## Overview of Four Winds Behavioral Health

Four Winds Behavioral Health is a prominent provider of mental health and substance abuse treatment services, primarily serving Native American communities and other underserved populations. Established with a mission to promote holistic wellness, the organization integrates traditional healing practices with modern clinical approaches. Their commitment to culturally relevant care distinguishes them from many other behavioral health providers.

The organization operates multiple facilities and outreach programs designed to address a wide spectrum of behavioral health needs. Four Winds Behavioral Health emphasizes the importance of individualized treatment plans, ensuring that each client receives care tailored to their specific circumstances and goals. This approach enhances treatment effectiveness and supports long-term recovery and well-being.

## Mission and Vision

The mission of Four Winds Behavioral Health is to provide accessible, high-quality behavioral health services that respect cultural identities and

promote healing. Their vision includes fostering healthy communities through comprehensive care, education, and advocacy. By integrating culturally grounded methods with clinical expertise, Four Winds Behavioral Health aims to reduce health disparities and improve quality of life for their clients.

## **Organizational Structure**

Four Winds Behavioral Health is structured to deliver a continuum of care, including prevention, intervention, treatment, and recovery support. The organization employs multidisciplinary teams composed of psychiatrists, psychologists, counselors, social workers, and traditional healers. This collaborative model ensures that clients benefit from a broad range of expertise and holistic perspectives.

## **Services Offered by Four Winds Behavioral Health**

Four Winds Behavioral Health provides an extensive array of services designed to address mental health disorders, substance use disorders, and co-occurring conditions. These services are available in both inpatient and outpatient settings, allowing flexibility based on client needs and severity of symptoms.

### **Mental Health Treatment**

The organization offers comprehensive mental health services including diagnosis, therapy, medication management, and crisis intervention. Treatment targets conditions such as depression, anxiety, PTSD, bipolar disorder, and schizophrenia. Therapeutic modalities include individual counseling, group therapy, family therapy, and psychoeducation.

### **Substance Abuse Programs**

Substance abuse treatment at Four Winds Behavioral Health encompasses detoxification, outpatient and residential programs, relapse prevention, and aftercare support. The programs address alcohol, drug, and prescription medication dependencies with a focus on sustainable recovery. Integration of culturally sensitive practices enhances engagement and outcomes for clients from diverse backgrounds.

### **Additional Support Services**

Beyond direct clinical care, Four Winds Behavioral Health offers a variety of support services to assist clients in their recovery journey. These include:

- Case management and care coordination
- Peer support groups
- Family education and involvement
- Employment and vocational training assistance
- Community outreach and prevention programs

## **Treatment Approaches and Programs**

Four Winds Behavioral Health employs evidence-based treatment approaches integrated with traditional healing methods to provide culturally competent care. This dual approach supports both the psychological and spiritual dimensions of recovery.

## **Evidence-Based Therapies**

Clinicians utilize a variety of scientifically supported therapies, including cognitive-behavioral therapy (CBT), motivational interviewing, dialectical behavior therapy (DBT), and trauma-informed care. These therapies are effective in addressing the underlying causes of mental health disorders and substance use.

## **Traditional and Cultural Healing**

A unique feature of Four Winds Behavioral Health is its incorporation of Native American cultural practices such as sweat lodge ceremonies, talking circles, and traditional counseling. These practices help clients connect with their heritage and foster a sense of identity and community belonging, which are critical components of healing.

## **Integrated Care Model**

The integrated care model combines mental health treatment with primary healthcare services, ensuring that physical and psychological health are addressed simultaneously. This model improves treatment adherence and overall health outcomes by providing comprehensive, coordinated care.

# **Community Involvement and Cultural Competence**

Four Winds Behavioral Health prioritizes community engagement and cultural competence as foundational elements of its service delivery. Understanding and respecting cultural values and traditions enhances trust and effectiveness in treatment.

## **Community Partnerships**

The organization collaborates with tribal governments, local healthcare providers, educational institutions, and social service agencies to build a network of support for clients. These partnerships enable resource sharing, referral coordination, and community education efforts that promote mental health awareness.

## **Cultural Sensitivity Training**

Staff at Four Winds Behavioral Health undergo ongoing cultural sensitivity training to ensure respectful and appropriate interactions with clients from diverse backgrounds. This training equips providers with the knowledge and skills to address cultural barriers that might otherwise hinder engagement in treatment.

## **Prevention and Education Initiatives**

Prevention programs focus on reducing the incidence of mental health disorders and substance abuse through education, early intervention, and community outreach. These initiatives include workshops, school-based programs, and public awareness campaigns tailored to the cultural context of the populations served.

## **Accessing Care and Support**

Four Winds Behavioral Health strives to make care accessible through multiple entry points and flexible service options. Understanding how to access these services is essential for individuals seeking help for themselves or loved ones.

## **Referral and Intake Process**

The intake process begins with an initial assessment to determine the appropriate level of care. Referrals can be made by healthcare providers, community organizations, or individuals themselves. The staff works promptly to coordinate evaluations and develop individualized treatment plans.

## **Insurance and Payment Options**

Four Winds Behavioral Health accepts various insurance plans, including Medicaid and Medicare, and offers sliding scale fees based on income to ensure affordability. Financial counselors are available to assist clients in navigating payment options and insurance coverage.

## **Aftercare and Continuing Support**

Recovery is supported beyond initial treatment through aftercare programs, which include outpatient counseling, support groups, and relapse prevention services. Continued engagement helps sustain long-term wellness and reduces the risk of relapse.

**four winds behavioral health:** *An International Perspective on Disasters and Children's Mental Health* Christina W. Hoven, Lawrence V. Amsel, Sam Tyano, 2019-07-18 This book provides a broad international perspective on the psychological trauma faced by children and adolescents exposed to major disasters, and on the local public health response to their needs. An outstanding quality of the book is that it draws upon the experience of local researchers, clinicians, and public mental health practitioners who dedicated themselves to these children in the wake of overwhelming events. The chapters address exemplary responses to a wide variety of trauma types, including severe weather, war, industrial catastrophes, earthquakes, and terrorism. Because disasters do not recognize geographic, economic, or political boundaries, the chapters have been selected to reflect the diverse global community's attempt to respond to vulnerable children in the most challenging times. The book, thus, examines a diverse range of healthcare systems, cultural settings, mental health infrastructure, government policies, and the economic factors that have played an important role in responses to traumatic events. The ultimate goal of this book is to stimulate future international collaborations and interventions that will promote children's mental health in the face of disaster.

**four winds behavioral health:** Tip 61 - Behavioral Health Services for American Indians and Alaska Natives U.S. Department of Health and Human Services, 2019-03-17 American Indians and Alaska Natives have consistently experienced disparities in access to healthcare services, funding, and resources; quality and quantity of services; treatment outcomes; and health education and prevention services. Availability, accessibility, and acceptability of behavioral health services are major barriers to recovery for American Indians and Alaska Natives. Common factors that influence engagement and participation in services include availability of transportation and child care, treatment infrastructure, level of social support, perceived provider effectiveness, cultural responsiveness of services, treatment settings, geographic locations, and tribal affiliations.

**four winds behavioral health:** **Mental Health Interventions with Preschool Children** Robert D. Lyman, Toni L. Hembree-Kigin, 2013-11-11 Preschool children have been largely neglected in the mental health treatment literature, although research has established that many behavioral and emotional disorders in children result from events occurring during the preschool years or are first manifested during this period. This has occurred for several reasons. Traditional psychoanalytic thinking has considered preschoolers to be too psychologically immature for complete manifestations of psychopathology, and the limited language abilities of young children have complicated assessment procedures and made them less appropriate for treatment approaches that are largely verbal in nature. In addition, the developmental complexity of the preschool period has deterred many researchers from investigating clinical issues with this age group. Partly as a result of the lack of information on preschoolers in the literature, practitioners have historically been uncomfortable in conducting assessments and initiating treatment with young children. They have often adopted a wait and see attitude in which formal mental health diagnosis and treatment are not implemented until after the child's entry into school. Unfortunately, such a delay may mean wasting the time during which mental health interventions can be maximally effective. Recently, this attitude has changed and practitioners now recognize the need for assessment and treatment of behavioral and emotional disorders early in life. What they require to assist them in the timely delivery of such services is information about assessment and treatment procedures specifically designed for preschoolers and with demonstrated efficacy with that age group.

**four winds behavioral health: Understanding Mental Health and Mental Illness** Paul H. Jenkins, 2021-01-26 The question of whether someone is psychologically healthy or mentally ill, and the fundamental nature of mental health underlying that question has been debated in cultural, academic, and clinical settings for millennia. This book provides an overview of how people have conceptualized and understood mental illness through the ages. The book begins by looking at mental illness in humanity's evolutionary past then moves through the major historical epochs: the mythological, the Classical, the Middle Ages, the Renaissance, the Enlightenment, and modern, and the postmodern. At each point, it focuses on major elements that emerged regarding how people judged sanity and insanity and places major emphasis on the growing fields of psychiatry and psychology as they emerged and developed. As the book moves into the twenty-first century, Dr. Jenkins presents his integrated model of knowledge, a systemic, holistic model of the psyche that creates a conceptual foundation for understanding both psychological wellness and disorder and approaching assessment and diagnosis. This text provides a valuable exploration of mental health and illness across the ages and gives those already well versed in the subject matter a fresh perspective on the past and new model of knowledge and assessment for the future.
