

crime statistics in iran

crime statistics in iran provide critical insights into the patterns and trends of criminal activity within the country. Understanding these statistics is essential for policymakers, law enforcement agencies, researchers, and the public to gauge the safety and security environment in Iran. This article delves into the most recent and relevant crime data, highlighting various types of crime, regional differences, and the social and economic factors influencing crime rates. Additionally, it examines the legal framework and the effectiveness of law enforcement efforts in combating crime. By analyzing crime trends and statistics, this comprehensive overview aims to present an accurate picture of crime dynamics in Iran. The discussion will cover categories of crimes, including violent crimes, property crimes, drug-related offenses, cybercrime, and more, followed by an exploration of governmental responses and crime prevention strategies.

- Overview of Crime Statistics in Iran
- Types of Crimes Reported
- Regional Variations in Crime Rates
- Factors Influencing Crime in Iran
- Law Enforcement and Judicial Response
- Crime Prevention and Future Trends

Overview of Crime Statistics in Iran

Crime statistics in Iran are collected and reported by various government agencies, including the Iranian Police (NAJA) and the judiciary. These statistics offer a quantitative measure of criminal activity and help track changes over time. The official crime reports typically categorize offenses by type, severity, and geographic location. Over recent years, data suggest fluctuations in crime rates, with some categories showing increases while others decline. Accurate data collection faces challenges due to underreporting, especially for socially sensitive crimes. Nevertheless, available statistics provide a foundational understanding of crime patterns in Iran's socio-political context.

Data Collection and Reporting Mechanisms

The primary sources of crime data in Iran include police records, court records, and victim surveys. The Iranian government has implemented systematic data collection protocols to improve the reliability of crime statistics. However, cultural factors and stigmatization can affect reporting rates, particularly in cases involving domestic violence or sexual offenses. Despite these challenges, annual crime reports are published, offering insights into trends and enabling comparisons across years and regions.

Trends Over Recent Years

Recent data indicate that certain types of crime, such as drug trafficking and cybercrime, have seen notable increases, while violent crimes like homicide have remained relatively stable or decreased slightly. Economic sanctions and social pressures have also influenced crime dynamics, with some illicit activities emerging as responses to economic hardship. Overall, crime statistics in Iran reveal a complex picture influenced by multiple internal and external factors.

Types of Crimes Reported

The crime landscape in Iran encompasses a variety of offenses, ranging from violent crimes to white-collar crimes. Understanding the distribution and prevalence of different crime types is essential to grasp the overall security situation. Below are key categories frequently reported in official statistics.

Violent Crimes

Violent crimes include homicide, assault, robbery, and domestic violence. Although the homicide rate in Iran is relatively low compared to global averages, incidents of assault and robbery are more common in urban centers. Domestic violence remains a significant yet underreported issue, influenced by cultural and legal factors that sometimes discourage victims from filing complaints.

Property Crimes

Property crimes involve burglary, theft, and vandalism. These offenses are prevalent in both urban and rural areas, with theft being the most frequently reported property crime. Economic conditions have a direct impact on the incidence of property crimes, as financial hardship may drive individuals toward such activities.

Drug-Related Offenses

Iran is a key transit country for narcotics, particularly opium and heroin, resulting in high rates of drug-related crimes. Drug trafficking, possession, and abuse are significant challenges for law enforcement agencies. The government has implemented strict anti-narcotics laws and launched numerous campaigns to combat drug-related criminal activity.

Cybercrime

With increasing internet penetration, cybercrime has emerged as a growing concern in Iran. Crimes include hacking, online fraud, identity theft, and the spread of illegal content. Iranian authorities have developed specialized units to address cyber threats, yet the rapid evolution of technology presents ongoing challenges.

Other Crimes

Other reported crimes include corruption, bribery, and white-collar offenses, which affect different sectors of society. Human trafficking and smuggling are also noted concerns, although less frequently reported in official crime statistics.

Regional Variations in Crime Rates

Crime statistics in Iran demonstrate notable regional disparities, reflecting differences in socio-economic conditions, population density, and law enforcement presence. Understanding these regional patterns is vital for targeted crime prevention and resource allocation.

Urban Versus Rural Crime Rates

Urban areas such as Tehran, Mashhad, and Isfahan tend to report higher crime rates overall, particularly for property crimes and violent offenses. High population density, economic inequality, and anonymity contribute to elevated crime levels in cities. Conversely, rural areas often experience lower crime rates but may face unique challenges such as smuggling and drug trafficking due to proximity to borders.

Border Provinces and Crime

Provinces bordering Afghanistan, Pakistan, and Iraq report higher incidences of drug trafficking and smuggling-related crimes. These border regions are strategic points for narcotics transit, influencing local crime dynamics. Law enforcement agencies in these areas often prioritize anti-smuggling operations and cross-border cooperation efforts.

Socioeconomic Disparities and Crime

Regions with higher unemployment rates, lower education levels, and limited economic opportunities tend to have elevated crime rates. Socioeconomic deprivation correlates strongly with increased involvement in property crimes and drug offenses, underscoring the importance of addressing underlying social issues to reduce crime.

Factors Influencing Crime in Iran

Several factors contribute to the crime situation in Iran, ranging from social and economic to political influences. Crime statistics in Iran must be analyzed within this broader context to identify root causes and effective interventions.

Economic Conditions

Economic challenges, including inflation, unemployment, and sanctions, have a direct impact on crime rates. Financial hardship can drive individuals toward illegal activities such as theft, drug trafficking, or fraud. Conversely, economic growth and stability tend to reduce incentives for criminal behavior.

Social and Cultural Factors

Social norms and cultural values influence crime reporting and prevalence. For example, crimes such as domestic violence and sexual offenses may be underreported due to stigma. Additionally, religious and legal frameworks shape the types of punishments and social responses to crime.

Legal and Institutional Framework

The structure and effectiveness of the criminal justice system play a critical role in crime control. Iran's legal system is based on Islamic law combined with civil law elements, affecting definitions of crime, procedures, and penalties. Efficient law enforcement and judicial processes are essential to deterrence and public trust.

Technological and Environmental Factors

The rise of digital technology has introduced new crime forms, such as cybercrime, necessitating updated capabilities for detection and prevention. Environmental factors, including urbanization and population growth, also influence crime dynamics by altering social interactions and opportunities for criminal conduct.

Law Enforcement and Judicial Response

The response of law enforcement and the judiciary to crime in Iran is a crucial aspect of the country's overall security framework. Crime statistics in Iran are influenced not only by the prevalence of offenses but also by the efficiency of detection, investigation, and prosecution.

Police and Security Agencies

The Law Enforcement Force of the Islamic Republic of Iran (NAJA) is the primary agency responsible for maintaining public order, preventing crime, and conducting investigations. Specialized units address specific crime categories such as narcotics, cybercrime, and organized crime. The police also engage in community outreach and crime prevention programs.

Judicial System and Sentencing

The judiciary in Iran oversees the prosecution, trial, and sentencing of offenders. The legal

framework includes strict penalties for many crimes, ranging from fines and imprisonment to capital punishment for serious offenses. Judicial efficiency and fairness are critical for maintaining public confidence and deterring crime.

Challenges in Law Enforcement

Challenges faced by law enforcement include resource limitations, corruption, and the complexity of certain crimes such as cyber offenses and transnational smuggling. Additionally, balancing strict enforcement with human rights considerations remains an ongoing concern.

Crime Prevention and Future Trends

Effective crime prevention strategies are essential for reducing criminal activity and enhancing public safety in Iran. Crime statistics in Iran serve as a basis for developing policies and programs aimed at addressing both immediate and root causes of crime.

Government Initiatives

The Iranian government has launched various initiatives to combat crime, including increased funding for law enforcement, public education campaigns, and social welfare programs targeting vulnerable populations. Efforts to modernize police capabilities and legal reforms are also underway.

Community Engagement and Education

Community-based programs emphasize crime prevention through education, awareness, and collaboration between citizens and authorities. These efforts aim to reduce social factors contributing to crime and encourage reporting and cooperation with law enforcement.

Technological Advancements

Investments in technology, such as surveillance systems, forensic capabilities, and cybercrime detection tools, enhance the ability to prevent and solve crimes. Continued adaptation to emerging threats and criminal methods is necessary to maintain effectiveness.

Emerging Trends

Future crime trends in Iran may include increased cybercrime, evolving drug trafficking patterns, and challenges related to urbanization. Monitoring crime statistics in Iran will remain vital for identifying these trends early and formulating appropriate responses.

- Economic hardship and social inequalities are significant drivers of crime.

- Drug trafficking and cybercrime are rising concerns in recent years.
- Urban centers report higher rates of violent and property crimes.
- Law enforcement agencies face challenges but are enhancing capabilities.
- Preventive efforts focus on community involvement and technological upgrades.

Frequently Asked Questions

What are the most common types of crimes reported in Iran?

The most common types of crimes reported in Iran include theft, drug-related offenses, fraud, and violent crimes such as assault and homicide.

How has the crime rate in Iran changed over the past decade?

Over the past decade, crime rates in Iran have shown fluctuations, with some decreases in violent crimes but an increase in drug-related offenses due to Iran's position as a transit route for narcotics.

What role does drug trafficking play in Iran's crime statistics?

Drug trafficking is a significant issue in Iran, contributing heavily to crime statistics. Iran's geographical location makes it a major transit route for opiates from Afghanistan, leading to high rates of drug seizures and related criminal activity.

How reliable are crime statistics reported by Iranian authorities?

Crime statistics in Iran may be subject to underreporting or lack of transparency due to political and social factors. Independent verification is limited, so figures should be interpreted with caution.

What measures has the Iranian government taken to reduce crime rates?

The Iranian government has implemented stricter law enforcement, increased surveillance, and harsher penalties for crimes such as drug trafficking and violent offenses to reduce crime rates.

Are cybercrimes increasing in Iran?

Yes, cybercrimes, including hacking, online fraud, and digital privacy breaches, have been increasing in Iran, reflecting global trends and the growing use of digital technologies.

How does Iran's crime rate compare to other countries in the Middle East?

Iran's crime rate is comparable to other countries in the Middle East, with some variations depending on the type of crime. Drug-related offenses are particularly prominent in Iran compared to some neighbors.

What is the impact of socio-economic factors on crime rates in Iran?

Socio-economic factors such as unemployment, poverty, and social inequality contribute to higher crime rates in certain regions of Iran, as economic hardship can lead to increased criminal activity.

How are violent crimes, such as homicide, trending in Iran?

Violent crimes like homicide in Iran have seen a gradual decline in recent years due to improved policing and legal measures, though some areas still report higher incidences.

Additional Resources

1. *Crime Trends and Patterns in Iran: A Statistical Overview*

This book offers a comprehensive analysis of crime trends in Iran using statistical data collected over the last two decades. It explores various categories of crime, including violent crime, property crime, and drug-related offenses, highlighting shifts and patterns across different regions. The author uses advanced statistical methods to interpret the data, making it a valuable resource for policymakers and researchers interested in Iranian crime dynamics.

2. *Understanding Crime Rates in Iran: A Quantitative Approach*

Focusing on the quantitative analysis of crime rates, this book delves into the socio-economic and demographic factors influencing crime in Iran. It presents data-driven insights into how urbanization, unemployment, and education levels correlate with criminal activity. The book serves as an essential guide for criminologists and social scientists studying the Iranian context.

3. *Iranian Crime Statistics: Challenges and Interpretations*

This volume addresses the complexities and limitations inherent in collecting and interpreting crime data in Iran. It discusses issues such as underreporting, legal definitions of crime, and data reliability. Readers will gain a critical perspective on how crime statistics are produced and the implications for law enforcement and public policy.

4. *Drug-Related Crime in Iran: Statistical Insights and Policy Responses*

Examining the significant issue of drug trafficking and abuse, this book provides detailed statistical analysis of drug-related crimes in Iran. It discusses trends in drug seizures, arrests, and sentencing, along with the socio-economic impact on affected communities. The author also evaluates Iran's policies and their effectiveness in combating drug-related offenses.

5. *Violent Crime in Iran: Patterns, Causes, and Statistics*

This book investigates violent crime in Iran through robust statistical data, focusing on homicide, assault, and domestic violence rates. It explores underlying causes such as cultural, economic, and

psychological factors contributing to violence. The study offers policy recommendations aimed at reducing violent crime and improving public safety.

6. *Cybercrime in Iran: An Emerging Statistical Profile*

As cybercrime becomes increasingly prevalent, this book compiles the latest statistics on digital offenses in Iran, including hacking, fraud, and online harassment. It analyzes the challenges faced by law enforcement in tracking and prosecuting cybercriminals. The book is a timely resource for understanding the digital dimension of crime in Iran.

7. *Gender and Crime in Iran: Statistical Perspectives*

This publication explores the relationship between gender and crime in Iran, presenting data on female and male involvement in various offenses. It examines societal attitudes, legal treatment, and the impact of gender norms on criminal behavior. The book sheds light on gender disparities within the Iranian criminal justice system.

8. *Juvenile Delinquency in Iran: Statistical Analysis and Social Implications*

Focusing on youth crime, this book provides an in-depth statistical analysis of juvenile delinquency rates across Iran. It discusses contributing factors such as family environment, education, and peer influence. The author also reviews rehabilitation programs and their effectiveness in preventing recidivism among young offenders.

9. *Crime Reporting and Data Collection in Iran: A Statistical Review*

This book critiques the methods and systems used in Iran for crime reporting and data collection. It highlights the strengths and weaknesses of current practices, offering suggestions for improving accuracy and transparency. The work is essential for stakeholders aiming to enhance the quality of crime statistics in Iran.

crime statistics in iran: *Life on Drugs in Iran* Nahid Rahimipour Anaraki, 2022-08-22 When they initiated a war on drugs in 1979, Iran developed a reputation as having some of the world's harshest drug penalties and as an opponent of efforts to reform global drug policy. As mass incarceration failed to stem the growth of drug use, Iran shifted its policies in 1990 to introduce treatment regimens that focus on rehabilitation. While most Muslim countries and some Western states still do not espouse welfare-oriented measures, Iran has established several harm-reduction centers nationwide through the welfare system for those who use substances. In doing so, Iran moved from labeling drug users as criminals to patients. In *Life on Drugs in Iran*, Anaraki moves beyond these labels to explore the lived experience of those who use and have used illicit substances and the challenges they face as a result of the state's shifting policies. Gaining remarkable access to a community that has largely been ignored by researchers, Anaraki chronicles the lives of current and former substance users in prisons, treatment centers, and NGOs. In each setting, individuals are criminalized, medicalized, and marginalized as the system attempts to normalize them without

addressing the root cause of the problem. Drawing upon first-hand accounts, Anaraki's groundbreaking study takes an essential step in humanizing people with substance abuse issues in Iran.

crime statistics in iran: Juvenile Justice John A. Winterdyk, 2014-10-14 Juvenile justice has been and remains a topical issue at national and international levels. There are various standards and guidelines for administration, but six major models characterize juvenile justice systems worldwide: participatory, welfare, corporatism, modified justice, justice, and crime control. Juvenile Justice: International Perspectiv

crime statistics in iran: The Sacred Law of Islam Hamid R. Kusha, 2017-07-05 Assessing the treatment of women under Iran's justice system, this book offers a rare analysis of women's situation in a system of justice that adheres to Islam's Sacred Law. It also demonstrates that the Sacred Law is one of the most complex, detailed and comprehensive legal theories that Islam has produced in its capacity as a doctrine of social justice.

crime statistics in iran: Area Handbook for Iran Harvey Henry Smith, 1971 General study on Iran, Islamic Republic - covers historical and geographical aspects, population, ethnic groups, languages, social structure, the family, living conditions, education, the arts, religion, ethics, political system, economic structure, agriculture, industry, labour market, defence and the administration of justice. Bibliography pp. 605 to 626, illustration, maps and statistical tables.

crime statistics in iran: Iran, a Country Study American University (Washington, D.C.). Foreign Area Studies, 1978

crime statistics in iran: Crime and Crime Control Gregg Barak, 2000-06-30 Are crime rates rising or falling around the world? Are specific types of crime more prevalent in some cultures than others? Do different cultures vary greatly in their attitudes toward crime prevention? Students will find answers to these and similar questions in this unique resource of 15 case studies exploring the problems of crime and crime control in different countries, ranging from Germany to Ghana, to around the world. Cross-cultural comparisons examine the history, the public perceptions, contemporary problems, and the future of crime and crime control in each country. The comparisons also provide readers with the opportunity to discover both the many differences and the many similarities that exist among the different cultures in their rates of crime, forms of prevention, and attitudes toward it. Each of the 15 chapters opens with a brief overview, which includes the type of government and the living environment of the country to introduce readers to the population. The countries were chosen to represent every region of the world and to provide as broad a picture as possible when exploring the issues presented by the problem of crime and different cultures' efforts to control it. The user-friendly format of the volume, with each chapter following the same outline, makes it easy for readers to compare specific aspects among the 15 cultures. These different views of the crime problem around the world and what it means to different people will help students to understand it in a broad sense as a social issue that affects all of humanity.

crime statistics in iran: A Bibliography of Islamic Criminal Law Olaf Köndgen, 2021-12-06 In A Bibliography of Islamic Criminal Law Olaf Köndgen offers the most extensive bibliography on Islamic criminal law ever compiled. Drawing on a multitude of sources online and offline A Bibliography of Islamic Criminal Law covers, in its thematic section, not only the classical crime categories of ḥudūd, qiṣāṣ and ta'zīr but also a large number of newly emerging and related fields. In a second section dedicated to countries and eras, Köndgen comprehensively covers the historical and modern application of Islamic criminal law in all its forms. Unlocking the richness of this sub-field of Islamic law with the help of two detailed indices, this innovative reference work is highly relevant for all those researching Islamic law in general and the application of Islamic criminal law over time in particular. See also A Bibliography of Islamic Criminal Law, Supplement.

crime statistics in iran: Conflicts of Family Law In Islam and Iran Alireza Ahmadian Zarchi, 2015-05-14 The law, which was supposed to encourage marriage and the family institution, has turned into a tool of separation and divorce. Major problems between spouses that are related to the current family law exist in the area of finance mainly with regard to the marriage portion (mahr),

daily expenses (nafaqah) and wages for housework. Each of these three items alone is enough to discourage young adults from getting married or bring about a collapse in the marriage and/or divorce among already married couples

crime statistics in iran: Foreign Relations of the United States, 1969-1976, V. XXVII, Iran, Iraq, 1973-1976 Monica L. Belmonte, Edward Coltrin Keefer, 2013-03-21 The Foreign Relations of the United States series presents the official documentary historical record of major foreign policy decisions and significant diplomatic activity of the United States Government. Part of a subseries of the State Department's Foreign Relations of the United States (FRUS) series that documents the most important issues in the foreign policy of the administrations of Richard M. Nixon and Gerald R. Ford, this volume documents U.S. policy towards Iran and Iraq from 1973 to 1976. The volume's six chapters are divided into two chronological sections. The first section documents the increasingly close political, economic, and strategic relationship, which developed between the U.S. and Iran during the mid-1970s. The second section covers Washington's somewhat more distant interactions with Iraq, with whom the United States did not maintain formal diplomatic relations following the 1967 Arab-Israeli war. Historians, researchers, and students in high school and above, including debate teams, may want to use this resource for the chronological timeframes for U.S. involvement with Iran during the mid-1970s. High school, public, community college, and academic/university libraries will want to include this primary source reference work in their Middle East reference collections. Table of Contents Preface III Sources XIII Abbreviations and Terms XXIII Persons XXIX Note on Covert Actions XXXVII Iran 1 Iraq 599 Index 915 Edited by Monica Belmonte. General Editor, Edward C. Keefer.

crime statistics in iran: Iran under Islamists Majid Mohammadi, 2019-03-08 Since January 2018 Iran has been on the verge of bankruptcy. Iranian society is collapsing due to very high inflation, very low economic growth, high school dropouts, and very high unemployment rates. The political establishment is in disarray. This book tries to explain how the situation is in Iran, why it is not getting better, and what the reactions of ordinary people in Iran are. To avoid lengthy discussions I have provided just a very general picture.

crime statistics in iran: Health and Well-Being in Islamic Societies Harold G. Koenig, Saad Al Shohaib, 2014-05-17 From the first hospitals to pioneering pharmacy techniques, the early history of medicine reflects the groundbreaking contributions of Islamic physicians and scientists. Less recognized, however, is the impact of Islam on the health and daily health practices of modern day Muslims. Meticulously documented with current research sources and relevant religious texts, *Health and Well-Being in Islamic Societies* sheds light on the relationships between Muslim beliefs and physical, psychological, and social health. Background chapters trace Muslim thought on health and healing as it has evolved over the centuries to the present. The authors provide even-handed comparisons with Christianity as the two traditions approach medical and ethical questions, and with Christian populations in terms of health outcomes, assuring coverage that is not only objective but also empirically sound and clinically useful. And as the concluding chapters show, understanding of these similarities and differences can lead to better care for clients, cost-effective services for communities, and healthier Muslim populations in general. Included among the book's topics: Muslim beliefs about health, healing, and healthcare Similarities and differences between Muslim and Christian health beliefs Impact of religion on physical, mental, and community health in Muslims Understanding how Islam influences health Applications for clinical practice Implications for public health Cultural awareness is critical to improving both individual client health and public health on a global scale. *Health and Well-Being in Islamic Societies* is essential reading for clinical and health psychologists, psychiatrists, social workers, and nurses, and will be informative for the general reader as well.

crime statistics in iran: America & Islam Lawrence Pintak, 2019-06-27 Donald Trump's first term as the 45th President of the United States of America has shocked the world. His attitudes towards Islam became a key point of contention on the campaign trail, and in power Trump has continued his war of divisive words and deeds. Here, acclaimed journalist Lawrence Pintak scrutinizes America's relationship with Islam since its foundation. Casting Donald Trump as a symptom of decades of misunderstanding and demonization of the Islamic world, as well as a cause of future tensions, Pintak shows how and why America's relationship with the world's largest religion has been so fractious, damaging and self-defeating. Featuring unique interviews with victims and perpetrators of Trump's policies, as well as analysis of the media's role in inflaming debate, *America & Islam* seeks to provide a complete guide to the twin challenges of terrorism and the polarizing rhetoric that fuels it, and sketches out a future based on co-operation and the reassertion of democratic values.

crime statistics in iran: *The State of Social Progress of Islamic Societies* Habib Tiliouine, Richard J. Estes, 2016-04-08 This handbook addresses the historical background of the Islamic world and reviews its basic past intellectual achievements. It studies social progress of these regions and sub-regions in comparison with other parts of the world. It uses large data sets and well established statistically weighted Indexes in order to assess the nature and pace of the multiple facets of social change in member states of the Organization of Islamic Cooperation (OIC). The handbook extensively discusses the main challenges confronting the Islamic nations in the social, economic, political, and ideological fields. Though it is recognizable that social change in the Islamic World is generally positive, it remains highly variable in pace and there is room to speed it up to the benefit of millions of deprived Muslim people. Hence, the book studies the different propositions and programs of action, such as the United Nations' Millennium Development Campaign and the OIC's Ten-Year Programme of Action to present an integrated and comprehensive agenda of action to help improve the situation in the Islamic World.

crime statistics in iran: National Criminal Justice Thesaurus , 1994

crime statistics in iran: *Women and Suicide in Iran* S. Behnaz Hosseini, 2021-09-30 Drawing on feminist theory, as well as theory surrounding the correlation between poverty and suicide, this study explores the increased rate of suicide among women in western Iran. Based on empirical research, including interviews with women from the Kurdish region of the country, the author considers the marginalisation of Kurdish populations in Iran, the suppression of their rights, and violence against women in its various forms. With attention to family violence, such as direct physical or sexual assault, psychological bullying or through practices such as forced marriage or honour killings, the author also considers the political nature of such violence, as certain violent practices are enshrined in the Iranian constitution and legitimised in jurisprudential practice. A study of gendered violence and its effects, *Women and Suicide in Iran* will be of interest to scholars working in the fields of Sociology, Criminology and Middle Eastern Studies with interests in violence, gender and suicide.

crime statistics in iran: Financial Times World Desk Reference 2005 DK, 2005-01-17 Whatever you need to know about the world, from Afghanistan to Zimbabwe, have the facts at your fingertips with this complete gazeteer of the globe. Each of the world's 192 nations is surveyed and mapped, including full coverage of the world's newest nations. Informative profiles of overseas dependencies and territories, every fact and stat, plus a full glossary, makes this comprehensive and browser-friendly guide a must-have for any reference collection.

crime statistics in iran: *Social Capital in Political Development in Iran* Ali Abolali Aghdaci, 2020-10-21 Aghdaci argues that Iran has not yet sustained political development due to negligence by its leaders, resulting in a decline of public trust in post-revolutionary governments. He takes a statistical look at the reduction of social capital in Iran and suggests ways this trend can be reversed and political development can The role of social capital in political development and their relevance to Hashemi, Khatami, and Mahmoud Ahmadinejad's presidencies has been relatively neglected in the scholarship. In *Social Capital in Political Development in Iran*, Ali Abolali Aghdaci fills that void

by discussing how states can create social development platforms and proposing an integrated model of social capital and political development. Aghdaci argues that the path to peak political development has not yet been sustained by any government in Iran because in all post-revolutionary governments, the people's trust in the government has fallen sharply due to the negligence and practices of the leaders in the political system. This book takes a statistical look at the reduction of social capital in Iran and suggests ways this trend can be reversed and political development can be maximized.

crime statistics in iran: Checking Iran's Nuclear Ambitions Henry D. Sokolski, Patrick Clawson, Considering the latest Iranian nuclear developments, one might question whether a study now on how best to restrain Tehran is simply one that's come too late. To be sure, estimates vary as to when Iran could build its first bomb. Some believe Tehran could do it before the end of 2005; others think Iran would only be able to do so by the end of the decade. In either case, though, the die seems cast: If Iran wants, it has all that it needs eventually to build a bomb on its own. Certainly, trying to deny Iran further nuclear technology in the hopes that this will prevent it from getting nuclear weapons is no longer a credible strategy. The questions this edited volume addresses are whether or not any strategy can prevent Iran from going nuclear, what the proper goals of such a strategy might be (deterring use, keeping Tehran from deploying weapons, getting it to dismantle its nuclear program, etc.), and what other nonproliferation goals ought to be attempted (including trying to dissuade other nations from following Iran's example). The answers this volume offers are: 1) in the long-run Iran will gain little from going nuclear, and 2) much can be gained by enforcing the nonproliferation rules Iran agreed to and spelling out the costs to Iran of its continuing acquisition of nuclear weapons- related capabilities.

crime statistics in iran: Understanding the Threat to the Homeland From AQAP, Serial No. 113-34, Sept. 18, 2013, 113-1 Hearing, * , 2014

crime statistics in iran: On the Reliability of Economic Models Daniel Little, 2012-12-06 This volume represents a contribution to the philosophy of economics with a distinctive point of view -- the contributors have selected particular areas of economics and have probed these areas for the philosophical and methodological issues that they raise. The primary essays are written by philosophers concentrating on philosophical issues that arise at the level of the everyday theoretical practice of working economists. Commentary essays are provided by working economists responding to the philosophical arguments from the standpoint of their own disciplines. The volume thus represents something of an 'experiment' in the philosophy of science, striving as it does to explore methodological issues across two research communities. The purpose of the volume is very specific: to stimulate a discussion of the epistemology and methodology of economics that works at the level of detail of existing 'best practice' in economics today. The contributors have designed their contributions to stimulate productive conversation between philosophers and economists on topics in the methodology of economics.
