**crime statistics hyde park chicago:** *Chicago's Block Clubs* Amanda I. Seligman, 2016-10-04  
What do you do if your alley is strewn with garbage after the sanitation truck comes through? Or if you're tired of the rowdy teenagers next door keeping you up all night? Is there a vacant lot on your block accumulating weeds, needles, and litter? For a century, Chicagoans have joined block clubs to address problems like these that make daily life in the city a nuisance. When neighbors work together in block clubs, playgrounds get built, local crime is monitored, streets are cleaned up, and every summer is marked by the festivities of day-long block parties. In *Chicago's Block Clubs*, Amanda I. Seligman uncovers the history of the block club in Chicago—from its origins in the Urban League in the early 1900s through to the Chicago Police Department's twenty-first-century community policing program. Recognizing that many neighborhood problems are too big for one resident to handle—but too small for the city to keep up with—city residents have for more than a century created clubs to establish and maintain their neighborhood's particular social dynamics, quality of life, and appearance. Omnipresent yet evanescent, block clubs are sometimes the major outlets for community organizing in the city—especially in neighborhoods otherwise lacking in political strength and clout. Drawing on the stories of hundreds of these groups from across the city, Seligman vividly illustrates what neighbors can—and cannot—accomplish when they work together.

**crime statistics hyde park chicago:** *The Life of Saul Bellow* Zachary Leader, 2018-11-06  
When this second volume of *The Life of Saul Bellow* opens, Bellow, at forty-nine, is at the pinnacle of American letters - rich, famous, critically acclaimed. The expected trajectory is one of decline: volume 1, rise; volume 2, fall. Bellow never fell, producing some of his greatest fiction (*Mr Sammler's Planet*, *Humboldt's Gift*, all his best stories), winning two more National Book Awards, a Pulitzer Prize, and the Nobel Prize. At eighty, he wrote his last story; at eighty-five, he wrote *Ravelstein*. In this volume, his life away from the desk, including his love life, is if anything more dramatic than in volume 1. In the public sphere, he is embroiled in controversy over foreign affairs, race, religion, education, social policy, the state of culture, the fate of the novel. Bellow's relations with women were often fraught. In the 1960s he was compulsively promiscuous (even as he inveighed against sexual liberation). The women he pursued, the ones he married and those with whom he had affairs, were intelligent, attractive and strong-willed. At eighty-five he fathered his fourth child, a daughter, with his fifth wife. His three sons, whom he loved, could be as volatile as he was, and their relations with their father were often troubled. Although an early and engaged supporter of civil rights, in the second half of his life Bellow was angered by the excesses of Black Power. An opponent of cultural relativism, he exercised great influence in literary and intellectual circles, advising a host of institutes and foundations, helping those he approved of, hindering those of whom he disapproved. In making his case, he could be cutting and rude; he could also be charming, loyal, and funny. Bellow's heroic energy and will are clear to the very end of his life. His immense achievement and its cost, to himself and others, are also clear.

**crime statistics hyde park chicago:** *Pockets of Crime* Peter K. B. St. Jean, 2008-09-15 Why, even in the same high-crime neighborhoods, do robbery, drug dealing, and assault occur much more frequently on some blocks than on others? One popular theory is that a weak sense of community among neighbors can create conditions more hospitable for criminals, and another proposes that neighborhood disorder—such as broken windows and boarded-up buildings—makes crime more likely. But in his innovative new study, Peter K. B. St. Jean argues that we cannot fully understand the impact of these factors without considering that, because urban space is unevenly developed, different kinds of crimes occur most often in locations that offer their perpetrators specific advantages. Drawing on Chicago Police Department statistics and extensive interviews with both law-abiding citizens and criminals in one of the city's highest-crime areas, St. Jean demonstrates that drug dealers and robbers, for example, are primarily attracted to locations with businesses like liquor stores, fast food restaurants, and check-cashing outlets. By accounting for these important factors of spatial positioning, he expands upon previous research to provide the most comprehensive explanation available of why crime occurs where it does.

Hoyt, Jack W. Meek, Ulf Zimmermann, 2017-09-29 Initiated and governed by property or business owners under the authorization of state and local governments, business improvement districts (BIDs) have received a very mixed reception. To some, they are innovative examples of self-governance and public-private partnerships; to others, they are yet another example of the movement toward the privatization of what should be inherent government responsibilities. Among the first books to present a collection of scholarly work on the subject, Business Improvement Districts: Research, Theories, and Controversies brings together renowned leaders in the field to compile the highest-quality theoretical, legal, and empirical studies into one comprehensive volume. Investigating fundamental concerns at the core of the debate, as well as potential solutions, this groundbreaking resource: Tackles the need for improved problem solving and efficiency in service delivery Examines new and innovative policy tools for both the public and private sectors Evaluates whether BIDs do ignore the needs and voices of residential property owners Discusses the challenge created by social segregation in cities Addresses lack of accountability by BIDs to the public and elected representatives From different perspectives, leading practitioners and academics analyze the pros and cons of BIDs both in the United States and around the world. They look at their impact on urban planning and retail revitalization, consider their legal implications, and explore ways to measure BID performance. Filled with case studies of urban centers including San Diego, Atlanta, New York, Toronto, and Capetown, and state models such as New Jersey and Pennsylvania, this examination bring together essential information for researchers as well as those leaders and policy makers looking to adopt a BID model or improve one already in place.
