There has been close coordination in the development of these guidelines by the Joint Trauma System, and the Defense Committees on Trauma. Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre-hospital units. It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense. Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics (CCFP) ability to follow and execute the medical instructions herein. These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments. Unit medical providers are not expected to employ these guidelines blindly. Unit medical providers are expected to manipulate and adjust these guidelines to their unit's mission and medical air crew training / experience. Medical directors or designated supervising physicians should endorse these guidelines as a baseline, appropriately adjust components as needed, and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics, Enroute Critical Care Nurses, and advanced practice aeromedical providers. The medication section of this manual is provided for information purposes only. CCFPs may administer medications only as listed in the guidelines unless their medical director and/or supervising physician orders a deviation. Other medications may be added, so long as the unit supervising physician and/or medical director approves them. This manual also serves as a reference for physicians providing medical direction and clinical oversight to the CCFP. Treatment direction, which is more appropriate to the patient's condition than the guideline, should be provided by the physician as long as the CCFP scope of practice is not exceeded. Any medical guideline that is out of date or has been found to cause further harm will be updated or deleted immediately. The Medical Evacuation Concepts and Capabilities Division (MECCD) serves as the managing editor of the SMOG and are responsible for content updates, managing the formal review process, and identifying review committee members for the annual review. The Standard Medical Operating Guidelines are intended to provide medical procedural guidance and is in compliment to other Department of Defense and Department of the Army policies, regulatory and doctrinal guidance. Nothing herein overrides or supersedes laws, rules, regulation or policies of the United States, DoD or DA.
