These lines are nested within historical, social, cultural, and political contexts of two nations—the US and Canada—two provinces and three states: Alberta, British Columbia, California, Hawai'i, and Washington. The author studies the development of the community college and the development of the university from community college origins, bringing to the forefront these seven individual stories. Addressing continuity and discontinuity and identity preservation and identity change, as well as individual organizations' responses to government policy, Levin analyzes and illuminates those policies with neoliberal assumptions and values.
