Gloria Guzmán Johannessen, 2019-01-14 This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across

nations and all levels of educational systems.

Kulkarni, 2025-10-17 Addressing Racism and Ableism in the Classroom and Teacher Education centers and elevates narratives of special education teachers of color, an overlooked and underserved population in public education, as a vehicle for analyzing the tensions of race and disability. Special education teachers of color, who work and may themselves live at the intersections of these complex identity constructs, are uniquely positioned to develop effective approaches to countering racism and ableism. This book offers five critical case studies of special education teachers of color, whose replicable practices span preschool through high school classrooms while also holding urgent implications for teacher education programs. Building toward an original framework that synthesizes DisCrit and Culturally Sustaining Pedagogies, these narratives refuse deficit readings of disability among students of color and instead prepare teachers to model collective joy and pride in their identities.
