## History and Establishment of the Frankfurt Peace Research Institute

The frankfurt peace research institute was founded with the mission to advance the academic study of peace and conflict resolution. Established amid growing global concerns about war, violence, and international instability, the institute sought to bridge theoretical research with practical applications. Based in Frankfurt, Germany, the institute leverages the city's strategic position as an international hub to foster dialogue among diverse stakeholders. Over the decades, it has evolved into a multidisciplinary center attracting experts from political science, sociology, law, and economics.

## Founding Principles and Early Development

The institute's founding principles emphasize rigorous, policy-relevant research aimed at contributing to peaceful conflict transformation. Initially, the focus was on Cold War dynamics, arms control, and disarmament, reflecting the geopolitical context of its inception. Over time, the institute expanded its scope to include post-Cold War conflicts, humanitarian interventions, and peacebuilding strategies. This evolution reflects the institute's responsiveness to shifting global peace and security challenges.

## **Institutional Growth and Recognition**

Throughout its history, the frankfurt peace research institute has gained international recognition for its scholarly output and policy impact. The establishment of dedicated research programs, academic journals, and conferences has further solidified its reputation. The institute's growth is also marked by increased funding from governmental and non-governmental sources, enabling expanded research activities and global engagement.

## **Core Research Areas and Academic Focus**

The frankfurt peace research institute conducts in-depth research across several interrelated themes that define contemporary peace and conflict studies. Its academic focus encompasses both theoretical frameworks and empirical investigations designed to inform policy and practice.

### **Conflict Prevention and Resolution**

One of the primary research areas involves mechanisms for preventing violent conflict and facilitating peaceful resolution. This includes the study of diplomacy, negotiation techniques, mediation processes, and early warning systems. The institute explores how local, national, and international actors can effectively collaborate to prevent escalation and promote dialogue.

### **Peacebuilding and Post-Conflict Reconstruction**

The institute dedicates significant attention to post-conflict environments, analyzing strategies for rebuilding societies after violence. Topics include transitional justice, reconciliation, institution-building, and sustainable development in fragile contexts. Research in this area seeks to identify best practices for fostering long-term stability and social cohesion.

### **International Security and Disarmament**

Research on international security covers arms control, nuclear non-proliferation, and the reduction of militarization. The frankfurt peace research institute examines the impact of security policies on global peace dynamics and advocates for disarmament measures that reduce the risk of armed conflict.

## **Key Contributions to Peace and Conflict Studies**

The frankfurt peace research institute has made numerous significant contributions that have shaped academic discourse and practical approaches in the field of peace studies.

## **Innovative Theoretical Frameworks**

The institute has developed and refined influential theories related to conflict transformation, structural violence, and peacebuilding paradigms. These frameworks help scholars and practitioners better understand the root causes of conflict and the multifaceted nature of peace processes.

## **Policy Recommendations and Impact**

Beyond academia, the institute provides evidence-based policy recommendations aimed at governments, international organizations, and civil society. Its research has informed peace negotiations, conflict prevention strategies, and humanitarian interventions worldwide, demonstrating tangible real-world impact.

## **Scholarly Publications and Conferences**

The institute regularly publishes books, peer-reviewed articles, and policy briefs that contribute to the knowledge base of peace and conflict studies. It also hosts international conferences and workshops that facilitate knowledge exchange and networking among experts and stakeholders.

## **Collaborations and Partnerships**

The frankfurt peace research institute actively collaborates with a wide range of institutions and organizations to enhance its research capacity and broaden its influence.

## **Academic and Research Networks**

The institute is part of several international academic networks, partnering with universities and research centers specializing in peace and conflict studies. These collaborations enable joint research projects, student exchanges, and shared resources.

## **Governmental and Non-Governmental Organizations**

Close cooperation with governmental bodies and NGOs allows the institute to translate academic findings into actionable policies and programs. Partnerships with organizations such as the United Nations, European Union, and various peace NGOs are central to its applied research efforts.

## **Community and Grassroots Engagement**

The frankfurt peace research institute also engages with local communities and grassroots organizations to incorporate diverse perspectives into its research. This approach ensures that peacebuilding initiatives are context-sensitive and inclusive.

# **Public Outreach and Educational Programs**

Education and public engagement are core components of the institute's mission to foster a culture of peace.

## **Academic Courses and Degree Programs**

The institute offers graduate-level programs and courses in peace and conflict studies, attracting students from around the world. These academic offerings provide rigorous training in research methods, conflict analysis, and peacebuilding strategies.

## **Workshops, Seminars, and Public Lectures**

Regular workshops, seminars, and lectures delivered by leading scholars and practitioners provide platforms for disseminating current research and facilitating public dialogue on peace-related issues. These events contribute to raising awareness and building capacity among diverse audiences.

## **Publications and Online Resources**

The institute publishes accessible materials such as policy briefs, newsletters, and digital content designed to reach a broader public. These resources help translate complex research findings into practical knowledge that can inform public debate and decision-making.

## **Future Directions and Strategic Goals**

Looking ahead, the frankfurt peace research institute aims to expand its research scope and deepen its global impact in peace and conflict studies.

## **Emphasis on Emerging Global Challenges**

The institute plans to address emerging issues such as cyber conflict, climate change-related security risks, and the growing importance of non-state actors in conflict dynamics. These areas represent critical frontiers in contemporary peace research.

## **Strengthening Interdisciplinary Approaches**

Recognizing the complexity of peace and conflict, the institute seeks to enhance interdisciplinary collaboration by integrating insights from psychology, environmental science, technology studies, and other fields to develop holistic solutions.

## **Enhancing Global Partnerships and Capacity Building**

Expanding partnerships with institutions in the Global South and increasing capacity-building initiatives are strategic priorities. This focus aims to promote inclusive research agendas and support locally-led peace efforts worldwide.

## **Key Strategic Goals**

- Increase the volume and impact of policy-relevant research
- Expand educational opportunities and online learning platforms
- Promote dialogue between academic, policy, and practitioner communities
- Develop innovative tools for conflict analysis and peacebuilding

**frankfurt peace research institute: Justice and Peace** Caroline Fehl, Dirk Peters, Simone Wisotzki, Jonas Wolff, 2019-07-05 This book studies the justice concerns of political actors in important international regimes and international and domestic conflicts and traces their effects on peace and conflict. The book demonstrates that such justice concerns play an ambivalent role for the resolution of conflicts and maintenance of order. While arrangements that actors perceive as just will provide a good basis for peaceful relations, the pursuit of justice can create conflicts or make existing ones more difficult to resolve. **frankfurt peace research institute: Global Nuclear Disarmament** Nik Hynek, Michal Smetana, 2015-12-22 This book examines the issue of nuclear disarmament in different strategic, political, and regional contexts. This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security: global abolishment of nuclear weapons. Renewed calls for a nuclear weapons-free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken. Comparably less attention, however, has been paid to theoretically informed considerations of the consequences of nuclear abolition. Comprising essays from leading scholars and experts within the field, this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts. The varied methodological approach of the contributors aims to advance a multi-theoretical and multi-perspectival view of the issue. The book is organized in three main sections: 'Strategic Perspectives', dealing with the specific constraints and facilitators for the states to achieve their core objectives; 'Political Perspectives', with the focus on the power of norms, belief-systems and ideas; and 'Regional Perspectives', with the analyses of seven regional and/or state-specific nuclear contexts. As a whole, the volume provides a detailed, complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon-free world. This book will be of great interest to students of nuclear proliferation, arms control, war and conflict studies, international relations and security studies.

**frankfurt peace research institute: Comparative International Politics of Democracy Promotion** Jonas Wolff, Hans-Joachim Spanger, Hans-Jürgen Puhle, 2013-09-11 Though scholarly attention to democracy promotion is increasing, there is still little comparative and theoretically-based work on the protagonists of democracy promotion. This book investigates the motives that drive democracy promotion in a comparative and theoretically oriented manner, exploring how democracy promoters deal with conflicting objectives and the factors that shape their behaviour. It also addresses the more policy-oriented debate on the contemporary challenges to democracy promotion, focusing on US and German policies towards three kinds of challenges: the emergence of 'radical' leftist governments in Bolivia and Ecuador, the political rise of Islamist movements in Turkey and Pakistan, and the consolidation of (semi-)authoritarian rule in Belarus and Russia. In each case, North-Western democracy promoters have been confronted with serious conflicts of objectives between security, economic interests and democracy promotion. The analysis and comparison of such situations in which democracy promoters have to deal with competing objectives and make tough decisions provides powerful evidence as to the factors that shape democracy promotion. The Comparative International Politics of Democracy Promotion will be of interest to students and scholars of international relations, comparative politics, democratization studies and foreign policy.

**frankfurt peace research institute: The Agency of the Governed in the Global South** Anke Draude, 2020-06-04 Research on global norm diffusion and institutional transfer has often neglected

the agency of the governed. This collection argues that limited statehood – the lack of state capacities in most parts of the global South – provides opportunities for the governed to raise their voices and be listened to. Thus, people on the receiving end of development cooperation, state building, or security interventions can significantly shape global dynamics of normative and institutional change. Drawing on the emerging body of literature on the agency of the governed, this book assesses the current dynamics of transfer and diffusion studies at the interstice of political science and social anthropology. By focusing on the agency of the governed, the authors integrate a broad spectrum of issues and debates, from the proliferation of global norms to state and security building to international policy cooperation. This book will be of interest to students and researchers of global politics and international relations, particularly those focusing on the global South. It was originally published as a special issue of the online journal *Third World Thematics*.

**frankfurt peace research institute:** *Southeast Asian Muslims in the Era of Globalization* K. Miichi, O. Farouk, 2014-12-15 This volume investigates the appropriate position of Islam and opposing perceptions of Muslims in Southeast Asia. The contributors examine how Southeast Asian Muslims respond to globalization in their particular regional, national and local settings, and suggest global solutions for key local issues.

**frankfurt peace research institute: Routledge Handbook of Autocratization in Southeast Asia** Netina Tan, Yuko Kasuya, 2025-07-31 The Routledge Handbook of Autocratization in Southeast Asia examines how global and domestic forces of autocratization affect regional and local politics. It analyzes how the interactions of international and domestic factors affect actors and institutions in both democracies and autocracies in the region. Bringing together a representative slate of both local and international, junior and senior scholars of different methodological backgrounds, this Handbook cross-examines regional trends and provides an insider view of the causes and effects of autocratization in a region with diverse experiences with de-colonization, state-building, and economic and political developments. The 28 chapters are organized into three sections. Part I examines a range of structural, international, socio-political, technological, and ideological causal factors of autocratization. Part II offers a comparative analysis of the consequences of autocratization on key actors and democratic institutions. Part III provides a more detailed study of autocratic consolidation and pushback in each country in Southeast Asia. Taking into account structural-historical, institutional, and cultural factors, the contributors analyze how domestic actors and democratic institutions withstand the global forces of autocratization. This Handbook fills empirical gaps in the current scholarship by focusing on all nation-states in the Association of Southeast Asia Nations and Timor-Leste, varied regime types with diverse socio-religious backgrounds. It is the first authoritative reference work dedicated to Southeast Asia's autocratization and will be an indispensable reference work for academics and policymakers interested in democracy and autocracy, regime transition, and Southeast Asian politics.

**frankfurt peace research institute:** *The Justification of War and International Order* Lothar Brock, Hendrik Simon, 2021-02-11 The history of war is also a history of its justification. The contributions to this book argue that the justification of war rarely happens as empty propaganda. While it is directed at mobilizing support and reducing resistance, it is not purely instrumental. Rather, the justification of force is part of an incessant struggle over what is to count as justifiable behaviour in a given historical constellation of power, interests, and norms. This way, the justification of specific wars interacts with international order as a normative frame of reference for

dealing with conflict. The justification of war shapes this order, and is being shaped by it. As the justification of specific wars entails a critique of war in general, the use of force in international relations has always been accompanied by political and scholarly discourses on its appropriateness. In much of the pertinent literature the dominating focus is on theoretical or conceptual debates as a mirror of how international normative orders evolve. In contrast, the focus of the present volume is on theory and political practice as sources for the re- and de-construction of the way in which the justification of war and international order interact. With contributions from international law, history, and international relations, and from Western and non-Western perspectives, this book offers a unique collection of papers exploring the continuities and changes in war discourses as they respond to and shape normative orders from early modern times to the present.

**frankfurt peace research institute: Think Tank Traditions** Diane Stone, Andrew Denham, 2004-06-19 Think tank traditions is a follow up to the critically acclaimed monograph Think Tanks across Nations (Manchester University Press, 1998), edited by the same authors, which was widely acknowledged as a ground-breaking work in the comparative study of think tanks. The book looks at the historical role and contemporary significance of think tanks in the West, including Europe, the United States and Canada, as well as considering their activities in China, Eastern Europe and Argentina. In so doing, the book provides a broad-based and in-depth analysis of the role of think tanks in the processes of economic liberalization and democratization.

**frankfurt peace research institute: Rule in International Politics** Christopher Daase, Nicole Deitelhoff, Antonia Witt, 2023-06-29 There is hardly any aspect of social, political, and economic life today that is not also governed internationally. Drawing on debates around hierarchy, hegemony, and authority in international politics, this volume takes the study of the international 'beyond anarchy' a step further by establishing the concept of rule as the defining feature of order in the international realm. The contributors argue that the manifold conceptual approaches to sub- and superordination in the international should be understood as rich conceptualizations of one concept: rule. Rule allows constellations of sub- and superordination in the international to be seen as multiplex, systemic, and normatively ambiguous phenomena that need to be studied in the context of their interplay and consequences. This volume draws on a variety of conceptualizations of rule, exploring, in particular, the practices of rule as well as the relational and dynamic characteristics of rule in international politics.

**frankfurt peace research institute: Lessons from World War I for the Rise of Asia** Andreas Herberg-Rothe, 2015-06-01 This groundbreaking volume offers a historical comparison between the events leading up to World War I and current global tensions related to the economical and political rise of Asia. What are the risks that the desire of the new super power China and great powers like India to be recognized by the West could set off a chain of events resulting in the nightmare of a great power war? Assessing the similarities as well as differences between the build-up of World War I and today, it is argued that we need to understand the driving forces behind the scene of global politics: The conflict between rising, established, and disintegrating powers and the desire of recognition on all sides. Carefully dissecting the current power dynamics in play, the authors hope to contribute to a better understanding of world events in order to ensure that history will not repeat itself.

**frankfurt peace research institute: Information Technology for Peace and Security** Christian Reuter, 2024-10-31 Technological and scientific progress, especially the rapid development in information technology (IT) and artificial intelligence (AI), plays a crucial role regarding questions of peace and security. This textbook, extended and updated in its second edition, addresses the significance, potential of IT, as well as the challenges it poses, with regard to peace and security. It introduces the reader to the concepts of peace, conflict, and security research, especially focusing on natural, technical and computer science perspectives. In the following sections, it sheds light on cyber conflicts, war and peace, cyber arms control, cyber attribution, infrastructures, artificial intelligence, as well ICT in peace and conflict.

**frankfurt peace research institute: Democratic Wars** A. Geis, L. Brock, H. Mueller,

2006-02-28 The book turns the 'democratic peace' theme on its head: rather than investigating the reasons for the supposed pacifism of democracies, it looks for the causes of their militancy. In order to solve this puzzle, the authors look across International Relations, political theory, political philosophy and sociology.

**frankfurt peace research institute: *Peace Studies in the Chinese Century*** Alan Hunter, 2017-05-15 The rise of China is probably the most significant shift in the international power structure this generation. China's leaders have so far committed themselves to a 'peaceful rising' but serious tensions are inevitable in such a rapid transformation. Dialogue on peace and conflict issues at this juncture is invaluable. This volume focuses on developments in peace research in a number of key countries, and in particular introduces for the first time in English the perspectives of a number of Chinese scholars who have started to engage with peace studies agendas. Comparisons are drawn from the UK, USA, Mexico, Japan and South Africa to provide a better understanding of the debates on a global level and the discussion among different countries. Some of the outstanding peace researchers who contribute to the volume include Andrew Rigby, Johan Galtung - who is generally considered to have founded the discipline in its current form - and Ursula Oswald. The volume is a valuable and unique contribution to the contemporary peace research agenda and will appeal to an interdisciplinary readership in peace studies, sociology, politics, international relations, religious studies, philosophy and Asian studies.

**frankfurt peace research institute: *WMD Arms Control in the Middle East*** Harald Müller, 2016-02-17 The Middle East is a hot spot of proliferation. It contains one state assumed to possess nuclear weapons, several states that tried and failed to develop a military nuclear capability, one state under suspicion of trying to do so, and it is the world region that witnessed the most frequent and severe employment of chemical weapons since the end of World War I. Notwithstanding, not a single arms control regime concerning weapons of mass destruction (WMD) covers the region as a whole. Instead we have seen several proliferation-related military operations which have rather contributed to destabilization than served non-proliferation. This volume, written under the auspices of the EU Consortium for Non-Proliferation and Disarmament determines the current state of diplomatic efforts to establish a WMD free zone in the Middle East. In doing so, it provides insights into central actors' conflicting political positions, thereby explaining the stalemate of efforts to negotiate a WMD-free zone. Chapters written by renowned experts from academia and policy-oriented think tanks, as well as by next-generation Middle East and arms control experts, introduce the subject to the reader, give background information about arms control initiatives, provide technical expertise, and endeavour to make proposals for arms control measures in support of the creation of a Middle East WMD-free zone.

**frankfurt peace research institute: *Democracy and Security*** Matthew Evangelista, Harald Muller, Niklas Schoernig, 2009-12-04 It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general. This edited book offers a broad examination of how democratic preferences and norms are relevant to security policy beyond the decision of whether to go to war. It therefore offers a fresh understanding of state behaviour in the security realm. The contributors discuss such issues as defence policy, air war, cluster bombs, non-lethal weapons, weapons of mass destruction, democratic and non-democratic nuclear weapon states' transparency, and the political and ideological background of the ongoing 'Revolution in Military Affairs'. It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general.
