2021-07-07 Indian history and culture are dynamic, spanning back to the beginning of human civilization. It began with a mysterious culture that flourished along the Indus River as well as among the farming communities in the southern lands of India. And the history of India is punctuated by constant integration of migrating people with the diverse cultures that surrounded India. Available evidence suggests that the use of iron, copper, and other metals was widely prevalent in the Indian sub-continent at a fairly early period, which is indicative of the progress that this part of the world had made by the end of the fourth millennium BC. History is the chronological study of the life and civilization of human beings. To develop linkage with the past and the present through continuous dialogues between the experience of past and that of the present is the fundamental mission of history. So, the historian E H Carr aptly says that the great writing of history becomes successful only when the search done by the historians illuminates and involves it with the problems of present age. The tested truth is that achieving knowledge from the experience of history acts as constant in the different socio-economic and political contexts. But the approaches to studying history are continuously informed by the changing circumstances and consequently modified from time to time in keeping with the demands of time and space. New ideas and views develop in the present and future times in the light of experiences of history.

Two centuries of British rule crystallized in the minds of English educated Indians a peculiar mindset that tended to undervalue their native ethos and moorings, and make English culture more attractive. This tendency is called the "colonial syndrome". This syndrome has infected the modern Indian elite, who abandon their cultural roots and imitating the Western ways. This situation has drained them off their intrinsic creative capabilities and rendered them less likely to make any significant original contributions to nation building. This book, an outcome of Prof. K. Ramakrishna Rao's work as a National Fellow of Indian Council of Social Science Research (ICSSR), attempts to define and elucidate this syndrome and its ill effects on the modern Indian mindset, and suggests means to contain and overcome it. It alerts people and the leadership about the negative and cascading effects of colonial syndrome, and pleads for Indianization of education, philosophy and psychology, among others in the country. Mahatma Gandhi's concept of *svadeśi* is the driving force here. It has no negative attributes, only positive self-assertion for common good. Colonial Syndrome goes on to analyse Gandhi's concept of *svadeśi*, and attempts to make clear the difference between education in India and Indian education, Indian philosophy and philosophy in India, and psychology in India and Indian psychology and emphasizes that India had its own unique standing on education, philosophy and psychology which needs to be revived and nurtured for fast social and economic development. About the Author: Professor Koneru Ramakrishna Rao is currently Chancellor of GITAM (deemed to be) University. He has the rare distinction of being National Fellow of the Indian Council of Social Sciences Research and the Indian Council of Philosophical Research, and Distinguished Honorary Professor at Andhra University. His earlier academic appointments include Professor of Psychology and Vice-Chancellor at Andhra University; Executive Director, Foundation for Research on the Nature of Man, USA; Chairman, A.P. State Council of Higher Education, and Advisor on Education, Government of Andhra Pradesh. He published 25 plus books and nearly 300 research papers. Prof. Rao received numerous honours that include the national award Padma Shri from the President of India and Honorary Doctoral degrees from Andhra, Acharya Nagarjuna and Kakatiya universities.
