frank welch architect dallas: The Open-Ended City Kathryn Holliday, 2019-05-01 Texas

Historical Commission Award of Excellence in Media Achievement, Texas Historical Commission In 1980, David Dillon launched his career as an architectural critic with a provocative article that asked "Why Is Dallas Architecture So Bad?" Over the next quarter century, he offered readers of the Dallas Morning News a vision of how good architecture and planning could improve quality of life, combatting the negative effects of urban sprawl, civic fragmentation, and rapacious real estate development typical in Texas cities. The Open-Ended City gathers more than sixty key articles that helped establish Dillon's national reputation as a witty and acerbic critic, showing readers why architecture matters and how it can enrich their lives. Kathryn E. Holliday discusses how Dillon connected culture, commerce, history, and public life in ways that few columnists and reporters ever get the opportunity to do. The articles she includes touch on major themes that animated Dillon's writing: downtown redevelopment, suburban sprawl, arts and culture, historic preservation, and the necessity of aesthetic quality in architecture as a baseline for thriving communities. While the specifics of these articles will resonate with those who care about Dallas, Fort Worth, and other Texas cities, they are also deeply relevant to all architects, urbanists, and citizens who engage in the public life and planning of cities. As a collection, The Open-Ended City persuasively demonstrates how a discerning critic helped to shape a landmark city by shaping the conversation about its architecture.

frank welch architect dallas: The Alcalde, 1978-07 As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for mayor or chief magistrate; the nickname of the governor who signed UT into existence was The Old Alcalde.

frank welch architect dallas: The Architecture of O'Neil Ford David Dillon, 1999 O'Neil Ford (1905-1982) was the most influential Texas architect of the twentieth century. A technological innovator who bridged Texas' rural past and urban future, he taught three generations of architects how to adapt vernacular forms and materials to modern conditions. Widely known for his many projects in San Antonio and Dallas, Ford also designed buildings from Laredo, Texas, to Saratoga Springs, New York, over the course of a sixty-year career. In this book, David Dillon undertakes the first critical study of Ford's architecture in both its regional and national contexts. In particular, Dillon explores Ford's links to the regional and eclectic movements of the 1920s and 1930s, his use of postwar technology and materials (lift-slab, pre-stressed concrete shells, new metals), and his influence on other architects in Texas and the Southwest. Quotes from the author's wide-ranging interviews with O'Neil Ford in the last years of his life, as well as with his partners, relatives, friends, and critics, give the text firsthand vividness.

frank welch architect dallas: Landmarks of Texas Architecture Lawrence W. Speck, 1986-06 This selection of twenty of Texas' proudest architectural achievements is a tiny sampling of the state's rich, but little-heralded, architectural heritage. The visual presentation of these buildings in Richard Payne's insightful photographs is evidence enough to any student of Texas culture that there are deep and meaningful tracks of our civilization in the state's built environment. . . . In the stones of the Alamo and the steel and glass of our downtown skyscrapers lie the silent embodiment of who we are and where we have been. —from the Introduction Texas architecture has never been, nor is it likely to be in the future, an easily digested whole. This collection, drawn from the 1983 Texas Society of Architects' exhibit Creating Tomorrow's Heritage, provides a look at twenty of the most interesting responses to the challenges posed by Texas history and geography. It reveals that what Texas architecture lacks in cohesiveness, it more than compensates for in vitality. Variations in circumstance and background, coupled with the kind of freedom which heterogeneity breeds, have

produced a lively climate for architectural development in Texas—a place where, in the absence of pat answers, intriguing questions have been raised. The same freedom which has produced a dearth of cohesion has encouraged exploration and invention. The same disparities which have made tidy categorization of historical movements or periods difficult have led to some evocative hybrids—new and telling syntheses which are genuinely of their place. Of interest to anyone who has strolled the Paseo del Rio in San Antonio or admired the dramatically lit State Capitol at night, *Landmarks of Texas Architecture* is a book to be looked at and enjoyed, a place to start in creating one's own list of architectural favorites. Part of the growing interest in Texas history and culture, *Landmarks* adds to our understanding of the forces which shaped the Texas of yesterday and will build the Texas of tomorrow.

frank welch architect dallas: O'Neil Ford on Architecture Kathryn O'Rourke, 2019-04-22 Winner, Publication Award, Southeastern Chapter of the Society of Architectural Historians (SESAH), 2019 Acclaimed for his designs of the Trinity University campus, the Little Chapel in the Woods, the Texas Instruments Semiconductor Components Division Building, and numerous private houses, O'Neil Ford (1905-1982) was an important twentieth-century architect and a pioneer of modernism in Texas. Collaborating with artists, landscape architects, and engineers, Ford created diverse and enduringly rich works that embodied and informed international developments in modern architecture. His buildings, lectures, and teaching influenced a generation of Texas architects. *O'Neil Ford on Architecture* brings together Ford's major professional writings and speeches for the first time. Revealing the intellectual and theoretical underpinnings of his distinctive modernism, they illuminate his fascination with architectural history, his pioneering uses of new technologies and construction systems, his deep concerns for the landscape and environment, and his passionate commitments to education and civil rights. An interlocutor with titans of the twentieth century, including Louis Kahn and J. Robert Oppenheimer, Ford understood architecture as inseparable from the social, political, and scientific developments of his day. An introductory essay by Kathryn E. O'Rourke provides a critical assessment of Ford's essays and lectures and repositions him in the history of US architectural modernism. As some of his most important buildings turn sixty, *O'Neil Ford on Architecture* demonstrates that this Texas modernist deserves to be ranked among the leading midcentury American architects.

frank welch architect dallas: Hocker Hocker, 2020-09-15 A visually stunning overview of the work of internationally recognized, award-winning landscape architecture studio Hocker, whose thoughtfully conceived projects reveal a deep understanding of environment and materials, and express a strikingly contemporary point of view. This monograph is the first to present the work of the award-winning, Texas-based but internationally recognized landscape architecture studio Hocker. Founded in 2005 by David L. Hocker, the studio has over fifteen years of practice earned wide acclaim for projects that are meticulously detailed, evince a superlative understanding of materials, thoughtfully address environmental context, and promote an arrestingly contemporary aesthetic. Hocker's work, and the fifteen projects featured in the book, represent a range of typologies, from residential gardens to urban parks. Among them are landscapes for a weekend retreat in the Sonoma Hills (winner of the 2019 ASLA Award of Excellence), a former power station-turned-contemporary art center (winner of a 2016 ASLA Honor Award), the revitalized Dallas Museum of Art (winner of a 2017 ASLA Texas Chapter Merit Award), a historic synagogue, and a Cistercian abbey and preparatory school. Equipped with the knowledge necessary to confront complex environmental and programmatic challenges, Hocker nevertheless approaches each project with the ambition of creating spaces that are simple and restrained, but beautiful and engaging.

frank welch architect dallas: Making Houston Modern Barrie Scardino Bradley, Stephen

Fox, Michelangelo Sabatino, 2023-11-15 Complex, controversial, and prolific, Howard Barnstone was a central figure in the world of twentieth-century modern architecture. Recognized as Houston's foremost modern architect in the 1950s, Barnstone came to prominence for his designs with partner Preston M. Bolton, which transposed the rigorous and austere architectural practices of Ludwig Mies van der Rohe to the hot, steamy coastal plain of Texas. Barnstone was a man of contradictions—charming and witty but also self-centered, caustic, and abusive—who shaped new settings that were imbued, at once, with spatial calm and emotional intensity. Making Houston Modern explores the provocative architect's life and work, not only through the lens of his architectural practice but also by delving into his personal life, class identity, and connections to the artists, critics, collectors, and museum directors who forged Houston's distinctive culture in the postwar era. Edited by three renowned voices in the architecture world, this volume situates Barnstone within the contexts of American architecture, modernism, and Jewish culture to unravel the legacy of a charismatic personality whose imaginative work as an architect, author, teacher, and civic commentator helped redefine architecture in Texas.

frank welch architect dallas: Double Vision William Middleton, 2018-03-27 **NAMED ONE OF THE BEST ART BOOKS OF THE DECADE BY ARTNEWS** The first and definitive biography of the celebrated collectors Dominique and John de Menil, who became one of the greatest cultural forces of the twentieth century through groundbreaking exhibits of art, artistic scholarship, the creation of innovative galleries and museums, and work with civil rights. Dominique and John de Menil created an oasis of culture in their Philip Johnson-designed house with everyone from Marlene Dietrich and René Magritte to Andy Warhol and Jasper Johns. In Houston, they built the Menil Collection, the Rothko Chapel, the Byzantine Fresco Chapel, the Cy Twombly Gallery, and underwrote the Contemporary Arts Museum. Now, with unprecedented access to family archives, William Middleton has written a sweeping biography of this unique couple. From their ancestors in Normandy and Alsace, to their own early years in France, and their travels in South America before settling in Houston. We see them introduced to the artists in Europe and America whose works they would collect, and we see how, by the 1960s, their collection had grown to include 17,000 paintings, sculptures, drawings, photographs, rare books, and decorative objects. And here is, as well, a vivid behind-the-scenes look at the art world of the twentieth century and the enormous influence the de Menils wielded through what they collected and built and through the causes they believed in.
