bernheim arboretum and research forest tickets: *Botanic Gems Indiana Public Gardens* Alan McPherson, 2009 Tales of a Farmboy isn't just the life story of a farmer and his struggles (though it is that, too). It warmly relates the peaks and valleys in one man's life, told with a great depth of feeling, and with great humility and humor. Clarence Salmon paints pictures with his stories and poems, and the reader can almost smell the scents and hear the sounds that his vivid descriptions evoke. This book is filled with first-person accounts of a simpler time, when going to church meant hitching up the horse and buggy, when Christmas was truly a homegrown affair, and where children could actually go sledding down the middle of Allen Hill Road without danger. It describes the author's firsthand experiences with the traumatic events of the times, such as the stock market crash of 1929, when he was a twenty-year-old bellhop at a well-to-do Florida hotel, as well as the destruction of the 1938 hurricane - The Storm of Storms. Together, Clarence and Donna Salmon have created a wonderful reading experience which follows one man's journey from cradle to old age using love, faith, determination, strength of character, perseverance and a great sense of humor. A true piece of Americana.

bernheim arboretum and research forest tickets: *Foods of Association* Nina Lilian Etkin, 2009 ÒWe should look for someone to eat and drink with before looking for something to eat and drink.Ó ÑEpicurus This fascinating book examines the biology and culture of foods and beverages that are consumed in communal settings, with special attention to their health implications. Nina Etkin covers a wealth of topics, exploring human evolutionary history, the Slow Food movement, ritual and ceremonial foods, caffeinated beverages, spices, the street foods of Hawaii and northern Nigeria, and even bottled water. Her work is framed by a biocultural perspective that considers both the physiological implications of consumption and the cultural construction and circulation of foods. For Etkin, the foods and beverages we consume are simultaneously Òbiodynamic substances and cultural objects.Ó The book begins with a look at the social eating habits of our primate relatives and discusses our evolutionary adaptations. It then offers a history of social foods in the era of European expansion, with a focus on spices and Òcaffeinated cordials.Ó (Of course, there were some powerful physiological consequences of eating foods brought home by returning explorers, and those are considered tooÑalong with consequences for native peoples.) From there, the book describes Òstreet food,Ó which is always served in communal settings. Etkin then scrutinizes ceremonial foods and beverages, and considers their pharmacological effects as well. Her extensive examination concludes by assessing the biological and cultural implications of bottled water. While intended primarily for scholars, this enticing book serves up a tantalizing smorgasbord of food for thought.
