

csu general education breadth

csu general education breadth is a foundational component of the California State University system's undergraduate curriculum designed to ensure that students gain a well-rounded education. This breadth requirement encompasses a diverse range of disciplines, promoting critical thinking, communication skills, and cultural awareness. Understanding the structure and purpose of the CSU general education breadth is essential for students navigating degree requirements and planning their academic pathways. This article provides an in-depth exploration of the CSU general education breadth, including its categories, course options, transfer policies, and benefits. Readers will gain clarity on how this curriculum supports academic success and prepares students for professional and civic life. The following sections will outline the key elements of the CSU general education breadth and offer practical guidance for successful completion.

- Overview of CSU General Education Breadth Requirements
- Categories and Areas of Study Within the General Education Breadth
- Course Selection and Approval Process
- Transfer Students and CSU General Education Breadth
- Benefits of Completing CSU General Education Breadth

Overview of CSU General Education Breadth Requirements

The CSU general education breadth is a set of lower-division courses that all undergraduate students must complete to graduate. These courses are designed to provide a comprehensive educational experience beyond the major field of study. The breadth requirement ensures that students develop knowledge and skills across multiple disciplines, fostering intellectual versatility and adaptability. Typically, the CSU general education breadth consists of approximately 48 semester units distributed across several subject areas. Completion of these requirements is mandatory unless students fulfill an equivalent general education pattern, such as the Intersegmental General Education Transfer Curriculum (IGETC) for transfer students. The CSU system regularly reviews and updates the breadth requirements to maintain academic rigor and relevance to evolving educational standards.

Categories and Areas of Study Within the General Education Breadth

The CSU general education breadth is organized into five main categories that cover a broad spectrum of academic disciplines. Each category includes specific subareas requiring students to complete courses that foster diverse intellectual competencies. The categories are designed to balance arts, sciences, social sciences, and communication skills to produce well-educated

graduates.

Category A: English Language Communication and Critical Thinking

This category emphasizes effective communication and analytical skills through courses in English composition, oral communication, and critical thinking. It typically includes:

- Oral Communication
- Written Communication
- Critical Thinking

Category B: Scientific Inquiry and Quantitative Reasoning

Courses in this category develop students' understanding of scientific principles and quantitative methods. It is divided into:

- B1: Physical Science
- B2: Life Science
- B3: Laboratory Activity
- B4: Mathematics/Quantitative Reasoning

Category C: Arts and Humanities

Category C fosters appreciation and critical analysis of cultural, artistic, and philosophical works. Students select courses from:

- C1: Arts
- C2: Humanities

Category D: Social Sciences

This area focuses on understanding human behavior, society, and social institutions. Courses may include topics in history, political science, psychology, and economics, among others.

Category E: Lifelong Learning and Self-Development

Category E encourages personal growth and awareness through courses that promote health, wellness, and self-understanding.

Course Selection and Approval Process

Choosing courses that satisfy the CSU general education breadth requirements involves careful planning and consultation with academic advisors. Each CSU campus maintains an approved list of courses that fulfill the general education categories. Students must ensure that selected courses meet the criteria and are transferable across campuses within the CSU system.

To assist students, the CSU system provides a General Education Course List, which is periodically updated. This list identifies courses approved for each breadth category and subarea. Additionally, students can use the ASSIST website to verify course equivalencies and transferability between California community colleges and CSU campuses.

The approval process for new courses to be included in the CSU general education breadth involves rigorous evaluation by curriculum committees to ensure academic quality and relevance. Faculty review course content, learning outcomes, and alignment with breadth categories before granting approval.

Transfer Students and CSU General Education Breadth

Transfer students from California community colleges can fulfill the CSU general education breadth requirement by completing the Intersegmental General Education Transfer Curriculum (IGETC) or the CSU General Education Breadth pattern. These transfer pathways facilitate a smooth transition to CSU campuses and help avoid unnecessary repetition of coursework.

IGETC is commonly used for students planning to transfer to either CSU or University of California (UC) campuses. Completion of IGETC satisfies lower-division general education requirements, but students should confirm with their intended CSU campus which pattern is preferred or required.

Students transferring without completion of a full general education pattern may need to complete remaining breadth courses after admission. Academic advising is crucial to ensure timely progress toward degree completion.

Benefits of Completing CSU General Education Breadth

Completing the CSU general education breadth offers multiple academic and personal benefits. It equips students with a broad knowledge base and versatile skill set that are valuable in the workforce and civic engagement. Some notable benefits include:

- **Enhanced Critical Thinking:** Breadth courses develop analytical skills applicable across professions.

- **Improved Communication:** Emphasis on writing and oral communication prepares students for effective interaction.
- **Cultural Competency:** Exposure to diverse perspectives fosters social awareness and empathy.
- **Academic Flexibility:** A broad foundation allows students to explore different fields and adapt to changing career goals.
- **Transferability:** Standardized breadth requirements facilitate credit transfer within the CSU system.

Overall, the CSU general education breadth is a critical component of undergraduate education that supports student success both academically and professionally.

Frequently Asked Questions

What is the CSU General Education Breadth requirement?

The CSU General Education Breadth requirement is a set of courses that students must complete to fulfill lower-division general education requirements for admission to California State University campuses. It covers areas such as English communication, mathematics, arts, humanities, social sciences, and physical and biological sciences.

How many units are required to complete the CSU General Education Breadth?

Typically, students need to complete a minimum of 39 semester units, distributed across five categories: A) English Language Communication and Critical Thinking, B) Scientific Inquiry and Quantitative Reasoning, C) Arts and Humanities, D) Social Sciences, and E) Lifelong Learning and Self-Development.

Can I use the CSU General Education Breadth pattern to satisfy general education at all CSU campuses?

Yes, completing the CSU General Education Breadth pattern satisfies lower-division general education requirements for all California State University campuses, allowing students to transfer without needing to take additional lower-division GE courses.

What is the difference between CSU GE Breadth and IGETC?

CSU GE Breadth is designed specifically for students transferring to California State University campuses, while IGETC (Intersegmental General Education Transfer Curriculum) is a general education pattern that satisfies lower-division requirements at both the University of California and CSU systems. Students should choose the pattern based on their intended transfer

institution.

Where can I find a list of courses that fulfill CSU General Education Breadth requirements?

Course lists for CSU General Education Breadth requirements are typically available on the website of your community college or California State University campus. Additionally, the CSU Chancellor's Office website provides resources and approved course lists to help students plan their GE coursework.

Additional Resources

1. "Sapiens: A Brief History of Humankind" by Yuval Noah Harari

This book offers a compelling overview of the history of human beings from the emergence of Homo sapiens in the Stone Age to the present. It explores how biology and history have defined us and enhanced our understanding of what it means to be "human." The book touches on themes relevant to social sciences and humanities, making it a valuable read for general education breadth.

2. "Thinking, Fast and Slow" by Daniel Kahneman

Nobel laureate Daniel Kahneman delves into the two systems that drive our thinking: the fast, intuitive system and the slow, deliberate system. This book bridges psychology, economics, and decision science, offering insights into human behavior and cognition. It is particularly relevant to social sciences and critical thinking courses within the general education framework.

3. "The Immortal Life of Henrietta Lacks" by Rebecca Skloot

This book tells the true story of Henrietta Lacks, whose cancer cells were taken without her knowledge and led to numerous scientific breakthroughs. It raises important ethical questions about medical research, consent, and race. The narrative connects biology, ethics, and history, fitting well within the natural sciences and social sciences breadth areas.

4. "Guns, Germs, and Steel: The Fates of Human Societies" by Jared Diamond

Jared Diamond explains how environmental and geographical factors shaped the modern world. The book synthesizes anthropology, history, and geography to understand societal development and inequality. It is an excellent resource for courses in social sciences and humanities within CSU's general education.

5. "The Elements of Style" by William Strunk Jr. and E.B. White

A classic guide to writing clearly and effectively, this book is essential for students aiming to improve their communication skills. It covers grammar, style, and composition principles that are fundamental to humanities and communication courses. Mastery of these skills supports success across all academic disciplines.

6. "Silent Spring" by Rachel Carson

This groundbreaking work alerted the public to the dangers of pesticides and sparked the modern environmental movement. Carson's writing combines natural sciences with social impact, emphasizing the interconnectedness of ecology and human health. It is highly relevant to natural sciences and sustainability studies within the general education curriculum.

7. "The Republic" by Plato

A foundational text in Western philosophy and political theory, "The Republic" explores justice, governance, and the ideal society. Plato's dialogues encourage critical thinking about ethics, politics, and human nature, making it a cornerstone for humanities and social sciences courses. Its themes remain pertinent to contemporary discussions of civic responsibility.

8. *"Freakonomics: A Rogue Economist Explores the Hidden Side of Everything"* by Steven D. Levitt and Stephen J. Dubner

This engaging book uses economic theory to explore unexpected and intriguing questions about everyday life. It demonstrates how incentives shape behavior in areas from crime to parenting, promoting analytical thinking relevant to social sciences and quantitative reasoning. The accessible style makes complex ideas approachable for general education students.

9. *"A People's History of the United States"* by Howard Zinn

Zinn offers a perspective on American history from the viewpoint of marginalized groups rather than political and economic elites. This narrative challenges traditional histories and encourages critical examination of social justice and power dynamics. It is an important text for humanities and social sciences breadth courses focused on diversity and equity.

csu general education breadth: A College for All Californians George R. Boggs, Larry Galizio, 2021 This is the first comprehensive and contemporary history of the largest and most diverse public system of higher education in the United States. Serving over 2 million students annually—approximately one-quarter of the nation's community college undergraduates—California's 116 community colleges play an indispensable role in career and

transfer education in North America and have maintained an outsized influence on the evolution of postsecondary education nationally. A College for All Californians chronicles the sector's emergence from K-12 institutions, its evolving mission and growth following World War II and the G.I. Bill For Education, the expansion of its ever-broadening mission, and its essential role in the 1960 Master Plan for Higher Education. Chapters cover California's junior and community colleges' development, mission, governance, faculty, finances, athletics, student support services, and more. It also examines the successes and ongoing political, financial, and educational challenges confronting this uniquely American educational experiment. Book Features: Encapsulates the evolution and contemporary status of our nation's largest and most diverse undergraduate education system. Examines how the colleges were influenced by the political, economic, and social issues of the day. Includes new historical information affecting postsecondary education in California. Analyzes some of the most important current and emerging issues that will continue to influence California's community colleges. Contributors: Carlos O. Turner Cortez, Michelle Fischthal, Jonathan Lightman, Jessica Luedtke, David W. Morse, Joe Newmyer, Mark Robinson, Leslie M. Salas.

csu general education breadth: Implementing Transfer Associate Degrees: Perspectives From the States Carrie B. Kisker, Richard L. Wagoner, 2013-02-25 In recent years, a convergence of several forces—increased legislative involvement in higher education, governmental and philanthropic pressure to increase postsecondary degree and certificate production, and fiscal belt-tightening at colleges and universities across America—has resulted in efforts to significantly reform community college-to-university transfer and articulation processes. One increasingly popular method of reform is the implementation of transfer associate degrees: statewide pathways or degree programs that allow students to both earn an associate degree from a community college and transfer seamlessly into a state university with junior status. This volume of *New Directions for Community Colleges* outlines the elements of effective transfer associate degrees and explores their implementation in six states. This is the 160th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

csu general education breadth: Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students. Among them have been issues related to population density; racial, ethnic, cultural, and linguistic diversity; poverty; racism (individual and institutional); and funding levels. Although urban educators have been addressing these issues for decades, placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent. Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels. In short, urban education remains an ill-defined concept. This comprehensive volume addresses this definitional challenge and provides a 3-part conceptual model in which the achievement of equity for all -- regardless of race, gender, or ethnicity -- is an ideal that is central to urban education. The model also posits that effective urban education requires attention to the three central issues that confronts all education systems (a) accountability of individuals and the institutions in which they work, (b) leadership, which occurs in multiple ways and at multiple levels, and (c) learning, which is the *raison d'être* of education. Just as a three-legged stool would fall if any one leg were weak or missing, each of these areas is essential to effective urban education and affects the others.

csu general education breadth: Reforming the State's Transfer Process Judy Heiman, 2012
Transfer Is a core-yet historically problematic-feature of the State's Higher Education System. The Legislature has long recognized the importance of facilitating the efficient transfer of students between the California Community Colleges (CCC) and four-year universities. According to the Master Plan for Higher Education (originally adopted by the Legislature in 1960 and periodically reviewed), The transfer function shall be recognized by the Governor, Legislature, and the governing boards of each of California's postsecondary education segments as a central institutional priority of all segments of higher education. Despite this emphasis by the state, however, CCC students often must navigate a complex maze of transfer course requirements, which can make accessing and completing a baccalaureate program difficult. Recent Legislation Designed to Streamline Major Transfer Pathways. In an attempt to fundamentally reform the state's primary transfer pipeline from CCC to the California State University (CSU) system, the Legislature and Governor enacted Chapter 428, Statutes of 2010 (SB 1440, Padilla). The legislation requires community colleges to create two-year (60 unit) degrees (known as associate degrees for transfer) that are fully transferable to CSU.

csu general education breadth: The New Flagship University John Aubrey Douglass, 2016-01-26 The New Flagship University is an expansive vision for leading national universities and an alternative narrative to global rankings and World Class Universities. The Flagship model explores pathways for universities to re-shape their missions and operational features to expand their relevancy in the societies that gave them life and purpose.

csu general education breadth: *Susan Haack: Reintegrating Philosophy* Julia F. Göhner, Eva-Maria Jung, 2016-02-26 This volume documents the 17th Münster Lectures in Philosophy with Susan Haack, the prominent contemporary philosopher. It contains an original, programmatic article by Haack on her overall philosophical approach, entitled 'The Fragmentation of Philosophy, the Road to Reintegration'. In addition, the volume includes seven papers on various aspects of Haack's philosophical work as well as her replies to the papers. Susan Haack has deeply influenced many of the debates in contemporary philosophy. In her vivid and accessible way, she has made ground-breaking contributions covering a wide range of topics, from logic, metaphysics and epistemology, to pragmatism and the philosophy of science and law. In her work, Haack has always been very sensitive in detecting subtle differences. The distinctions she has introduced reveal what lies at the core of philosophical controversies, and show the problems that exist with established views. In order to resolve these problems, Haack has developed some 'middle-course approaches'. One example of this is her famous 'Foundherentism', a theory of justification that includes elements from both the rival theories of Foundationalism and Coherentism. Haack herself has offered the best description of her work calling herself a 'passionate moderate'.

csu general education breadth: *The Articulation/transfer Phenomenon* Frederick C. Kintzer, James Lorenzo Wattenbarger, 1985 This report presents a discussion of articulation and transfer between community colleges and four-year institutions and points to future directions for transfer education. Chapter I examines the current situation regarding transfer education including background information on transfer enrollments; a summary of the literature on transfer enrollments, and performance and persistence; performance and persistence in California and other states; and the implications of the current situation for public policy. Chapter II discusses statewide articulation and transfer and identifies three types of statewide and/or transfer agreements (i.e., formal and legally based policies, state system policies, and voluntary agreements between individual institutions or systems), and provides examples of each of these types of agreements. This chapter also examines the transfer of vocational-technical credits and the transfer potential of upper-level universities. Chapter III reviews significant developments on the international scene including an assessment of developments in Canada, the United Kingdom, Scandinavia, and Ireland. Finally, chapter IV examines some new developments in transfer education including the shift in attention from traditional college students to the new clientele; transfer relationships with business/industry, proprietary schools, and the military; major projects undertaken to promote the study of articulation and transfer; and current trends in the area of articulation and transfer.
