1st grade teacher job description: The Changing Nature of Instructional Leadership in the 21st Century Alan R. Shoho, Bruce G. Barnett, Autumn K. Tooms, 2012-12-01 This third book in the Information Age book series, International Research on School Leadership, focuses on the changing nature of instructional leadership in the 21st century. Our goal is to examine instructional leadership from multiple educational and international perspectives. Unlike many leadership books that focus on conceptualizations and personal narratives, the seven chapters provide empirical evidence of how instructional leadership is evolving in the 21st century. From the effective schools research of the 1980s to today's relentless calls for improved student performance, attention has focused on the instructional leadership roles and responsibilities of school principals, headteachers, and educational system leaders. The emphasis on student performance has gone global as evidenced by highly-publicized international studies, such as the Trends in International Math and Science Studies (TIMSS) and the Program for International Student Assessment (PISA), comparing student achievement in different countries. These developments have had substantial effects on school leaders, especially building-level principals and headteachers. Rather than being the only ones overseeing school improvement aimed at increasing student learning, many school administrators are distributing leadership responsibilities to other administrators and teachers on their campuses. To fully understand instructional leadership in the 21st century, the book examines three important dimensions of instructional leadership: (1) the current context for turning around low-performing schools, increasing teacher effectiveness, and providing equitable outcomes for all students, (2) international perspectives of instructional leadership development, particularly the value of teacher coaching and leadership development for aspiring and practicing school leaders in a developing country, and (3) the obstacles instructional leaders confront as they deal with fiscal constraints, political pressure, diverse student populations, and high-stakes standards-based reforms.

1st grade teacher job description: **Policies for Diversity in Education** Tony Booth, Mary Masterson, Patricia Potts, Will Swann, 2013-09-27 The emphasis in this book shifts to the coordination of practice into schools, regional and national policies and the power and interest groups concerned with educational difficulties and disability. In the opening section the authors review the location of power in the systems; the impact of Local Management of Schools, case studies of Union policy, the National Curriculum Council and voluntary societies. They then look at one threatened element of the power structure - the local education authorities. They examine the features of local authority policy and attempt to systematise local policy. The experience of families is examined in their relationships with professionals, particularly during the preparation of Statements of Special Educational Need. This is followed by sections on services for under-fives, integrating education and the authors provide examples of changing school policies and the

practices that have arisen from them; supporting the learning of all pupils in primary and secondary schools, changing the role of special schools, ensuring that girls and boys are provided with equal opportunities, writing a development plan and the experience of a teacher with a disability. They then examine policies and practices in education after school and finish with theories of integration and disability.
