best self behavioral health amherst ny: Black Film Through a Psychodynamic Lens

Katherine Marshall Woods, 2024-11-13 *Black Film Through a Psychodynamic Lens* delves into the nuanced character development and narrative themes within the struggles and successes presented in Black films over the last five decades. In this pioneering book, Katherine Marshall Woods looks at Black cinema from a psychological and psychoanalytic perspective. Focusing on a decade at a time, she charts the development of representation and creative output from the 1980s to the present day. She deftly moves from analyzing depictions of poverty and triumphs to highlighting the importance of cinema in shaping cultural identity while considering racial prejudice and discrimination. Adopting theoretical viewpoints from Freud to bell hooks, Marshall Woods examines the damaging effect on cultural psychology as a result of stereotypical racial tropes, and expertly demonstrates the healing that can be found when one sees oneself represented in an honest light in popular art. From *Do The Right Thing*, *The Color Purple* and *Malcolm X* to contemporary classics like *12 Years a Slave*, *Black Panther* and *American Fiction*, this book is an essential read for those interested in the intersection between Psychology, Psychoanalysis, Film Theory, and African American cultural identity.

best self behavioral health amherst ny: Trauma and Resilience in the Lives of Contemporary Native Americans

Hilary N. Weaver, 2019-03-18 *Indigenous Peoples around the world and our allies* often reflect on the many challenges that continue to confront us, the reasons behind health, economic, and social disparities, and the best ways forward to a healthy future. This book draws on theoretical, conceptual, and evidence-based scholarship as well as interviews with scholars immersed in Indigenous wellbeing, to examine contemporary issues for Native Americans. It includes reflections on resilience as well as disparities. In recent decades, there has been increasing attention on how trauma, both historical and contemporary, shapes the lives of Native Americans. Indigenous scholars urge recognition of historical trauma as a framework for understanding contemporary health and social disparities. Accordingly, this book uses a trauma-informed lens to examine Native American issues with the understanding that even when not specifically seeking to address trauma directly, it is useful to understand that trauma is a common experience that can shape many aspects of life. Scholarship on trauma and trauma-informed care is integrated with scholarship on historical trauma, providing a framework for examining contemporary issues for Native American populations. It should be considered essential reading for all human service professionals working with Native American clients, as well as a core text for Native American studies and classes on trauma or diversity more generally.

best self behavioral health amherst ny: Deviance Leon Anderson, 2024-04-15 *Deviance:*

Social Constructions and Blurred Boundaries is designed for courses on social deviance that take a strong sociological perspective. The book draws on up-to-date scholarship across a wide spectrum of deviance categories, providing a symbolic interactionist analysis of the deviance process. The book addresses positivistic theories of deviant behavior within a description of the deviance process that encompasses the work of deviance claims-makers, rule-breakers, and social control agents. Students are introduced to the sociology of deviance and learn to analyze several kinds of criminal deviance that involve unwilling victims-such as murder, rape, street-level property crime, and white-collar

crime. Students also learn to examine several categories of lifestyle and status deviance and develop skills for critical analysis of criminal justice and social policies. Overall, students gain an understanding of the sociology of deviance through cross-cultural comparisons, historical overview of deviance in the U.S., and up-close analysis of the lived experience of those who are labeled deviant as well as responses to them in the U.S. today

best self behavioral health amherst ny: Destructive Emotions Daniel Goleman, 2004-03-30
*Why do seemingly rational, intelligent people commit acts of cruelty and violence? *What are the root causes of destructive behavior? *How can we control the emotions that drive these impulses? *Can we learn to live at peace with ourselves and others? Imagine sitting with the Dalai Lama in his private meeting room with a small group of world-class scientists and philosophers. The talk is lively and fascinating as these leading minds grapple with age-old questions of compelling contemporary urgency. Daniel Goleman, the internationally bestselling author of Emotional Intelligence, provides the illuminating commentary—and reports on the breakthrough research this historic gathering inspired. Destructive Emotions Buddhist philosophy tells us that all personal unhappiness and interpersonal conflict lie in the “three poisons”: craving, anger, and delusion. It also provides antidotes of astonishing psychological sophistication—which are now being confirmed by modern neuroscience. With new high-tech devices, scientists can peer inside the brain centers that calm the inner storms of rage and fear. They also can demonstrate that awareness-training strategies such as meditation strengthen emotional stability—and greatly enhance our positive moods. The distinguished panel members report these recent findings and debate an exhilarating range of other topics: What role do destructive emotions play in human evolution? Are they “hardwired” in our bodies? Are they universal, or does culture determine how we feel? How can we nurture the compassion that is also our birthright? We learn how practices that reduce negativity have also been shown to bolster the immune system. Here, too, is an enlightened proposal for a school-based program of social and emotional learning that can help our children increase self-awareness, manage their anger, and become more empathetic. Throughout, these provocative ideas are brought to life by the play of personalities, by the Dalai Lama’s probing questions, and by his surprising sense of humor. Although there are no easy answers, the dialogues, which are part of a series sponsored by the Mind and Life Institute, chart an ultimately hopeful course. They are sure to spark discussion among educators, religious and political leaders, parents—and all people who seek peace for themselves and the world. The Mind and Life Institute sponsors cross-cultural dialogues that bring together the Dalai Lama and other Buddhist scholars with Western scientists and philosophers. Mind and Life VIII, on which this book is based, took place in Dharamsala, India, in March 2000.
