

critical incident stress management certification training

critical incident stress management certification training is an essential educational program designed to equip professionals with the skills and knowledge necessary to support individuals affected by traumatic events. This specialized training focuses on understanding the psychological impact of critical incidents and implementing effective intervention strategies to mitigate stress responses. As workplaces, emergency responders, healthcare providers, and community leaders increasingly recognize the importance of mental health support, certification in critical incident stress management (CISM) has become a valuable credential. This article explores the core components of critical incident stress management certification training, its benefits, the certification process, and practical applications. Additionally, it covers the key techniques used in CISM and the professional opportunities available to certified practitioners.

- Overview of Critical Incident Stress Management Certification Training
- Benefits of Obtaining CISM Certification
- Certification Process and Requirements
- Core Components and Techniques of CISM
- Applications in Various Professional Fields
- Continuing Education and Career Advancement

Overview of Critical Incident Stress Management Certification Training

Critical incident stress management certification training provides comprehensive instruction on recognizing, assessing, and intervening in situations involving traumatic stress. The training typically involves both theoretical knowledge and practical exercises to prepare participants for real-world application. It emphasizes the identification of stress reactions following critical incidents such as accidents, natural disasters, or violent events. Participants learn how to utilize established CISM protocols, which include critical incident stress debriefings, defusings, and individual support. The curriculum also covers psychological first aid, crisis intervention, and referral processes. This certification is often sought by emergency personnel, mental health professionals, and organizational leaders aiming to enhance their crisis response capabilities.

Benefits of Obtaining CISM Certification

Completing critical incident stress management certification training offers numerous advantages for

both individuals and organizations. Certified professionals gain credibility and demonstrate their commitment to providing effective psychological support during crises. The training enhances the ability to reduce the risk of long-term psychological issues such as post-traumatic stress disorder (PTSD) among affected individuals. Organizations benefit by having trained staff who can maintain workforce resilience and promote recovery after traumatic events. Additionally, CISM certification can improve communication and coordination among multidisciplinary teams involved in emergency response. Overall, this credential contributes to better mental health outcomes and organizational preparedness.

- Enhanced knowledge of trauma and stress responses
- Improved intervention and support skills
- Recognition as a qualified CISM practitioner
- Increased professional opportunities and career growth
- Contribution to organizational crisis management plans

Certification Process and Requirements

The pathway to obtaining critical incident stress management certification involves meeting specific educational and training criteria. Candidates are generally required to complete a designated number of instructional hours, which can vary depending on the certifying organization. Training programs may include lectures, interactive workshops, role-playing scenarios, and written assessments. Some certification bodies mandate prior experience in emergency services, counseling, or related fields to ensure participants have foundational knowledge. Upon successful completion, candidates receive official certification that validates their competency in CISM techniques. Maintaining certification often involves continuing education and periodic recertification to stay current with best practices.

Typical Steps in the Certification Process

1. Enrollment in an accredited CISM training course
2. Completion of required training hours and coursework
3. Participation in practical exercises and simulations
4. Passing written or practical examinations
5. Submission of application and supporting documentation
6. Receipt of certification and inclusion in practitioner registries
7. Engagement in ongoing professional development

Core Components and Techniques of CISM

Critical incident stress management certification training covers a range of intervention strategies designed to address acute stress reactions effectively. Core components include pre-incident preparedness, immediate crisis intervention, and post-incident follow-up. Participants learn various CISM techniques such as defusing, which provides immediate emotional support shortly after an incident, and debriefing, a structured group discussion aimed at processing the event. Other elements include individual crisis counseling and referral to professional mental health services when necessary. The training also highlights the importance of confidentiality, cultural sensitivity, and ethical considerations during interventions.

Key Techniques Used in CISM

- **Defusing:** A brief, informal intervention conducted within hours of the incident to alleviate stress symptoms.
- **Debriefing:** A more formal group process that allows participants to discuss their experiences and emotions in a safe environment.
- **Individual Crisis Intervention:** One-on-one support tailored to the specific needs of the affected individual.
- **Follow-Up and Referral:** Monitoring affected individuals over time and connecting them with specialized mental health resources if needed.
- **Education and Preparedness:** Training individuals and organizations on stress management techniques and resilience building before incidents occur.

Applications in Various Professional Fields

Critical incident stress management certification training is applicable across a broad spectrum of professions where exposure to traumatic events is likely. Emergency medical technicians, firefighters, law enforcement officers, and disaster response teams frequently utilize CISM protocols to support both victims and responders. Healthcare professionals working in hospitals or clinics benefit from this training to address patient and staff stress related to critical incidents. Additionally, corporate organizations, educational institutions, and community agencies incorporate CISM strategies to enhance workplace safety and employee well-being. The versatility of CISM allows certified practitioners to contribute meaningfully in diverse environments that require trauma-informed care.

Examples of Professional Use Cases

- Emergency responders managing stress after natural disasters
- Healthcare workers supporting trauma victims in critical care settings
- Human resources teams implementing crisis intervention in the workplace
- School counselors addressing incidents of violence or accidents
- Community organizations providing support after public emergencies

Continuing Education and Career Advancement

Maintaining a critical incident stress management certification requires ongoing education to remain updated on evolving best practices and emerging research. Many certifying bodies offer advanced courses and refresher training to help practitioners enhance their skills. Continuing education not only ensures compliance with certification renewal requirements but also broadens professional expertise. Certified individuals may pursue career advancement opportunities such as leadership roles in crisis intervention teams, training facilitator positions, or specialized mental health counseling. The demand for qualified CISM practitioners continues to grow as awareness of mental health and trauma-informed care increases.

- Participation in advanced CISM workshops and seminars
- Engagement in peer support and supervision programs
- Certification renewal through continuing education credits
- Opportunities for specialization in trauma counseling or organizational resilience
- Leadership roles in emergency management and mental health services

Frequently Asked Questions

What is Critical Incident Stress Management (CISM) certification training?

CISM certification training is a specialized program designed to equip professionals with the skills and knowledge to effectively manage and support individuals experiencing stress after critical incidents, such as traumatic events or emergencies.

Who should attend Critical Incident Stress Management certification training?

This training is ideal for first responders, mental health professionals, emergency personnel, counselors, and anyone involved in crisis intervention or trauma support.

What topics are covered in Critical Incident Stress Management certification training?

The training typically covers stress response mechanisms, crisis intervention techniques, group defusing and debriefing, peer support strategies, and ethical considerations in managing critical incident stress.

How long does it take to complete Critical Incident Stress Management certification training?

The duration varies by provider but generally ranges from 3 to 5 days of intensive training, including both theoretical instruction and practical exercises.

Are there any prerequisites for enrolling in Critical Incident Stress Management certification training?

Prerequisites vary, but many programs require participants to have a background in mental health, emergency services, or related fields. Some courses may require prior experience in crisis intervention.

What are the benefits of obtaining a Critical Incident Stress Management certification?

Certification enhances professional credibility, improves skills in managing trauma and stress, increases job opportunities in emergency and mental health services, and ensures adherence to recognized best practices in critical incident stress management.

Additional Resources

1. *Critical Incident Stress Management: A Guide for Emergency Services and Mental Health Professionals*

This book provides a comprehensive overview of critical incident stress management (CISM) principles and practices. It is tailored for emergency responders, mental health professionals, and crisis counselors. The text covers assessment, intervention strategies, and post-incident support, making it essential for certification training. Readers will gain practical tools for managing stress in high-pressure situations.

2. *The Critical Incident Stress Debriefing (CISD) Manual*

A detailed manual focused on the Critical Incident Stress Debriefing process, this book outlines step-by-step procedures for conducting effective debriefings. It emphasizes the importance of structured

group interventions following traumatic events. The guide is useful for professionals seeking certification as it includes case studies and best practices.

3. Managing Traumatic Stress Through Critical Incident Stress Management

This resource delves into the psychological impact of traumatic incidents and the role of CISM in mitigating long-term effects. It explains the stages of stress response and provides techniques for early intervention and resilience building. The book supports certification candidates by offering evidence-based methods for stress management.

4. Critical Incident Stress Management: Theory and Practice

Combining theoretical foundations with practical applications, this book explores the science behind stress reactions and trauma recovery. It covers various CISM models, including peer support and defusing strategies. The text is ideal for those preparing for certification exams and seeking a deeper understanding of the field.

5. Peer Support and Critical Incident Stress Management: A Handbook for Responders

Focused on the role of peer support in CISM, this handbook provides guidance on establishing and maintaining peer support programs. It highlights the benefits of peer-led interventions and offers training modules for responders. Certification trainees will find valuable insights into building effective support networks.

6. Emergency Response and Critical Incident Stress: Strategies for First Responders

This book addresses the unique stressors faced by first responders and the importance of CISM in emergency settings. It includes practical strategies for stress reduction, crisis communication, and self-care. The content is designed to enhance the skills required for certification in critical incident stress management.

7. Critical Incident Stress Management Certification Study Guide

Specifically created as a study aid, this guide covers key concepts, terminology, and techniques essential for passing CISM certification exams. It features practice questions, scenario analyses, and review summaries. Candidates will benefit from its focused and accessible format.

8. Trauma and Recovery: Implementing Critical Incident Stress Management in Healthcare

This book explores the application of CISM within healthcare environments, addressing the psychological toll on medical professionals. It discusses trauma-informed care and organizational strategies to support staff well-being. Certification candidates working in healthcare will find this resource particularly relevant.

9. Resilience and Recovery: Advanced Techniques in Critical Incident Stress Management

Targeting experienced practitioners, this text presents advanced intervention techniques and resilience-building strategies. It includes recent research findings and case examples to enhance professional practice. Those pursuing advanced certification or continuing education in CISM will find this book invaluable.

critical incident stress management certification training: The Basic Critical Incident Stress Management Course Jeffrey T. Mitchell, George S. Everly (Jr.), International critical incident stress foundation, 2001-01-01

critical incident stress management certification training: Critical Incident Stress Management in Aviation Joachim Vogt, 2016-04-22 Critical incident stress management (CISM) is now a well-established method in crisis intervention, and one that is clearly needed within aviation. However, there are many peculiarities in this branch of CISM which require thorough consideration. People working in high-reliability environments need to be sensitive to others' reactions to critical stress. They are the normal reactions of normal people in abnormal situations. However, to ensure this a proper programme must be put in place, based on a scientific and standardized approach. This book describes the various methods and elements of the CISM model, as well as their interventions. It also investigates the benefits of CISM on the individual level and on an organisational strategic level. It details CISM training and courses, and features a case study based on the Überlingen accident of 2002. Critical Incident Stress Management in Aviation will be of direct relevance to human factors experts, safety managers, ATCOs and air navigation service providers, though there is also much that will be of interest to aviation physicians, psychologists and airport/airline managers.

critical incident stress management certification training: Stress: Concepts, Cognition, Emotion, and Behavior George Fink, 2016-03-10 Stress: Concepts, Cognition, Emotion, and Behavior: Handbook in Stress Series, Volume 1, examines stress and its management in the workplace and is targeted at scientific and clinical researchers in biomedicine, psychology, and some aspects of the social sciences. The audience is appropriate faculty and graduate and undergraduate students interested in stress and its consequences. The format allows access to specific self-contained stress subsections without the need to purchase the whole nine volume Stress handbook series. This makes the publication much more affordable than the previously published four volume Encyclopedia of Stress (Elsevier 2007) in which stress subsections were arranged alphabetically and therefore required purchase of the whole work. This feature will be of special significance for individual scientists and clinicians, as well as laboratories. In this first volume of the series, the primary focus will be on general stress concepts as well as the areas of cognition, emotion, and behavior. - Offers chapters with impressive scope, covering topics including the interactions between stress, cognition, emotion and behaviour - Features articles carefully selected by eminent stress researchers and prepared by contributors representing outstanding scholarship in the field - Includes rich illustrations with explanatory figures and tables - Includes boxed call out sections that serve to explain key concepts and methods - Allows access to specific self-contained stress subsections without the need to purchase the whole nine volume Stress handbook series

critical incident stress management certification training: *First Responder Mental Health* Michael L. Bourke, Vincent B. Van Hasselt, Sam J. Buser, 2023-10-12 This edited volume provides mental health clinicians with knowledge to effectively work with current and former first responders. It provides strategies on how to best develop and adapt clinical assessment procedures and therapeutic interventions to better meet the unique needs found in these settings. Chapters synthesize existing literature to introduce the reader to profession-specific factors issues that exist in these contexts and describe the challenges that can present when working with police, firefighters, EMS, emergency communications operators, crime scene investigators, and corrections personnel. The book covers a range of topics that clinicians and trainees need to understand the relevant issues, develop effective treatment plans, and deliver appropriate psychological services in public safety settings. *First Responder Mental Health: A Clinician's Guide* will be essential reading for mental health professionals working with first responders, as well as those in training.

critical incident stress management certification training: *A Clinical Guide to the*

Treatment of the Human Stress Response George S. Everly, Jr., Jeffrey M. Lating, 2019-03-05 This comprehensive update of the now classic text applies the most current findings across disciplines to the treatment of pathogenic human stress arousal. New and revised chapters bring together the art and science of intervention, based in up-to-date neuroscience, starting with an innovative model tracing the stress-to-disease continuum throughout the systems of the human body. The authors detail the spectrum of physiological and psychological treatments for the stress response, including cognitive therapy, neuromuscular relaxation, breathing exercises, nutritional interventions, and pharmacotherapy. They also assess the strengths and limitations of widely-used measures of the stress response and consider the value of personality factors, cultural considerations, and resilience in stress mediation. Included in the coverage: The anatomy and physiology of the human stress response. Advances in neuroscience: implications for stress. Crisis intervention and psychological first aid. Neurophysiological rationale for the use of the relaxation response. Physical exercise and the human stress response. The pharmacological management of stress reactions. Disaster Mental Health Planning. Cultural Awareness and Stress. The Fourth Edition of *A Clinical Guide to the Treatment of Human Stress Response* offers readers a dual perspective, exceedingly useful in examining the origins of the stress response, and in preventing and treating the response itself. This rich integrative volume will join its predecessors in popularity among practitioners and students across disciplines and specialties.

critical incident stress management certification training: Disaster Response and Recovery Diane Garaventa Myers, 1994 A resource on basic, practical issues related to planning & implementing disaster mental health services. Provides specific, concrete information for managers who are involved in planning services as well as practitioners who are delivering services. Chapters include checklists of actions to take before, during, & after a disaster to help staff in carrying out important actions. Provides specific activities to engage in with disaster victims. List of training manuals & materials, videotapes, suggested outreach materials & books for children.

critical incident stress management certification training: The Struggle Is Real Dr. Tim Clinton, 2017-09-21 20-25% of Americans suffer from a diagnosable mental illness. Divorce is epidemic. Abuse of all kinds is rampant. Suicidality is at an all-time high. Domestic violence is out of control. Cohabitation and out of wedlock births are at unprecedented levels. Addictions are more widespread than ever. These and many other problems confront our culture today in alarming proportions. Consequently, mental and relational health issues find their way home. To everyone's home. People with these and other concerns typically turn first to the church for help. Yet most churches are not equipped to adequately minister to the depth and magnitude of these overwhelming problems. This book was created as a comprehensive resource to provide the church with practical tools to care for these hurting people in a biblically sound and emotionally healthy way. We at the American Association of Christian Counselors hope and pray this book finds its way into the hands of every pastor, church leader, counselor, and Christian caregiver in America. Because the struggle is real. The struggle is real indeed. This is a lineup of experienced healers and caring writers. It will be a valuable resource for the field of mental and emotional health for years to come. John Ortberg, Ph.D., Senior Pastor of Menlo Church, Menlo Park, CA, Clinical Psychologist and best-selling author People everywhere are hurting, including those inside the church. Written by a team of experts, this important resource is designed to shine the wonderful and liberating light of the gospel into the dark and difficult areas of people's lives. What's here will heal. You need this book and the people you love need it too. Johnnie Moore, Founder, The KAIROS Company People today are struggling in ways that only the church can help. The Struggle is Real is an excellent resource for equipping ministry leaders and counselors alike to meet this most pressing need. Rev. Samuel Rodriguez, president of the National Hispanic Christian Leadership Conference I heartily recommend *The Struggle Is Real*...Clinton and Pingleton have provided exactly what the church needs. Jeremiah J. Johnston, Ph.D., President, Christian Thinkers Society, Professor, Houston Baptist University We are not fine; the people we serve are not fine—we all struggle! This book is an invaluable resource for helping us minister to people who need our understanding. Greg Surratt,

Founding Pastor, Seacoast Church, Mount Pleasant, SC, President, Association of Related Churches (ARC) In this book, Tim Clinton and Jared Pingleton provide a solid guide to better understand the issues and dynamics of trouble that people experience and how to effectively minister to them. George O. Wood, P.Th.D., J.D., former General Superintendent, The General Council of the Assemblies of God

critical incident stress management certification training: Mental Health Intervention and Treatment of First Responders and Emergency Workers Bowers, Clint A., Beidel, Deborah C., Marks, Madeline R., 2019-08-30 The stress that comes with being a first responder has been known to lead to depression, anxiety, substance abuse, and suicide. However, few clinicians are informed about these health concerns and how to adequately treat them in this population. Therefore, there is an urgent need for practitioners to understand the latest information regarding treatments that will be useful to this specific population. *Mental Health Intervention and Treatment of First Responders and Emergency Workers* is an essential reference source that focuses on the latest research for diagnosing and treating mental health issues experienced by emergency personnel and seeks to generate awareness and inform clinicians about the unique circumstances encountered by these professionals. While highlighting topics including anxiety disorders and stress management, this book is ideally designed for clinicians, therapists, psychologists, psychiatrists, practitioners, medical professionals, EMTs, law enforcement, fire departments, military, academicians, researchers, policymakers, and students seeking current research on psychological therapy methods regarding first responders.

critical incident stress management certification training: The Comprehensive Handbook of School Safety E. Scott Dunlap, 2016-04-19 In most schools you will probably see one, if not all of the following: Metal detectors to prevent handguns and other weapons from being brought onto school property Students in standardized uniforms to prevent the appearance of gang affiliations Police officers patrolling the property to deter violent activity as well as respond to incidents Such evol

critical incident stress management certification training: The European External Action Service David Spence, Jozef Bátora, 2015-08-18 This book questions whether the institutions and practices of the emerging EU diplomatic system conform to established standards of the state-centric diplomatic order; or whether practice is paving the way for innovative, even revolutionary, forms of diplomatic organisation.

critical incident stress management certification training: *Military Ministry, Second Edition* Paul E. Linzey, B. Keith Travis, Christopher J. Linzey, 2025-09-02 The church is called to provide clergy for the military. Seminaries educate and prepare students. But there are complexities, controversies, and criticisms and many seminary or college professors have no experience in the military. Understanding these dilemmas, Paul Linzey, Keith Travis, and Chris Linzey created a much-needed resource. They have trained and mentored thousands of chaplains, pastors, and ministerial students in the United States and several other nations. The result is a comprehensive book about serving as military chaplains in the twenty-first century. Drawing from their experience as pastors, chaplains, professors, endorsing agent, chaplain recruiters, and social media content creators, they provide a professional resource for anyone interested in ministry. Their records, qualifications, and expertise combine to provide a passionate and authoritative look at serving as military chaplains today. The book is well-researched, true to life, and up to date. It is unparalleled in scope.

critical incident stress management certification training: Introduction to Fire Protection and Emergency Services includes Navigate Advantage Access Robert Klinoff, 2019-11-11 The sixth edition of *Introduction to Fire Protection and Emergency Services* meets and exceeds the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) course objectives and outcomes for the Associate's (Core) course called Principles of Emergency Services (C0273). The Sixth Edition delivers future fire service candidates a head start in the competitive selection process by familiarizing students with the selection and training process. In

addition, the Sixth Edition provides a comprehensive and concise overview of the broad spectrum of the fire service, from the primary duties of the modern fire department, to emergency incident management, to fire prevention, to department administration. The Sixth Edition reinforces foundational knowledge, including the history and future of the fire service; the chemistry and physics of fire; issues facing the fire and rescue service in the United States; and careers in the fire and emergency services. The entire range of services of the modern fire service is explored, including emergency medical services, hazardous materials response, wildland fires, swiftwater rescue, and urban search and rescue. The Sixth Edition includes: An emphasis on safety and professionalism, which is reinforced through discussions of incident effectiveness, fire fighter ethics, customer service, physical fitness, training, decision making, fire prevention, and behavioral health. Organizations that support the fire service are highlighted, including: Firefighter Behavioral Health Alliance. Firefighter Cancer Support Network. Leary Firefighter Foundation. Discussions on Post-Traumatic Stress Disorder (PTSD) and Repeated Exposure to Trauma (RET) and their effects on fire fighters. An expanded discussion of the possible future effects of climate change and the effect on the fire and rescue service.

critical incident stress management certification training: Military Ministry Paul E. Linzey, B. Keith Travis, 2022-05-09 The church is called to provide clergy for the military. Seminaries educate and prepare students. But there are complexities, controversies, and criticisms. Many seminary and college professors have no experience in the military. Understanding these dilemmas, Paul Linzey and Keith Travis created a much-needed resource. They both have mentored hundreds of chaplains, pastors, and ministerial students. The result is a comprehensive book about serving as a military chaplain in the twenty-first century. Drawing from their experience as chaplain, professor, endorsing agent, and chief of Army chaplain recruiting, they provide a professional resource for anyone interested in ministry to people in the military. Their records, qualifications, and expertise combine to provide a comprehensive, passionate, and authoritative look at serving as a chaplain in today's military. The book is well-researched, true to real life, and up-to-date. It is unparalleled in scope.

critical incident stress management certification training: Fire and Emergency Services Instructor: Principles and Practice Forest F Reeder, Alan E Joos, 2019-03-28 The National Fire Protection Association (NFPA), the International Association of Fire Chiefs (IAFC), and the International Society of Fire Service Instructors (ISFSI) are pleased to bring you Fire and Emergency Services Instructor: Principles and Practice, Third Edition. With a full library of technological resources to engage candidates and assist instructors, Fire and Emergency Services Instructor takes training off the printed page. This text meets and exceeds all of the job performance requirements (JPRs) for Fire and Emergency Services Instructor I, II, and III, as well as two new levels for Live Fire Instructor and Live Fire Instructor-in-Charge, of the 2019 Edition of NFPA 1041, Standard for Fire and Emergency Services Instructor Professional Qualifications. Innovative features include: Rapid access of content through clear and concise Knowledge and Skills Objectives with page number references and NFPA 1041 correlations. Promotion of critical thinking and classroom discussion through the "Training Bulletin" and "Incident Report" features. "JPRs in Action" feature identifying the specific responsibilities of the Fire and Emergency Services Instructor I, II, and III relating to the job performance requirements (JPRs). Tips geared toward the company-level instructor, department training officer, and training program manager offering instruction techniques, test writing and evaluation pointers, and helpful notes on communication and curriculum delivery. Realistic instructor scenarios with questions designed to provoke critical thinking in the learning environment. New to the Third Edition: In-depth discussion of student-centered learning. Learner-centered teaching methods and strategies. Evidence-based techniques for improving learning. Expanded explanation of learning science. Content that meets the live fire instructor and live fire instructor-in-charge JPRs of NFPA 1041, including: Live Fire Evolution Pre-Live Fire Evolution Post-Live Fire Evolution

critical incident stress management certification training: FBI Law Enforcement Bulletin ,

critical incident stress management certification training: Successful Volunteer Retention and Recruitment in the Fire Service Candice McDonald, 2025-07-01 Fire departments nationwide are facing one of their greatest modern challenges—recruiting and retaining the best talent. Successful Volunteer Retention and Recruitment in the Fire Service by Dr. Candice McDonald provides fire service leaders with the proven strategies, tools, and insights needed to build and sustain a strong, committed workforce. Drawing on years of experience, real-world case studies, and data-driven research, author Candice McDonald offers a practical roadmap to: Develop compelling recruitment campaigns that resonate with modern candidates Foster workplace cultures that support long-term retention Implement mentorship and career development programs that inspire growth Navigate generational differences and improve team cohesion Build sustainable strategies tailored to overcome unique barriers From understanding why volunteers leave to creating a game plan that overcomes organizational barriers, this resource addresses the core issues behind staffing shortages and provides actionable solutions for both volunteer and career departments. Whether you're a fire chief, recruiter, HR professional, or community leader, this book will help you reignite passion for service, strengthen retention, and ensure your department's success for years to come. The future of the fire service starts with the people who power it—this is your guide to finding them, keeping them, and helping them thrive.

critical incident stress management certification training: Examining Bureau of Indian Affairs and Tribal Police Recruitment, Training, Hiring, and Retention United States. Congress. Senate. Committee on Indian Affairs (1993-), 2010

critical incident stress management certification training: Trauma Psychology Elizabeth K. Carll Ph.D., 2007-08-30 These volumes by a team of internationally recognized experts reflect and highlight both recognized and under-recognized events that cause trauma. They also examine current and emerging research on effective interventions to minimize and heal the effects of the trauma. Special attention is also given to culture and context, because what is considered healthy or problematic may vary widely across cultures, and culture can influence people's coping styles. Sources of trauma discussed include stalking, killing, terrorism, torture, kidnap, workplace violence, domestic violence, children and war, fires, floods, AIDS, pain, burns, spinal cord injury, children and medical illness, homelessness, and more. Case examples, treatment recommendations, and public policy recommendations are included in each of the chapters. The growing field of trauma psychology has been spurred recently by natural events from Hurricane Katrina to the Tsunami, and by terrorist events worldwide, as well as chronic health and social issues—from persistent pain to homelessness—that are mounting. The experts offer a gripping overview of the most traumatic and widespread events causing trauma and of the symptoms and health impairment that may result. Most important, they explain how we can best recognize, understand, and treat the sufferers and develop intervention policies.

critical incident stress management certification training: On the Front Lines United States. Congress. House. Select Committee on Children, Youth, and Families, 1991 Testimony from a Congressional hearing on police stress and how it affects the well-being of the officers, their families and their work, is presented in this document. An opening statement by Representative Patricia Schroeder is presented. Statements are included from Representatives Frank D. Riggs, George Miller, and Frank R. Wolf. Testimony and/or prepared statements from these individuals are included: (1) Beverly J. Anderson, clinical director/program administrator, the Metropolitan Police Employee Assistance Program, Washington, D.C.; (2) Anthony E. Daniels, assistant director, Training Division, Federal Bureau of Investigation, Quantico, Virginia; (3) Leanor Boulton Johnson, associate professor of family studies, Department of Family Resources and Human Development, Arizona State University, Tempe, Arizona; (4) Jeffrey A. King, officer and peer counselor coordinator, the Metropolitan Police Employee Assistance Program, Washington, D.C.; (5) James T. Reese, supervisory special agent, Assistant Unit Chief, Behavioral Science Services Unit, Training Division, Federal Bureau of Investigation, Quantico, Virginia; (6) Cathy Riggs, former police officer, Santa

Rosa Police Department and wife of Representative Frank Riggs (former police officer), Santa Rosa, California; (7) Ellen Scrivner, director, Psychological Services Division, Prince George's County Police Department, Upper Marlboro, Maryland, and president elect, Division of Psychologists in Public Service, the American Psychological Association, Washington, D.C.; (8) Gary W. Sommers, sergeant, training services, Prince George's County Police Department, Landover, Maryland, accompanied by Kay Sommers, Landover, Maryland; (9) Aristedes W. Zavaras, chief, Denver Police Department, Denver, Colorado; (10) Suzanne F. Sawyer, executive director, Concerns of Police Survivors, Upper Marlboro, Maryland; and (11) William K. Stover, police chief, Arlington County Police Department, Arlington, Virginia. (ABL)
