creepy events in history: Lake Ronkonkoma in History and Legend, the Princess Curse and Other Stories: a Lifeguard'S View Dr. David S. Ignéri, 2013-07-22 The History and Legends of Lake Ronkonkoma, the Princess Curse and Other Stories; A Lifeguards View, discusses the history and the folklore of Long Islands largest lake. It builds a strong case for the Princess legend. The author consulted professional opinions, of paranormal experts, who generally believe curses are real, not superstition. He also consulted many sources on Lake Ronkonkoma, to focus in on the fact that a young male has drowned almost every year, and that few females have died in the Lake. In fact it remains, that possibly only one female lost her life. Her official cause of death was kidney failure, caused by secondary drowning. The volume also chronicles the lifeguard career of the author, David S. Ignéri. His lifeguards at the lake and his other beaches were, in general gifted athletes. However, to lifeguard Lake Ronkonkoma they needed specific training that was not covered

in their regular lifeguard preparation. At first, Igneri himself, did not totally understand the task before him. However, he sought advice from older lifeguards, and read everything he could about Ronkonkoma, and formulated a program. In his early years he did not believe in the Princess Curse at all, and believed it was only superstition. His experiences during that time, made him re-think his views. Gradually he realized that some force or entity was causing, or helped causing the many deaths. David Igneri began to change his policies at Lake Ronkonkoma on July 5, 1965. He totally believes that the spirits told him what to do. His goal became to protect and save all of the people, all of the time, and stop the legend. After reading this volume, you will have to decide for yourself, how much success he had in this endeavor.

creepy events in history: Understanding Family Change and Variation Jennifer A. Johnson-Hanks, Christine A. Bachrach, S. Philip Morgan, Hans-Peter Kohler, 2011-08-27 Fertility rates vary considerably across and within societies, and over time. Over the last three decades, social demographers have made remarkable progress in documenting these axes of variation, but theoretical models to explain family change and variation have lagged behind. At the same time, our sister disciplines—from cultural anthropology to social psychology to cognitive science and beyond—have made dramatic strides in understanding how social action works, and how bodies, brains, cultural contexts, and structural conditions are coordinated in that process. *Understanding Family Change and Variation: Toward a Theory of Conjunctural Action* argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action, and proposes a framework through which that reintegration can occur. This framework posits that material and schematic structures profoundly shape the occurrence, frequency, and context of the vital events that constitute the object of social demography. Fertility and family behaviors are best understood as a function not just of individual traits, but of the structured contexts in which behavior occurs. This approach upends many assumptions in social demography, encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture, of agency versus structure, or of biology versus society.

creepy events in history: *The Golden Age of Chicago Children's Television* Ted Okuda, Jack Mulqueen, 2004 There was a time when every television station in Chicago produced or aired programming for children, and this book discusses the back stories and details of this special era from the people who created, lived, and enjoyed it, such as producers, on-air personalities, and fans. This compendium describes how from the late 1940s through the early 1970s, local television stations created a golden age of children's television unique in American broadcasting and how the FCC changed the regulations governing the relationship between sponsors and local programming in 1972, effectively bringing the genre to a close since the programs operated under strict budgetary constraints. The story of this chapter in television history show the richness of imagination and inventiveness of children's programming and the devotion of the fans. Featured shows include Bozo's Circus; Garfield Goose; Kukla, Fran, & Ollie; The Mulqueen's Kiddie-A-Go-Go; Ray Rayner and Friends; and Super Circus. Today, we can be nostalgic about the passing of great local children's fare such as Bozo's Circus . . . and Garfield Goose. However, I believe that today's children have more and better choices in programming . . . What is missing is the localism, the heart and soul that emanated from these and other programs. Economics, regulation, and expectations for what a program should look like have altered children's television forever. As you read this book, perhaps you will not only find memories or curiosities from a bygone era, but inspiration to create children's television for today's audiences. A pie in the face is still funny, kids still like to dance, and the last time I looked, you could still buy six buckets and nail them to a board and call it a Grand Prize Game.—from the foreword by Neal Sabin, WCIU-TV, Chicago Behind-the-Scenes Stories of the Golden Age of Chicago Children's Television as Told by the People Who Lived It At one time every station in Chicago—a maximum of five, until 1964—produced or aired some programming for children. From the late 1940s through the early 1970s, local television stations created a golden age of children's television unique in American broadcasting. Though the shows often operated under strict budgetary constraints, these programs were rich in imagination, inventiveness, and devoted fans. The mere mention of their names brings smiles to the faces of Midwestern Baby Boomers everywhere: Kukla, Fran, & Ollie, Super Circus, Garfield Goose, Bozo's Circus, Mulqueens' Kiddie-A-Go-Go, BJ & Dirty Dragon, Ray Rayner and Friends, and a host of others. In 1972 the FCC changed the regulations governing the relationship between sponsors and local programming, effectively bringing to a close this chapter of television history. What Chicago kids' show had American Bandstand host Dick Clark dancing on T.V. for the first time ever? Why did one have to wait months and, more often, years to get tickets for Bozo's Circus? Which very popular and successful host never wanted to do a children's T.V. show? Who really made the puppet Garfield Goose (you may not have known it was a mystery)? Remember the talent that bit the head off a parakeet on live TV and the shocked emcee's reaction? What sent television executives into a quandary when Kiddie-A-Go-Go went on the air? Which show was almost forced off the air because a giant soft drink company opposed a so-called rival's use of the word sip? Now, discover the back stories and details of this special era from the people who created, lived, and enjoyed it—producers, on-air personalities, and fans.

creepy events in history: *Common Core Meets Education Reform* Frederick M. Hess, Michael Q. McShane, 2014 How can the Common Core complement and not conflict with school improvement efforts already at work across the United States? How can it be seamlessly integrated into accountability systems, teacher preparation and development, charter schools, and educational technology? This timely volume brings together prominent scholars and policy analysts to examine the pressing issues that will mark Common Core implementation. Whether or not you agree with the standards, the Common Core is coming, and this book will help policymakers, practitioners, and other stakeholders anticipate the challenges and take steps to address them. "Common Core Meets Education Reform raises the hard questions about implementing and sustaining the Common Core State Standards so they don't end up in the dustbin of abandoned public education reforms. These new standards can help students enormously in becoming problem solvers and critical thinkers—which is essential in the 21st century—but only if teachers become engaged in the rollout, get the support they need, and the fixation on high-stakes testing gives way to a fixation on learning." —Randi Weingarten, president, American Federation of Teachers "Adopting the Common Core in a mad dash for federal gold, policymakers across the country blew right past critical questions about how they'd implement the thing. This volume, in stark contrast, meticulously studies the road ahead, seeking out tripwires, pitfalls, and boulders, making it a must-read for anyone who hopes to avoid total Common Core disaster." —Neal McCluskey, associate director, Center for Educational Freedom, Cato Institute, Washington, DC "This balanced, wide-ranging, and deeply

informed book is certain to guide educators and reformers through a complex time of transition for U.S. education. But it also turns out to be timely and clarifying as politicians battle over ambitious new academic standards with plenty of heat and smoke but appallingly little illumination. Thanks to the authors for turning on some lights!" —Chester E. Finn, Jr., senior fellow, Hoover Institution, Stanford University and president, Thomas B. Fordham Institute Frederick M. Hess is director of education policy studies at the American Enterprise Institute (AEI) and serves as executive editor of Education Next. Michael Q. McShane is a research fellow in education policy studies at AEI.
