1970s quiz questions and answers: *'Everyday health', embodiment, and selfhood since 1950* Tracey Loughran, Hannah Froom, Kate Mahoney, Daisy Payling, 2024-10-22 What is the history of 'everyday health' in the postwar world, and where might we find it? This volume moves away from top-down histories of health and medicine that focus on states, medical professionals, and other experts. Instead, it centres the day-to-day lives of people in diverse contexts from 1950 to the present. The volume foregrounds methodologies for writing bottom-up histories of health, subjectivity, and embodiment, offering insights applicable to scholars of times and places beyond those represented in the case studies presented here. 1970s quiz questions and answers: The Amateur Hour Jonathan Zimmerman, 2020-10-27
The first full-length history of college teaching in the United States from the nineteenth century to the present, this book sheds new light on the ongoing tension between the modern scholarly ideal—scientific, objective, and dispassionate—and the inevitably subjective nature of day-to-day instruction. American college teaching is in crisis, or so we are told. But we've heard that complaint for the past 150 years, as critics have denounced the poor quality of instruction in undergraduate classrooms. Students daydream in gigantic lecture halls while a professor drones on, or they meet with a teaching assistant for an hour of aimless discussion. The modern university does not reward teaching, so faculty members at every level neglect it in favor of research and publication. In the first book-length history of American college teaching, Jonathan Zimmerman confirms but also contradicts these perennial complaints. Drawing upon a wide range of previously unexamined sources, *The Amateur Hour* shows how generations of undergraduates indicted the weak instruction they received. But Zimmerman also chronicles institutional efforts to improve it, especially by making teaching more personal. As higher education grew into a gigantic industry, he writes, American colleges and universities introduced small-group activities and other reforms designed to counter the anonymity of mass instruction. They also experimented with new technologies like television and computers, which promised to personalize teaching by tailoring it to the individual interests and abilities of each student. But, Zimmerman reveals, the emphasis on the personal inhibited the professionalization of college teaching, which remains, ultimately, an amateur enterprise. The more that Americans treated teaching as a highly personal endeavor, dependent on the idiosyncrasies of the instructor, the less they could develop shared standards for it. Nor have they rigorously documented college instruction, a highly public activity which has taken place mostly in private. Pushing open the classroom door, *The Amateur Hour* illuminates American college teaching and frames a fresh case for restoring intimate learning communities, especially for America's least privileged students. Anyone who wants to change college teaching will have to start here.

1970s quiz questions and answers: On Becoming an Artist Ellen J. Langer, 2007-12-18 "All it takes to become an artist is to start doing art." -from On Becoming an Artist On Becoming an Artist is loaded with good news. Backed by her landmark scientific work on mindfulness and artistic nature, bestselling author and Harvard psychologist Ellen J. Langer shows us that creativity is not a rare gift that only some special few are born with, but rather an integral part of everyone's makeup. All of us can express our creative impulses- authentically and uniquely-and, in the process, enrich our lives. Why then do so many of us merely dream of someday painting, someday writing, someday making music? Why do we think the same old thoughts, harbor the same old prejudices, stay stuck in the same old mud? Who taught us to think "inside the box"? No one is more qualified to answer these questions than Dr. Langer, who has explored their every facet for years. She describes dozens of fascinating experiments-her own and those of her colleagues-that are designed to study mindfulness and its relation to human creativity, and she shares the profound implications of the results-for our well-being, health, and happiness. Langer reveals myriad insights, among them: We think we should already know what only firsthand experience can teach us. . . . In learning the ways that all roses are alike, we risk becoming blind to their differences. . . . If we are mindfully creative, the circumstances of the moment will tell us what to do. . . . Those of us who are less evaluatively inclined experience less guilt, less regret, less blame, and tend to like ourselves more. . . . Uncertainty gives us the freedom to discover meaning. . . . Finally, what we think we're sure of may not even exist. With the skill of a gifted logician, Langer demonstrates exactly how we undervalue ourselves and undermine our creativity. By example, she persuades us to have faith in our creative works, not because someone else approves of them but because they're a true expression of ourselves. Her high-spirited, challenging book sparkles with wit and intelligence and inspires in us an infectious enthusiasm for our creations, our world, and ourselves. It can be of lifelong value to everyone who reads it.
