1987 science fiction movies: Gender in Science Fiction Films, 1964-1979 Bonnie Noonan, 2015-06-08 The 1950s era of science fiction film effectively ended when space flight became a reality with the first manned orbit of Earth in 1962. As the genre's wildly speculative depictions of science and technology gave way to more reality-based representations, relations between male and female characters reflected the changing political and social climates of the era. Drawing on critical analyses, film reviews and cultural commentaries, this book examines the development of science fiction film and its representations of gender, from the groundbreaking films of 1968--including *2001: A Space Odyssey*, *Barbarella* and *Planet of the Apes*--through its often overlooked Middle Period, which includes such films as *Colossus: The Forbin Project* (1970), *The Stepford Wives* (1975) and *A Boy and His Dog* (1975). The author examines intersections of gender and race in *The Omega Man* (1971) and *Frogs* (1972), gender and dystopia in *Soylent Green* (1973) and *Logan's Run* (1976), and gender and computers in *Demon Seed* (1977). The big-budget films of the late 1970s--*Close Encounters of the Third Kind*, *Alien* and *Star Wars*--are also discussed.

1987 science fiction movies: Film and the Nuclear Age Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war, until quite recently, scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo. Films that feature nuclear issues most often simplify and trivialize the subject. They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability. The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear, such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s. By their very numbers, and through a set of recurring stylistic and narrative conventions, nuclear films reflect a deep-seated cultural anxiety. This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs, nuclear testing and the fear of fallout, nuclear power, the Cold War arms race, loose nukes, and future nuclear war and its aftermath. (Includes bibliographic references, index, filmography, chronology; Illustrated)

1987 science fiction movies: Horror and Science Fiction Cinema and Society Martin Harris, 2024-09-02 Examining how horror and science fiction films from the 1950s to the present invent and explore fictional "us-versus-them" scenarios, this book analyzes the different ways such films employ allegory and/or satire to interrogate the causes and consequences of increasing polarization in American politics and society. Starting with the killer ants film with an

anti-communist subtext *Them!* (1954) and concluding with Jordan Peele's social horror film with revenge-seeking homicidal doppelgängers *Us* (2019), Martin Harris highlights social and political contexts, contemporary reviews and responses, and retrospective evaluations to show how American horror and science fiction films reflect and respond to contemporary conflicts marking various periods in U.S. history from post-WWII to the present, including those concerning race, gender, class, faith, political ideology, national identity, and other elements of American society. *Horror and Science Fiction Cinema and Society* draws upon cinematic sociology to provide a resourceful approach to American horror and science fiction films that integrates discussion of plot construction and character development with analyses of the thematic uses of conflict, guiding readers' understanding of how filmmakers create otherworldly confrontations to deliver real-world social and political commentary.

1987 science fiction movies: *Fantasy Femmes of Sixties Cinema* Tom Lisanti, 2015-05-20 Elvis Presley musicals, beach romps, biker flicks, and alienated youth movies were some of the most popular types of drive-in films during the sixties. The actresses interviewed for this book (including Celeste Yarnall, Lana Wood, Linda Harrison, Pamela Tiffin, Deanna Lund, Diane McBain, Judy Pace, and Chris Noel) all made their mark in these genres. These fantastic femmes could be found either twisting on the shores of Malibu, careening down the highway on a chopper, being serenaded by Elvis, or taking on the establishment as hip coeds. As cult figures, they contributed greatly to that period of filmmaking aimed at the teenage audience who frequented the drive-ins of America. They frolicked, screamed, and danced their way into B-movie history in such diverse films as *Eve*, *Teenage Millionaire*, *The Girls on the Beach*, *Dr. Goldfoot and the Bikini Machine*, *Three in the Attic*, *Wild in the Streets*, and *Paradise, Hawaiian Style*. This book is a celebration of the actresses' careers. They have for the most part been overlooked in other publications documenting the history of film. *Fantasy Femmes* addresses their film and television careers, focusing on their view of the above genres, their candid comments and anecdotes about their films, the people they worked with, and their feelings in general regarding their lives and the choices they made. The book is well illuminated and contains a complete list of film and television credits.

1987 science fiction movies: *Watching the World Die* Mike Bogue, 2023-10-23 During the 1980s, popular fear of World War III spurred moviemakers to produce dozens of nuclear threat films. Categories ranged from monster movies to post-apocalyptic adventures to realistic depictions of nuclear war and its immediate aftermath. Coverage of atomic angst films isn't new, but this is the first book to solely analyze 1980s nuclear threat movies as a group. Entries range from classics such as *The Day After* and *WarGames* to obscurities such as *Desert Warrior* and *Massive Retaliation*. Chronological coverage of the 121 films released between 1980 and 1990 includes production details, chapter notes, and critical commentaries.

1987 science fiction movies: *Atomic Narratives and American Youth* Michael Scheibach, 2015-09-17 Following the atomic bombings of Hiroshima and Nagasaki, numerous atomic narratives--books, newspapers, magazines, textbooks, movies, and television programs--addressed the implications of the bomb. Post-World War II youth encountered atomic narratives in their daily lives at school, at home and in their communities, and were profoundly affected by what they read and saw. This multidisciplinary study examines the exposure of American youth to atomic narratives during the ten years following World War II. In addition, it examines the broader social narrative of the atom, which included educational, social, cultural, and political activities that surrounded and involved American youth. The activities ranged from school and community programs to movies and television shows to government-sponsored traveling exhibits on atomic energy. The book also presents numerous examples of writings by postwar adolescents, who clearly expressed their conflicted feelings about growing up in such a tumultuous time, and shows how many of the issues commonly associated with the sixties generation, such as peace, fellowship, free expression, and environmental concern, can be traced to this earlier generation.

1987 science fiction movies: *Children Beware!* Filipa Antunes, 2020-02-07 How does a culture respond when the limits of childhood become uncertain? The emergence of pre-adolescence in the 1980s, which is signified by the new PG-13 rating for film, disrupted the established boundaries between childhood and adulthood. The concept of pre-adolescence affected not only America's pillar ideals of family and childhood innocence but also the very foundation of the horror genre's identity, its association with maturity and exclusivity. Cultural disputes over the limits of childhood and horror were explicitly articulated in the children's horror trend (1980-1997), a cluster of child-oriented horror titles in film and other media, which included *Gremlins*, *The Gate*, the *Goosebumps* series, and others. As the first serious analysis of the children's horror trend, with a focus on the significance of ratings, this book provides a complete chart of its development while presenting it as a document of American culture's adaptation to pre-adolescence. Each important

children's horror title corresponds to a key moment of ideological negotiation, cultural power struggles, and industrial compromise.
