**berkshire humane society dogs: Finding Shelter** Jesse Freidin, 2017-04 The healing, beauty, and joy of the animal shelter system Without volunteers, our nation's animal shelter system simply

would not exist. Volunteers speak for those that cannot speak, pick up the pieces for abandoned animals that have been let down by previous owners or unfortunate circumstances, and do whatever it takes to heal the deepest of wounds. In *Finding Shelter*, award-winning photographer Jesse Freidin shows the softer side of this story. He witnessed firsthand how many of the volunteers were able to mend their own emotional hurts with the love the shelter animals gave back to them, and how the power of these relationships transforms shelters into places where humans and animals can heal together. This realization propelled him to take a two-year journey across the country to document the tenderness and healing, beauty and joy he encountered within the shelter system. The result is a heartwarming inspiration for people to look differently at how to save shelter pets. In *Finding Shelter*, Freidin sparks a new discussion about animal rescue and what it feels like to truly love an animal.

**berkshire humane society dogs: The Story of My Life - By Shayna** Greta Marsh, 2003-04-15 The story of my life is about dog racing and a good deal more. It is about cruelty, the human capacity for cruelty towards human animals and animals of other species. Dog racing, commonly known as Greyhound racing, is not a sport because no legitimate sport uses enslaved/involuntary participants and murders many of them once they start losing and no longer are competitive and profitable. Dog racing is, in fact, a deadly form of entertainment, as are horse racing, dog fighting, cock fighting, hunting and circuses that use enslaved other-specied animals. Incidentally, I remember Greta talking about a form of entertainment that was popular in Ancient Rome and which took place in public arenas. There enslaved humans known as gladiators were forced to engage in deadly combat against each other to the delight of cheering crowds. Often the losing gladiator was killed outright, and sometimes he lived depending upon the mood of the spectators. Unlike some spectator sports whose fans identify with and form emotional attachments to the athletes, dog racing fans care little or nothing about the Greyhounds. This detachment can be attributed to the racers' short racing careers; some race for just one season or part of a season at a specific track, and then are shipped elsewhere. But let's return to my story. Please know that I am real, as are other characters. On the other hand, some characters are not real. They are fictional. And although some of the events discussed in Part One are based on real happenings, some are not, and Part One is a work of fiction. In conclusion, I hope with all my heart that this book touches the hearts and minds of its readers. - Shayna Lanesboro, MA (1998)

**berkshire humane society dogs: Art for Animals** J. Keri Cronin, 2018-04-09 Animal rights activists today regularly use visual imagery in their efforts to shape the public's understanding of what it means to be "kind," "cruel," and "inhuman" toward animals. Art for Animals explores the early history of this form of advocacy through the images and the people who harnessed their power. Following in the footsteps of earlier-formed organizations like the RSPCA and ASPCA, animal advocacy groups such as the Victoria Street Society for the Protection of Animals from Vivisection made significant use of visual art in literature and campaign materials. But, enabled by new and improved technologies and techniques, they took the imagery much further than their predecessors did, turning toward vivid, pointed, and at times graphic depictions of human-animal interactions. Keri Cronin explains why the activist community embraced this approach, details how the use of such tools played a critical role in educational and reform movements in the United States, Canada, and England, and traces their impact in public and private spaces. Far from being peripheral illustrations of points articulated in written texts or argued in impassioned speeches, these photographs, prints, paintings, exhibitions, "magic lantern" slides, and films were key components of animal advocacy at the time, both educating the general public and creating a sense of shared identity among the reformers. Uniquely focused on imagery from the early days of the animal rights movement and filled with striking visuals, Art for Animals sheds new light on the history and development of modern animal advocacy.
