Overview of CSU Fresno Speech Pathology Program

The CSU Fresno speech pathology program is housed within the Department of Communicative Sciences and Deaf Studies. It offers both undergraduate and graduate degrees focused on communication disorders, including a Master of Science in Speech-Language Pathology. The program emphasizes evidence-based practice, preparing students to assess, diagnose, and treat speech, language, voice, and swallowing disorders across the lifespan. CSU Fresno is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA), ensuring that its curriculum meets rigorous professional standards. The program's mission centers on fostering skilled clinicians who are culturally competent and equipped to serve diverse populations.

Academic Curriculum and Coursework

The curriculum in csu fresno speech pathology is designed to cover foundational knowledge, clinical skills, and research methodologies. Students engage in interdisciplinary study combining linguistics, anatomy, physiology, psychology, and education. The program offers a structured sequence of courses that provide theoretical and practical understanding of communication disorders.

Core Courses

Key courses include:

- Introduction to Communication Disorders
- Anatomy and Physiology of Speech and Hearing Mechanisms
- Phonetics and Phonology
- Language Development and Disorders
- Speech Sound Disorders
- Neurological Bases of Communication
- Augmentative and Alternative Communication
- Research Methods in Communication Sciences

Graduate-Level Coursework

Graduate students undertake advanced courses that focus on assessment, intervention, and clinical practicum. Emphasis is placed on multidisciplinary approaches and the integration of technology in therapy. Coursework also prepares students for the national examination required for certification as speech-language pathologists.

Clinical Training and Practicum Opportunities

Clinical experience is a cornerstone of the csu fresno speech pathology program. Students participate in supervised practicum placements that provide direct client interaction and hands-on treatment planning. These experiences occur both on campus and in community settings such as schools, hospitals, and rehabilitation centers.

On-Campus Clinics

CSU Fresno operates a speech and hearing clinic staffed by faculty supervisors where students deliver services to a diverse client base. This setting allows students to apply theoretical knowledge in real-world scenarios while refining diagnostic and therapeutic skills.

Externships and Community Placements

Externship placements extend clinical training into specialized environments. Students work alongside licensed professionals in healthcare facilities, educational institutions, and private practices. These opportunities help students gain exposure to various populations, including children with developmental delays and adults with acquired communication disorders.

Faculty and Research Initiatives

The faculty involved in the csu fresno speech pathology program are experienced clinicians and active researchers. They contribute to advancing knowledge in areas such as language acquisition, speech sound disorders, and neurogenic communication impairments. Faculty members mentor students in research projects and encourage participation in professional conferences.

Research Focus Areas

Research initiatives at CSU Fresno include:

- Speech and language development in bilingual populations
- Innovative therapy techniques using technology
- Swallowing disorders and rehabilitation
- Neuroplasticity and recovery after brain injury
- Communication disorders associated with aging

Student Involvement in Research

Graduate students have the opportunity to collaborate with faculty on research projects, contributing to publications and presentations. This involvement enhances their academic experience and strengthens their professional credentials.

Admission Requirements and Application Process

Admission to the csu fresno speech pathology graduate program is competitive and requires meeting specific criteria. Prospective students must hold a bachelor's degree with prerequisite coursework in communication sciences. The application process includes submission of transcripts, letters of recommendation, a statement of purpose, and GRE scores (if required).

Prerequisite Coursework

Applicants should have completed foundational courses such as:

- Introduction to Communication Disorders
- Anatomy and Physiology of Speech and Hearing
- Phonetics

csu fresno speech pathology: Treatment Protocols for Language Disorders in Children, Volume II Hegde, M.N., 2005-11-01 Contains protocols for basic language skills most children with language disorder need to be taught in the initial stages of treatment. The protocols give scripted scenarios for teaching most of the bound morphemes of English that children with language disorder typically lack. These include: basic words; regular and irregular plurals; possessive; present progressive; prepositions; pronouns; auxiliaries and copula; regular and irregular past tense; articles; conjunctions; adverbs; regular third person singular. For each target skill, 20 exemplars are available for the clinician to base rate, treat, and probe for generalized production. Most children can be advanced to relatively complex social communication skill level training only when they have mastered the basic morphologic features.

It also includes examples of the "elements of scientific style," such as capitalization and abbreviations, how to reference sources cited within the text, and how to prepare the reference list. Also covered are how to submit a manuscript to scholarly journals and best practices for proofreading and making revisions. The last section is focused on professional/clinical writing and the various written communications speech-language pathologists (SLPs) prepare as part of their jobs. These include diagnostic reports, brief and comprehensive treatment plans, and progress reports. The book ends with a section on report writing for SLPs working in public schools, including assessment reports, IEPs, and SOAP notes. A unique and student-friendly feature of the book is its practical design. The first two sections provide incorrect exemplars the user can rewrite or write correctly. In the last section, left-hand pages show specific

examples of general, scientific, or professional writing, and the corresponding right-hand pages allow students to practice writing. Updates to the Scientific Writing section include: The text incorporates APA 7th edition changes to reference citations and preparation of the reference list, along with updates on how to cite electronic sources. The bias-free writing section is updated and expanded to include appropriate terms and writing style to describe LGBTQ community members. A glossary is provided for easy reference. Information on how to submit content to academic journals and conferences, preparing electronic manuscripts, and making revisions in light of the copyeditor's comments have been updated to current publishing industry standards. Updates to the Professional Writing section include: The text includes current clinical terminology and practice in speech-language pathology. A new trial-by-trial treatment progress recording sheet has been added to the progress report section. A subjective, objective, assessment, plan (SOAP) progress report written for medical settings has been added, along with a new section on report writing in public schools, which includes an assessment plan that helps determine whether a student meets the school district's criteria for enrollment in clinical speech-language services.
