benefits of honor society: A 21st Century System for Evaluating Veterans for Disability Benefits Institute of Medicine, Board on Military and Veterans Health, Committee on Medical Evaluation of Veterans for Disability Compensation, 2007-09-30 21st Century System for Evaluating Veterans' Disability Benefits recommends improvements in the medical evaluation and rating of veterans for the benefits provided by the Department of Veterans Affairs (VA) to compensate for illnesses or injuries incurred in or aggravated by military service. Compensation is a monthly cash benefit based on a rating schedule that determines the degree of disability on a scale of 0 to 100. Although a disability rating may also entitle a veteran to ancillary services, such as vocational rehabilitation and employment services, the rating schedule is out of date medically and contains ambiguous criteria and obsolete conditions and language. The current rating schedule emphasizes impairment and limitations or loss of specific body structures and functions which may not predict disability well. 21st Century System for Evaluating Veterans' Disability Benefits recommends that

this schedule could be revised to include modern concepts of disability including work disability, nonwork disability, and quality of life. In addition to the need for an updated rating schedule, this book highlights the need for the Department of Veterans' Affairs to devote additional resources to systematic analysis of how well it is providing services or how much the lives of veterans are being improved, as well as the need for a program of research oriented toward understanding and improving the effectiveness of its benefits programs.
