this sense of unease was expressed in the country's art, notably these films. In *Invasions USA: The Essential Science Fiction Films of the 1950s*, Michael Bliss examines movies that stripped away the veneer of normality during a decade often portrayed as the last innocent period in American history. From a boy's nightmares about his alien-controlled parents and a young woman's fears that her fiancé has been replaced by an emotionless alien to an extraterrestrial visitor who comes to warn mankind about its self-destructive ways, the stories of these films offer a variety of messages, both subtle and overt. With detailed discussions and analyses of the films in question, this book examines a unique group of movies with profound messages. By exploring depictions of insecurities—whether personal or political—Bliss shows how science fiction films spoke to American audiences deeply troubled by their circumstances. *Invasions USA* will appeal to science fiction buffs and film aficionados interested in this significant phenomenon in movie and cultural history.

1950s science fiction books: The Eternal Future of the 1950s Dennis R. Cutchins, Dennis R. Perry, 2023-07-17 Science fiction cinema, once relegated to the undervalued B movie slot, has become one of the dominant film genres of the 21st century, with Hollywood alone producing more than 400 science fiction films annually. Many of these owe a great deal of their success to the films of one defining decade: the 1950s. Essays in this book explore how classic '50s science fiction films have been recycled, repurposed, and reused in the decades since their release. Tropes from Don Siegel's *Invasion of the Body Snatchers* (1956), for instance, have found surprising new life in Netflix's wildly popular *Stranger Things*. *Interstellar* (2014) and *Arrival* (2016) have clear, though indirect roots in the iconic 1950s science fictions films *Rocketship X-M* (1950) and *The Day the Earth Stood Still* (1951), and *The Shape of Water* (2017) openly recalls and reworks the major premises of *The Creature From the Black Lagoon* (1954).
