1924 french diet secret: Lustful Appetites Rachel Hope Cleves, 2024-11-18 We take the edible trappings of flirtation for granted: chocolate covered strawberries and romance, oysters on the half shell and desire, the eggplant emoji and a suggestive wink. But why does it feel so natural for us to link food and sexual pleasure? Rachel Hope Cleves explores the long association between indulging in good food and an appetite for naughty sex, from the development of the Parisian restaurant as a place for men to meet with prostitutes and mistresses, to the role of sexual outlaws like bohemians, new women, lesbians and gay men in creating epicurean culture in Britain and the United States. Taking readers on a gastronomic journey from Paris and London to New York, Chicago and San Francisco, *Lustful Appetites* reveals how this preoccupation changed the ways we eat and the ways we are intimate—while also creating stigmas that persist well into our own twenty-first century.

1924 french diet secret: Russo-Japanese Relations, 1905-17 Peter Berton, 2013-06-17 One surprising outcome of the Russo-Japanese War of 1904-1905 was that, although Russia was humiliatingly defeated, by 1916 Russia and Japan had become allies. This book provides a detailed analysis of how this remarkable turnaround came about. It traces the evolution of relations between the two powers through the conclusion of three public and secret agreements in 1907, 1910, and 1912, and the controversial secret alliance of 1916. The book argues that careful examination of complete records of negotiations from both sides definitively proves the case for Germany, not the United States, as the target of the secret treaty. Based on meticulous examination of documents in both Russian and Japanese foreign policy archives, it charts diplomatic developments, explores how Japanese and Russian thinking evolved, and assesses the wider international impact of the new alliance.

1924 french diet secret: France and Germany in the South China Sea, c. 1840-1930 Bert Becker, 2021-07-02 This book explores imperial power and the transnational encounters of shipowners and merchants in the South China Sea from 1840 to 1930. With British Hong Kong and French Indochina on its northern and western shores, the 'Asian Mediterranean' was for almost a century a crucible of power and an axis of economic struggle for coastal shipping companies from various nations. Merchant steamers shipped cargoes and passengers between ports of the region. Hong Kong, the global port city, and the colonial ports of Saigon and Haiphong developed into major hubs for the flow of goods and people, while Guangzhouwan survived as an almost forgotten outpost of Indochina. While previous research in this field has largely remained within the confines of colonial history, this book uses the examples of French and German companies operating in the South China Sea to demonstrate the extent to which transnational actors and business networks interacted with imperial power and the process of globalisation.
