Many of our most serious psychological problems can be traced to a special form of guilt: the hidden guilt we feel toward our parents or other loved ones. Somewhere back in childhood we came to believe that by achieving independence, happiness or success, we would harm the ones we love. We judged ourselves guilty of imaginary crimes and have been punishing ourselves ever since. This book introduces us to a new approach to psychological healing, never before presented in a book for the general public. Many previous readers have found this book a profound step on their road to psychological recovery.--Publisher.
