Overview of Franciscan Physician Network Greenwood Parke Family Medicine

The Franciscan Physician Network Greenwood Parke Family Medicine is an integral part of the broader Franciscan Health system, known for delivering high-quality healthcare across Indiana. This family medicine practice provides a wide range of medical services tailored to meet the needs of patients at every stage of life. From newborns to seniors, the providers at Greenwood Parke Family Medicine are dedicated to fostering strong patient-provider relationships that support comprehensive health management. This network emphasizes coordinated care that links primary care providers with specialists, ensuring seamless communication and continuity of care.

Mission and Values

The mission of the Franciscan Physician Network Greenwood Parke Family Medicine centers on compassionate, evidence-based care that respects the dignity and individuality of each patient. Their core values include integrity, excellence, collaboration, and community focus. These principles guide

the practice in delivering personalized healthcare solutions that improve health outcomes.

Comprehensive Family Medicine Services

Franciscan Physician Network Greenwood Parke Family Medicine offers a broad spectrum of family medicine services designed to address acute illnesses, chronic conditions, and routine health maintenance. The practice serves as a medical home where patients receive continuous and comprehensive care that spans preventive health screenings to complex disease management.

Primary Care Services

The primary care services include routine physical exams, immunizations, health screenings, and treatment for common illnesses such as infections and minor injuries. Providers focus on early detection and intervention to maintain optimal health.

Chronic Disease Management

Patients with chronic diseases such as diabetes, hypertension, asthma, and cardiovascular conditions receive specialized management plans. These plans are tailored to control symptoms, prevent complications, and enhance quality of life through medication management, lifestyle counseling, and regular monitoring.

Pediatric and Geriatric Care

The network offers age-appropriate care that caters to the unique needs of children and older adults. Pediatric services include growth monitoring and developmental assessments, while geriatric care focuses on managing multiple chronic conditions and promoting functional independence.

Team-Based Care Approach

The Franciscan Physician Network Greenwood Parke Family Medicine operates with a multidisciplinary team approach, integrating physicians, nurse practitioners, physician assistants, nurses, and support staff. This collaborative model ensures comprehensive evaluation and treatment planning that addresses all aspects of a patient's health.

Collaborative Care Coordination

Care coordination is a hallmark of the network's approach, involving communication between primary care providers and specialists to streamline patient care. This coordination reduces fragmentation, avoids duplication of services, and fosters timely interventions.

Patient Education and Engagement

Empowering patients with knowledge about their health conditions and treatment options is a priority. The team provides educational resources and encourages active participation in health decisions, which contributes to improved adherence and outcomes.

Patient Experience and Accessibility

Franciscan Physician Network Greenwood Parke Family Medicine prioritizes patient convenience and satisfaction by offering accessible appointment scheduling, extended office hours, and a welcoming environment. The practice is designed to accommodate the busy lifestyles of families while maintaining high standards of care.

Location and Facilities

Located in Greenwood, Indiana, the Greenwood Parke facility is equipped with modern medical technology and comfortable patient areas. The location is easily accessible via major roadways and provides ample parking to facilitate visits.

Insurance and Payment Options

The network accepts a wide range of insurance plans to ensure that patients can access care without financial barriers. Additionally, billing and payment processes are streamlined to make healthcare affordable and straightforward.

Preventive Care and Chronic Disease Management

Prevention is a key focus at Franciscan Physician Network Greenwood Parke Family Medicine. The practice emphasizes routine screenings, vaccinations, and lifestyle counseling to reduce the risk of illness and detect health issues early.

Wellness and Screening Programs

Regular wellness visits include screenings for blood pressure, cholesterol, diabetes, cancer, and other conditions based on age and risk factors. These programs are designed to identify potential health concerns before they become serious.

Managing Long-Term Conditions

Effective management of chronic illnesses involves regular follow-up visits, medication adjustments, and patient education. The team works closely with patients to develop sustainable health plans that improve disease control and reduce hospitalizations.

Technology and Innovation in Care Delivery

The Franciscan Physician Network Greenwood Parke Family Medicine integrates advanced medical technology to enhance diagnostic accuracy and treatment effectiveness. Electronic health records (EHR) and telemedicine capabilities are key components of their innovative care model.

Electronic Health Records

EHR systems facilitate efficient documentation, easy access to patient history, and improved communication among healthcare providers. This technology supports personalized treatment and reduces errors.

Telehealth Services

Telehealth options provide virtual consultations, allowing patients to receive care from the comfort of their homes. This service is particularly beneficial for routine follow-ups and managing chronic conditions, increasing access and convenience.

- Comprehensive primary and specialty care integration
- Multidisciplinary team collaboration
- Focus on preventive and chronic disease care
- Patient-centered care with education and engagement
- Utilization of advanced technology including telehealth

Additional Resources

1. Franciscan Physician Network: A Legacy of Compassionate Care

This book explores the history and mission of the Franciscan Physician Network, highlighting its commitment to compassionate and comprehensive healthcare. It delves into the network's integration of faith-based values with modern medical practices. Readers will gain insights into how the network supports both patients and medical professionals alike.

2. Greenwood Parke Family Medicine: Community and Care

Focusing on the Greenwood Parke Family Medicine clinic, this book illustrates the importance of family-centered healthcare. It discusses the clinic's approach to personalized medicine and its role in fostering strong patient-doctor relationships. The narrative emphasizes community outreach and preventive care initiatives.

3. The Intersection of Faith and Medicine: Stories from Franciscan Physicians

This collection of stories presents firsthand accounts from physicians within the Franciscan network. It highlights how faith influences their approach to healing and patient care. The book offers an intimate look at the challenges and rewards of practicing medicine within a faith-based system.

4. Advances in Family Medicine: Innovations at Greenwood Parke

Detailing recent medical advancements, this book showcases the innovative practices adopted by Greenwood Parke Family Medicine. From new diagnostic tools to cutting-edge treatment protocols, it highlights the clinic's dedication to staying at the forefront of family healthcare. The book also discusses the impact of technology on patient outcomes.

5. Building a Healthcare Network: The Franciscan Model

An in-depth analysis of how the Franciscan Physician Network was established and expanded. The book covers organizational strategy, community engagement, and the integration of various specialties. It serves as a guide for healthcare administrators seeking to create effective, mission-driven networks.

6. Patient-Centered Care at Greenwood Parke Family Medicine

This book emphasizes the principles and practices that make Greenwood Parke a leader in patient-centered care. It explores communication techniques, individualized treatment plans, and the importance of empathy in medicine. Case studies illustrate successful patient outcomes resulting from this approach.

7. Faith-Based Healthcare Ethics: Insights from the Franciscan Network

Exploring ethical dilemmas and decision-making in faith-based healthcare settings, this book provides a framework grounded in Franciscan values. It addresses topics such as end-of-life care, reproductive health, and resource allocation. Healthcare professionals and ethicists will find this a valuable resource.

8. The Role of Family Medicine in Community Health: The Greenwood Parke Experience

Highlighting the critical role of family medicine, this book details how Greenwood Parke contributes to overall community health improvement. It discusses preventive care, chronic disease management, and partnerships with local organizations. The book underscores the clinic's role as a healthcare hub in its region.

9. Integrating Spirituality and Medicine: Practices from the Franciscan Physician Network

This book examines practical ways spirituality is incorporated into patient care within the Franciscan Physician Network. It covers chaplaincy services, holistic healing approaches, and patient support programs. Readers will learn how spirituality can enhance healing and patient satisfaction.

franciscan physician network greenwood parke family medicine: *Who's Who of American Women 2004-2005* Inc. Marquis Who's Who, Who's Who Marquis, 2004-06 A biographical dictionary of notable living women in the United States of America.

franciscan physician network greenwood parke family medicine: Essentials of Family Medicine Philip D. Sloane, 2008 Written at the clerkship level, this book is a comprehensive introduction to family medicine. It is organized into three sections—principles of family medicine, preventive care, and common problems—and includes chapters on evidence-based medicine and complementary therapies. The text has a user-friendly writing style, focuses on common clinical problems, and uses case studies to show practical applications of key concepts. This edition features an updated art program, more illustrations, summaries, consistent headings, greater emphasis on evidence-based care, and more diverse family physician profiles representing varied practice settings. A companion Website offers the fully searchable text, 75 study questions, and an ExamKit of more than 300 questions with which faculty can generate tests.

franciscan physician network greenwood parke family medicine: *Family Medicine* Paul M. Paulman, Robert B. Taylor, Audrey A. Paulman, Laeth S. Nasir, 2022-01-21 Since the publication of the 7th edition of this book, there has been a remarkable increase in information in several clinical areas, including cardiology, immunology and oncology. This rapid knowledge expansion has led to practice changes for family physicians and other primary care providers. Patients are now discharged from tertiary care hospitals to their home communities with life sustaining left ventricular assist “heart pumps”. Hepatitis C, once an incurable illness, is now routinely cured. Oncology treatment regimens are increasingly becoming ambulatory and individualized. The decreased cost and increasing availability of health monitoring devices will make it possible for physicians to remotely check on the health status of their patients in their homes. With the ongoing and worsening shortage of family physicians across the US, the practice model for family medicine in the future may tend toward a family physician supervising a cast of mid-level providers as they care for a panel of patients, versus the physician providing the majority of care. All of these changes will require practice pattern changes and a need for up to date sources of information for the family physician. In addition, the “family” of family medicine academic organizations is undertaking a major review of the practice, training, funding and evaluation of all aspects of family medicine. Eight family medicine organizations have launched the “Family Medicine for America’s Health” (FMAHealth) with the expressed purpose “to strategically align work to improve practice models, payment, technology, workforce and education, and research to support the triple aim”. This project has moved past the study phase and will soon move to the implementation phased. This book is organized into short, focused chapters almost exclusively dedicated to topics relevant to daily practice. All lead authors are themselves accomplished family physicians who can specifically address the needs, concerns, and interests of this crucial profession. As one of the key reference textbooks for family medicine, it is very important to provide the most up-to-date knowledge to support learners and practitioners of family medicine in the face of rapidly expanding clinical knowledge and the extensive self-examination of family medicine. *Family Medicine: Principles and Practice*, 8th Edition, is a must-have reference for medical students, residents, practicing physicians, nurse practitioners and physician assistants with an active role in patient care.

franciscan physician network greenwood parke family medicine: **Fundamentals of Family Medicine** A.K. David, D.M. Phillips, J.E. Scherger, S.A. Fields, 2013-03-09 *Fundamentals of Family Medicine*, Third Edition, describes the current approach to common problems in family practice. The book tells how family physicians provide high-quality, comprehensive, and ongoing health care for patients and families, based on current evidence and time-tested methods in clinical practice. Clinical scenarios that include case studies and questions for group discussion reinforce the book's clinical topics. The clinical scenarios all concern members of the Nelson family- a multigenerational extended family whose members visit the family physician with a variety of health concerns and whose dynamics evolve from chapter to chapter. The discussion questions allow the group to consider both the biomedical and psychosocial aspects of problems such as headache,

obstructive airway disease, diabetes mellitus, athletic injuries, domestic violence, care of the dying patient, and the family physicians's role in dealing with terrorist events. The book is intended to be a reference source for the care of diseases family physicians are likely to see and as the course textbook for medical students in family medicine clerkships in medical school. This book will help health professionals provide up-to-date care for their patients, and will allow students to view clinical issues through the eyes of the family physician. *Fundamentals of Family Medicine, Third Edition*, ideally is used as a companion to *Family Medicine: Principles and Practice, Sixth Edition*, edited by Robert B. Taylor et al.

franciscan physician network greenwood parke family medicine: Urban Family Medicine Richard B. Birrer, 1987 Now, more than ever, Family Medicine is alive and well in the United States. The base of this medical specialty has traditionally been in the smaller cities, suburban communities, and rural areas of this country. Over the past decade, however, there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment. A rebirth of urban family medicine has accompanied these pioneering efforts. To date, the accomplishments are substantial and the prospects are bright. There is still a long way to go and there are a significant number of hurdles to cross. Although diseases are generally the same wherever you are, their effects as illness on the individual and the family are strongly influenced by the environment and social milieu. Urban families have distinctive and diverse problems-cultural, economic, and ethnic. Training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training. There is very little research literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine. Dr. Birrer has persuaded true experts to share their knowledge with the reader.

franciscan physician network greenwood parke family medicine: Taylor's Manual of Family Medicine Paul M. Paulman, Audrey A. Paulman, Kimberly Jarzynka, Nathan P. Falk, 2015 Written from the family physician's perspective, this text provides practical, accessible information on the full spectrum of clinical problems in primary care. It emphasises ambulatory care, pertinent hospital-based and home-based problems, and focuses on disease prevention and health maintenance.
