In this collection of essays, based on a conference held at the University of Hartford, a group of individuals – professional translators, linguists, and literary scholars – exchange their views on translation and its power to influence literary traditions and to shape cultural and economic identities. croatian language to english translation: *The Translation of Violence in Children's Literature* Marija Todorova, 2021-11-29 Considering children's literature as a powerful repository for creating and proliferating cultural and national identities, this monograph is the first academic study of children's literature in translation from the Western Balkans. Marija Todorova looks at a broad range of children's literature, from fiction to creative non-fiction and picture books, across five different countries in the Western Balkans, with each chapter including detailed textual and visual analysis through the predominant lens of violence. These chapters raise questions around who initiates and effectuates the selection of children's literature from the Western Balkans for translation into English, and interrogate the role of different stakeholders, such as translators, publishers and cultural institutions in the representation and construction of these countries in translated children's literature, both in text and visually. Given the combination of this study's interdisciplinary nature and Todorova's detailed analysis, this book will prove to be an essential resource for professional translators, researchers and students in courses in translation studies, children's literature or area studies, especially that of countries in the Western Balkans. .

croatian language to english translation: *New Advances in Legal Translation and Interpreting* Junfeng Zhao, Defeng Li, Victoria Lai Cheng Lei, 2023-03-02 This book describes interdisciplinary exploration of matters related to the translation and interpreting of legal texts. Translation of legal texts has grown exponentially since the beginning of new millennium in response to the fast-increasing volume of international trade and business as well as all sorts of other transnational activities in a myriad of spheres. International trade demands translation of trade laws and business contracts, immigration leads to rise in court interpreting services, and countries may seek to enhance their international influence through translating and making known to the world their laws and/or other legal documents. These legal translation activities occurred

mostly between languages officially used in international or regional organizations, such as the United Nations and the European Union, and between the languages of major countries who exert or seek influence on international economy and law. On the other hand, rapid advances in computer technology and artificial intelligence in recent years have also brought about changes in the practices of legal translation. With changes also come problems in both theory and practice that merit our immediate attention. This edited volume highlights the newest developments in the theory, practice, and training of legal translation, with contributions from international leading researchers in this area. It will be a standard reference for anyone who is to embark on research and practice of legal translation in the twenty-first century. It is also adaptable as teaching materials for translation and interpreting training. croatian language to english translation: Insights Into Specialized Translation Maurizio Gotti, Susan Šarčević, 2006 This volume focuses on specialist translation - one of the areas of translation in greatest demand in our age of globalization. The 16 chapters deal not only with the classical domains of science and technology, law, socio-politics and medicine but also with lesser researched areas such as archeology, geography, nutrigenomics and others. As a whole, the book achieves a blend of theory and practice. It addresses a variety of issues such as translation strategy based on text type and purpose, intercultural transfer and quality assessment, as well as textual and terminological issues in bilingual and multilingual settings, including international organizations and the European Union. Today translation competence presupposes multidisciplinary skills. Whereas some chapters analyze the linguistic features of special-purpose texts and their function in specialized communication, others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing.

croatian language to english translation: *Legacies of the International Criminal Tribunal for the Former Yugoslavia* Carsten Stahn, Carmel Agius, Serge Brammertz, Colleen Rohan, 2020-06-10 The International Criminal Tribunal for the former Yugoslavia (ICTY) is one the pioneering experiments in international criminal justice. It has left a rich legal, institutional, and non-judicial legacy. This edited collection provides a broad perspective on the contribution of the tribunal to law, memory, and justice. It explores some of the accomplishments, challenges, and critiques of the ICTY, including its less visible legacies. The book analyses different sites of legacy: the expressive function of the tribunal, its contribution to the framing of facts, events, and narratives of the conflict in the former Yugoslavia, and investigative and experiential legacies. It also explores lesser known aspects of legal practice (such as defence investigative ethics, judgment drafting, contempt cases against journalists, interpretation and translation), outreach, approaches to punishment and sentencing, the tribunals' impact on domestic legal systems, and ongoing debates over impact and societal reception. The volume combines voices from inside the tribunal with external perspectives to elaborate the rich history of the ICTY, which continues to be written to this day.

croatian language to english translation: *Legal Risks in EU Law* Emilia Mišćenić, Aurélien Raccah, 2016-04-13 This book takes a completely new and innovative approach to analysing the development of EU law. Within the framework of different important areas of EU law, such as the internal market, consumer protection law, social law, investment law, environment law, migration law, legal translation and terminology, it examines the Union's approach to the regulation and management of legal risks. Over the years, the Union has come to a point where it is becoming increasingly difficult to justify its authority to regulate in various areas of law. In managing legal risks deriving from the diversity of Member States' laws, which create barriers to trade and hinder

the Union's economy, the Union itself has actually produced new legal risks that now have to be addressed. This failure on the part of EU institutions to manage legal risks has contributed to legal uncertainty for actors operating on the internal market. This book intends to contribute to the Union's smoother functioning and continuing development by proposing effective concrete solutions for managing the legal risks distorting the development of various areas of EU law. It pursues an innovative and effective approach to identify legal risks, their causes at the EU level and their impacts on the functioning of the Union and its Member States. By presenting new approaches in this context, the first book on legal risk management in the EU will actively promote the improvement of the EU lawmaking process and the application of EU law in practice.

croatian language to english translation: Talking about Motion Luna Filipovi?, 2007-12-06

This is a corpus-based study of lexicalization of motion events in Serbo-Croatian and English, with contrasting examples from Spanish, French, Italian, Mandarin Chinese and Albanian. Talmy's typology (1985) provides the backdrop for the analysis and the focus is on intratypological differences that affect habitual presence or absence of information in motion expressions crosslinguistically as well as "pattern clashing" in translation. This fresh look at issues regarding linguistic typology, lexical and construction meaning and spatio-temporal construals in language and experience results in a more finely grained classification of verbalized motion events. The study offers an eclectic overview of different theoretical approaches and insists on theoretically unbiased set of tools and principles that can be used in studies of any cognitive domain in any language. It provides an in-depth discussion of current issues in cognitive linguistics in particular and suggests systematic implementation of the research findings in applied and interdisciplinary studies of language.
