

critical care society conference

critical care society conference events serve as a pivotal platform for healthcare professionals specializing in critical care medicine to converge, share knowledge, and advance patient care standards. These conferences typically gather intensivists, nurses, researchers, and allied health professionals to explore the latest developments in critical care practices, technologies, and research findings. Attendees benefit from keynote speeches, panel discussions, workshops, and poster sessions that focus on innovations in critical care treatment, patient management strategies, and interdisciplinary collaboration. The conferences also provide opportunities for networking, professional development, and collaboration that can lead to improved clinical outcomes in intensive care units. This article delves into the significance of the critical care society conference, its primary components, thematic focuses, and the impact it has on critical care medicine globally. The following table of contents outlines the key areas covered in this comprehensive overview.

- Overview of the Critical Care Society Conference
- Key Themes and Topics Addressed
- Structure and Format of the Conference

Overview of the Critical Care Society Conference

The critical care society conference is an annual or biennial event organized by leading professional organizations dedicated to intensive care medicine. These conferences are designed to foster education, research dissemination, and collaboration among critical care practitioners worldwide. Typically hosted in major cities, the event attracts thousands of participants including physicians, nurses, respiratory therapists, pharmacists, and researchers focused on the care of critically ill patients. The conference agenda emphasizes multidisciplinary approaches that improve patient outcomes in settings such as intensive care units (ICUs), emergency departments, and trauma centers. By bringing together experts in the field, the conference promotes the exchange of cutting-edge knowledge and evidence-based practices.

History and Evolution

The origins of the critical care society conference trace back several decades, evolving alongside advancements in critical care medicine. Initially smaller in scale, the event has grown in size and scope, reflecting the expanding complexities of critical care management. Over time, the conference has incorporated diverse formats such as virtual sessions and interactive workshops to

accommodate changing participant needs and technological advancements. This evolution underscores the conference's commitment to remaining a relevant and dynamic forum for professional growth.

Organizing Bodies

Various national and international critical care societies organize these conferences, including the Society of Critical Care Medicine (SCCM), the European Society of Intensive Care Medicine (ESICM), and other regional organizations. These bodies ensure the conference content is scientifically rigorous, clinically applicable, and aligned with current healthcare standards. Collaboration among societies often results in joint conferences that enhance global participation and knowledge exchange.

Key Themes and Topics Addressed

The critical care society conference covers a wide range of themes reflecting the multifaceted nature of intensive care medicine. Each year, the program is tailored to address emerging challenges, innovative therapies, and evolving clinical guidelines. Core topics often include sepsis management, mechanical ventilation, hemodynamic monitoring, infection control, and patient safety initiatives. Additionally, sessions on ethical considerations, end-of-life care, and the psychological impact of critical illness are integral parts of the conference.

Advances in Technology and Monitoring

One of the prominent themes is the integration of advanced technology in critical care settings. This includes discussions on real-time patient monitoring systems, artificial intelligence in diagnostic support, and novel ventilatory devices. Presentations often highlight how these technologies can enhance patient assessment, reduce complications, and optimize resource utilization.

Research and Evidence-Based Practice

Research dissemination is a cornerstone of the critical care society conference. Attendees engage with the latest clinical trials, meta-analyses, and guideline updates that inform evidence-based practice. Workshops and poster sessions provide platforms for emerging investigators to present findings that may influence future care protocols. This focus on research ensures that clinical decisions are grounded in robust scientific evidence.

Structure and Format of the Conference

The critical care society conference is structured to maximize learning and interaction among participants. The format usually includes plenary sessions, breakout workshops, panel discussions, and poster presentations. Additionally, hands-on training and simulation workshops are often incorporated to enhance practical skills. This diverse format caters to varying learning preferences and professional needs.

Plenary and Keynote Sessions

These sessions feature presentations by renowned experts who provide insights into major trends and breakthrough discoveries in critical care. They set the tone for the conference and address overarching themes relevant to the global critical care community.

Workshops and Interactive Learning

Practical workshops offer attendees opportunities to acquire and refine clinical skills such as advanced airway management, ultrasound-guided procedures, and sedation protocols. Interactive case discussions encourage active participation and problem-solving among multidisciplinary teams.

Networking and Collaboration Opportunities

Dedicated networking events, roundtable discussions, and social gatherings facilitate professional connections. These interactions promote collaborative research initiatives and mentorship opportunities, fostering a strong community within the critical care field.

Benefits for Healthcare Professionals

Participation in the critical care society conference equips healthcare professionals with up-to-date knowledge and skills essential for delivering high-quality critical care. It provides a forum for lifelong learning, professional certification preparation, and exposure to novel therapeutic approaches. Nurses, physicians, and allied health staff gain insights into multidisciplinary teamwork and patient-centered care models.

Continuing Medical Education (CME)

Most conferences offer CME credits, which are vital for maintaining licensure and certifications. This incentivizes attendance and ensures that participants remain current with evolving clinical standards.

Professional Development and Career Advancement

Presenting research, leading sessions, or participating in committees at the conference can enhance professional profiles. Early-career professionals especially benefit from mentorship programs and leadership training offered during the event.

Impact on Clinical Practice and Research

The critical care society conference has a significant influence on shaping clinical protocols and advancing research agendas. Knowledge gained at the conference is often translated into improved patient care guidelines and institutional policies. Furthermore, collaborative research projects

initiated at these meetings contribute to the global body of critical care literature.

Implementation of Best Practices

Insights from conference sessions assist healthcare institutions in adopting evidence-based interventions that reduce ICU mortality, prevent complications, and enhance recovery. Quality improvement initiatives frequently draw from conference content.

Research Collaborations and Funding

The conference environment fosters partnerships that lead to multicenter trials and innovative studies. Funding agencies and industry representatives often participate, facilitating research sponsorship and technology dissemination.

Future Trends and Innovations Highlighted

Each critical care society conference spotlights emerging trends that are poised to transform intensive care delivery. Precision medicine, tele-ICU models, and the use of big data analytics are among the innovations gaining attention. The conference also addresses challenges such as the integration of sustainability practices and the impact of global health crises on critical care resources.

Telemedicine and Remote Monitoring

The expansion of tele-ICU services enables critical care expertise to reach underserved regions. Presentations explore how remote monitoring and virtual consultations improve access and patient outcomes.

Artificial Intelligence and Predictive Analytics

AI-driven tools are increasingly utilized for early detection of patient deterioration and personalized treatment plans. The conference highlights developments in machine learning algorithms that support clinical decision-making.

Sustainability and Resource Management

Sessions dedicated to environmental sustainability in critical care discuss strategies to minimize waste and optimize the use of medical supplies without compromising patient safety. This reflects a growing emphasis on responsible healthcare delivery.

Frequently Asked Questions

What is the Critical Care Society Conference?

The Critical Care Society Conference is an annual event that brings together healthcare professionals, researchers, and experts in critical care medicine to discuss the latest advancements, research, and best practices in the field.

Who should attend the Critical Care Society Conference?

The conference is ideal for intensivists, critical care nurses, respiratory therapists, emergency medicine physicians, researchers, and other healthcare professionals involved in critical care.

What are the main topics covered at the Critical Care Society Conference?

Topics typically include advances in intensive care treatments, sepsis management, ventilator strategies, critical care pharmacology, emerging technologies, and patient safety in critical care settings.

Are there opportunities for continuing medical education (CME) credits at the conference?

Yes, most Critical Care Society Conferences offer CME credits for attending workshops, lectures, and other educational sessions, helping professionals maintain their certifications.

How can I submit a research abstract to the Critical Care Society Conference?

Researchers can usually submit abstracts through the conference's official website during the call for papers period, following specific guidelines on format and content.

Where can I find the schedule and list of speakers for the upcoming Critical Care Society Conference?

The detailed schedule and speaker list are typically published on the official conference website a few months before the event.

Is the Critical Care Society Conference held virtually or in-person?

Depending on the year and circumstances, the conference may be held in-person, virtually, or as a hybrid event to accommodate a wider audience.

What networking opportunities are available at the Critical Care Society Conference?

Attendees can participate in networking sessions, panel discussions, workshops, and social events designed to foster collaboration and professional connections among critical care specialists.

Additional Resources

1. *Advances in Critical Care: Insights from the Society Conference*

This book compiles the latest research findings and clinical practices presented at the annual critical care society conference. It covers a broad range of topics including sepsis management, ventilator strategies, and emerging technologies in intensive care. Designed for clinicians and researchers, it offers practical applications and future directions in critical care medicine.

2. *Innovations in Intensive Care: Proceedings of the Critical Care Society Symposium*

A comprehensive collection of papers and presentations from the Critical Care Society Symposium, this volume highlights cutting-edge innovations in patient monitoring, pharmacology, and critical care protocols. The book emphasizes translational research and the implementation of novel therapies to improve patient outcomes in ICU settings.

3. *Critical Care Society Conference Highlights: Best Practices and Case Studies*

Focusing on real-world applications, this book presents case studies and best practice guidelines discussed during the Critical Care Society Conference. It explores multidisciplinary approaches, ethical considerations, and advanced diagnostic techniques that have been shown to enhance critical care delivery.

4. *Emergency and Critical Care: Conference Proceedings and Expert Perspectives*

Featuring expert commentaries and detailed conference proceedings, this title addresses the management of acute emergencies within critical care environments. Topics include trauma care, cardiac arrest management, and rapid response systems, providing readers with evidence-based strategies to optimize critical patient care.

5. *Future Directions in Critical Care: Research from the Society Conference*

This volume delves into emerging research trends showcased at the Critical Care Society Conference, including precision medicine, artificial intelligence applications, and novel biomarkers. It offers insights into how these advancements may transform intensive care practices and improve patient prognoses in the coming years.

6. *Critical Care Nursing: Insights from the Society Conference*

Dedicated to nursing professionals, this book highlights the latest developments in critical care nursing presented at the conference. It covers topics such as patient safety, sedation protocols, family-centered care, and nurse-led interventions, underlining the essential role of nursing in critical

care teams.

7. Sepsis and Organ Dysfunction: Critical Care Society Conference Review

This focused review compiles research and clinical discussions on sepsis and multi-organ dysfunction syndrome from the Critical Care Society Conference. It provides updates on diagnostic criteria, therapeutic approaches, and patient management strategies aimed at reducing sepsis-related mortality.

8. Mechanical Ventilation Strategies: Insights from the Critical Care Society Gathering

Exploring advancements in respiratory support, this book summarizes key presentations on mechanical ventilation from the society's conference. It discusses lung-protective ventilation techniques, weaning protocols, and innovations in non-invasive ventilation to enhance respiratory care in critically ill patients.

9. Ethical Challenges in Critical Care: Perspectives from the Society Conference

Addressing the complex ethical issues in critical care medicine, this title presents debates and consensus statements from the Critical Care Society Conference. Topics include end-of-life decision-making, resource allocation, and patient autonomy, providing a framework for navigating ethical dilemmas in intensive care units.

critical care society conference: *Intensive Care Nursing* Philip Woodrow, 2002-09-11 Intensive care is a rapidly developing areas of healthcare. This introductory textbook is written

specifically for qualified nurses who are working in intensive care units and also for those undertaking post-registration courses in the speciality. It is structured in four parts: Fundamentals of Care explores patient-focused issues of bedside nursing; Monitoring the Critically Ill Patient describes the technical knowledge necessary to care safely for ICU patients; Pathophysiology and Treatments illustrates the more common and specialized disease processes and treatments encountered; and Advanced Nursing Practice looks at how nurses can use their knowledge and skills to develop their own and others' practice. This accessible text: covers all the key areas of knowledge needed; includes fundamental knowledge sections, introductions, chapter summaries, a glossary of key terms, extensive and up-to-date references and a comprehensive index; and is clearly written by an experienced university lecturer with a strong clinical background of working in intensive care nursing.

critical care society conference: 55th Anniversary of the German Society for Anaesthesiology and Intensive Care Jürgen Schüttler, 2012-08-16 This book presents to all those who are interested in the history of Anaesthesiology historical details and information on the development of anaesthesiology in Germany and the remarkable growth of our Society. At the founding session of the German Society of Anaesthesia in Munich on 10 April 1953 42 persons had signed the founding documents. Today about 12,000 anaesthetists are members of the German Society of Anaesthesiology and Intensive Care Medicine, making the DGAI the biggest national society within ESA. Well known are the pioneering contributions of German scientists and surgeons to the development of general, regional and local anaesthesia during the 19th and the beginning of the 20th centuries. But less known outside Germany are the reasons for the delayed evolution of anaesthesiology as a specialty of its own in German medicine, far later than in the UK, Scandinavia or the USA. In this book you will find answers to this question and detailed information on the successful evolution of anaesthesiology especially at the Faculties of Medicine at German universities.

critical care society conference: Critical Care Nursing Sheila Adam, Sue Osborne, John Welch, 2017-03-10 The third edition of the best-selling Critical Care Nursing offers readers a fully up-to-date, evidence-based guide to the science and practice of nursing the critically ill patient. Organised into 16 chapters, this edition covers all essential aspects of critical care nursing, from how to manage and monitor specific problems within organ systems, to how to provide sympathetic and compassionate care. A new chapter on 'Managing major incidents and preparing for pandemics' has been introduced with an insight to this crucial aspect of contemporary global healthcare. Written by a team of experienced nurses, this textbook supports staff working across the continuum of critical care to deliver safe, knowledgeable care that is rooted in a strong clinical, evidence base.

critical care society conference: Critical Care Manual of Clinical Nursing Procedures Suzanne Bench, Nicki Credland, Chris Hill, 2024-11-04 Critical Care Manual of Clinical Nursing Procedures The second edition of Critical Care Manual of Clinical Nursing Procedures is a practical overview of essential procedures for the care of critically ill patients. Beginning with chapters outlining the current scope of critical care, the book adopts a systematic stage-by-stage approach from admission to discharge. At each stage, it provides insights into physiology, key procedures, and the relevant evidence base. Now fully updated to incorporate the latest research and best practices, this volume is poised to remain an indispensable resource for the next generation of critical care providers. Readers of the second edition will find: In-depth, beat-by-beat analysis of key procedures in critical care Interventions underpinned by the latest evidence Content aligned with the National Critical Care Competency Framework and endorsed by the British Association of Critical Care Nurses Critical Care Manual of Clinical Nursing Procedures is ideal for nurses working in a critical care unit, nurses undertaking post-qualification specialist courses in critical care, or other healthcare professionals working as part of a critical care team.

critical care society conference: Roger's Textbook of Pediatric Intensive Care Donald H. Shaffner, John J. McCloskey, Elizabeth A. Hunt, Robert C. Tasker, 2023-08-14 Long recognized as the leading text in this dynamic field, Rogers' Textbook of Pediatric Intensive Care provides

comprehensive, clear explanations of both the principles underlying pediatric critical care disease and trauma as well as how these principles are applied. Led by Drs. Donald H. Shaffner, John J. McCloskey, Elizabeth A. Hunt, and Robert C. Tasker, along with a team of 27 section editors as well as more than 250 expert global contributors, the fully revised Sixth Edition brings you completely up to date on today's understanding, treatments, technologies, and outcomes regarding critical illness in children.

critical care society conference: Principles and Practice of Neurocritical Care Hemanshu Prabhakar, Vasudha Singhal, Kapil G Zirpe, Harsh Sapra, 2024-05-31 This official textbook of the Society of Neurocritical Care (SNCC) comprises a comprehensive review of all possible neurologic conditions that one may encounter in the practice of neuro-intensive care. It covers various topics, from the history and origin of neuro-intensive care to psychological and nursing care. Neurocritical care is the intensive care management of patients with life-threatening neurological and neurosurgical illnesses such as massive stroke, bleeding in or around the brain (subarachnoid hemorrhage, intracerebral hemorrhage, subdural hemorrhage, intraventricular hemorrhage), brain tumors, brain trauma, status epilepticus, nerve and muscle diseases (myasthenia gravis, Guillain-Barre Syndrome), spinal cord disorders and the cardiopulmonary complications of brain injury. Neurocritical care units specialize in managing the unique needs of such critically ill patients. The textbook is divided into many sections. Chapters discuss issues related to palliative care and describe some of the commonly performed procedures in the neuro-intensive care unit as well. It provides a straightforward and systematic approach to various clinical problems encountered during intensive care management of neurologic patients. It includes a separate section on special considerations in neurocritical care. The book includes ample figures, flowcharts and algorithms. The textbook is a valuable resource for residents, fellows and trainees in neuroanesthesia, neurointensive care, critical care, and anesthesia. It serves as a quick guide to all intensivists managing neurosurgical patients. It is also helpful for general intensivists who occasionally manages neurologic patients.

critical care society conference: Nursing in Critical Care Setting Irene Comisso, Alberto Lucchini, Stefano Bambi, Gian Domenico Giusti, Matteo Manici, 2018-06-06 This book provides essential insights into how the approach to nursing care in ICU patients has markedly changed over recent years. It shows how the focus has progressively moved away from the technical approach that characterized early ICUs to a wider personalization of patient care that also highlights general problems such as basic hygiene and general comfort. It also demonstrates that, at the same time, the nurses' role has become more professionalized, with increasing competences in assessing and managing patients' problems and measuring related outcomes. It is structured in four units: Unit 1 presents the essential elements of accurate vital-function and basic-needs assessments for ICU patients, using both instrumental monitoring and specially validated assessment tools. Unit 2 addresses basic care in ICU patients, particularly hygiene and mobilization, reflecting recent developments in nursing that focus on the importance of these activities. Unit 3 highlights the main nursing outcomes in ICU patients, particularly focusing on risk prevention and complication management. Lastly, Unit 4 discusses advances in ICU nursing, from clinical, organizational and research perspectives.

critical care society conference: ACCCN's Critical Care Nursing Leanne Aitken, Andrea Marshall, Wendy Chaboyer, 2016-01-04 With each edition, ACCCN's Critical Care Nursing has built on its highly respected reputation. Its contributors aim to encourage and challenge practising critical care nurses and students to develop world-class critical care nursing skills in order to ensure delivery of the highest quality care. Endorsed by the Australian College of Critical Care Nurses (ACCCN), this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence-based research and up-to-date advances in clinical practice, technology, procedures and standards. Expanded to reflect the universal core elements of critical care nursing practice authors, Aitken, Marshall and Chaboyer, have retained the specific information that captures the unique elements of contemporary critical care nursing in Australia, New Zealand and

other similar practice environments. Structured in three sections, ACCCN's Critical Care Nursing, 3rd Edition addresses all aspects of critical care nursing, including patient care and organisational issues, while highlighting some of the unique and complex aspects of specialty critical care nursing practice, such as paediatric considerations, trauma management and organ donation. Presented in three sections: - Scope of Critical Care - Principles and Practice of Critical Care - Speciality Practice Focus on concepts that underpin practice - essential physical, psychological, social and cultural care New case studies elaborate on relevant care topics Research vignettes explore a range of topics Practice tips highlight areas of care particularly relevant to daily clinical practice Learning activities support knowledge, reflective learning and understanding Additional case studies with answers available on evolve NEW chapter on Postanaesthesia recovery Revised coverage of metabolic and nutritional considerations for the critically ill patient Aligned with the NEW ACCCN Standards for Practice

critical care society conference: *Neuromonitoring and Assessment, An Issue of Critical Care Nursing Clinics of North America* Catherine Harris, 2016-02-27 Neuromonitoring is a broad term that essentially accounts for the essence of neuroscience nursing. Nurses working with critically ill, neurologically impaired patients should have a foundation in not only in invasive neuromonitoring, but the more subtle aspects of care. Nurses must understand that they are the most important tool in monitoring patients and interpreting the data. This issue of Critical Care Nursing Clinics will bring together the critical aspects of neuromonitoring in the intensive care units that can be used as a resource for nurses. Some articles included are devoted to Temperature Targeted Management; Refractory Intracranial Pressure Management; Blood pressure monitoring controversies; Invasive Neuromonitoring; Neuroradiology Review; Nursing Monitoring of Critically Ill Neurological Patients; Case Studies in EEG monitoring; and Neuromonitoring in the Operating Room.

critical care society conference: *Essentials of Evidence-Based Practice of Neuroanesthesia and Neurocritical Care* Hemanshu Prabhakar, 2021-11-18 The current practice of medicine is largely moving toward applying an evidence-based approach. Evidence-based medicine is the integration of best research evidence using systematic reviews of the medical literature and then translating it into practice by selecting treatment options for specific cases based on the best research. Clinicians rely on the availability of evidence and accordingly take decisions to provide best treatment to their patients. Clinical management of neurologically compromised

patients is challenging and varied; for this reason, treating physicians including neuroanesthesiologists are always in search of best available evidence for patient management and care. *Essentials of Evidence-Based Practice of Neuroanesthesia and Neurocritical Care* highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence-based solutions. This comprehensive resource succinctly discusses evidence-based practice of neuroanesthesia based on systematic reviews in clinical neuroscience research. Topics include neurophysiology: ICP or CPP thresholds; neuropharmacology: intravenous or inhalational anesthetics; and neuromonitoring: ICP monitoring. Evidence-based practice is now an integral part of neuroscience, and this book will help residents and trainees gain knowledge to apply it to their practice. Endorsements/Reviews: Evidence based practice is facilitating changes at a rapid pace in neuroanesthesia and neurocritical care practice. Its practice is exceedingly crucial in neuroanesthesia and neurocritical care considering the criticality of the neurologically sick patients, which leaves little or no room for error for an acceptable outcome in them. Patient management in Neuroanesthesia and neurocritical care has many contentious issues because of rapidly evolving changes in their management which require treatment guided by the latest available evidence in literature. Dr. Hemanshu Prabhakar is a strong proponent of evidence based practice for the management of neurologically ill patients both for surgical procedures and their management in neurointensive care unit. Undoubtedly, this book will be of enormous benefits to the students as well as teachers of neuroanesthesia and neurocritical care sub-specialties. -- Parmod Bithal, Editor-In-Chief, *Journal of Neuroanaesthesiology and Critical Care (JNACC)* - Highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence-based solutions - Topics include neurophysiology: ICP or CPP thresholds; neuropharmacology: intravenous or inhalational anesthetics; and neuromonitoring: ICP monitoring - Provides residents and trainees with the knowledge to apply evidence-based practice of neuroanesthesia to their practice

critical care society conference: *Yearbook of Anesthesiology-8* Raminder Sehgal, Anjan Trikha, 2019-01-31 *Yearbook of Anesthesiology-8* is an up-to-date guide to the latest advances in anaesthesiology practice. Comprising 25 chapters covering all three specialties associated with anaesthesiology - regional and general anaesthesia, pain, and intensive care - this book presents the most recent information in the field, in a concise and highly illustrated format. The book covers the complete field from techniques and post-surgical recovery, to pharmacology, non-technical skills and medicolegal issues. This new volume features chapters on obstetric anaesthesia and analgesia, implications of clinical practice guidelines, renal replacement therapy, management of organophosphorus poisoning, and failed epidural block. The final chapter of the book - Journal Scan - covers recent articles published in respected journals, accompanied by reviews and interpretations by experts in the field. Key points Up-to-date guide to latest advances in anaesthesiology In depth coverage of all three sub-specialties - regional and general anaesthesia, pain, and intensive care Features new topics including obstetric anaesthesia, renal replacement therapy, and failed epidural block Includes recent journal articles with reviews and interpretations by experts in the field

critical care society conference: *The Practice of Emergency and Critical Care Neurology* Eelco F.M. Wijdicks, 2016-04-11 Fully updated and revised, the second edition of *The Practice of Emergency and Critical Care Neurology* puts a more modern approach on the practice of emergency neurological care. When most texts within the field focus on the theoretical aspects, this book concentrates on the management of neurologic conditions, recognition of deterioration of neurologic functions, neurosurgical procedures, and immediate interventions. This text also presents hard data to explain why we do what we do. Dr. Wijdicks condenses essential information into several sections comprising of the principles in recognizing critically ill neurologic patients in the emergency department, the evaluation of symptoms indicating critical emergency, general principles of managing critically ill patients, monitoring devices and diagnostic tests, complete management of specific disorders in the neurosciences intensive care unit, postoperative neurosurgical and neurointerventional complications, management of medical complications, and end of life care. Key Features of the New Edition include 1. Additional chapters on critical consults in surgical and

medical ICUs, critical care management, and comprehensive monitoring and biomarkers to reflect new research; 2. Rich illustrations using color photos of patients and drawings of important basic concepts of mechanism of acute neurologic disease; 3. Fully updated and comprehensive reference list; 4. A pocket book of selected tables and figures covering all essential points for quick reference and as a survival guide for house staff. This is the go-to guide for every physician, staff neurologist, neurointensivist, resident, and fellow in training with managing acutely ill neurologic patients.

critical care society conference: *Challenging Concepts in Critical Care* Christopher Gough, Justine Barnett, Tim Cook, Jerry Nolan, 2020 This practical title presents 18 challenging cases in critical care, complete with case histories and evidence-based, up-to-date learning points and clinical tips. Each chapter has commentary from an expert who identifies and explains the key points and controversies of the case.
