

fowler's faith development

fowler's faith development represents a seminal framework in understanding how individuals mature in their spiritual and religious beliefs over time. This theory, proposed by James W. Fowler, outlines distinct stages of faith growth that span from early childhood to adulthood, providing valuable insight into the complexity of faith as a dynamic and evolving process. Fowler's model transcends specific religious traditions, offering a universal lens through which to view the development of meaning, trust, and belief systems. This article explores the core principles of Fowler's faith development theory, the characteristics of each stage, and the implications for education, counseling, and personal spiritual growth. Additionally, the discussion includes critiques and expansions of the theory, highlighting its relevance in contemporary religious and psychological contexts. Understanding Fowler's stages enriches the appreciation of faith as integral to human development and social interaction.

- Critiques and Contemporary Perspectives

Overview of Fowler's Faith Development Theory

Fowler's faith development theory offers a systematic approach to understanding how faith evolves throughout an individual's life. Developed in the 1980s by James W. Fowler, a theologian and psychologist, the theory proposes that faith is not static but progresses through a series of identifiable stages. These stages reflect increasing complexity and abstraction in how individuals perceive and relate to their beliefs, values, and ultimate concerns. Central to Fowler's concept is the idea that faith encompasses more than religious affiliation; it includes the ways people find meaning and purpose.

Definition of Faith in Fowler's Model

In Fowler's framework, faith is broadly defined as the human capacity to make meaning out of personal experience and to live in relation to what is considered sacred or of ultimate significance. This definition extends beyond traditional religious belief to include spiritual, moral, and existential dimensions. Faith development, therefore, involves cognitive, emotional, and

social components that interact over time, influencing how individuals interpret their world and themselves within it.

Theoretical Foundations

Fowler's theory draws from multiple disciplines, including developmental psychology, theology, and sociology. Influenced by the work of Piaget on cognitive development and Erikson on psychosocial stages, Fowler integrates these perspectives to explain how faith matures in a patterned sequence. The theory also considers the role of community, culture, and personal crises in facilitating movement between stages, emphasizing that faith growth is not automatic but contingent on experience and reflection.

The Six Stages of Faith Development

Fowler identifies six distinct stages of faith development, each characterized by particular ways of understanding and relating to faith. These stages are sequential but not strictly age-bound, allowing for variation based on individual and contextual factors.

Stage 0: Primal or Undifferentiated Faith

This initial stage occurs in infancy and early toddlerhood, where faith is primarily formed through trust and safety in the caregiver relationship. It is a pre-verbal, sensory experience marked by a basic sense of security and hope. The foundations of faith in this stage are implicit rather than explicit.

Stage 1: Intuitive-Projective Faith

Typically emerging between ages 3 and 7, this stage involves imagination and perception heavily influenced by stories, images, and emotions. Children at this stage interpret faith in concrete, fantastical ways, often blending reality with fantasy, and are sensitive to the feelings and attitudes of significant adults.

Stage 2: Mythic-Literal Faith

During middle childhood, individuals begin to take religious stories and beliefs literally and concretely. Faith at this stage is characterized by an understanding of justice and reciprocity, with strong adherence to rules and rituals. The mythic narratives provide a framework for moral reasoning.

Stage 3: Synthetic-Conventional Faith

Often developing in adolescence, this stage reflects conformity to the beliefs and values of significant communities, such as family, church, or peer groups. Individuals synthesize their faith identity based largely on external authority and are motivated by a desire for belonging and approval.

Stage 4: Individuative-Reflective Faith

This stage typically emerges in young adulthood when individuals critically examine their beliefs and values. There is a move toward personal responsibility for faith, greater self-awareness, and acknowledgment of complexity and ambiguity. Faith becomes more self-chosen and less dependent on authority.

Stage 5: Conjunctive Faith

In this stage, usually arising in mid-life or later, individuals integrate paradox, transcendence, and deeper awareness of the limitations of understanding. Faith embraces mystery and is open to diverse perspectives, often moving beyond literal interpretations to symbolic and metaphorical meanings.

Stage 6: Universalizing Faith

The rarest and most advanced stage, universalizing faith, is characterized by a radical commitment to universal principles of love and justice. Individuals at this level often act as transformative agents in society, embodying selfless compassion and transcending particular religious boundaries.

Summary of Stages

1. Primal or Undifferentiated Faith
2. Intuitive-Projective Faith
3. Mythic-Literal Faith
4. Synthetic-Conventional Faith
5. Individuative-Reflective Faith
6. Conjunctive Faith
7. Universalizing Faith

Applications and Implications of Fowler's Theory

Fowler's faith development theory has broad applications across various fields, including education, pastoral care, counseling, and spiritual formation. Understanding the stages allows professionals to tailor interventions and support that correspond to an individual's current faith development level.

Educational Contexts

In religious education, knowledge of Fowler's stages helps educators design age-appropriate curricula that resonate with learners' cognitive and emotional capacities. For example, storytelling and imaginative activities may be effective for children in the Intuitive-Projective stage, while opportunities for critical reflection suit those in the Individuative-Reflective stage.

Counseling and Pastoral Care

Counselors and spiritual directors utilize Fowler's model to assess clients' faith maturity and to guide conversations about meaning, purpose, and belief struggles. The theory encourages an empathetic approach that respects where individuals are in their faith journey and facilitates growth through supportive dialogue.

Personal and Community Development

On a personal level, awareness of faith stages can foster self-understanding and patience during periods of doubt or transformation. Communities that recognize diverse faith development stages can cultivate inclusive environments that nurture spiritual growth and respect differing perspectives.

Critiques and Contemporary Perspectives

While Fowler's faith development theory has been influential, it has also faced critiques and inspired further research in the fields of psychology and theology. These critiques address issues of cultural bias, linear progression assumptions, and the applicability across diverse faith traditions.

Cultural and Religious Diversity

Some scholars argue that Fowler's stages reflect a Western, Christian-centric worldview that may not adequately capture faith development in non-Western or non-Christian contexts. They call for models that incorporate a wider range of cultural narratives and spiritual expressions.

Non-Linear Development

Critics question the strict sequential nature of the stages, suggesting that faith development can be non-linear, recursive, and influenced by life circumstances. People may regress, skip stages, or experience aspects of multiple stages simultaneously.

Integration with Other Models

Contemporary perspectives often integrate Fowler's theory with other developmental and psychological models to provide a more holistic understanding of faith. These approaches emphasize the interplay between cognitive, emotional, social, and cultural factors in faith maturation.

Frequently Asked Questions

What is Fowler's theory of faith development?

Fowler's theory of faith development is a framework that outlines how an individual's faith matures through a series of six stages, ranging from intuitive-projective faith in early childhood to universalizing faith in adulthood.

Who developed the stages of faith development?

The stages of faith development were developed by James W. Fowler, a theologian and developmental psychologist, in his 1981 book 'Stages of Faith: The Psychology of Human Development and the Quest for Meaning.'

What are the main stages in Fowler's faith development theory?

Fowler's main stages of faith development are: Stage 0 - Primal or Undifferentiated Faith, Stage 1 - Intuitive-Projective Faith, Stage 2 - Mythic-Literal Faith, Stage 3 - Synthetic-Conventional Faith, Stage 4 - Individuative-Reflective Faith, Stage 5 - Conjunctive Faith, and Stage 6 - Universalizing Faith.

How does Fowler's faith development theory apply to adults?

In adults, faith development typically involves moving beyond the Synthetic-Conventional Faith (Stage 3) to Individuative-Reflective Faith (Stage 4), where individuals critically examine their beliefs, and potentially to higher stages that emphasize complexity, integration, and universal principles.

Can Fowler's stages of faith development be applied to non-religious contexts?

Yes, while Fowler's theory was originally framed within a religious context, the stages can also be applied to broader meaning-making processes and personal belief systems beyond traditional religion.

What is the significance of the Synthetic-Conventional faith stage in Fowler's model?

The Synthetic-Conventional faith stage (Stage 3) is significant because it represents a period, often in adolescence or early adulthood, when individuals conform to the beliefs of their community and authority figures without critical reflection.

How can understanding Fowler's faith development stages benefit educators and counselors?

Understanding Fowler's faith development stages helps educators and counselors support individuals' spiritual and personal growth by recognizing their current stage, facilitating appropriate challenges, and encouraging reflection and development in faith or personal belief systems.

Additional Resources

1. Faith Development and Fowler's Model: An Introduction

This book provides a comprehensive overview of James W. Fowler's theory of faith development, outlining the stages from infancy through adulthood. It explores how individuals grow in their understanding and expression of faith, incorporating psychological, spiritual, and social dimensions. The text serves as a foundational resource for students and practitioners in theology, psychology, and pastoral care.

2. Stages of Faith: The Psychology of Human Development and the Quest for Meaning

Delving deeply into Fowler's stages of faith, this book examines the psychological underpinnings of faith maturation. It discusses how faith evolves in response to life experiences and cognitive growth, highlighting the challenges and transformations at each stage. The author integrates case

studies and practical examples to demonstrate the model's applicability in real-life contexts.

3. Faith Development in Adolescence: Navigating the Transition

Focusing specifically on adolescent faith development, this text applies Fowler's model to the unique spiritual challenges faced during teenage years. It discusses the interplay between identity formation and faith maturation, offering strategies for educators and youth ministers to support healthy faith growth. The book also addresses cultural and social influences on adolescent spirituality.

4. Fowler's Faith Development Theory in Pastoral Counseling

This volume explores how pastoral counselors can utilize Fowler's stages of faith to better understand and assist their congregants. It provides practical guidance on assessing faith development and tailoring interventions to meet individuals where they are spiritually. The book includes case studies and reflective exercises for enhancing counseling effectiveness.

5. The Spiritual Journey: Exploring Faith Development through Fowler's Lens

This reflective book invites readers to explore their own faith journeys using Fowler's framework. Combining narrative, theology, and psychology, it encourages personal growth and deeper understanding of one's spiritual development. The text is suitable for both personal study and group discussion settings.

6. Faith Development in Diverse Cultures: Expanding Fowler's Model

Addressing criticisms of cultural limitations in Fowler's theory, this book examines faith development across various cultural and religious contexts. It proposes adaptations and expansions to the original model to make it more inclusive and globally relevant. The work highlights the dynamic nature of faith formation in a multicultural world.

7. Integrating Cognitive Science and Faith Development: New Perspectives on Fowler's Model

This scholarly work bridges cognitive science research with Fowler's faith development theory, offering fresh insights into how the brain processes spirituality and meaning. It discusses neural mechanisms involved in faith transitions and the impact of cognitive development on spiritual beliefs. The book is ideal for academic readers interested in interdisciplinary approaches.

8. Faith Development and Moral Growth: Intersections and Implications

Exploring the relationship between faith and morality, this book examines how Fowler's stages correlate with moral reasoning development. It considers how spiritual beliefs influence ethical decision-making and character formation. The text is valuable for educators, clergy, and psychologists interested in holistic human development.

9. Faith Development in Later Life: Challenges and Opportunities

This book focuses on the unique aspects of faith development during older adulthood, applying Fowler's model to the aging process. It discusses how

life review, loss, and existential questions impact spiritual growth and meaning-making. Practical guidance is offered for caregivers and faith leaders working with the elderly population.

fowler s faith development: Stages of Faith James W. Fowler, 1995-09-15 Dr. James Fowler has asked these questions, and others like them, of nearly six hundred people. He has talked with men, women, and children of all ages, from four to eighty-eight, including Jews, Catholics, Protestants, agnostics, and atheists. In many cases, the interviews became in-depth conversations that provided rare, intimate glimpses into the various ways our lives have meaning and purpose, windows into what this books calls faith. Faith, as approached here, is not necessarily religious, nor is it to be equated with belief. Rather, faith is a person's way of leaning into and making sense of life. More verb than noun, faith is the dynamic system of images, values, and commitments that guide one's life. It is thus universal: everyone who chooses to go on living operated by some basic faith. Building on the contributions of such key thinkers as Piaget, Erikson, and Kohlberg, Fowler draws on a wide range of scholarship, literature, and firsthand research to present expertly and engagingly the six stages that emerge in working out the meaning of our lives--from the intuitive, imitative faith of childhood through conventional and then more independent faith to the universalizing, self-transcending faith of full maturity. *Stages of Faith* helps us to understand our own pilgrimage of faith, the passages of our own quest for meaning and value.

fowler s faith development: Becoming Adult, Becoming Christian James W. Fowler, 1999-12-02 In this updated reissue of his 1984 classic, James Fowler applies his groundbreaking research on the development of faith to Christianity. In his revised first chapter Fowler locates his approach to the study of human and faith development in relation to the contemporary conversation about identity and selfhood in postmodernity. Fowler invites readers to explore what it means to find and claim vocation: a purpose for one's life that is part of the purposes of God. Reclaiming covenant and vocation as ideals for responsible, mature, Christian selfhood, Fowler shows how a dynamic understanding of what vocation involves can both inform and transform lives.

fowler s faith development: Stages of Faith and Religious Development James W. Fowler, Karl Ernst Nipkow, Friedrich Schweitzer, 1992 An interpretation, criticism and application of research and theory in religious development.

fowler s faith development: Faith Development and Fowler Craig R. Dykstra, Sharon Parks, 1986 An overview of the faith development theory - Evaluating faith development theory - Faith development theory and ministry - Future in faith development studies.

fowler s faith development: Weaving the New Creation James W. Fowler, 2001-02-20

fowler s faith development: Faith Development and Pastoral Care James W. Fowler, 1987 James Fowler's work as the originator of faith development research -- his use of the theories of Jean Piaget and Erik Erikson for theology -- has been widely acclaimed for its profound impact on the field of religious education, and for its promise for other fields.

fowler s faith development: Women's Faith Development Nicola Slee, 2021-11-18 Presenting a rich account of women's faith lives and, mapping women's meanings in their own right,

this book offers an alternative to dominant accounts of faith development which failed to account for women's experience. Drawing on Fowler's faith development theory, feminist models of women's faith and social science methodology, the text explores the patterns and processes of women's faith development and spirituality in a group of thirty women belonging to, or on the edges of, Christian tradition. Integrating practical theological concern with Christian education and pastoral practice, this book will be of interest to all concerned with women's faith development, spirituality, education and formation, and those working in the fields of practical theology, pastoral care, adult theological education, spiritual direction and counselling.

fowler s faith development: Spirituality in Pastoral Counseling and the Community Helping Professions Charles Topper, 2003 Spirituality in Pastoral Counseling and the Community Helping Professions investigates: the best tools for spiritual assessment; how ethnic background influences spirituality; the language of the sacred in daily life; how people can develop greater empathy; integrating spirituality into community; the importance of ritual.

fowler s faith development: 1993 Manual for Faith Development Research Romney M. Moseley, David Jarvis, James W. Fowler, 1993-01-01

fowler s faith development: Introducing Christian Education Michael J. Anthony, 2001-09-01 Building on the success of his 1992 collection Foundations of Ministry (over 17,000 sold), Michael Anthony offers Introducing Christian Education to fill the need in the C.E. curriculum for an introductory foundations textbook--one that provides an overview and understanding of the broad range of subjects included in C.E.--for college and seminary use. Thirty-one chapters are offered under the following sections: 1) Foundations of C.E.; 2) Developmental Perspectives of C.E.; 3) Educational Implications of C.E.; 4) Organization, Administration, and Leadership; 5) C.E. Applied to the Family; and 6) Specialized Ministries. Contributors include Robert Pazmiño, Jim Wilhoit, Julie Gorman, Klaus Issler, and Ted Ward. FROM THE FOREWORD BY LESTER C. BLANK JR. Introducing Christian Education will become a major resource text for church leaders and Christian education leaders who are professors of Christian education. It will be a valuable resource in my personal library. The desired outcome will be Psalm 78:72: He cared for them with a true heart and led them with skillful hands.

fowler s faith development: Handbook of Moral Behavior and Development William M. Kurtines, Jacob Gewirtz, Jacob L. Lamb, 2014-02-04 The publication of this unique three-volume set represents the culmination of years of work by a large number of scholars, researchers, and professionals in the field of moral development. The literature on moral behavior and development has grown to the point where it is no longer possible to capture the "state of the art" in a single volume. This comprehensive multi-volume Handbook marks an important transition because it provides evidence that the field has emerged as an area of scholarly activity in its own right. Spanning many professional domains, there is a striking variety of issues and topics surveyed: anthropology, biology, economics, education, philosophy, psychology, psychiatry, sociology, social work, and more. By bringing together work on diverse topics, the editors have fostered a mutually-beneficial exchange not only between alternative approaches and perspectives, but also between "applied" and "pure" research interests. The Theory volume presents current and ongoing theoretical advances focusing on new developments or substantive refinements and revisions to existing theoretical frameworks. The Research volume summarizes and interprets the findings of specific, theory-driven, research programs; reviews research in areas that have generated substantial empirical findings; describes recent developments in research methodology/techniques; and reports research on new and emerging issues. The Application volume describes a diverse array of intervention projects — educational, clinical, organizational, and the like. Each chapter includes a summary report of results and findings, conceptual developments, and emerging issues or topics. Since the contributors to this publication are active theorists, researchers, and practitioners, it may serve to define directions that will shape the emerging literature in the field.

fowler s faith development: Spirituality in Clinical Practice Len Sperry, 2001 Spirituality in Clinical Practice includes perspectives not found in other texts such as a developmental perspective

integrating moral and spiritual development, the interface of spiritual development with personality functioning, and insights from object relations, self psychology and transpersonal psychotherapy as they relate to various spiritual traditions and contemporary spiritual practices. This brief, reader-friendly text is written in a highly accessible style and is destined to set a precedent for excellence in the emerging field of spirituality in clinical practice or psychotherapy and counseling.

fowler s faith development: Spiritual Care in Nursing Practice Kristen L. Mauk, Nola A. Schmidt, 2004 Focusing on spirituality as an inherent component of effective nursing care, this text presents an unbiased view of the nature of human spirituality apart from religion. The text offers a unique interdisciplinary and inter-religious perspective—representing a range of Eastern and Western religious traditions—while addressing lifespan considerations and belief systems within the nursing process framework. Readable, interactive chapters apply the content clinically and highlight timely research on spirituality and health. Each chapter includes case studies, critical thinking questions, and personal reflection questions. Website references are also included.

fowler s faith development: Bioethics from a Faith Perspective Jack T Hanford, Harold G Koenig, 2013-04-15 Discover the spiritual community's position on bioethics issues! Bioethics from a Faith Perspective: Ethics in Health Care for the Twenty-First Century offers a meaningful, rational, faith-oriented framework for deciding how to deal with important biomedical health care issues. Organ donation, managed care, the Human Genome Project, and medical technology that keeps people alive beyond their “natural” life span are some of the topics it illuminates through case analysis and resolution. Since almost all textbooks in bioethics omit the religious dimension of life (even though the field was inspired and stimulated by religious scholars at Princeton and Yale), this is an indispensable volume. While most people state their moral positions from the background of their religious traditions, many have not had the opportunity to study the relation between their faith perspectives and the difficult issues that arise in the pursuit of health care. This book shows the relevance, significance, and guidance that a faith perspective can offer for dealing with bioethical issues. This unique and thoughtful book: shows you how to distinguish and describe the relation between technical and ethical aspects of health-related issues provides you with a framework of moral principles, theories, values, and faith viewpoints teaches you the defining characteristics of a moral professional-client relationship related to faith helps you to discern when medical ethics and faith commitments are therapeutic and when they are not gives examples describing a moral problem, a faith perspective, and a justified position on that problem Since bioethics has been an amazing story of growth from the 1950s to the present day and is still expanding, there will be changes. Bioethics from a Faith Perspective stimulates that expansion by including the religious dimension. It is the perfect supplement to the existing literature on the subject.

fowler s faith development: Spirituality and Psychological Health Richard H. Cox, Betty Ervin-Cox, Louis Hoffman, 2005

fowler s faith development: Student Development in College Nancy J. Evans, Deanna S. Forney, Florence M. Guido, Lori D. Patton, Kristen A. Renn, 2009-11-05 The second edition of Student Development in College offers higher education professionals a clear understanding of the developmental challenges facing today's college students. Thoroughly revised and updated, this edition includes new integrative theories of student development, expanded coverage of social identity theories, a targeted focus on higher education-related research, a current review of student development research and application, and reconceptualization of typology theories as a way to understand individual differences. Praise for the Second Edition of STUDENT DEVELOPMENT IN COLLEGE Student Development in College is a rich, comprehensive exploration of the major theoretical perspectives that inform development. The authors' attention to nuances and complexities results in a substantive history of theory development and a careful story about how various perspectives evolved yielding contemporary theorizing. The book is a masterful blend of theoretical lenses and their use in designing developmentally appropriate practice for diverse populations of contemporary college students. It is an excellent resource for all educators who work on college campuses. Marcia Baxter Magolda, Distinguished Professor, Educational Leadership,

Miami University This is an invaluable work for anyone seeking an introduction to college student development theories or those seeking to update their existing knowledge. It offers a thorough and complex review of both the foundational theories and the newer often more culturally relevant theories and models. Raechele L. Pope, program coordinator, Higher Education Program, University at Buffalo The original book was a tremendous contribution to the field of higher education and especially student affairs. After more than ten years, this revision is a timely and focused enhancement to the literature that nurtures quality professionals to think differently about topics relevant to our field. Well done a second time around! Gregory Roberts, executive director, ACPA College Student Educators International

fowler s faith development: One Generation from Extinction Mark Griffiths, 2012-09-12 When Robert Raikes started his first Sunday School in 1780, he saw his idea grow to reach 300,000 unchurched children within five years - this in a nation widely ignorant of Christian ideas and values. Mark Griffiths has used Raikes' pioneering work in examining child evangelism in the UK. Working from extensive local and national research (leading to a PhD), he considers how children 'tick', what basic theology is at work in Christian outreach, and what constitutes best practice in child evangelism. His text is studded with insights and observations, and brings together the author's passion for his subject with the rigour of careful research. This is an unparalleled resource, laying the foundations of future growth.

fowler s faith development: The Handbook of Spiritual Development in Childhood and Adolescence Eugene C. Roehlkepartain, 2006 With sixty-seven scholars from four continents and many diverse disciplines contributing as authors to the volume; with fourteen scholars from around the world serving as editorial advisors; with financial support provided by the John Templeton Foundation via Search Institute; with frequent conversations occurring with colleagues at Fuller Theological Seminary; and with the careful attention of editorial work provided by Sage publications, this handbook provides a remarkable contribution toward those ends. --JOURNAL OF YOUTH AND THEOLOGY Research into spiritual development during childhood and adolescence has . . . yearned for the stimulus of integration, cross-fertilization, and internationalization, across conceptual boundaries, methodological divisions, religious traditions, and local interests. The Handbook of Spiritual Development in Childhood and Adolescence sets out to meet this need and does so with skill and with authority, by identifying the key themes and by drawing on the best minds to address those themes. Research communities and faith communities have been well served by this pioneering initiative. - The Revd Professor Leslie J Francis PhD, ScD, DD, University of Wales, Bangor, UK The Handbook of Spiritual Development in Childhood and Adolescence breaks new ground by articulating the state of knowledge in the area of childhood and adolescent spiritual development. Featuring a rich array of theory and research from an international assortment of leading social scientists in multiple disciplines, this book represents work from diverse traditions and approaches - making it an invaluable resource for scholars across a variety of disciplines and organizations. Key Features: Presents a wealth of interdisciplinary theory and research, as well as proposals for future areas of inquiry, to help move spiritual development into a mainstream field of learning Provides the first comprehensive collection of social science research on spiritual development in childhood and adolescence to introduce the topic engagingly to students Features the works of scholars from around the world in multiple disciplines (psychology, sociology, anthropology, medicine, and educational philosophy) to present a diversity of traditions and approaches Includes introductions to the volume as well as to each section that provide overviews and syntheses of key concepts The Handbook of Spiritual Development in Childhood and Adolescence is a key resource for academics, researchers, and students in departments of Psychology, Family Studies, and Religious Studies. It is particularly useful for courses in Developmental Psychology, Human Development (especially child and adolescent development), Psychology of Religion, and Sociology of Religion. It also will be invaluable for professionals working with young people, including educators, religious leaders, and health practitioners.

fowler s faith development: Encyclopedia of Religious and Spiritual Development Elizabeth M.

Dowling, W. George Scarlett, 2006 Focuses on the developmental process of religion and spirituality across the human life span. This encyclopedia joins a recent trend in research and scholarship aimed at better understanding the similarities and differences between world religions and spiritualities, between expressions of the divine and between experiences of the transcendent.

fowler s faith development: *Ministry with Youth in Crisis, Revised Edition* Harley T. Atkinson, W. Lee Barnett, Michael Severe, 2016-11-09 Ministry with Youth in Crisis is a comprehensive treatment of major adolescent crises related to life themes including self-identity, faith formation, family life, social relationships, sexuality, suicide, substance abuse, and eating disorders. The distinctiveness of this book is that it offers a fine blend of solid research, workable theory, and specific strategies for successfully ministering to and with youth in crisis. Furthermore, it emphasizes the caring and sensitive side of working effectively with adolescents experiencing both normal and extreme crisis situations. This volume, therefore, is both descriptive and prescriptive in nature, in that it describes the world teens live in and offers biblical responses for ministry.
