create dating app without coding: The Divine Dating App Linda Wallace, 2024-10-27 In a world obsessed with swiping left, Melinda Soto, a brilliant coder more comfortable with ancient myths than modern dating, creates Amor—a dating app designed to ignite true love. But thanks to a late-night coding spree fueled by espresso and a cryptic Etruscan algorithm, Amor starts matching users based on their divine Roman ancestry. Suddenly, the dating pool is overflowing with descendants of gods, and first dates are more likely to feature metaphorical thunderbolts than candlelight. Rodney, a mild-mannered accountant, discovers he's a descendant of Jupiter, king of the gods, while Eleanor, his fiery lawyer date, finds out she's descended from Juno, Jupiter's notoriously jealous wife. Their dinner date quickly escalates into a power struggle worthy of Mount Olympus. Meanwhile, Isaac, a descendant of Mars, the god of war, finds himself locked in a passionate tango with Bethany, an artistic offspring of Venus. Their dates are a whirlwind of art gallery openings and intense sparring matches—a bizarre but compelling mix of their inherited natures. And then there's Wanda, a descendant of Ceres, whose apartment inexplicably transforms into an urban farm, attracting every vegan and organic farmer within a fifty-mile radius. Melinda, horrified by the chaos she's unleashed, becomes a reluctant digital deity, desperately trying to debug her app and contain the escalating divine drama. Her own love life, ironically, remains a barren wasteland. That is, until she meets Theodore, a quirky history professor with an encyclopedic knowledge of Roman mythology and a secret lineage connected to Mercury, the messenger god. Their connection sparks over late-night debates about historical accuracy and the absurdity of online dating. But the laughs don't last long. A hidden layer of code in Amor reveals a forgotten prophecy, foretelling catastrophic

consequences should the divine bloodlines fully reconnect. A cosmic imbalance threatens reality, and a clandestine group known as the Council of Elders, tasked with maintaining balance between the mortal and divine realms, pressures Melinda to shut down Amor. As the divine descendants' inherited traits amplify, turning first dates into epic showdowns and everyday lives into mythological reenactments, Melinda must choose between fixing her mistake and risking her own chance at happiness. With Theodore by her side, she races against time to unravel the mysteries of the Etruscan algorithm, battling the Council's interference and the escalating chaos, all while falling deeper in love amidst the divine pandemonium. Will they find a way to harmonize the ancient and the modern before the gods return and turn the world upside down?

Context-rich learning embodies the answer to the question, "Why do we need to learn this?" Many students, especially those who have dyslexia or otherwise neurodivergent brains, require the kind of context that is lacking in education. Designing Context-Rich Learning by Extending Reality is a collection of research and readings on the context-rich learning approach that examines the aspects of design, delivery, and assessments. The book proposes novel approaches to designing and delivering context-rich learning across all disciplines. Covering topics such as learning experiences, sustainable development, and user experience design, this premier reference source is a valuable resource of inspiration to learning and training facilitators, instructional designers, assessment developers, instructional technologists, psychometricians, educators and administrators of both higher and K-12 education, pre-service teachers, teacher educators, researchers, and academicians.

create dating app without coding: The Innovation Mindset Lorraine Marchand, 2022-09-13 Innovation requires more than a eureka moment. The vast majority of new product ideas never make it to market. Typically, this is because of the failure to address a real problem that a customer has experienced and is willing to pay to have solved. What do people and businesses need to know about the realities of innovating in order to develop products successfully? Lorraine Marchand—a seasoned practitioner who has guided Fortune 500 companies and start-ups on developing and launching new ideas—lays out a step-by-step framework for spurring success. She shares her eight laws of innovation, a formula for driving significant and lasting transformation in any organization. Marchand emphasizes the frame of mind needed to spark the innovation process, underscoring the importance of creating a problem-solving culture and supporting personal curiosity, passion, and talent. She pinpoints the strengths shared by the big ideas that break through and debunks the myths that hold back aspiring creators. Drawing on her experience as a woman in a male-dominated field, Marchand discusses how to support entrepreneurship by women and highlights the contributions of underrepresented innovators. Marchand's how-to program for innovation is clear and easy to follow, featuring a toolkit of strategic templates and planning frameworks that are illustrated by helpful case studies. Written in authoritative but conversational language, The Innovation Mindset offers a practical plan for both the veteran with another great idea and the first-timer with a big dream.
