berkeley research group reddit: Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit, one of the most popular and least studied social platforms of the early 21st century. The book inspires new ways of thinking about Reddit, considering it from multiple perspectives: through a historical lens, as a site where identity is forged, as a democracy, as a community, and as a news aggregator and distributor. By bringing theories from computer-mediated communication, communication studies, and sociology to bear on original, large-scale observational analyses of Reddit's communities, this book provides a uniquely comprehensive overview of the platform's first 15 years. Understanding Reddit will help us make sense of how rapidly growing communities function in an era of mass online anonymity. Serving both as a primer on how social behavior on Reddit plays out, and as a way of locating it within multiple theoretical traditions, the book will offer important insights to scholars and students in the disciplines of communication, media studies, information science, internet and emerging media studies, and sociology.

berkeley research group reddit: *These Strange New Minds* Christopher Summerfield, 2025-03-11 An insider look at the Large Language Models (LLMs) that are revolutionizing our relationship to technology, exploring their surprising history, what they can and should do for us today, and where they will go in the future—from an AI pioneer and neuroscientist In this accessible, up-to-date, and authoritative examination of the world's most radical technology, neuroscientist and AI researcher Christopher Summerfield explores what it really takes to build a brain from scratch. We have entered a world in which disarmingly human-like chatbots, such as ChatGPT, Claude and Bard, appear to be able to talk and reason like us - and are beginning to transform everything we do. But can AI 'think', 'know' and 'understand'? What are its values? Whose biases is it perpetuating? Can it lie and if so, could we tell? Does their arrival threaten our very existence? *These Strange New Minds* charts the evolution of intelligent talking machines and provides us with the tools to understand how they work and how we can use them. Ultimately, armed with an understanding of AI's mysterious inner workings, we can begin to grapple with the existential question of our age: have we written ourselves out of history or is a technological utopia ahead?

berkeley research group reddit: Rare Diseases in the Age of Health 2.0 Rajeev K. Bali, Lodewijk Bos, Michael Christopher Gibbons, Simon Ibell, 2013-10-21 This text focuses on various factors associated with orphan diseases and the influence and role of health information technologies. Orphan diseases have not been adopted by the pharmaceutical industry because they provide little financial incentive to treat or prevent it. It is estimated that 6,000-7,000 orphan diseases exist today; as medical knowledge continues to expand, this number is likely to become much greater. The book highlights the opportunities and challenges in this increasingly important area. The book explores new avenues which are opened by information technologies and Health 2.0, and highlights also economic opportunities of orphan disease medicine. The editors of this new book have international experience and competencies in the key areas of patient empowerment, healthcare and clinical knowledge management, healthcare inequalities and disparities, rare diseases and patient advocacy.

berkeley research group reddit: Encyclopedia of Criminal Activities and the Deep Web Khosrow-Pour D.B.A., Mehdi, 2020-02-01 As society continues to rely heavily on technological tools for facilitating business, e-commerce, banking, and communication, among other applications, there has been a significant rise in criminals seeking to exploit these tools for their nefarious gain. Countries all over the world are seeing substantial increases in identity theft and cyberattacks, as well as illicit transactions, including drug trafficking and human trafficking, being made through the dark web internet. Sex offenders and murderers explore unconventional methods of finding and contacting their victims through Facebook, Instagram, popular dating sites, etc., while pedophiles rely on these channels to obtain information and photographs of children, which are shared on hidden community sites. As criminals continue to harness technological advancements that are outpacing legal and ethical standards, law enforcement and government officials are faced with the challenge of devising new and alternative strategies to identify and apprehend criminals to preserve the safety of society. The Encyclopedia of Criminal Activities and the Deep Web is a three-volume set that includes comprehensive articles covering multidisciplinary research and expert insights provided by hundreds of leading researchers from 30 countries including the United States, the United Kingdom, Australia, New Zealand, Germany, Finland, South Korea, Malaysia, and more. This comprehensive encyclopedia provides the most diverse findings and new methodologies for monitoring and regulating the use of online tools as well as hidden areas of the internet, including the deep and dark web. Highlighting a wide range of topics such as cyberbullying, online hate speech, and hacktivism, this book will offer strategies for the prediction and prevention of online criminal activity and examine methods for safeguarding internet users and their data from being tracked or stalked. Due to the techniques and extensive knowledge discussed in this publication it is an invaluable addition for academic and corporate libraries as well as a critical resource for policy makers, law enforcement officials, forensic scientists, criminologists, sociologists, victim advocates, cybersecurity analysts, lawmakers, government officials, industry professionals, academicians, researchers, and students within this field of study.

berkeley research group reddit: **Complex Networks VI** Giuseppe Mangioni, Filippo Simini,

Stephen Miles Uzzo, Dashun Wang, 2015-03-14 Elucidating the spatial and temporal dynamics of how things connect has become one of the most important areas of research in the 21st century. Network science now pervades nearly every science domain, resulting in new discoveries in a host of dynamic social and natural systems, including: how neurons connect and communicate in the brain, how information percolates within and among social networks, the evolution of science research through co-authorship networks, the spread of epidemics and many other complex phenomena. Over the past decade, advances in computational power have put the tools of network analysis in the hands of increasing numbers of scientists, enabling more explorations of our world than ever before possible. Information science, social sciences, systems biology, ecosystems ecology, neuroscience and physics all benefit from this movement, which combines graph theory with data sciences to develop and validate theories about the world around us. This book brings together cutting-edge research from the network science field and includes diverse and interdisciplinary topics such as: modeling the structure of urban systems, behavior in social networks, education and learning, data network architecture, structure and dynamics of organizations, crime and terrorism, as well as network topology, modularity and community detection.

Horned warriors with painted faces and fur headdresses draped over their naked torsos. The storming of the Capitol brought together men who had previously come across one another only online in the Manosphere. These were men with a common interest, followers of a male-supremacist ideology, who rioted in order to fight for their privilege. Before then, the world had looked on as devastating attacks were carried out by incels: those who seek to gain unfettered access to women's bodies by redrawing the hierarchy of the sexes in order to ensure the subjugation of women. For all of these men, masculinity is a political project, and the events at the Capitol were one episode in a growing movement. From the US and Canada to New Zealand, from Poland to Brazil, right-wing extremists, religious fundamentalists and male supremacists are coming together in order to translate their reactionary dreams of male domination into politics, underscoring the masculine roots of the authoritarian backlash. berkeley research group reddit: *Social Media in Disaster Response* Liza Potts, 2013-10-30 Social Media in Disaster Response focuses on how emerging social web tools provide researchers and practitioners with new opportunities to address disaster communication and information design for participatory cultures. Both groups, however, currently lack research toolkits for tracing participant networks across systems; there is little understanding of how to design not just for individual social web sites, but how to design across multiple systems. Given the volatile political and ecological climate we are currently living in, the practicality of understanding how people communicate during disasters is important both for those researching solutions and for those putting that research into practice. Social Media in Disaster Response addresses this situation by presenting the results of a large-scale sociotechnical usability study on crisis communication in the vernacular related to recent natural and human-made crisis; this is an analysis of the way social web applications are transformed, by participants, into a critical information infrastructure in moments of crisis. This book provides researchers with methods, tools, and examples for researching and analyzing these communication systems while providing practitioners with design methods and information about these participatory communities to assist them in influencing the design and structure of these communication systems.

berkeley research group reddit: *Disruption and Digital Journalism* John V. Pavlik, 2021-10-06 This book offers a timely insight into how the news media have adapted to the digital transformation of public communication infrastructure. Providing a conceptual roadmap to understanding the disruptive, innovative impact of digital networked journalism in the 21st century, the author critically examines how and to what extent news media around the world have engaged in digital adaptation. Making use of data from news media content production and distribution both off- and online, as well as user and financial data from the U.S. and internationally, the book traces how the

news media embraced and reacted to key developments such as the invention of the World Wide Web in 1989 and the launch of Google in 1998, Facebook in 2004, and the Apple iPhone in 2009. The author also highlights innovative organizations that have sought to reimagine news media that are optimized for digital, online, and mobile media of the 21st century, demonstrating how these groups have been able to stay better engaged with the public. *Disruption and Digital Journalism* is recommended reading for all academics and scholars with an interest in media, digital journalism studies, and technological innovation.

High-stakes, high-IQ, and often high on their own mythologies, they are driving the next era of finance, tech, and politics. But what happens when their bets go too far? Nate Silver's *On The Edge* reveals the hidden world of the River. It is the domain of gamblers and like-minded folks who move markets and change the fabric of society: poker legends, hedge fund titans, crypto speculators, and even those willing to bet the world's future on AI. They are obsessives with a deep hunger for volatility and an unrelenting desire to exploit every edge over the rest of us. Silver embeds with them, competing in the World Series of Poker, visiting Sam Bankman-Fried's FTX compound, and attending wild Miami yacht parties at the height of the crypto bubble. *On the Edge* is a front-row seat to a new world order built on risk, math, and ambition—a gripping ride through the minds shaping your future, whether you like it or not.

berkeley research group reddit: *Computers and Society* Ronald M. Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies, and most aspects of modern life have changed significantly with their widespread availability and use. Technology at various scales - supercomputers, corporate networks, desktop and laptop computers, the internet, tablets, mobile phones, and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye - all pervade our world in a major way. *Computers and Society: Modern Perspectives* is a wide-ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media; education and learning; medicine and health; free speech, democracy, and government; and war and peace. Ronald M. Baecker reviews critical ethical issues raised by computers, such as digital inclusion, security, safety, privacy, automation, and work, and discusses social, political, and ethical controversies and choices now faced by society. Particular attention is paid to new and exciting developments in artificial intelligence and machine learning, and the issues that have arisen from our complex relationship with AI.

Do you feel silenced when feminists dismiss male struggles as irrelevant? Are you exhausted watching merit collapse under the weight of quotas and victim points? Ever wonder why feminists partner with Marxists to erase biological truth? - Exposes how "glass ceilings" are myths spun to guilt-trip society. - Reveals why victimhood is feminism's currency—and why it pays them, not you. - Debunks the "toxic masculinity" lie and restores pride in male strength. - Documents how abortion advocacy ignores women's silent regret and ethical decay. - Uncovers feminism's alliance with Marxism to dismantle families and freedoms. - Proves gender studies prioritize ideology over facts, sabotaging real progress. - Details how intersectionality divides women into warring "oppression tiers." - Shows why men's sacrifices throughout history deserve gratitude, not contempt. If you want to arm yourself with truth, crush feminist gaslighting, and reclaim pride in reality—buy this book today.

Studying the language used on social media platforms presents great opportunities as well as challenges to corpus linguists. The contributions in *Corpus Approaches to Social Media* address technical, ethical, and methodological issues by showcasing in-depth social media studies as conducted by corpus scholars. The chapters are based on a variety of social media platforms and include corpus perspectives on the language of online communities, linguistic variation in short media texts, and the role of images in computer-mediated communication. A particularly strong point of the collection are the detailed accounts of the methodological aspects of working with social media corpora. The volume features research applying traditional corpus linguistic methods to social media data as well as novel and innovative research methods for the analysis of multimodal material and atypical corpus texts.

Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, *Online Film Production in China Using Blockchain and Smart Contracts* explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

berkeley research group reddit: *Ageism and Person-Centred Care* Stephen Buetow, 2024-10-14 This thought-provoking book exposes the values, judgements, and hierarchies that underlie ageism in care settings. Destabilizing the assumption that biases like ageism are always bad, Buetow suggests that ageism is normatively neutral and that truly person-centred care requires situated acknowledgement of and responsiveness to its negative and positive aspects. Buetow contends that respecting meaningful age differences between persons as moral agents puts ageism on the radar of care environments, weakening barriers to engagement. His analysis moves from concern for age-friendliness to prudent ageism that enables person-centred care to apply practical wisdom in everyday, age-sensitive judgement and decision-making. Challenging political correctness and advocating for justice rather than social justice, Buetow discusses how prudent ageism may advantage some age groups over others in particular circumstances while providing a moral structure for managing real rather than socially constructed differences. Looking at how

age-sensitive judgments combined with a person first approach can inform research, policy, and practice, this book will interest students and researchers from fields like health and social care, and disciplines, such as sociology, psychology, politics, and philosophy.

berkeley research group reddit: Slippery Eugenics R Sánchez-Rivera, 2024-12-04 Discover the hidden legacy of eugenics and its enduring influence on modern policies and global society. Beginning with the origins of eugenics, Sánchez-Rivera traces the spread of eugenic ideas across different nations, revealing how they intersect with nationalism, populism and individual reproductive rights. Through a comprehensive exploration, this book uncovers how these intertwined legacies still shape our world today offering fresh insights into the subtle forces that define contemporary social and political landscapes, and have lasting impacts on reproductive control, racialization, colonialism, gender norms, and more. The Social Science for Social Justice series challenges the Ivory Tower of academia, providing a platform for academics, journalists, and activists of color to respond to pressing social issues.

berkeley research group reddit: Insulting Music Lily E. Hirsch, 2022-11-01 Insulting Music explores insult in and around music and demonstrates that insult is a key dimension of Western musical experience and practice. There is insult in the music we hear, how we express our musical preferences, as well as our reactions to settings and sites of music and music making. More than that, when music and insult overlap, the effects can both promote social justice or undermine it, foster connection or break it apart. The coming together of music and insult shapes our sense of self and view of other people, underlining and constructing difference, often in terms of race and gender. In the last decade, music's power dynamics have become an increasingly important concern for music scholars, critics, and fans. Studying musicians such as Frank Zappa, Nickleback, Taylor Swift, and the Insane Clown Posse, and musical phenomena such as musician jokes, the use of music to torture people, and the playing of music in restaurants, this book shows the various and contradictory ways insults are used to negotiate those existing dynamics in and around music.
