

# crip authorship disability as method

**crip authorship disability as method** is an emerging concept within disability studies and critical theory that reimagines the role of disability in creative and academic production. This approach challenges conventional narratives by positioning disability not merely as a limitation or identity marker but as a deliberate and productive methodology. By integrating crip theory with authorship practices, scholars and artists utilize disability as a lens to critique normative structures, enable new forms of expression, and foster inclusive storytelling. The use of crip authorship disability as method encourages a redefinition of creativity, highlighting the intersections of embodiment, accessibility, and cultural representation. This article explores the theoretical foundations, practical applications, and broader implications of this method. It also examines how crip authorship influences literary, artistic, and academic fields, contributing to a richer understanding of disability as a source of knowledge and innovation.

- Theoretical Foundations of Crip Authorship Disability as Method
- Applications in Literary and Artistic Practices
- Impact on Academic and Critical Frameworks
- Challenges and Considerations in Crip Methodologies
- Future Directions and Cultural Implications

## Theoretical Foundations of Crip Authorship Disability as Method

The concept of crip authorship disability as method finds its roots in crip theory, a critical framework that emerged from disability studies and queer theory. Crip theory critiques dominant societal norms around ability, normalcy, and productivity, advocating for a reframing of disability experiences as valuable epistemologies. This theoretical foundation challenges the medical and deficit models of disability, which often marginalize disabled bodies and minds by framing them solely as problems to be fixed or overcome.

Crip authorship extends these critiques into the realm of creative production and intellectual labor. It posits that disability can be used intentionally as a methodological tool to disrupt traditional narratives, aesthetics, and modes of knowledge creation. This approach embraces the unique perspectives and lived experiences of disabled authors, positioning them as agents of innovation rather than passive subjects of study.

Key concepts underpinning this method include:

- **Embodiment:** Recognizing the body as an integral part of knowledge production, where disability shapes perception and expression.

- **Intersectionality:** Addressing how disability intersects with other identity categories such as race, gender, and sexuality to inform authorship.
- **Accessibility as Aesthetic:** Viewing accessibility features and accommodations not only as necessities but as creative strategies that influence form and content.
- **Resistance and Subversion:** Using disability to challenge normative structures in literature, art, and academia.

## Applications in Literary and Artistic Practices

Crip authorship disability as method manifests vividly in contemporary literary and artistic practices, where disabled creators incorporate their experiences into their work in innovative ways. These practices often reject traditional notions of coherence, linearity, and universality, favoring fragmented, nonlinear, or multisensory narratives that reflect diverse cognitive and sensory experiences.

### Literary Innovations

In literature, crip authorship encourages experimental forms that foreground disability as both theme and technique. Writers may employ nonstandard syntax, disrupted narrative timelines, or multimodal storytelling to embody the sensory and cognitive diversity of disabled experience. This approach challenges readers to engage with text in new ways and to reconsider assumptions about communication and comprehension.

### Visual and Performing Arts

Artists and performers utilize crip methodologies to incorporate accessibility into their creative processes, transforming limitations into aesthetic choices. This includes the use of assistive technologies, adaptive tools, and collaborative methods that prioritize disabled participants' agency. Performance art, for example, may incorporate embodied experiences of pain, fatigue, or movement difference to convey complex emotional and political messages.

- Use of adaptive technologies in digital art
- Collaborative creation involving disabled and nondisabled artists
- Incorporation of sensory elements such as touch and sound
- Subversion of traditional stage conventions in theater

# **Impact on Academic and Critical Frameworks**

Within academic disciplines, crip authorship disability as method has profound implications for research methodologies, pedagogy, and critical theory. It encourages scholars to adopt reflexive and inclusive approaches that acknowledge disability as a valuable analytical category rather than a marginal or pathological one.

## **Research Methodologies**

Crip methodologies advocate for participatory and accessible research practices that center disabled voices and experiences. This may involve adapting data collection methods, rethinking ethical frameworks, and emphasizing narrative and qualitative data that reflect embodied knowledge. Such approaches challenge the dominance of quantitative, ableist paradigms in academia.

## **Pedagogical Innovations**

In educational settings, the integration of crip authorship methods promotes curricula that recognize diverse learning styles and cognitive differences. This includes flexible assessment strategies, multimodal teaching, and the inclusion of disabled scholars and creators as central figures in the curriculum. It fosters environments where disability is not a barrier but a source of intellectual enrichment.

## **Challenges and Considerations in Crip Methodologies**

While crip authorship disability as method offers transformative potential, it also encounters several challenges and ethical considerations. The complexity of representing disability without reinforcing stereotypes or commodifying experiences requires careful negotiation.

## **Representation and Authenticity**

Ensuring authentic representation involves prioritizing disabled voices and resisting the appropriation of disability narratives by nondisabled authors. Crip authorship emphasizes lived experience as a critical component of authenticity and cautions against simplistic portrayals that perpetuate stigma.

## **Accessibility and Inclusion**

Implementing crip methodologies demands ongoing attention to accessibility, both in the production and dissemination of work. This includes considering physical, sensory, and cognitive access to creative outputs and academic materials, as well as addressing systemic barriers within institutions.

## **Balancing Theory and Practice**

Integrating crip theory into practical authorship requires balancing abstract theoretical frameworks with concrete lived realities. This balance ensures that disability as method remains grounded and meaningful rather than becoming overly academic or detached from community needs.

## **Future Directions and Cultural Implications**

The future of crip authorship disability as method holds promise for expanding the boundaries of creative and intellectual production. As awareness of disability justice grows, this approach is likely to influence mainstream cultural narratives, promoting greater diversity and inclusion.

Emerging technologies, such as artificial intelligence and virtual reality, offer new platforms for crip methodologies to flourish, enabling novel forms of expression and accessibility. Additionally, cross-disciplinary collaborations between disabled creators, technologists, and scholars may further enrich the field.

- Expansion of crip methodologies into digital humanities
- Integration with global disability justice movements
- Development of new accessibility standards in publishing and media
- Increased visibility of disabled authors and artists in mainstream culture

Ultimately, crip authorship disability as method challenges society to rethink the value of disability in cultural production and knowledge creation, advocating for a world where diverse bodies and minds are central to innovation and creativity.

## **Frequently Asked Questions**

### **What does 'crip authorship' mean in the context of disability studies?**

'Crip authorship' refers to the practice of disabled authors embracing and expressing disability as a central aspect of their identity and narrative, often challenging dominant ableist perspectives through their writing.

### **How is 'disability as method' applied in academic research or creative writing?**

'Disability as method' involves using disability not just as a subject but as a critical lens or approach in research and writing, allowing scholars and authors to interrogate norms,

reveal systemic ableism, and produce knowledge that centers disabled experiences.

## **Why is 'crip authorship' considered a powerful method for disability activism?**

Crip authorship empowers disabled individuals to reclaim their stories, resist stereotypes, and create authentic representations, thereby fostering visibility, challenging stigma, and advancing disability rights and social justice.

## **In what ways does employing 'disability as method' influence narrative structure or style?**

Using 'disability as method' can lead to innovative narrative forms that disrupt conventional storytelling, incorporate embodied experiences, embrace non-normative temporality, and highlight sensory or cognitive differences, enriching literary and scholarly expression.

## **Can 'crip authorship' intersect with other critical theories or identities?**

Yes, crip authorship often intersects with feminist, queer, racial, and postcolonial theories, creating multifaceted critiques that address how disability interrelates with other axes of identity and systems of oppression.

## **Additional Resources**

### *1. Care Work: Dreaming Disability Justice* by Leah Lakshmi Piepzna-Samarasinha

This collection of essays and poetry explores the intersections of disability, race, gender, and sexuality through the lens of care work. Piepzna-Samarasinha, a queer disabled writer and activist, uses personal narrative and community stories to challenge normative ideas about productivity and value. The book emphasizes the importance of interdependence and collective care as foundational to disability justice.

### *2. Disability Visibility: First-Person Stories from the Twenty-First Century* edited by Alice Wong

A groundbreaking anthology that centers disabled voices, this collection features a diverse array of essays, memoirs, and reflections by disabled authors. It highlights the multiplicity of disabled experiences and challenges societal stigmas. Wong's editorial work fosters a space where disability is seen as an identity and culture, not merely a medical diagnosis.

### *3. Extraordinary Bodies: Figuring Physical Disability in American Culture and Literature* by Rosemarie Garland-Thomson

Garland-Thomson's seminal work analyzes how physical disability is represented in literature and culture, arguing that disability is a critical lens for understanding identity and human variation. The book introduces key concepts such as the "normate" and emphasizes the role of disability in shaping social narratives. It is foundational for scholars interested in crip theory and disability studies.

4. *Crip Theory: Cultural Signs of Queerness and Disability* by Robert McRuer

This influential text combines queer theory and disability studies to articulate the concept of “crip” as a political and cultural identity. McRuer critiques compulsory able-bodiedness and heteronormativity, arguing for the recognition of alternative ways of being and desiring. The book is essential for understanding disability as a method of critique and resistance.

5. *The Body in Pain: The Making and Unmaking of the World* by Elaine Scarry

Although not exclusively focused on disability, this philosophical work examines the experience of physical pain and its impact on language, power, and social structures. Scarry’s insights into embodiment and suffering provide valuable perspectives for crip theory scholars. The text interrogates how pain can both destroy and create meaning.

6. *Feminist Disability Studies* edited by Kim Q. Hall

This edited volume brings together feminist and disability studies scholars to explore how gender and disability intersect in complex ways. The contributors use crip methodologies to challenge dominant narratives about bodies, identities, and social justice. The book advances conversations about embodiment, agency, and resistance from a feminist-crip perspective.

7. *Black Disabled Art History: Envisioning Disability in African American Visual Culture* by Rashmi Sadana

Sadana’s work centers the experiences and artistic expressions of Black disabled individuals, highlighting how disability is represented and reimaged in African American visual culture. The book employs crip theory to analyze art as a form of resistance and identity-making. It expands disability studies by incorporating race, culture, and aesthetics.

8. *Manifest: Aqueer Feminist Crip Anthology* edited by Alison Kafer and Allyson Nadia Field

This anthology brings together essays, poetry, and art that articulate queer, feminist, and crip perspectives. The contributors explore the intersections of disability with sexuality, gender, and social justice, using crip as a method of critique and creative expression. The collection is a vital resource for understanding how crip authorship challenges normative frameworks.

9. *Care Work: Dreaming Disability Justice* by Leah Lakshmi Piepzna-Samarasinha

A powerful blend of memoir, poetry, and political analysis, this book foregrounds the experiences of disabled people of color and queer disabled communities. It advocates for a transformative vision of care that is radical, communal, and healing. Piepzna-Samarasinha’s work exemplifies crip authorship as a method for envisioning disability justice in practice.

**crip authorship disability as method:** *Crip Authority* Elizabeth Bearden, 2025-09-22

*Crip Authority* explores how Renaissance writers and artists with disabilities drew on consolatory literature to enhance their authority and create a sense of disability community across the centuries. Elizabeth B. Bearden considers how Renaissance writers and artists understood their lived experiences of disability by drawing on the ancient genre of consolation, which aims to comfort people for a variety of hardships, including mental and physical disability. Renaissance writers used the art of consolation to resignify the mental and physical disabilities that their society frequently scorned into an expression of their military, spiritual, political, and most importantly for this study, writerly authority. Bearden names this kind of defiant authorial self-representation crip authority, thereby transgressively crippling our society's ableist notions of who has the ability and authority to write. Disabled authors include Francesco Petrarca, Teresa de Cartagena, Giovanni Paolo Lomazzo, Miguel de Cervantes Saavedra, Robert Burton, and John Milton. They all explore their experiences of disability, but their work has rarely or never been considered from a disability studies perspective. Bearden thus brings today's models of disability studies and crip theory together with early modern articulations of disability based on ancient and Renaissance models of military, political, biblical, and literary authority. In sum, *Crip Authority* makes a significant contribution to the growing field of early modern disability studies and invites us to rethink the extent of crip history and the endurance of disability gain.

**crip authorship disability as method:** *How to Be Disabled in a Pandemic* Mara Mills,

Harris Kornstein, Faye Ginsburg, Rayna Rapp, 2025-02-25 *How to Be Disabled in a Pandemic* chronicles experiences of disabled and chronically-ill people in New York City during the COVID-19 pandemic, tracking wide-ranging themes: incarceration, low wage and essential work, Black mental health, anti-Asian violence, Long COVID, migrant detention centers, blindness and digital accessibility, caregiving, neurodiversity, disability arts, and more--

**crip authorship disability as method:** *South Asian Disability and Deaf Theatres* Kanta

Kochhar-Lindgren, 2025-01-28 *South Asian Disability and Deaf Theatres* investigates translocal intimacies in relation to twenty-first-century transnational South Asian disability theatres in order to lay out new possibilities for accessible theatres. The book provides a theoretical and methodological framework for thinking through the relationships between disability, translocal intimacies, and visceral ethnography. It presents new and innovative approaches to rethinking bodily, cultural, spatial, and performance practices in relation to disability and disability rights that cut across national, sociocultural, and artistic boundaries. The author presents a consideration of some of India's specific theatre examples such as Mahesh Dattani's *Tara*; Manjula Padmanabhan's *Harvest*; Shyambazar Blind Opera House's *Brihannala*; Jana Sanskriti's *The Wasteland: A Journey*; and First Drop Change Foundation's *Playback Theatre*. Through analyses of specific performances and theatre groups and theoretical explorations of visceral ethnography, disability theatres' decolonising initiatives, and disability as method, this book furthers the project of creating the conditions for a radically accessible and open-door theatre for both the present and the future. The first book to cover theatre and Disability Studies in India, it shows that disability literature and theatres assist in delineating ways of reworking the politics of intimacy and belonging within and across differences.

The book makes an important contribution to the broad field of theatre, performance and Disability Studies as well as Feminist Studies and South Asian Studies.

**crip authorship disability as method:** *The Disabled Anthropologist* Sumi Colligan, Anna Jaysane-Darr, 2025-03-31 This book brings much needed attention to disabled anthropologists, making clear that “disabled” and “anthropologist” belong together. The disabled anthropologists who contribute to this volume and on which these chapters focus have refused erasure from a profession that would ignore their critiques and creativity. Applying autoethnographic, photographic, and poetic venues, the contributors assess the drawbacks of their anthropology training programs, the limitations of accessibility practices in the academy, and how their own embodiments and the contingencies of their research and research settings have facilitated the discovery of novel methodologies and insights. Collectively this volume’s contributors demonstrate a shared concern for the wellbeing of disabled ethnographers and interlocutors, whether working with Colombian refugees in Ecuador or those living with chronic pain in Michigan. *The Disabled Anthropologist* is essential reading for students and scholars working in cultural and medical anthropology.

**crip authorship disability as method:** *Unfurl* Eli Clare, 2025-08-15 Blending poetry and creative nonfiction, emotion and activist thinking, Eli Clare explores the pulsing core and porous edges of survival, sorrow, and dreaming.

**crip authorship disability as method:** *Head above Water* Shahd Alshammari, 2023-07-18 This lyrical hybrid memoir revisits a lifetime's worth of personal journals to slowly piece together a narrative of chronic illness—a moving account of survival, memory, loss, and hope. Shahd Alshammari is just eighteen when she is diagnosed with multiple sclerosis, and told by her neurologist that she would not make it past age thirty. Despite what she is told, by thirty, she has become a professor of literature, and has managed to navigate education systems in both Kuwait and the United Kingdom and inspire generations of students. *Head above Water* is the painstaking, philosophical memoir of Shahd Alshammari's life of triumph and resistance, as the daughter of a Palestinian mother and Bedouin father, as a woman marked ill by society, and as a lifelong reader, student, and teacher. Charting her journey with raw honesty, Shahd explores disability, displacement, and belonging—not only of the body, but of culture, gender, and race, and imparts wisdom of profound philosophical value throughout. It is people, human connections, that keep us afloat, she argues—and in storytelling we have the power to gain a sense of agency over our lives.

**crip authorship disability as method:** *Research Methods for the Marginalized* Staci B. Smith, Brian G. Smith, 2025-07-18 This edited volume explores how to effectively and ethically conduct social science research and work with marginalized and vulnerable populations. Many researchers find themselves unprepared for the challenges of studying or working with populations that may be outside their personal expectations and experiences, affecting their ability to accurately represent the lived experiences of marginalized and vulnerable communities. Written by a diverse group of international scholars within the fields of strategic communication and communication studies, this volume provides real-world insights from researchers who not only have direct experience working with marginalized populations, but many of whom are members of these communities. Imperatives include critical lessons for access and accessibility in research. Contributors draw on their own studies to guide readers through the main phases of research, including study design, data collection, and data analysis. The volume is especially suited as a supplementary text for researchers and students studying qualitative research methods in strategic communication and communication studies.

**crip authorship disability as method:** *Ludic Inquiries Into Power and Pedagogy in Higher Education* Amelia Walker, Helen Grimmett, Alison L. Black, 2024-08-30 This book interrogates the role games and playfulness bear in both formal education and informal social learning. Responsive to contemporary social and ecological challenges, this book especially explores games’ interactions with social power. On one hand, games sometimes operate to reinforce ideologies that normalise social injustice and environmental disregard. On the other, games offer

rich possibilities for questioning such ideologies and encouraging change. Strongly interdisciplinary, the book assembles 20 chapters written by 50 experts across fields including education, game design, cultural studies, sociology, Indigenous studies, disability studies, queer studies, STEM, legal studies, history, creative writing, visual arts, music, the creative industries, and social inclusion. These contributions not only make games a focus but incorporate playful research writing strategies, demonstrating methods of what we term ludic inquiry. This includes chapters written using arts-based research, practice-led research, poetic inquiry, narrative inquiry, autoethnography, duoethnography, and more. Organised across four themes – ‘philosophical sparks’, ‘lived experiences’, ‘pedagogical perspectives’, and ‘the spirit of play’ – this book emphasises the radical egalitarian possibilities inherent in critical attention to games and how we play (or get played by) them. Its fresh insights will interest all readers interested in creatively remaking our worlds.

**crip authorship disability as method: ,**

**crip authorship disability as method:** *Roman Comedy against the Subject* Mario Telò, 2025-09-17 Roman Comedy against the Subject provides an expansive interpretation of four Roman comedies named after objects--Plautus's Cistellaria, Aulularia, and Rudens, and Terence's Eunuchus. In this book, the titular object provides an opportunity not to reconceive the relational politics of Roman comedy, but to conceive a different politics of familial and social relations with Roman comedy. Employing object-oriented ontology, psychoanalysis, queer theory, and Black critical theory, the book radically recasts perennial problems of Roman comedy and literature in general: the author, in relation to mothering (alternative maternities); character, in relation to neurodiversity; genre, in relation to sibling-like parentality; and the title itself, in relation to gendering and ungendering. Roman Comedy against the Subject explores the aesthetic and political possibilities of becoming object, of embracing itness. Rather than assimilating objects to subjects or vital agents, the book finds emancipatory potential in renouncing the normative and intrinsically exclusionary subjecthood of he, she, and they, markers of privilege that are burdened by the violence of humanization and often dehumanizing of others. The introduction features nine brief but acute readings of object-oriented modern dramas: Tennessee Williams's Glass Menagerie, Yukio Mishima's The Damask Drum, Eugène Ionesco's Les Chaises, and Alice Childress's String, among others.

**crip authorship disability as method:** *Disability Worlds* Faye Ginsburg, Rayna Rapp, 2024-03-18 Faye Ginsburg and Rayna Rapp chronicle and theorize two decades of immersion in New York City's wide-ranging disability worlds as parents, activists, anthropologists, and disability studies scholars.

**crip authorship disability as method:** *Navigating the Online Networks of Young Creators* Juan Carlos Castro, Joanna Black, 2025-03-26 This volume examines how young creators learn, create, and share their visual art online. Drawing from a robust set of case studies gathered locally, nationally, and internationally over three years with young adults 16-24, this work comes together as a crucial resource for understanding the evolving landscape of online art creation and dissemination by young people. The influence of social media is central to this exploration of the continuous cycle of producing, circulating, and consuming of digital images, here designated as digital visual learning networks (DVLN). As technology remains an inherent part of daily activities, contributions provide insights into how young creators harness tools to learn, innovate, and share.

**crip authorship disability as method:** *Being Understood* Kristin Snoddon, 2025-09-29 Experiences of not understanding and not being understood during interactions are a pervasive aspect of life for many deaf people, so ensuring understanding becomes a moral imperative in deaf worlds and part of deaf ontologies. Through a series of linked applied linguistics studies regarding the primacy of text, signing songs, the mediation practices of deaf interpreters and Caribbean deaf epistemologies of language and understanding, this book outlines theoretical and methodological approaches to analyzing deaf people's experiences of understanding and being understood. These are grounded in a Continental philosophy of language and qualitative methods including autoethnography, interpretative interviews and phenomenology. The book explores issues surrounding linguistic and semiotic repertoires; access and affordances; orientation, sociality and

power; and mediated communication. Ultimately, it reveals both the workings of epistemic injustice related to deaf signers and ways of understanding and being understood that extend beyond named languages.

**crip authorship disability as method:** *Osiris*, Volume 39 Jaipreet Virdi, Mara Mills, Sarah F. Rose, 2024-09-02 Presents a powerful new vision of the history of science through the lens of disability studies. Disability has been a central—if unacknowledged—force in the history of science, as in the scientific disciplines. Across historical epistemology and laboratory research, disability has been “good to think with”: an object of investigation made to yield generalizable truths. Yet disability is rarely imagined to be the source of expertise, especially the kind of expertise that produces (rational, neutral, universal) scientific knowledge. This volume of *Osiris* places disability history and the history of science in conversation to foreground disability epistemologies, disabled scientists, and disability sciencing (engagement with scientific tools and processes). Looking beyond paradigms of medicalization and industrialization, the volume authors also examine knowledge production about disability from the ancient world to the present in fields ranging from mathematics to the social sciences, resulting in groundbreaking histories of taken-for-granted terms such as impairment, infirmity, epidemics, and shōgai. Some contributors trace the disabling impacts of scientific theories and practices in the contexts of war, factory labor, insurance, and colonialism; others excavate racial and settler ableism in the history of scientific facts, protocols, and collections; still others query the boundaries between scientific, lay, and disability expertise. Contending that disability alters method, authors bring new sources and interpretation techniques to the history of science, overturn familiar narratives, apply disability analyses to established terms and archives, and discuss accessibility issues for disabled historians. The resulting volume announces a disability history of science.

**crip authorship disability as method:** *Intoxicated* Mel Y. Chen, 2023-11-28 In *Intoxicated* Mel Y. Chen explores the ongoing imperial relationship between race, sexuality, and disability. They focus on nineteenth-century biopolitical archives in England and Australia to show how mutual entanglements of race and disability take form through toxicity. Examining English scientist John Langdon Down’s characterization of white intellectual disability as Asian interiority and Queensland’s racialization and targeting of Aboriginal peoples through its ostensible concern with black opium, Chen explores how the colonial administration of race and disability gives rise to “intoxicated” subjects often shadowed by slowness. Chen charts the ongoing reverberations of these chemical entanglements in art and contemporary moments of political and economic conflict or agitation. Although intoxicated subjects may be affected by ongoing pollution or discredited as agents of failure, Chen affirmatively identifies queer/crip forms of unlearning and worldmaking under imperialism. Exemplifying an undisciplined thinking that resists linear or accretive methods of inquiry, Chen unsettles conventional understandings of slowness and agitation, intellectual method, and the toxic ordinary.

**crip authorship disability as method:** *Critical Neurodiversity Studies* Jenny Bergenmar, Louise Creechan, Anna Stenning, 2025-07-10 This landmark volume for neurodiversity studies introduces a new, more inclusive field of scholarship for literary and cultural studies. Bringing together scholars and writers from across Europe, it explores the revolutionary potential of neurodivergent scholarly practice and demonstrates that there is no such thing as a ‘normal’ response to cultural production. Drawing on critical disability studies to highlight the ideology behind dominant notions of ability, it moves beyond representations of neurodivergent characters and highlights the entanglement of sensory and cognitive difference with both cultural practices and social status. Combining the recent turn towards psychiatric depathologisation with insights from feminist, queer, intersectional and critical race theory, this volume aims to amplify the epistemic authority of those who have been subject to marginalisation because of the ways we are taught to read, and value literary culture. In essence, this volume reveals what it means to read, write and love literature and the arts as a neurodivergent person.

**crip authorship disability as method:** *The Shakespearean International Yearbook* Alexa

Alice Joubin, Natalia Khomenko, Katherine Schaap Williams, 2024-04-18 The Shakespearean International Yearbook surveys the present state of Shakespeare studies in global contexts, addressing issues that are fundamental to our interpretive encounter with Shakespeare's work and his time. Contributions are solicited from scholars across the field and from both hemispheres of the globe who represent diverse career stages and linguistic traditions. Both new and ongoing trends are examined in comparative contexts, and emerging voices in different cultural contexts are featured alongside established scholarship. Each volume features a collection of articles that focus on a theme curated by a specialist Guest Editor, along with coverage of the current state of the field in other aspects. An essential reference tool for scholars of early modern literature and culture, this annual publication captures, from year to year, current and developing thought in global Shakespeare scholarship and performance practice worldwide.
