Academic Programs and Curriculum

The csu san bernardino psychology department offers a variety of academic programs designed to meet the needs of undergraduate and graduate students. These programs are structured to provide a solid foundation in psychological theories, research methods, and applied practices. With a focus on both breadth and depth, the curriculum integrates core psychological concepts with specialized courses that reflect current trends and advances in the field.

Undergraduate Degree Options

Students pursuing a Bachelor of Arts or Bachelor of Science in Psychology at CSU San Bernardino benefit from a rigorous curriculum that covers essential topics such as developmental psychology, cognitive processes, abnormal psychology, and social behavior. The program requires completion of general education courses, core psychology classes, and electives that allow for exploration of specific interests.

Graduate Programs

The university offers graduate degrees including a Master of Science in Psychology with various specializations. These programs are designed to prepare students for professional practice or doctoral

study. Coursework at this level emphasizes advanced research techniques, clinical assessment, and intervention strategies.

Curriculum Highlights

Key components of the csu san bernardino psychology curriculum include:

- Research methods and statistics
- Biopsychology and neuroscience
- Psychological assessment and testing
- Therapeutic techniques and counseling theories
- Ethics and multicultural competence

Faculty and Research Opportunities

The faculty members within the csu san bernardino psychology department are distinguished scholars and practitioners who bring a wealth of experience to the classroom. Their expertise spans a broad range of psychological subfields, fostering a rich educational environment that encourages inquiry and innovation.

Faculty Expertise

Professors at CSU San Bernardino specialize in areas such as clinical psychology, cognitive neuroscience, social psychology, developmental psychology, and health psychology. Many faculty members actively engage in research projects that contribute to the advancement of psychological science and practice.

Student Research Involvement

Students are encouraged to participate in faculty-led research, providing hands-on experience with experimental design, data collection, and analysis. Opportunities include assisting with studies, presenting findings at conferences, and contributing to scholarly publications. These experiences enhance critical thinking and prepare students for graduate education or research careers.

Research Facilities and Labs

CSU San Bernardino provides specialized laboratories and resources to support psychological research, including:

- Behavioral observation labs
- Neuropsychology testing suites
- Computerized data analysis centers
- Clinical simulation rooms

Career Paths and Professional Development

Graduates of the CSU San Bernardino psychology program are well-equipped to pursue diverse career paths in mental health services, education, business, and research. The program emphasizes practical skills and professional ethics to prepare students for the workforce or advanced study.

Career Opportunities

Common career trajectories for CSU San Bernardino psychology alumni include roles such as:

- Licensed mental health counselor
- School psychologist
- Human resources specialist
- Research analyst
- Behavioral therapist
- Academic instructor

Licensure and Certification Preparation

The curriculum aligns with state and national requirements for licensure in various psychology-related professions. Students receive guidance on certification processes, exam preparation, and supervised clinical hours necessary for professional credentials.

Internships and Practical Experience

CSU San Bernardino psychology students have access to internship placements in community agencies, hospitals, schools, and private practices. These experiences facilitate the development of applied skills and networking opportunities essential for career advancement.

Student Resources and Support Services

The psychology department at CSU San Bernardino offers comprehensive support services to ensure student success academically and professionally. These resources are designed to foster a supportive learning environment and promote student well-being.

Academic Advising and Mentorship

Students benefit from dedicated academic advisors who assist with course planning, degree requirements, and career counseling. Faculty mentors provide personalized guidance on research projects, graduate school applications, and professional development.

Psychology Club and Student Organizations

Active student organizations, such as the Psychology Club, offer opportunities for networking, community service, and professional growth. These groups host guest lectures, workshops, and social events that enhance the educational experience.

Writing and Tutoring Services

To support academic achievement, CSU San Bernardino provides writing centers and tutoring programs specializing in psychology coursework. These services help students improve research papers, presentations, and comprehension of complex material.

Community Engagement and Psychological Services

The CSU San Bernardino psychology program emphasizes community involvement and the practical application of psychological knowledge to benefit the public. The department operates various outreach initiatives and clinical services that serve the local population.

Psychological Assessment Clinic

The university hosts a Psychological Assessment Clinic where graduate students conduct supervised evaluations for clients. This clinic offers affordable mental health assessments and contributes to student training in diagnostic procedures.

Community Outreach Programs

CSU San Bernardino psychology faculty and students collaborate with community organizations to provide educational workshops, mental health screenings, and support groups. These programs promote psychological well-being and raise awareness about mental health issues.

Service Learning and Volunteer Opportunities

Students are encouraged to engage in service learning projects that integrate academic coursework with community service. Volunteer opportunities in local schools, hospitals, and nonprofit agencies complement classroom learning and foster civic responsibility.

Frequently Asked Questions

How competitive is admission to the CSU San Bernardino psychology graduate programs?

Admission to CSU San Bernardino's psychology graduate programs is competitive, with requirements including a strong academic record, letters of recommendation, and relevant experience.

Are there internship opportunities for psychology students at CSU San Bernardino?

Yes, CSU San Bernardino offers various internship opportunities in clinical, counseling, and research settings to help psychology students gain practical experience.

What distinguishes CSU San Bernardino's Clinical Psychology Ph.D. program from others?

CSU San Bernardino's Clinical Psychology Ph.D. program emphasizes community psychology and multicultural competence, preparing students to serve diverse populations.

Additional Resources

1. Foundations of Psychology at CSU San Bernardino

This book provides an overview of the core psychological theories and practices taught at CSU San Bernardino. It covers fundamental topics such as cognitive processes, behavioral psychology, and developmental psychology, tailored to the university's curriculum. The text integrates research findings and case studies relevant to the CSU San Bernardino student body, offering practical insights into psychological principles.

2. Research Methods in Psychology: A CSU San Bernardino Perspective

Focusing on the methodologies used in psychological research, this book guides students through designing experiments, collecting data, and analyzing results. It emphasizes ethical considerations and the application of research techniques specific to CSU San Bernardino's psychology program. Students will find examples of local studies and projects that highlight the importance of empirical evidence in psychology.

3. Clinical Psychology Practices at CSU San Bernardino

This title explores clinical psychology with a particular lens on the practices and training available at CSU San Bernardino. It covers assessment, diagnosis, and therapeutic interventions, with case examples drawn from the university's clinics. The book also discusses the integration of multicultural competencies in clinical settings.

4. Developmental Psychology: Insights from CSU San Bernardino

Covering the lifespan from infancy to adulthood, this book delves into developmental milestones and psychological growth as studied at CSU San Bernardino. It highlights research conducted by faculty and students, focusing on cognitive, emotional, and social development. The text is designed to complement coursework and stimulate critical thinking about human development.

5. Social Psychology and Community Engagement at CSU San Bernardino

This book emphasizes the role of social psychology in understanding group behavior, social influence, and community dynamics. It includes projects and initiatives led by CSU San Bernardino psychology students that address local community issues. Readers will gain an appreciation for how social psychology theories apply to real-world social challenges.

6. Neuroscience Foundations in the CSU San Bernardino Psychology Program

Providing an introduction to the biological bases of behavior, this book integrates neuroscience

principles with the CSU San Bernardino psychology curriculum. It covers brain structure, neural communication, and the impact of neurobiology on mental health. The text is enriched with laboratory exercises and research findings from the university's neuroscience labs.

7. Cognitive Psychology: Concepts and Applications at CSU San Bernardino

This book examines cognitive processes such as perception, memory, problem-solving, and decision-making from the perspective of CSU San Bernardino's psychology department. It discusses both classical theories and contemporary research, with examples relevant to students' academic and everyday experiences. Practical applications in education and technology are also explored.

8. Psychology and Diversity: Exploring Multicultural Issues at CSU San Bernardino

Addressing the importance of cultural competence, this book explores how diversity impacts psychological theory and practice. It highlights initiatives and coursework at CSU San Bernardino that prepare students to work effectively in diverse environments. The text includes discussions on identity, bias, and inclusive approaches to mental health care.

9. Applied Psychology in the CSU San Bernardino Community

Focusing on the practical application of psychological principles, this book showcases how CSU San Bernardino psychology students and faculty engage with local organizations and populations. It covers areas such as organizational psychology, health psychology, and educational interventions. Case studies demonstrate the impact of applied psychology in improving community well-being.

csu san bernardino psychology: Mastering Industrial-Organizational Psychology

Elizabeth Shoenfelt, 2020 This volume brings together faculty from top-ranked I-O master's programs to provide best practices and discussions of important topics for the training of master's level I-O psychologists, including areas of career practice, applying to graduate school, applied experiences needed to prepare graduates for the workplace, methods of teaching and considerations for faculty in I-O master's programs, and consulting in organizations as a component of graduate education.

csu san bernardino psychology: International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders V.E. Caballo, 1998-11-27 This handbook shows the wide perspective cognitive-behavioural treatment can offer to health professionals, the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many 'mental' disorders, even if certain disciplines continue to favour other kinds of treatment. This book offers a wide range of structured programmes for the treatment of various psychological/psychiatric disorders as classified by the DSM-IV. The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment. It is divided into seven sections, covering anxiety disorders, sexual disorders, dissociative, somatoform, impulse control disorders, emotional disorders and psychotic and organic disorders. Throughout the twenty-three chapters, this book offers the health professional a structured guide with which to start tackling a

whole series of 'mental' disorders and offers pointers as to where to find more detailed information. The programmes outlined should, it is hoped, prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist.

csu san bernardino psychology: Innovations in Feminist Psychological Research Ellen B. Kimmel, 1999 What are the best ways to do research on the psychology of women and gender? Within feminist psychology, there is a great deal of methodological creativity and diversity. This volume highlights how familiar methods such as focus groups can be brought to bear on feminist issues. It demonstrates less common methods, such as Q-sort, phenomenological analysis, concept mapping, and discourse analysis. Moreover, it explores the role of personal values, interpersonal dynamics, and sociopolitical influences on the research process. Over 60 international contributors share insights into adolescent girls and adult women's sexuality, violence and its prevention, life patterns and narratives, the teaching-research nexus, gender and race in clinical practice, and more. Included is a comprehensive resource guide for research, publication and teaching on methodological diversity.

csu san bernardino psychology: Measurement Theory in Action Kenneth S Shultz, David J. Whitney, Michael J Zickar, 2020-12-30 Measurement Theory in Action, Third Edition, helps readers apply testing and measurement theories and features 22 self-contained modules which instructors can match to their courses. Each module features an overview of a measurement issue and a step-by-step application of that theory. Best Practices provide recommendations for ensuring the appropriate application of the theory. Practical Questions help students assess their understanding of the topic. Students can apply the material using real data in the Exercises, some of which require no computer access, while others involve the use of statistical software to solve the problem. Case Studies in each module depict typical dilemmas faced when applying measurement theory followed by Questions to Ponder to encourage critical examination of the issues noted in the cases. The book's website houses the data sets, additional exercises, PowerPoints, and more. Other features include suggested readings to further one's understanding of the topics, a glossary, and a comprehensive exercise in Appendix A that incorporates many of the steps in the development of a measure of typical performance. Updated throughout to reflect recent changes in the field, the new edition also features: Recent changes in understanding measurement, with over 50 new and updated references Explanations of why each chapter, article, or book in each module's Further Readings section is recommended Instructors will find suggested answers to the book's questions and exercises; detailed solutions to the exercises; test bank with 10 multiple choice and 5 short answer questions for each module; and PowerPoint slides. Students and instructors can access SPSS data sets; additional exercises; the glossary; and additional information helpful in understanding psychometric concepts. It is ideal as a text for any psychometrics or testing and measurement course taught in psychology, education, marketing, and management. It is also an invaluable reference for professional researchers in need of a quick refresher on applying measurement theory.

csu san bernardino psychology: Graduate & Professional Programs: An Overview 2011 (Grad 1) Peterson's, 2011-05-01 An Overview contains more than 2,300 university/college profiles that offer valuable information on graduate and professional degrees and certificates, enrollment figures, tuition, financial support, housing, faculty, research affiliations, library facilities, and contact information. This graduate guide enables students to explore program listings by field and institution. Two-page in-depth descriptions, written by administrators at featured institutions, give complete details on the graduate study available. This book investigates the many definitions of creativity, as well as how it is manifested and measured in schools, the workplace, business, art, media, and more. Key Topics Discussed: The Four Ps of creativity: person, product, process, and press How creativity influences personality, motivation, intelligence, and talent The dark side of creativity: the remarkable relationship between creativity and mental illness Emerging directions in creativity research, with discussions on neuroscience, the media, and literature The Psych 101 Series Short, reader-friendly introductions to cutting-edge topics in psychology. With key concepts, controversial topics, and fascinating accounts of up-to-the-minute research, The Psych 101 Series is a valuable resource for all students of psychology and anyone interested in the field.

csu san bernardino psychology: Graduate & Professional Programs: An Overview 2014

(Grad 1) Peterson's, 2014-01-09 Peterson's Graduate & Professional Programs: An Overview 2014 contains more than 2,250 university/college profiles that offer valuable information on graduate and professional degrees and certificates, enrollment figures, tuition, financial support, housing, faculty, research affiliations, library facilities, and contact information. This graduate guide enables students to explore program listings by field and by institution. Two-page in-depth descriptions, written by administrators at featured institutions, give complete details on the graduate study available. Readers will benefit from the expert advice on the admissions process, financial support, and accrediting agencies.

csu san bernardino psychology: College Access and Opportunity Guide 2011 ,

csu san bernardino psychology: Heavy Work Investment Itzhak Harpaz, Raphael Snir,

2014-07-17 The book deals with the concept of Heavy Work Investment (HWI) recently initiated by Snir and Harpaz. Since its introduction the interest in the general HWI model has increased considerably. The book illustrates the development of HWI conceptualization, theory, and research. It deals with the foremost HWI subtype of workaholism. However, it also compares workaholism as a negative HWI subtype with work devotion/passion/engagement, as a positive HWI subtype. Most importantly, it addresses HWI in general, including its possible situational subtypes. In view of Snir and Harpaz's claim that the study of situational heavy work investors is relatively scarce, this

certainly constitutes a promising step in the right direction. Finally, it deals with timely and important topics examined by prominent international researchers on Heavy Work Investment and such issues as: personality factors of workaholism, work-life balance, cross-cultural similarities and differences in HWI, work addiction and technology, HWI and retirement, and intergenerational similarity in work investment.

csu san bernardino psychology: *Graduate Study in Psychology* , 2006

csu san bernardino psychology: *Gender Identity, Equity, and Violence* Geraldine B. Stahly, 2023-07-03 The authors of the thirteen chapters in this volume bring excitement and innovations to teaching about gender from a wide range of theoretical and discipline perspectives. They exhibit the inclusiveness that is central to feminist pedagogy—a perspective that centers the educational enterprise in the analysis of the interconnectedness of social categories that have traditionally divided and given root to inequality and oppression and aims for no less than social transformation. Empowerment is a core value in gender education and the experiential approach nurtures that goal. This volume provides many examples of the power of learning through experience as the authors demonstrate that, “...the authority of the feminist teacher as intellectual and theorist finds expression in the goal of making students themselves theorists of their own lives by interrogating and analyzing their own experience.” (Weiler, 1991) To stimulate the adaptation of the approaches described in these books, each volume includes an Activity / Methodology table that summarizes key elements of each example, such as class size, pedagogy, and other disciplinary applications.

csu san bernardino psychology: Peterson's Graduate Programs in the Social Sciences 2011

Peterson's, 2011-07-01 Peterson's Graduate Programs in the Social Sciences contains a wealth of information on colleges and universities that offer graduate work in Area & Cultural Studies; Communication & Media; Conflict Resolution & Mediation/Peace Studies; Criminology & Forensics; Economics; Family & Consumer Sciences; Geography; Military & Defense Studies; Political Science & International Affairs; Psychology & Counseling; Public, Regional, & Industrial Affairs; Social Sciences; and Sociology, Anthropology, & Archaeology. Institutions listed include those in the United States, Canada, and abroad that are accredited by U.S. accrediting agencies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

csu san bernardino psychology: Predictive Analytics of Psychological Disorders in Healthcare

Mamta Mittal, Lalit Mohan Goyal, 2022-05-20 This book discusses an interdisciplinary field which combines two major domains: healthcare and data analytics. It presents research studies by experts helping to fight discontent, distress, anxiety and unrealized potential by using mathematical models, machine learning, artificial intelligence, etc. and take preventive measures beforehand. Psychological disorders and biological abnormalities are significantly related with the applications of cognitive illnesses which has increased significantly in contemporary years and needs rapid investigation. The research content of this book is helpful for psychological undergraduates, health workers and their trainees, therapists, medical psychologists, and nurses.

csu san bernardino psychology: **Graduate Programs in the Humanities, Arts & Social Sciences 2014 (Grad 2)** Peterson's, 2013-11-22 Peterson's Graduate Programs in the Humanities, Arts & Social Sciences 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, applied arts & design, area & cultural studies, art & art history, conflict resolution & mediation/peace studies, criminology & forensics, language & literature, psychology & counseling, religious studies, sociology, anthropology, archaeology and more.

Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

csu san bernardino psychology: *Parent-Youth Relations* Stephan Wilson, Gary W Peterson, Suzanne Steinmetz, 2012-12-06 Explore the most fundamental human relationship between parent and child. Western social science has long neglected to acknowledge that family relationships must always be examined from a culturally sensitive perspective. *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* fills this void by exploring in depth the most fundamental human relationship between parent and child in different societies around the world. International experts provide a comprehensive collection of original research and theory on how parental styles and the effects of culture are interconnected. Written from diverse perspectives, this unique resource reveals deep insight into these relationships by focusing on the individuals, the structure of the family, and societal and cultural influences. Parental relations and cultural belief systems both play integral parts on how socialization and development occur in children. *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* presents several viewpoints, some comparing similarities and differences across societies or nations, others exploring relationships within a single culture. This probing global look at parent-youth relations provides sensitively nuanced information valuable for every professional or student in the social sciences. Detailed tables illustrate research data while thorough bibliographies offer opportunities for further study. *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* explores: parenting style and its effects on children in Chinese culture parenting style in problem-solving situations in Hong Kong cross-national perspectives on parental acceptance-rejection theory multinational studies of interparental conflict, parenting, and adolescent functioning the relationship between parenting behaviors and adolescent achievement in Chile and Ecuador parent-adolescent relations and problem behaviors in Hungary, the Netherlands, Switzerland, and the United States cross-national analysis of family and school socialization and adolescent academic achievement parent-child contact after divorce from the child's perspective familial impacts on adolescent aggression and depression in Colombia predicting Korean adolescents' sexual behavior from individual and family factors parenting in Mexican society relations with parents and friends during adolescence and early adulthood parent-child relationships in childhood and adulthood and their effect on the parent's marriage the effects of financial hardship, interparental conflict, and maternal parenting in Germany and more original research studies! *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* presents the freshest research available along with extensive bibliographies, providing essential reading for educators, advanced undergraduates, graduate students, and professionals in family studies, sociology, psychology, and anthropology.

csu san bernardino psychology: *Assassins* Boris Volodarsky, 2020-02-19 A look at the events surrounding the 2006 poisoning of a former Russian security officer in Great Britain. In November, 1998, Alexander Litvinenko, a former lieutenant colonel of the Russian security service or FSB, along with several former colleagues, publicly stated that their superiors had instigated an assassination attempt on a Russian tycoon and oligarch. Following his subsequent arrest and failed trials, Litvinenko fled to London where, having been granted asylum, he worked as a journalist and writer, as well as acting as a consultant for the British intelligence services. Eight years later, Litvinenko's past caught up with him when he was assassinated in London. On November 1, 2006,

Litvinenko was suddenly taken ill and hospitalized. He passed away twenty-two days later. Significant amounts of a rare, highly toxic element were subsequently found in his body. Before his death, Litvinenko had said, "You may succeed in silencing one man, but the howl of protest from around the world, Mr. Putin, will reverberate in your ears for the rest of your life." Author Boris Volodarsky, who was consulted by the Metropolitan Police during the investigation and remains in close contact with Litvinenko's widow, details the events surrounding Litvinenko's murder. Volodarsky updates the story, referring to the findings of the official British inquiry, on the release of which Prime Minister David Cameron condemned Putin for presiding over "state sponsored murder." The author proves that the Litvinenko's poisoning is just one of many. Some of these assassinations or attempted assassinations are already known; others are revealed by him for the first time.

csu san bernardino psychology: Women and Management Michele A. Paludi, 2013-02-20 For every woman still bumping the glass ceiling and every man who cares, these volumes recount challenges female leaders face—and strategies that will smooth the path to managerial positions in corporate America and worldwide. Expert contributors offer a global perspective on issues women leaders and managers must confront every day, from sex discrimination, sexual harassment, and gender mainstreaming to pay inequity and male perceptions of women leaders. Volume 1, *Degrees of Challenge*, addresses both overt and subtle biases women encounter in trying to meet their career aspirations. Volume 2, *Signs of Solutions*, offers concrete, empowering strategies for organizational change intended to eliminate discriminatory treatment of women in the workplace. The 30 research-based studies here are drawn from nations as disparate as the United States, Turkey, Puerto Rico, Australia, Japan, Great Britain, Israel, the Czech Republic, the Dominican Republic, India, Nepal, Korea, Sri Lanka, and Indonesia to showcase new and emerging solutions worldwide. Accounts from woman managers are also included to provide the reader with real-life examples of how women deal with organizations that welcome them—and those that hinder their performance.
