Michael Sayman is a second-generation Latino immigrant who taught himself how to code as a thirteen-year-old and went on to claim his share of the American dream. As his parents watched their restaurant business collapse in the wake of the Great Recession, Michael Sayman was googling "how to code." Within a year, he had launched an iPhone app that was raking in thousands of dollars a month, enough to keep his family afloat—and in America. Entirely self-taught, Sayman headed from high school straight into the professional world, and by the time he was seventeen, he was Facebook's youngest employee ever, building new features

that wowed its founder Mark Zuckerberg and are now being used by more than half a billion people every day. Sayman pushed Facebook to build its own version of Snapchat's Stories and, as a result, engagement on the platform soared across all demographics. Millions of Gen Z and Millennials flocked to Facebook, and as teen engagement rose dramatically on Instagram and WhatsApp, Snapchat's parent company suffered a billion-dollar loss in value. Three years later, Sayman jumped ship for Google. App Kid is the galvanizing story of a young Latino, not yet old enough to drink, who excelled in the cutthroat world of Silicon Valley and went on to become an inspiration to thousands of kids everywhere by following his own surprising, extraordinary path. In this candid and uplifting memoir, Sayman shares the highs and lows, the successes and failures, of his remarkable journey. His book is essential and affirming reading for anyone marching to the beat of their own drum.
