Benefits of CT Science Center Membership

The CT Science Center membership provides a wide array of benefits designed to enhance the visitor experience and encourage frequent engagement with the center's offerings. Members enjoy unlimited general admission throughout the year, which allows for repeated exploration of the interactive exhibits and hands-on science activities. This unlimited access supports continuous learning and enjoyment for families, school groups, and science enthusiasts.

Additional benefits include discounts on special exhibitions, workshops, and summer camps, which provide even more opportunities to delve into scientific topics. Members also receive exclusive invitations to member-only events, early access to new exhibits, and discounts at the museum store and café. These perks combine to deliver exceptional value and a rich cultural experience.

Overall, the CT Science Center membership is tailored to maximize engagement with science education and foster a sense of community among its members.

Unlimited Admission

Members gain unlimited access to the science center's permanent exhibits, allowing them to visit as often as desired without additional charges. This benefit is ideal for families and individuals who want to continuously explore and learn.

Discounts and Savings

Membership includes savings on various programs and services, such as:

- Special exhibit tickets
- Educational workshops
- Summer camps and classes
- Gift shop purchases
- Café dining

Membership Levels and Pricing

The CT Science Center membership offers several levels to accommodate different types of visitors and budgets. Each level is designed to provide increasing benefits and access, allowing members to choose the option that best fits their needs. Memberships can be purchased for individuals, families, and even corporate groups.

Pricing varies according to the membership tier and the number of people included. Typically, family memberships cover two adults and their children, while individual memberships cater to single visitors. Higher-tier memberships may include reciprocal benefits with other science centers and museums nationwide.

Individual Membership

The individual level is perfect for solo visitors who want full access to the science center's resources. It includes unlimited admission and discounts on programs and retail purchases.

Family Membership

Family memberships cover multiple family members, usually two adults and up to four children. This tier offers significant value for families seeking regular educational outings.

Supporting and Corporate Memberships

Supporting memberships provide additional benefits such as guest passes and recognition opportunities. Corporate memberships are designed for businesses interested in supporting STEM education and offering their employees cultural benefits.

Exclusive Member Events and Programs

One of the key attractions of CT Science Center membership is access to exclusive events and programs reserved only for members. These events foster a deeper connection to science through social and educational experiences.

Members receive invitations to special previews of new exhibits, science-themed lectures, and networking events with scientists and educators. Family-oriented programs often include science nights, hands-on workshops, and holiday events that make learning fun and engaging for all ages.

Member-Only Previews

Before new exhibits open to the public, members are invited to preview events, allowing them early access and opportunities to interact with exhibit developers.

Educational Workshops and Lectures

Members can attend exclusive workshops that cover a range of scientific topics, from robotics to environmental science, led by experts in the field.

Family Science Nights

These events provide interactive activities designed for families to learn together in an entertaining environment, promoting STEM skills and curiosity.

Educational Resources and Opportunities

The CT Science Center membership also grants access to a variety of educational resources that support learning in science, technology, engineering, and math. Members benefit from structured programs for students and educators, making the membership a valuable tool for formal and informal science education.

The center offers curriculum-aligned content, science kits, and outreach programs that extend learning beyond the museum walls. Membership supports participation in camps, classes, and summer programs that foster critical thinking and creativity among young learners.

Programs for Students

Science camps, after-school classes, and summer workshops provide hands-on learning experiences tailored to various age groups and skill levels.

Resources for Educators

Teachers and educational professionals have access to lesson plans, professional development

sessions, and special group rates for field trips.

STEM Outreach Initiatives

The center conducts outreach programs to bring science education to underserved communities, promoting inclusivity and wider access to STEM learning.

How to Purchase and Renew Membership

Acquiring a CT Science Center membership is a straightforward process designed to encourage ongoing participation. Prospective members can purchase their membership online, by phone, or at the center's admission desk. Memberships typically last for one year from the date of purchase and can be renewed annually to maintain benefits.

Renewal reminders and easy payment options ensure members can continue enjoying uninterrupted access to all the advantages the center offers. Members are encouraged to update their contact information to stay informed about upcoming events and new programs.

Purchasing Options

Memberships can be purchased through multiple convenient channels, providing flexibility for all visitors.

Annual Renewal Process

Renewals are managed to ensure continuous benefits, with options for automatic renewal or manual payment.

ct science center membership: *Cognitive Development in Museum Settings* David M. Sobel, Jennifer L. Jipson, 2015-10-30 Researchers in cognitive development are gaining new insights into the ways in which children learn about the world. At the same time, there has been increased recognition of the important role that visits to informal learning institutions plays in supporting learning. Research and practice pursuits typically unfold independently and often with different goals and methods, making it difficult to make meaningful connections between laboratory research in cognitive development and practices in informal education. Recently, groundbreaking partnerships between researchers and practitioners have resulted in innovative strategies for linking findings in cognitive development together with goals critical to museum practitioners, such as exhibit evaluation and design. *Cognitive Development in Museum Settings* offers an account of ways in which researchers in cognitive development partner with museum practitioners. Each chapter describes a partnership between academic researchers and museum practitioners and details their collaboration, the important research that has resulted from their partnership, and the benefits and challenges of maintaining their relationship. This approach illustrates cutting-edge developmental science, but also considers how researcher-practitioner interactions affect research outcomes and provide insight to questions common to practitioners. In addition, each set of researchers and practitioners discusses issues brought up by the partnership by posing questions concerning research-practice partnerships and research evidence, considering whether and how cognitive development research conducted in museum settings aligns with larger disciplinary interests in that field, and examining to what extent museum practitioners benefit from applying research on the development of cognitive processes to their educational practices.
