nearly a decade, Pulitzer Prize–winning critic Justin Davidson has explained the ever-changing city of New York to his readers at New York magazine, introducing new buildings, interviewing architects, tracking the way the transforming urban landscape shapes who New Yorkers are. Now, his extensive, inspiring knowledge will be available to a wide audience. An insider's guide to the architecture and planning of New York that includes maps, photographs, and original insights from the men and women who built the city and lived in it—its designers, visionaries, artists, writers—Magnetic City offers first-time visitors and lifelong residents a new way to see New York. Includes walking tours throughout Manhattan, Brooklyn, and the Bronx • the Financial District • the World Trade Center • the Seaport and the Brooklyn waterfront • Chelsea and the High Line • 42nd Street • the Upper West Side • the South Bronx and Sugar Hill Praise for Magnetic City "An intimate, seductive guidebook."—The New York Times "An enthralling new book makes clear that I'm not alone in my home-town infatuation . . . lends nuance, texture and historical perspective to my impression that New York City has never been so appealing or life-affirming as it is today."—New York Post "[Davidson] combines a keen intelligence, experience, observational skills, expertise (especially but not solely architectural), and an elegant writing style to make this beautifully produced book indispensable."—Booklist (starred review) "A street-level celebration of New York City in all 'its perpetual complexity and contradiction' . . . a worthy companion to Alfred Kazin's A Walker in the City and the American Institute of Architects guides to the architecture of New York as well as a treat for fans of the metropolis."—Kirkus Reviews (starred review) "Justin Davidson does more than direct our feet to New York's hidden monuments. He explains the structure of the city with a clarity that would be bracing even for a Gotham habitué, but more than that, he finds the meaning in every building and byway."—Andrew Solomon, National Book Award-winning author of Far from the Tree "Mr. Davidson's exceptional knowledge of our beloved city is inspiring. Magnetic City is now my official chaperone."—Patti LuPone "Justin Davidson has a mind alive to every signal, and his brilliant prose style transmits that electricity in black-and-white type. He is thus born to the task of capturing the chaotic splendor of New York City on the page."—Alex Ross, author of Listen to This "Justin Davidson's beautiful tours of New York City invoke and redouble our love of the metropolis."—Jerry Saltz, senior art critic, New York

160 water street financial district: *Crossing Continents* Duncan Campbell-Smith, 2021-05-13 For almost a hundred years from the 1860s, the City of London's overseas banks financed the global trade that lay at the core of the British Empire. Foremost among them from the beginning were two start-up ventures: the Standard Bank of South Africa, which soon developed a powerful domestic franchise at the Cape, and the Chartered Bank of India, Australia and China. This book traces their stories in the nineteenth century, their glory days before 1914 - and their remarkable survival in the face of global wars and the collapse of world trade in the first half of the twentieth century. The unravelling of the Empire after 1945 eventually forced Britain's overseas banks to confront a different future. The Standard and the Chartered, alarmed at the expansion of American banking, determined in 1969 on a merger as a way of sustaining the best of the City's overseas traditions. But from the start, Standard Chartered had to grapple with the fading fortunes of its own inherited franchise - badly dented in both Asia and Africa - and with radical changes in the nature of banking. Its British managers, steeped in the past, proved ill-suited to the challenge. By the late 1980s, efforts to expand in Europe and the USA had brought the merged Group to the brink of collapse. Yet it

survived - and then pulled off a dramatic recovery. Standard Chartered realigned itself, just in time, with the phenomenal growth of Asia's 'emerging markets', many of them in countries where the Chartered had flourished a century earlier. In the process, the Group was transformed. Trebling its workforce, it brushed aside the global financial crisis of 2008 and by 2012 could look back on a decade of astonishing growth. Recent times have added an eventful postscript to a long and absorbing history. Crossing Continents recounts Standard Chartered's story with a wealth of detail from one of the richest archives available to any commercial bank. The book also affords a rare and compelling perspective on the evolution of international trade and finance, showing how Britain's commercial influence has actually worked in practice around the world over one hundred and fifty years.
