

crime statistics in malaysia

crime statistics in malaysia provide critical insights into the nation's public safety, law enforcement effectiveness, and social challenges. Understanding these statistics helps policymakers, researchers, and the public grasp the trends and patterns of criminal activity across the country. Malaysia, with its diverse population and rapidly developing economy, experiences a variety of crimes ranging from petty theft to organized criminal offenses. This article explores the latest crime statistics in Malaysia, examining crime rates, types of crimes, regional variations, and government initiatives aimed at crime prevention. Additionally, the article delves into the impact of socioeconomic factors on crime and discusses future trends based on recent data. The following sections offer a comprehensive overview of crime in Malaysia and the measures taken to enhance security nationwide.

- Overview of Crime Rates in Malaysia
- Types of Crimes Reported
- Regional Crime Distribution
- Factors Influencing Crime Rates
- Government and Law Enforcement Initiatives
- Future Trends and Challenges

Overview of Crime Rates in Malaysia

Crime statistics in Malaysia reveal fluctuating trends over the past decade, influenced by various social and economic factors. Overall crime rates have seen periods of both increase and decline, reflecting the dynamic nature of criminal activity. The Royal Malaysia Police (Polis Diraja Malaysia, PDRM) regularly publishes crime data, which serves as the primary source for understanding crime prevalence. These statistics include reports on both violent and non-violent crimes, providing a holistic picture of Malaysia's security landscape. In recent years, improvements in crime reporting and law enforcement have contributed to more accurate and timely data collection. This section outlines the general trends observed in crime rates and highlights key periods of change.

Annual Crime Rate Trends

Annual reports from PDRM indicate that while certain categories of crime have decreased, others have remained persistent or increased slightly. For example, property crimes such as burglary and vehicle theft have generally declined due to enhanced security measures and community awareness. Conversely, cybercrime has shown a noticeable increase, reflecting technological advancements and greater online activity. Urban areas, in particular, tend to report higher crime rates due to population density and economic activity. The government continues to monitor these trends closely to adapt crime prevention strategies effectively.

Types of Crimes Reported

The diversity of crimes reported in Malaysia encompasses both traditional offenses and emerging forms of criminal behavior. Crime statistics in Malaysia categorize offenses into violent crimes, property crimes, cybercrimes, drug-related crimes, and white-collar crimes. Each category presents distinct challenges to law enforcement agencies and affects different segments of the population. Understanding the distribution and characteristics of these crimes is essential for targeted interventions and resource allocation.

Violent Crimes

Violent crimes include offenses such as homicide, assault, robbery, and sexual offenses. Although Malaysia generally maintains a lower rate of violent crime compared to some neighboring countries, these incidents remain a significant concern, especially in urban centers. The government's focus on reducing violent crime involves increasing police presence and community policing initiatives.

Property Crimes

Property crimes, including burglary, theft, and vehicle-related offenses, constitute a substantial portion of reported crimes. These crimes typically impact individuals and businesses, leading to financial losses and reduced perceptions of safety. Improvements in surveillance and public education have contributed to a gradual reduction in property crime rates in recent years.

Cybercrime

The rise of digital technology has led to increased cybercrime cases, such as online scams, data breaches, and identity theft. Cybercrime is particularly challenging due to its transnational nature and the need for specialized investigative skills. Malaysia has strengthened its legal framework and

established dedicated cybercrime units to combat this growing threat.

Drug-Related Crimes

Drug offenses remain a major issue, with Malaysia enforcing strict laws against trafficking, possession, and use of illegal substances. The government's approach combines law enforcement with rehabilitation programs aimed at reducing drug-related criminal activity.

Regional Crime Distribution

Crime statistics in Malaysia reveal notable regional variations influenced by economic development, population density, and local social conditions. Metropolitan areas such as Kuala Lumpur, Selangor, and Johor Bahru report higher crime rates compared to rural regions. These differences highlight the need for localized crime prevention strategies tailored to each region's unique circumstances.

Urban vs. Rural Crime Rates

Urban centers experience higher incidences of crimes due to factors like greater anonymity, economic disparity, and higher population density. Conversely, rural areas tend to report fewer crimes but may face challenges related to limited law enforcement resources and accessibility.

High-Crime Regions

Regions with significant industrial and commercial activity often see elevated crime levels, including organized crime and gang-related offenses. Authorities prioritize these areas for increased patrols and intelligence gathering to disrupt criminal networks effectively.

Factors Influencing Crime Rates

Several socioeconomic and demographic factors influence the patterns observed in crime statistics in Malaysia. Understanding these determinants is critical for developing effective crime control policies and social interventions.

Economic Factors

Economic conditions such as unemployment, poverty, and income inequality can contribute to higher crime rates. Individuals facing financial hardship may be more likely to engage in criminal activities as a means of survival or

economic gain.

Social and Demographic Factors

Population density, age distribution, and education levels also impact crime trends. Youth unemployment and social disenfranchisement are linked to increased participation in criminal behavior, necessitating community outreach and youth engagement programs.

Technological Advancements

The proliferation of technology influences crime patterns, particularly through the rise of cybercrime. While technology aids law enforcement, it also presents new avenues for criminal activity that require continuous adaptation.

Government and Law Enforcement Initiatives

The Malaysian government, through various agencies, implements comprehensive strategies to reduce crime and enhance public safety. These initiatives involve legislative reforms, community policing, technological integration, and international cooperation.

Legislative Measures

Malaysia has enacted laws targeting specific crime categories, such as the Computer Crimes Act and the Dangerous Drugs Act. These laws provide a legal framework for prosecuting offenders and deterring criminal behavior.

Community Policing and Public Engagement

Community policing programs foster collaboration between law enforcement and citizens to prevent crime through neighborhood watch schemes, education campaigns, and local partnerships. These efforts aim to build trust and improve reporting of criminal activities.

Technology and Surveillance

Advanced surveillance systems, data analytics, and forensic technologies enhance the capacity of law enforcement agencies to detect, investigate, and solve crimes efficiently. Cybercrime units are equipped with specialized tools to address digital offenses.

International Cooperation

Given the transnational nature of many crimes, Malaysia collaborates with international organizations and neighboring countries to combat cross-border criminal activities, including trafficking and cybercrime.

Future Trends and Challenges

Analysis of crime statistics in Malaysia suggests emerging trends and challenges that will shape the country's crime landscape in the coming years. These include the continued rise of cybercrime, the need for enhanced rehabilitation programs, and adapting to changing social dynamics.

Emerging Crime Patterns

Cyber-related offenses and financial crimes are expected to increase, requiring ongoing investment in technology and expertise. Additionally, environmental crimes and new forms of fraud may become more prominent.

Challenges in Crime Prevention

Balancing strict law enforcement with human rights considerations, addressing root causes of crime, and ensuring equitable resource distribution remain ongoing challenges. Effective crime prevention will depend on integrated approaches combining legal, social, and technological solutions.

Role of Data and Analytics

Utilizing big data and predictive analytics can improve crime forecasting and resource allocation. Enhancing data quality and accessibility will support evidence-based policymaking and strategic planning.

- Continuous monitoring of crime trends
- Investment in law enforcement technology
- Community involvement in crime prevention
- Strengthening legal frameworks
- International collaboration

Frequently Asked Questions

What are the latest crime statistics in Malaysia for 2023?

The latest crime statistics in Malaysia for 2023 indicate a slight decrease in overall crime rates compared to previous years, with notable reductions in property crimes and violent offenses according to the Royal Malaysia Police reports.

Which type of crime is most prevalent in Malaysia?

Property crimes such as theft, burglary, and snatch theft remain the most prevalent types of crime in Malaysia, followed by drug-related offenses and violent crimes.

How has the COVID-19 pandemic affected crime rates in Malaysia?

During the COVID-19 pandemic, Malaysia saw a temporary decline in certain crimes like street theft and burglary due to lockdowns, but there was an increase in cybercrime and domestic-related offenses.

What regions in Malaysia have the highest crime rates?

Urban areas such as Kuala Lumpur, Selangor, and Johor have consistently reported higher crime rates compared to rural regions, mainly due to higher population density and economic activities.

How does Malaysia compare with other ASEAN countries in terms of crime statistics?

Malaysia's crime rate is generally moderate compared to other ASEAN countries, with effective law enforcement contributing to relatively lower violent crime rates but challenges remain in addressing cybercrime and drug trafficking.

What measures are being taken by Malaysian authorities to reduce crime?

Malaysian authorities have implemented community policing, increased surveillance, crime prevention campaigns, and enhanced cybercrime units to tackle various types of crime effectively.

Are there any recent trends in cybercrime in Malaysia?

Cybercrime in Malaysia has been on the rise, with increases in online scams, phishing attacks, and identity theft reported, prompting authorities to strengthen digital security measures and public awareness programs.

Additional Resources

1. *Crime Trends and Patterns in Malaysia: An Analytical Overview*

This book offers a comprehensive analysis of crime statistics in Malaysia over the past two decades. It explores various types of crimes, including violent crime, property crime, and cybercrime, providing insights into their prevalence and shifts. The author uses government data and case studies to identify underlying factors influencing crime rates. It is a valuable resource for policymakers, law enforcement, and researchers interested in Malaysian crime trends.

2. *Understanding Crime in Malaysia: Statistical Perspectives and Social Implications*

Focusing on statistical data, this book delves into the social and economic contexts behind crime rates in Malaysia. It evaluates how demographic variables such as age, gender, and income correlate with criminal activity. The book also discusses the impact of urbanization and technological advancements on crime. With detailed charts and graphs, it serves as a guide for criminologists and social scientists.

3. *Malaysian Crime Data Handbook: Patterns, Causes, and Prevention*

This handbook compiles extensive crime data from Malaysian police reports and national surveys. It examines patterns of offenses such as drug trafficking, theft, and domestic violence, highlighting regional differences within the country. The book emphasizes data-driven approaches to crime prevention and policy formulation. It is ideal for students and professionals seeking a data-centric perspective on Malaysian crime.

4. *Cybercrime in Malaysia: Statistical Insights and Emerging Challenges*

Addressing the growing issue of cybercrime, this book presents detailed statistics on cyber offenses reported in Malaysia. It analyzes trends in hacking, online fraud, and identity theft, noting the challenges faced by law enforcement agencies. The author discusses legislative measures and technological tools used to combat cybercrime. This publication is essential for understanding the digital dimension of crime in Malaysia.

5. *Crime and Public Safety in Malaysia: Statistical Reports and Policy Analysis*

This volume compiles official crime reports and examines their implications for public safety policies in Malaysia. It discusses the effectiveness of various law enforcement strategies based on statistical outcomes. The book also reviews community-based initiatives aimed at crime reduction. It offers

a balanced view for policymakers, practitioners, and academics interested in crime prevention.

6. *Violent Crime in Malaysia: A Statistical and Sociological Study*

Concentrating on violent crimes such as homicide, assault, and robbery, this study uses statistical data to explore trends and causes in Malaysia. The author links crime statistics with sociological theories to understand motivations and risk factors. The book also evaluates the criminal justice system's response to violent offenses. It is a critical resource for students of criminology and sociology.

7. *Drug-Related Crime in Malaysia: Trends, Statistics, and Control Measures*

This book investigates the prevalence and patterns of drug-related crimes through detailed statistical analysis. It discusses the relationship between drug abuse and criminal behavior in various Malaysian states. The author reviews government control measures and rehabilitation programs. The text is informative for those studying drug policy and its impact on crime rates.

8. *Crime Mapping and Analysis in Malaysia: Techniques and Applications*

Focusing on geographic information systems (GIS) and crime mapping, this book explores how spatial data analysis enhances understanding of crime distribution in Malaysia. It showcases case studies where mapping has improved police response and resource allocation. The book explains methodologies for collecting and interpreting crime statistics spatially. It is an essential read for law enforcement analysts and urban planners.

9. *Youth Crime in Malaysia: Statistical Trends and Preventive Strategies*

This publication examines crime statistics related to juvenile offenders in Malaysia. It highlights common offenses among youth and explores social, economic, and educational factors contributing to delinquency. The book also discusses prevention programs and rehabilitation efforts tailored for young offenders. It serves as a useful guide for educators, social workers, and policymakers focused on youth crime reduction.

crime statistics in malaysia: Malaysia Official Year Book Malaysia, 1968

crime statistics in malaysia: Towards a Malaysian Criminology Muzammil Quraishi, 2020-03-11 This book provides a critical analysis of criminological scholarship in Malaysia, presenting a focused exploration of the key qualities and limitations to studies on crime, deviance, victimization and criminal justice in this country. This text connects contemporary crime problems with historical legacies such as the impact of colonialism and the influence of ethno-nationalism and

authoritarianism in the region. Conflict and tension created by legal pluralism is illustrated via three case studies exploring apostasy, Islamic rehabilitation centres, and retention and use of the death penalty. In addition to a critique of contemporary Malaysian criminological scholarship, *Towards a Malaysian Criminology* suggests a composite, critical criminological approach to guide future research. This approach draws on theoretical traditions in critical race theory, critical realism, ultra-realism and the emerging field of Islamic critical realism. Given the multidisciplinary nature of the discipline, this text will appeal to scholars of criminology, sociology, law, politics and Islamic theology.

crime statistics in malaysia: Area Handbook for Malaysia Nena Vreeland, 1977 General study of Malaysia - covers historical and geographical aspects, population, ethnic groups, languages, social structure, religion, living conditions, education, culture and mass media, politics and government, international relations, the economic structure, agriculture and industry, trade, the armed forces, the administration of justice, etc. Bibliography pp. 399 to 432, flow charts, glossary, maps and statistical tables.

crime statistics in malaysia: Lessons in Sustainable Development from Malaysia and Indonesia S. Hsu, N. Perry, 2014-11-20 Sustainable Development in Malaysia and Indonesia examines a range of topics pertaining to sustainable development in the two countries. While Indonesia and Malaysia are geographically close, Indonesia lags behind Malaysia in terms of well-being, with a lack of social services, and economic indicators, as GDP per capita is lower than that in Malaysia. Environmental problems are similar, since both possess large amounts of biodiversity and natural resources. Hsu and Perry provide a concise overview of sustainable development in the nations, make policy recommendations for each country, and discuss sustainable development experiments in both countries.

crime statistics in malaysia: Soft Computing in Data Science Bee Wah Yap, Azlinah Hj Mohamed, Michael W. Berry, 2018-12-10 This book constitutes the refereed proceedings of the 4th International Conference on Soft Computing in Data Science, SCDS 2018, held in Bangkok, Thailand, in August 2018. The 30 revised full papers presented were carefully reviewed and selected from 75 submissions. The papers are organized in topical sections on machine and deep learning, image processing, financial and fuzzy mathematics, optimization algorithms, data and text analytics, data visualization.

crime statistics in malaysia: Malaysia's New Ethnoscapes and Ways of Belonging Gaik Cheng Khoo, Julian C.H. Lee, 2017-10-02 This book provides a picture of a globalized Malaysia where its conventionally-conceived multi-ethnic composition of Malays, Chinese, Indians and Others rub shoulders with or interact more intimately on a daily basis with transnational ethnoscapes of migrant workers, asylum seekers, international students, and foreign spouses. It asks how, as Malaysians become wedded to their citizenship, they extend the same awareness of rights and claims to non-citizens such as African international students, the Indonesian maids who look after their children, and the Chins and stateless Rohingyas who populate the landscape as refugees and undocumented workers. What are the possibilities of forming cosmopolitan solidarities with non-Malaysians? And what are the newcomers' strategies for place-making and belonging? And to bring the discussions of citizenship in Malaysia into relief, it is also asked how Malaysians abroad seek to enact and make meaningful their Malaysian citizenship. A diversity of experiences shapes the narratives in the chapters: of racialization, rejection, boundary-making and exclusivity, resilience and adaptation. This book was published as a special issue of *Citizenship Studies*.

crime statistics in malaysia: Handbook of Asian Criminology Jianhong Liu, Bill Heberton, Susyan Jou, 2012-12-09 The Handbook of Asian Criminology aims to be a key reference for international scholars with an interest in the broad theme of international criminology in general, and the Asian region in particular. Contextualization is a key theme in this book. The role of context is often underemphasized in international criminology, so the Handbook of Asian Criminology's premise that crime and the responses to it are best understood as deeply embedded in the cultural specificity of the environment which produces them will play a key role throughout the work.

Attention will be given to country- and region specific attitudes towards crime and punishment.

crime statistics in malaysia: Finding Malaysia Zairil Khir Johari, Some of the most engaging contemporary writing has seen the transformation of the political column into a literary art form – an important way of taking in the world and thinking deeply about it. In his first collection of essays, Zairil Khir Johari offers quick-witted and focused reflections on some of the most pressing and contentious issues of the day. At the heart of the matter is the bane of Malaysian politics – the ethnic question – from which he explores a range of high-profile issues: identity, secularism, federalism, the economy, good governance and education. After sixty years of nationhood, Zairil finds much that is wrong with Malaysia. Its eccentricities are by no means benign. Yet these essays also offer answers to his own assertion that ‘we need to move beyond this.’ At once both philosophical and practical, Finding Malaysia lays down a marker for any serious debate over the future trajectory of the country.

crime statistics in malaysia: Decision Mathematics, Statistical Learning and Data Mining Wan Fairos Wan Yaacob, Yap Bee Wah, Obaid Ullah Mehmood, 2024-10-26 This book is a collection of selected research papers presented at the Mathematics, Statistics and Computing Technology (ICMSCT2023), held at the UST Angelicum College, Philippines, from 20th to 21st September 2023. This biennial event is a result from collaborations of university partners in Malaysia, Thailand, Indonesia and Philippines. Increasing investment in digital technologies is a challenge faced by most countries after the crisis caused by COVID-19 and the demand of technological revolution 4.0. Indirectly, regardless of their level of development, they take into account the importance of redesigning strategies for resilient and sustainable regional economic development, increasing regional resilience and minimizing recovery costs as a basis for development. In such situation, this book gather discussion, viewpoints and findings on the recent works of mathematical and computing technology applications in order to propose solutions to overcome adversity of digital resilience. This book covers a wide range of topics on applied mathematics, which includes decision mathematics and also applied statistics covering statistical learning with applications. In addition, the book also highlight the latest application of statistical mining and data visualization, particularly on data mining, machine learning and data visualization. Editors believe this book will interest and influence researchers on the recent techniques, methodologies and applications to ensure digital resilience and support future research.

crime statistics in malaysia: Area Handbook for Malaysia and Singapore American University (Washington, D.C.). Foreign Areas Studies Division, 1965

crime statistics in malaysia: MALAYSIA Collection of Essays Firend Al. Rasch, Impressed with the economic performance of Malaysia, triggered an interest in examining how Malaysia (then under PM Mahathir) managed to pull out of the financial crisis of 1997, that gripped much of South East Asia. Years later, Malaysia managed to pull itself out of the financial crisis, and to be a rising Asian tiger. This early interest has turned into love and affection to a country with unique history, resources, and marvelous people. The deeper my research of Malaysia, the more my frustration grew with the lack of ability of a nation to move into a unique socio-economic position. That is, to equalize with Singapore, or compete at the global level with Korea. I chose 2020 to publish this body of work, because I was waiting to confirm my hypothesis that Malaysia will not manage to achieve Wawasan 2020 (vision 2020), which is to be amongst 1st world nations. Failing to achieve vision 2020 is no coincidence. Malaysia is stuck in the middle between cheap production countries such as Vietnam and Korea, and services-based economies such as Singapore. The first essay that follows the introduction is called The Phenomenon of Economic Inertia. The premise for this research paper is that Malaysia is suffering from a phenomenon of inertia, economically however, that it is incapable of pulling itself out of its current position like many developing nations) for number of reasons. With corruption being deeply rooted in the varying layers of society, and a leadership that failed to control corruption (as in the case of Singapore) and move the country into globally competitive position. This is what is meant by a “Phenomenon of Inertia” that is a conscious self-inflicted condition. The human factor in the hypothesis of “Phenomenon of Inertia” does comprise of society

at large; people, leadership, and institutions. Managerial practices in Malaysia are still hierarchical and power based. Such hierarchy and power bases, are an evident participant in the inner-play of socio-economics of the Malaysian nation. The Malaysian current state of affairs (as of 2020) is self-inflicted condition. With the Malaysia education system being deeply flawed. This naturally led into the state of Malaysian lack of industrial competitiveness, which is not breaking through its global competitors. With so much to offer, Malaysia still has a great chance to make the leap forward to achieve its Wawasan to be realized in a later date, as long as it gets there. This will entirely depend on the will of the Malaysian people collectively.

crime statistics in malaysia: Proceedings of the International Conference on Computing, Mathematics and Statistics (iCMS 2015) Abd-Razak Ahmad, Liew Kee Kor, Illiasaak Ahmad, Zanariah Idrus, 2016-11-24 This proceedings volume consists of refereed papers presented at the Second International Conference on Computing, Mathematics and Statistics (iCMS 2015) held in Langkawi, Malaysia in November 2015. Divided into three sections - Computer Science, Mathematics and Statistics - the book includes both quantitative and qualitative research that confronts current societal issues. Within the main sections, the book also covers education based research works and the applications of computer and mathematical sciences in social science, business, industries and the life and hard sciences. Drawing on the theme Bridging Research Endeavor on Computing, Mathematics and Statistics, each of the conference papers are carefully selected and edited to cater to readers from diverse applied and social sciences backgrounds. The book allows for the contemplation and reflection on the possibility of the knowledge growth and knowledge sharing in building a better world for future generations.

crime statistics in malaysia: Encyclopedia of Criminal Activities and the Deep Web Khosrow-Pour D.B.A., Mehdi, 2020-02-01 As society continues to rely heavily on technological tools for facilitating business, e-commerce, banking, and communication, among other applications, there has been a significant rise in criminals seeking to exploit these tools for their nefarious gain. Countries all over the world are seeing substantial increases in identity theft and cyberattacks, as well as illicit transactions, including drug trafficking and human trafficking, being made through the dark web internet. Sex offenders and murderers explore unconventional methods of finding and contacting their victims through Facebook, Instagram, popular dating sites, etc., while pedophiles rely on these channels to obtain information and photographs of children, which are shared on hidden community sites. As criminals continue to harness technological advancements that are outpacing legal and ethical standards, law enforcement and government officials are faced with the challenge of devising new and alternative strategies to identify and apprehend criminals to preserve the safety of society. The Encyclopedia of Criminal Activities and the Deep Web is a three-volume set that includes comprehensive articles covering multidisciplinary research and expert insights provided by hundreds of leading researchers from 30 countries including the United States, the United Kingdom, Australia, New Zealand, Germany, Finland, South Korea, Malaysia, and more. This comprehensive encyclopedia provides the most diverse findings and new methodologies for monitoring and regulating the use of online tools as well as hidden areas of the internet, including the deep and dark web. Highlighting a wide range of topics such as cyberbullying, online hate speech, and hacktivism, this book will offer strategies for the prediction and prevention of online criminal activity and examine methods for safeguarding internet users and their data from being tracked or stalked. Due to the techniques and extensive knowledge discussed in this publication it is an invaluable addition for academic and corporate libraries as well as a critical resource for policy makers, law enforcement officials, forensic scientists, criminologists, sociologists, victim advocates, cybersecurity analysts, lawmakers, government officials, industry professionals, academicians, researchers, and students within this field of study.

crime statistics in malaysia: Terrorist Rehabilitation and Community Engagement in Malaysia and Southeast Asia Mohd Mizan Aslam, Rohan Gunaratna, 2019-11-04 The contributors to this book analyse the different approaches and modes of terrorist rehabilitation that have been attempted by Malaysia, and other countries in Southeast Asia. With an emphasis on the particular

contexts within which they operate, this book examines the factors that determine the relative successes and failure of a wide range of community initiatives in integrating terrorists back into society. These initiatives include using methods based on social psychology, religion, and entrepreneurship to develop a comprehensive approach to rehabilitating and deradicalizing terrorists in Malaysia as well as Singapore, Indonesia and the Philippines. As such it makes an important contribution to the global policy debate, coloured by the unique characteristics of the South East Asia region. A valuable resource for researchers and policymakers seeking constructive ways to counter violent extremism.

crime statistics in malaysia: Islamic perspectives relating to business, arts, culture and communication Roaimah Omar, Hasan Bahrom, Geraldine de Mello, 2015-06-16 This timely book explores how the Malays and Muslims in general are faced with challenges in the fields of business, economy and politics, in the modern era of globalisation. These research findings can help the Muslim community to enhance international integration, particularly in Malaysia and Southeast Asia. In this work, scholarly and expert authors explore Islamic perspectives on communication, art and culture, business, and law and policy. They respond to the need to uphold and strengthen the culture, arts and heritage of the Malays. Readers are invited to explore the challenges for the Malay and Muslim world and to evolve strategies to ensure competitiveness, dynamism and sustainability. Topics such as Islamophobia, drug trafficking, savings behaviours and the role of social media are addressed. These reviewed papers were presented at the International Conference on Islamic Business, Art, Culture & Communication 2014, held in Melaka, Malaysia. They have the potential to strengthen aspects of Islamic economy and leadership, if translated into action plans. This book represents essential reading for scholars of Islamic studies and will be of interest to those examining Southeast Asia and the Malay world.

crime statistics in malaysia: Media, Culture and Society in Malaysia Yeoh Seng Guan, 2010-02-25 This book presents a comprehensive, full-length analysis of the uses of media and communication technologies by different social actors in Malaysia. Unlike other studies of the media in Malaysia which concentrate on political economy or freedom of the media approaches, this book focuses on the ways in which different media forms have constituted cultural practices and power relations amongst particular audiences and publics. It also examines the ways in which technologies of varying scales and range have been appropriated for various subaltern purposes and counter-hegemonic agendas. Drawing upon recent case studies on the deployment of different media - including mainstream and independent films, television programming, black metal music, community rituals, political advertising, the internet, and artistic visual installations - it provides valuable insights into the complex, vibrant ways in which these different media forms have negotiated with the dominant cultural representations of Malaysian society. The book makes an important contribution to the emergent disciplines of media studies and cultural studies in Malaysia.

crime statistics in malaysia: OECD Development Pathways Multi-dimensional Review of Kazakhstan Volume 1. Initial Assessment OECD, 2016-01-20 Kazakhstan's economy and society have undergone deep transformations since the country declared independence in 1991. Kazakhstan's growth performance since 2000 has been impressive, averaging almost 8% per annum in real terms and leading to job creation and progress in the well-being of its citizens

crime statistics in malaysia: Consumer Financial Vulnerabilities in Malaysia Nurul Shahnaz Ahmad Mahdzan, Mohd Edil Abd Sukor, Izlin Ismail, Mahfuzur Rahman, 2020-11-29 This book examines four aspects of Malaysian consumers' financial vulnerabilities. First, it discusses the issue of over-indebtedness due to excessive reliance on consumer financing. Second, the book investigates why Malaysians are ill-prepared for their golden years in terms of retirement planning and savings. Third, it delves into the problem of financial fraud victimisation among Malaysian consumers. Fourth, the book analyses the reasons why Malaysians are underinsured despite the distinct benefits of life insurance. Drawing on secondary data from government agencies such as Bank Negara Malaysia, Employees' Provident Fund, Royal Malaysian Police and the Department of Statistics Malaysia, each chapter presents statistical trends reflecting the four financial vulnerabilities.

In-depth analyses of the literature reveal three broad psychological domains (cognition, motivation, and disposition) and specific psychological factors (e.g. over-confidence, self-control, social norms, and financial literacy) that significantly influence consumers' financial decisions. The four financial vulnerabilities investigated in this book directly address the strategic outcomes of the Malaysian National Strategy for Financial Literacy 2019-2023 (MNSFL), a five-year plan to elevate the financial literacy of Malaysians. Finally, the book presents strategic recommendations that are believed to be useful guidelines for relevant policymakers to promote positive financial behaviours and rational attitudes among consumers. It will be a useful resource for policymakers and researchers interested in economic psychology and behavioural finance.

crime statistics in malaysia: *Malaysia* John Hilley, 2001-10 Malaysia is an increasingly important player. Prime Minister Dr Mahathir Mohamad is now Asia's longest-serving leader. This work on Malaysian politics offers an analysis of the Mahathir project, examining how Mahathir has, over 20 years, translated the basis of the ruling bloc's legitimacy from one of coercive domination and ethnic card-playing into a more consensual form of hegemonic support. It argues that Mahathir has made considerable progress in building consent. Since the 1997 economic crisis and purging of Mahathir's former deputy Anwar Ibrahim, new problems have appeared within the ruling Barisan Nasional coalition and its leading party, the United Malays National Organization (UMNO). As Mahathir seeks to rebuild ideological support other parties have mounted a counter-hegemonic alternative to the prevailing project. This book provides an understanding of these contending forces and the new engagement of ideas taking place within Malaysia's changing political landscape.

crime statistics in malaysia: International encyclopedia of adolescence Jeffrey Jensen Arnett, 2007 Publisher description
