ben davis university adult education: Usage-Based Studies in Modern Hebrew Ruth A. Berman, 2020-03-18 The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics, typology, and Semitic studies. Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language, the bulk of the book is devoted to usage-based studies of the morphology, lexicon, and syntax of current Hebrew. Based primarily on original analyses of authentic spoken and online materials, these studies reflect varied theoretical frames-of-reference that are largely model-neutral in approach. To this end, the book presents a functionally motivated, dynamic approach to actual usage, rather than providing strictly structuralist or formal

characterizations of particular linguistic systems. Such a perspective is particularly important in the case of a language undergoing accelerated processes of change, in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated, literate but non-expert speaker-writers of current Hebrew is constantly on the rise.

ben davis university adult education: Outside Literary Studies Andy Hines, 2022-05-13 A timely reconsideration of the history of the profession, *Outside Literary Studies* investigates how midcentury Black writers built a critical practice tuned to the struggle against racism and colonialism. This striking contribution to Black literary studies examines the practices of Black writers in the mid-twentieth century to revise our understanding of the institutionalization of literary studies in America. Andy Hines uncovers a vibrant history of interpretive resistance to university-based New Criticism by Black writers of the American left. These include well-known figures such as Langston Hughes and Lorraine Hansberry as well as still underappreciated writers like Melvin B. Tolson and Doxey Wilkerson. In their critical practice, these and other Black writers levied their critique from "outside" venues: behind the closed doors of the Senate Permanent Subcommittee on Investigations, in the classroom at a communist labor school under FBI surveillance, and in a host of journals. From these vantages, Black writers not only called out the racist assumptions of the New Criticism, but also defined Black literary and interpretive practices to support communist and other radical world-making efforts in the mid-twentieth century. Hines's book thus offers a number of urgent contributions to literary studies: it spotlights a canon of Black literary texts that belong to an important era of anti-racist struggle, and it fills in the pre-history of the rise of Black studies and of ongoing Black dissent against the neoliberal university.

ben davis university adult education: The Cultural Front Michael Denning, 1998 As garment workers, longshoremen, autoworkers, sharecroppers and clerks took to the streets, striking and organizing unions in the midst of the Depression, artists, writers and filmmakers joined the insurgent social movement by creating a cultural front. Disney cartoonists walked picket lines, and Billie Holiday sang 'Strange Fruit' at the left-wing cabaret, Café Society. Duke Ellington produced a radical musical, *Jump for Joy*, New York garment workers staged the legendary Broadway revue *Pins and Needles*, and Orson Welles and his Mercury players took their labor operas and anti-fascist Shakespeare to Hollywood and made *Citizen Kane*. A major reassessment of US cultural history, *The Cultural Front* is a vivid mural of this extraordinary upheaval which reshaped American culture in the twentieth century.

ben davis university adult education: From Antarctica to Outer Space Albert A. Harrison, Yvonne A. Clearwater, Christopher P. McKay, 2012-12-06 From Antarctica to Outer Space: Life in Isolation and Confinement aims to revitalize and encourage behavioral research in spaceflight as well as in polar and comparable settings. It comprises a broad collection of papers that evolved from presentations at a three day conference entitled The Human Experience in Antarctica: Applications to Life in Space (The Sunnyvale Conference). This conference was co-sponsored by the Division of Polar Programs of the National Science Foundation and the National Aeronautics and Space Administration and held in 1987. The book provides, through firsthand accounts and research reviews, an introduction to the human facet in isolated and confined environments such as Antarctica, outer space, submarines, and remote national parks. The book discusses some of the theoretical issues underlying research on isolated and confined people, thus demonstrating the applicability of certain general theories of behavior. It also focuses on basic psychological and social responses to isolation and confinement. Studies whose primary purpose is to explore the effects of selection, training, and environmental design on human behavior and mission outcomes are discussed.

ben davis university adult education: Continuing Education and Training Stephen Richard Billett, Anthony Leow, Anh Hai Le, 2024-06-10 This book elaborates on the project of continuing education and training (CET), its purposes, practices and prospects for future models and approaches. As such, it also seeks to elaborate the needs for a means by which this important educational sector can achieve its goals both now, and in the near future. Often seen as a supplementary or additional educational sector, CET is gaining increased relevance and importance given the need for individuals to remain employable across lengthening working lives, enterprises needing to maintain their viability and nation states requiring skilled workforces to deliver the goods and services they require. Drawing upon an extensive review of literature and grounded in a national multi-phased investigation of how CET is currently provided, might be enhanced and envisaged for the future, this book provides both clear premises for proceeding with this important educational sector in an era of growing concerns about the currency of workforce capacities, and sustaining employability across lengthening working lives. It also provides advice on how its goals can be achieved drawing upon evidence from this investigation, and associated literature from the broader field.

ben davis university adult education: Continuing Professional Development Andrew L. Friedman, 2013-03-01 Continuing Professional Development (CPD) is the means by which the professions across the world ensure that their knowledge and skills remain up to date and relevant to changing needs and environments. CPD significantly contributes to the quality and reputation of the professions and therefore to the quality of national and international social life and economic well being. Starting with a discussion on what CPD is, the author analyzes how professional bodies govern CPD, what support they provide to individual professionals and how they measure or evaluate what individuals do under the provenance of CPD. Continuing Professional Development explains why, up to now, CPD has been a relatively neglected subject in spite of it being carried out by millions. It argues whether a variety of perspectives or visions of CPD has held back wider public appreciation of it and if greater co-ordination by professional bodies, or the introduction of new players to the field, will change this in the future. Providing the first comprehensive study of the subject, this innovative book will be required reading for CPD professionals and researchers and is a fascinating read for all professionals, especially those involved with human resource development and management / leadership development.
