ben franklin quotes education: *The Quote Verifier* Ralph Keyes, 2007-04-01 Our language is full of hundreds of quotations that are often cited but seldom confirmed. Ralph Keyes's *The Quote Verifier* considers not only classic misquotes such as Nice guys finish last, and Play it again, Sam, but more surprising ones such as Ain't I a woman? and Golf is a good walk spoiled, as well as the origins of popular sayings such as The opera ain't over till the fat lady sings, No one washes a rented car, and Make my day. Keyes's in-depth research routinely confounds widespread assumptions about who said what, where, and when. Organized in easy-to-access dictionary form, *The Quote Verifier* also contains special sections highlighting commonly misquoted people and genres, such as Yogi Berra and Oscar Wilde, famous last words, and misremembered movie lines. An invaluable resource for not just those with a professional need to quote accurately, but anyone at all who is interested in the roots of words and phrases, *The Quote Verifier* is not only a fascinating piece of literary sleuthing, but also a great read.

ben franklin quotes education: Democracy's Education Harry C. Boyte, 2015-02-01 Today Americans feel powerless in the face of problems on every front. Such feelings are acute in higher education, where educators are experiencing an avalanche of changes: cost cutting, new technologies, and demands that higher education be narrowly geared to the needs of today's workplace. College graduates face mounting debt and uncertain job prospects, and worry about a coarsening of the mass culture and the erosion of authentic human relationships. Higher education is increasingly seen, and often portrays itself, as a ticket to individual success--a private good, not a public one. *Democracy's Education* grows from the American Commonwealth Partnership, a year-long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good. The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act, which created land grant colleges. Beginning with an essay by Harry C. Boyte, *Reinventing Citizenship as Public Work*, which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students, the collection brings world-famous scholars, senior government officials, and university presidents together with faculty, students, staff, community organizers, and intellectuals from across the United States and South Africa and Japan. Contributors describe many constructive responses to change already taking place in different kinds of institutions, and present cutting-edge ideas like civic science, civic studies, citizen professionalism, and citizen alumni. Authors detail practical approaches to making change, from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment. Overall, the work develops a democratic story of education urgently needed to address today's challenges, from climate change to growing inequality.

ben franklin quotes education: **99% Perspiration** Adam Chandler, 2025-01-07 An enlightening and entertaining interrogation of the myth of American self-reliance and the idea of hard work as destiny "Genius is one percent inspiration and ninety-nine percent perspiration." This phrase, arguably Thomas Edison's most famous quote, has been drilled into the minds of generations of Americans. A fairly straightforward iteration of the idea that innovation, discovery, and ingenuity are the result of drive and grit above all, it has also come to represent much darker myths: that hard work always leads to success and that achievement is the product of individuals and not communities. In this model, those who come out on top are there because they earned it, and everyone else needs to buckle down, glove up, and, maybe one day, they'll get there too. As the wealth gap widens, communities crumble, and Americans work more for less, Adam Chandler raises the question: What happens when perspiration isn't enough? To answer it, he crisscrosses the country interviewing mayors, teachers, generals, pastors, construction workers, and entrepreneurs, to reveal just how untenable relying on "perspiration" as a strategy has truly become. He also delves into America's past to reveal how our government, education system, and culture at large have woven the idea of meritocracy deep into the fabric of American society and how some of history's most famous so-called bootstrappers really built their wealth. From George Washington to Seattle, Washington, Jay Gatsby to Bill Gates, *99% Perspiration* unpacks the misguided obsession with hard work that has come to define both the American dream and nightmare, offering insight

into how we got here and hope for where we may go.
