fpl construction phone number: **History of Construction Cultures Volume 2** João Mascarenhas-Mateus, Ana Paula Pires, 2021-07-08 Volume 2 of History of Construction Cultures contains papers presented at the 7ICCH – Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques ; - structural theory and analysis ; - political, social and economic aspects; - knowledge transfer and cultural translation of

construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

fpl construction phone number: Optimum Timeframes for Detecting Songbird Vocalizations in the Black Hills Todd R. Mills, 2000 Birds are indicators of vegetation structure and ecological conditions. The singing activity of birds declines during late-morning periods, which can affect estimates of abundance and conclusions regarding vegetative conditions indexed by birds. Therefore, it is important to quantify periods of bird activity so biologists can plan studies. We determined hourly detections from singing males of 22 nongame bird species in ponderosa pine, quaking aspen, and grassland vegetation types in the Black Hills of South Dakota. Detections of 12 of 22 species differed among 1-hr intervals after sunrise. Detections of yellowrumped warblers, Townsend's solitaires, red-breasted nuthatches, western tanagers, and American robins decreased on count-episodes more than 4 hrs after sunrise. Detections of dusky flycatchers declined on count-episodes more than 3 hrs after sunrise and detections of black-capped chickadees were greatest during the first hour after sunrise and declined afterward. Detections of many other species from songs or calls decreased on count-episodes more than 5 hrs after sunrise. We recommend that bird counts in the Black Hills be completed within 4 hrs after sunrise so estimates of bird abundance are not affected by reduced singing among males.

fpl construction phone number: The Floating Pool Lady Ann L. Bittenwieser, 2021-05-15 Why on earth would anyone want to float a pool up the Atlantic coastline to bring it to rest at a pier on the New York City waterfront? In *The Floating Pool Lady*, Ann L. Bittenwieser recounts her triumphant adventure that started in the bayous of Louisiana and ended with a self-sustaining, floating swimming pool moored in New York Harbor. When Bittenwieser decided something needed to be done to help revitalize the New York City waterfront, she reached into the city's nineteenth-century past for inspiration. Bittenwieser wanted New Yorkers to reestablish their connection to their riverine surroundings and she was energized by the prospect of city youth returning to the Hudson and East Rivers. What she didn't suspect was that outfitting and donating a swimming facility for free enjoyment by the public would turn into an almost-Sisyphean task. As she describes in *The Floating Pool Lady*, Bittenwieser battled for years with politicians and struggled with bureaucrats as she brought her crazy scheme to fruition. From dusty archives in the historic Battery Maritime Building to high-stakes community board meetings to tense negotiations in the Louisiana shipyard, Bittenwieser retells the improbable process that led to a pool named *The Floating Pool Lady* tying up to a pier at Barretto Point Park in the Bronx, ready for summer swimmers. Throughout *The Floating Pool Lady*, Bittenwieser raises consciousness about persistent environmental issues and the challenges of developing a constituency for projects to make cities livable in the twenty-first century. Her story and that of her floating pool function as both warning and inspiration to those who dare to dream of realizing innovative public projects in the modern urban landscape.
