framework for information literacy for higher education

framework for information literacy for higher education plays a crucial role in equipping students with the essential skills to locate, evaluate, and use information effectively in academic settings. As higher education institutions increasingly emphasize critical thinking and lifelong learning, establishing a comprehensive framework for information literacy becomes fundamental. This framework not only supports academic success but also prepares students for professional environments that demand adept information management. The development of a robust information literacy framework involves identifying core competencies, integrating digital literacy, and aligning with institutional goals. This article explores the key components of such a framework, its implementation strategies, and the benefits it offers to students and educators alike. The following sections provide a detailed overview of the elements that comprise an effective framework for information literacy in higher education.

- Understanding Information Literacy in Higher Education

- Core Components of the Framework

- Implementation Strategies for Higher Education Institutions

- Benefits of an Information Literacy Framework

- Challenges and Solutions in Developing the Framework

Understanding Information Literacy in Higher Education

Information literacy is a critical set of abilities that enables individuals to recognize when information is needed and to locate, evaluate, and use that information effectively. In the context of higher education, these skills are essential for academic research, critical analysis, and decision-making. The framework for information literacy for higher education establishes structured guidelines to help students navigate the vast and complex information landscape. It encompasses not only traditional research skills but also digital literacy, ethical use of information, and critical thinking.

Definition and Scope

The framework for information literacy in higher education defines information literacy as more than just the ability to find information; it includes understanding the nature of information, its context, and the ethical implications of its use. This comprehensive scope ensures students are prepared to engage with information responsibly and thoughtfully.

Importance in Academic Success

Information literacy directly contributes to academic achievement by enabling students to conduct thorough research, construct well-informed arguments, and avoid plagiarism. Higher education institutions recognize that fostering these skills enhances the quality of student work and promotes independent learning.

Core Components of the Framework

A well-designed framework for information literacy for higher education consists of several core components that collectively build students' competencies. These components address different stages of the information lifecycle, from identifying the need to ethically using and sharing information.

Recognizing Information Needs

The first component involves teaching students how to identify gaps in their knowledge and articulate specific information needs. This foundational skill assists in formulating research questions and determining the scope of inquiry.

Information Searching Strategies

Effective searching strategies are crucial. The framework includes instruction on using academic databases, search engines, catalogs, and other resources. Students learn techniques such as keyword selection, Boolean operators, and advanced search filters.

Evaluating Information Sources

Critical evaluation of information sources is essential to distinguish credible and relevant content from unreliable or biased information. The framework guides students to assess authority, accuracy, currency, and purpose of sources.

Ethical Use and Citation

Proper attribution and ethical use of information are emphasized to prevent plagiarism and respect intellectual property rights. Students are taught citation standards and the importance of academic integrity.

Information Synthesis and Application

The framework encourages students to synthesize information from multiple sources and apply it effectively in academic writing, presentations, or problem-solving scenarios. This component strengthens analytical and communication skills.

Implementation Strategies for Higher Education Institutions

To effectively embed a framework for information literacy within higher education, institutions must adopt strategic approaches that align with curriculum design and institutional objectives. Successful implementation ensures that information literacy becomes an integral part of the student learning experience.

Curriculum Integration

Embedding information literacy into existing courses across disciplines promotes consistent skill development. This can be achieved through collaboration between librarians, faculty, and instructional designers to create targeted assignments and learning activities.

Faculty and Librarian Collaboration

Strong partnerships between academic staff and librarians facilitate the delivery of information literacy instruction. Joint initiatives such as workshops, seminars, and co-taught sessions enhance student engagement and learning outcomes.

Use of Technology and Digital Tools

Incorporating digital tools such as online tutorials, learning management systems, and interactive modules supports flexible and accessible learning. These resources can provide self-paced instruction and reinforce classroom teaching.

Assessment and Feedback

Regular assessment of information literacy skills through quizzes, assignments, and projects helps monitor student progress. Feedback mechanisms guide improvements and inform curriculum

adjustments to address identified gaps.

Benefits of an Information Literacy Framework

Implementing a comprehensive framework for information literacy in higher education yields significant benefits for students, educators, and institutions. These advantages extend beyond academic performance to lifelong learning and professional success.

Enhanced Critical Thinking

Information literacy fosters critical thinking by encouraging students to question sources, analyze arguments, and make informed decisions. This intellectual rigor is essential across academic disciplines.

Improved Research Competency

Students equipped with effective research skills can access high-quality information efficiently, leading to more thorough and credible academic work. This competency is vital for graduate studies and scholarly contributions.

Preparation for the Workforce

The ability to navigate complex information environments is highly valued in the workplace. Graduates with strong information literacy skills are better prepared for problem-solving, decision-making, and continuous professional development.

Promotion of Academic Integrity

A clear framework emphasizing ethical information use reduces instances of plagiarism and academic misconduct, fostering a culture of honesty and respect within educational communities.

Challenges and Solutions in Developing the Framework

While the benefits of a framework for information literacy in higher education are evident, developing and maintaining such frameworks presents challenges that institutions must address proactively.

Resource Constraints

Limited funding and staffing can hinder comprehensive information literacy programming. Solutions include leveraging online resources, training existing staff, and fostering partnerships to maximize available assets.

Varying Student Preparedness

Students enter higher education with diverse backgrounds and skill levels. Differentiated instruction and scaffolded learning activities help accommodate varying needs and promote equitable skill development.

Keeping Pace with Technological Changes

Rapid advancements in technology require continuous updates to the framework and instructional methods. Ongoing professional development and technology integration support adaptation to evolving information landscapes.

Faculty Engagement

Securing faculty buy-in can be challenging due to competing priorities. Demonstrating the framework's alignment with academic goals and providing support for integration encourages faculty participation.

Strategies for Continuous Improvement

- Conducting regular reviews of the framework to incorporate new research and best practices.

- Gathering feedback from students and faculty to identify areas for enhancement.

- Investing in professional development for librarians and educators.

- Utilizing data-driven approaches to assess the impact of information literacy initiatives.

Frequently Asked Questions

What is the Framework for Information Literacy for Higher Education?

The Framework for Information Literacy for Higher Education is a set of core concepts and ideas developed by the Association of College and Research Libraries (ACRL) to guide the teaching and understanding of information literacy skills among college and university students.

How does the Framework for Information Literacy differ from previous standards?

Unlike previous prescriptive standards, the Framework emphasizes a conceptual understanding of information literacy through interconnected core concepts called 'frames', encouraging critical thinking

and adaptability rather than checklist-based skills.

What are the key frames in the Framework for Information Literacy?

The Framework consists of six key frames: Authority Is Constructed and Contextual, Information Creation as a Process, Information Has Value, Research as Inquiry, Scholarship as Conversation, and Searching as Strategic Exploration.

Why is the Framework for Information Literacy important for higher education?

It equips students with critical skills to evaluate and use information ethically and effectively, fostering lifelong learning and preparing them for complex information environments both academically and professionally.

How can faculty integrate the Framework into their curriculum?

Faculty can integrate the Framework by aligning assignments and learning outcomes with its core concepts, collaborating with librarians to design research-based projects, and encouraging critical reflection on information sources and processes.

What role do librarians play in implementing the Framework for Information Literacy?

Librarians act as educators and collaborators, helping to design instruction sessions, develop resources, and support students and faculty in understanding and applying the Framework's concepts throughout the research process.

How does the Framework address the evaluation of information sources?

The Framework emphasizes that authority is constructed and contextual, encouraging students to

critically evaluate sources based on their origin, purpose, and context rather than relying solely on traditional markers of credibility.

Can the Framework for Information Literacy be adapted for diverse disciplines?

Yes, the Framework is designed to be flexible and adaptable, allowing educators to tailor its core concepts to the specific research practices, information types, and values of different academic disciplines.

What challenges do institutions face when adopting the Framework for Information Literacy?

Challenges include shifting from skills-based instruction to conceptual teaching, ensuring faculty buy-in, providing professional development for librarians and educators, and assessing student learning outcomes related to the Framework's abstract concepts.

Additional Resources

1. *Framework for Information Literacy for Higher Education*

This foundational document by the Association of College and Research Libraries (ACRL) outlines core concepts and practices essential for developing information literacy in higher education. It emphasizes critical thinking, ethical use of information, and lifelong learning skills. The framework serves as a guide for educators and librarians to integrate information literacy into curricula effectively.

2. *Information Literacy and Higher Education: A Critical Review*

This book explores the evolving role of information literacy in higher education, analyzing various models and pedagogical approaches. It discusses challenges faced by institutions in fostering information literacy and offers strategies for effective integration. The text is valuable for educators seeking to understand the theoretical underpinnings and practical applications of information literacy frameworks.

3. *Teaching Information Literacy in Higher Education: Theory and Practice*

Focusing on instructional methods, this book provides educators with tools and techniques to teach information literacy skills. It combines theoretical insights with case studies and practical examples from college classrooms. Readers gain perspectives on designing assignments, assessments, and collaborative learning experiences that enhance students' information competencies.

4. *Information Literacy and Digital Competence: Frameworks and Practices*

This title examines the intersection of information literacy and digital skills within higher education contexts. It highlights how digital competence complements traditional information literacy frameworks to prepare students for the modern information landscape. The book includes guidelines for integrating technology and digital resources into information literacy instruction.

5. *Developing Information Literacy Instruction in Higher Education: Models and Case Studies*

Through a collection of case studies, this book showcases diverse instructional models for embedding information literacy into higher education curricula. It addresses institutional collaboration, curriculum design, and assessment methods. The practical examples provide insights into overcoming common barriers and achieving sustainable information literacy programs.

6. *Critical Information Literacy: Foundations, Frameworks, and Practices*

This work delves into critical information literacy, emphasizing social justice, power dynamics, and ethical considerations in information use. It challenges traditional frameworks by advocating for a more reflective and transformative approach to information literacy education. The book is a resource for educators interested in fostering critical awareness alongside technical skills.

7. *Information Literacy in Higher Education: A Comprehensive Guide*

Offering a broad overview, this guide covers key concepts, frameworks, and best practices for information literacy in colleges and universities. It addresses curriculum integration, faculty collaboration, and assessment strategies. The book serves as a practical reference for librarians, educators, and administrators involved in information literacy initiatives.

8. *Designing Curriculum for Information Literacy in Higher Education*

This book focuses on curriculum development, providing frameworks and strategies for embedding information literacy throughout academic programs. It discusses alignment with institutional goals, learning outcomes, and accreditation standards. Educators will find guidance on creating cohesive and effective information literacy curricula that enhance student learning.

9. *Assessment and Evaluation in Information Literacy Education*

Dedicated to the evaluation of information literacy programs, this book explores various assessment tools and methodologies. It emphasizes measuring student learning outcomes, program effectiveness, and continuous improvement. The text is essential for educators and librarians aiming to demonstrate the impact of information literacy instruction within higher education.

Framework For Information Literacy For Higher Education

Find other PDF articles:

framework for information literacy for higher education: The Information Literacy Framework Heidi Julien, Melissa Gross, Don Latham, 2020-02-07 This book helps demystify how to incorporate ACRL's Framework for Information Literacy for Higher Education into information literacy instruction in higher education as well as how to teach the new Framework to pre-service librarians as part of their professional preparation. This authoritative volume copublished by the Association for Library and Information Science Education (ALISE) demonstrates professional practice by bringing together current case studies from librarians in higher education who are implementing the Framework for Information Literacy for Higher Education as well as cases from educators in library and information science, who are working to prepare their pre-service students to practice in the new instructional environment. Instructional librarians, administrators, and educators will benefit from the experiences the people on the ground who are actively working to make the transition to the Framework in their professional practice.

framework for information literacy for higher education: Media and Information Literacy in Higher Education Dianne Oberg, Siri Ingvaldsen, 2016-11-18 Media and Information Literacy in Higher Education: Educating the Educators is written for librarians and educators working in universities and university colleges, providing them with the information they need to teach media and information literacy to students at levels ranging from bachelor to doctoral studies. In order to do so, they need to be familiar with students' strengths and weaknesses regarding MIL. This book investigates what university and college students need to know about searching for, and evaluating, information, and how teaching and learning can be planned and carried out to improve MIL skills. The discussions focus on the use of process-based inquiry approaches for developing media and information literacy competence, involving students in active learning and open-ended

investigations and emphasizing their personal learning process. It embraces face-to-face teaching, and newer forms of online education. - Examines the intersecting roles of academic librarians, teacher educators, and library educators in preparing library students and teacher education students to use the library - Brings new perspectives from both teacher educator and library educator, and draws connections between higher and secondary education (K12) - Draws on a number of competences, skills, knowledge, experiences, and reflections from a variety of perspectives, and focuses on libraries as efficient tools in all kinds of education and learning activities - Written by an international group of authors with firsthand experience of teaching MIL - Looks at how libraries can contribute to the promotion of civic literacy within higher education institutions and in society more widely

framework for information literacy for higher education: Framework for Information Literacy for Higher Education , 2015

framework for information literacy for higher education: Implementing the Information Literacy Framework Dave Harmeyer, Janice J. Baskin, 2018-03-05 Implementing the Information Literacy Framework: A Practical Guide for Librarians is written with three types of people in mind: librarians, classroom educators, and students. This book and its website address the implementation of the Association of College and Research Libraries' Framework of Information Literacy in Higher Education. One of the few books written jointly by an academic librarian and a classroom faculty member, Implementing the Information Literacy Framework packs dozens of how-to ideas and strategies into ten chapters specifically intended for librarians and classroom instructors. If you have been waiting for a no-nonsense, carefully explained, yet practical source for implementing the Framework, this book is for you, your colleagues, and your students, all in the context of a discipline-specific, equal collaboration between the library liaison and classroom educator. Implementing the Information Literacy Framework gives you the tools and strategies to put into practice a host of Framework-based information literacy experiences for students and faculty, creating a campus culture that understands and integrates information literacy into its educational mission.

framework for information literacy for higher education: Teaching Information Literacy Reframed Joanna M. Burkhardt, 2016-06-02 The six threshold concepts outlined in the Framework for Information Literacy for Higher Education are not simply a revision of ACRL's previous Information Literacy Competency Standards for Higher Education. They are instead an altogether new way of looking at information literacy. In this important new book, bestselling author and expert instructional librarian Burkhardt decodes the Framework, putting its conceptual approach into straightforward language while offering more than 50 classroom-ready Framework-based exercises. Guiding instructors towards helping students cross each threshold, this book discusses the history of the development of the Framework document and briefly deconstructs the six threshold concepts; thoroughly addresses each threshold concept, scaffolding from the beginner level to the intermediate level; includes exercises that can be used in the one-shot timeframe as well as others designed for longer class sessions and semester-long courses; offers best practices in creating learning outcomes, assessments, rubrics, and teaching tricks and tips; and looks at how learning, memory, and transfer of learning applies to the teaching of information literacy. Offering a solid starting point for understanding and teaching the six threshold concepts in the Framework, Burkhardt's guidance will help instructors create their own local information literacy programs.

framework for information literacy for higher education: *Information Literacy Education of Higher Education in Asian Countries* Chao-Chen Chen, Mei-Ling Wang, Samuel Kai Wah Chu, Emi Ishita, Kulthida Tuamsuk, Mohamed Shuhidan Shamila, 2023-04-18 This book focuses on information literacy in higher education from Asian countries. It explores the changing concepts, philosophies, learning environments, and technological environments of information literacy and discusses how information literacy education in universities should be carried out in the context of the information literacy framework. It also analyses the research focus and trends of information literacy education in universities in the past ten years worldwide and Asia by using the bibliometric method as well as

the information literacy education models of universities in Asian countries. In addition, this book also explains the current status of information literacy education and related issues in Taiwan, Japan, Hong Kong, Malaysia, Thailand and Vietnam. The target audience of this book is mainly university librarians, school librarians, the faculty and students of library and information sciences, information education and technology education related departments worldwide.

framework for information literacy for higher education: *Information Literacy in Higher Education* Fabiola Cabra-Torres, Gloria Patricia Marciales Vivas, Harold Castañeda-Peña, Jorge Winston Barbosa-Chacón, Leonardo Melo González, Oscar Gilberto Hernández Salamanca, 2020-08-07 This book presents an innovative theoretical and methodological approach to study information literacy in higher education contexts. While mainstream studies tend to see information literacy as a technical and universal process, this book proposes a theoretical and methodological framework to study information literacy from a sociocultural perspective, highlighting the importance of the social and cultural contexts in which information literacy develops. This situated approach demands that research data must be analysed in relation to the contexts in which they emerge, so the book proposes a research method based on the study of personal histories and stories, learning situations and intersubjective relationships to characterize the different information profiles of different information users. Adopting a multidisciplinary approach that combines contributions from educational research, psychology and information sciences, the authors first present a theoretical discussion to argue in favor of the sociocultural paradigm to study information literacy, then present their methodological proposal to observe informational competencies among higher education students, and finally present the results of an empirical study to identify different information literacy profiles among Latin American students and teachers. Breaking with the hegemonic paradigm in the field, Information Literacy in Higher Education – A Sociocultural Perspective provides useful and innovative tools to researchers working in different areas of the social sciences, such as education, psychology, linguistics and information sciences.

framework for information literacy for higher education: A Slow Approach to Visual Literacy in Higher Education Dana Statton Thompson, Stephanie Beene, 2025-04-10 The principles of "slow librarianship"—which prioritizes reflection, collaboration, solidarity, and valuing all kinds of contributions—can also support deeper and more sustained learning and understanding. This book emphasizes the importance of attention and focus to the process of visual literacy, demonstrating how this approach supports ACRL's Visual Literacy Competency Standards for Higher Education and the Framework for Visual Literacy in Higher Education. Library workers, educators, and instructors will discover dozens of flexible lesson plans for teaching visual literacy, scaffolded by competency levels: novice, intermediate, and advanced; ways to integrate slow looking into the classroom, emphasizing careful observation and the sustained act of looking; techniques for showing learners how to select images with intention, as well as carefully determine when and how to share those images; reasons why slow creating is essential to understanding and applying visual literacy in the twenty-first century; and a look at how increasing access to internet connectivity, generative artificial intelligence (AI), and new ethics for sharing and using information online will affect the future of visual literacy.

framework for information literacy for higher education: Disciplinary Applications of Information Literacy Threshold Concepts SAMANTHA GODBEY; SUSAN BETH WAINSCOTT; XAN GOODMAN., In 25 chapters divided into sections mirroring ACRL's Framework for Information Literacy for Higher Education--Authority is Constructed and Contextual, Information Creation as a Process, Information has Value, Research as Inquiry, Scholarship as Conversation, and Searching as Strategic Exploration--Disciplinary Applications of Information Literacy Threshold Concepts explores threshold concepts as an idea and the specifics of what the concepts contained in the Framework look like in disciplinary contexts. The chapters cover many disciplines, including the humanities, social sciences, life sciences, and physical sciences, and a range of students, from first-year undergraduates to doctoral students.

framework for information literacy for higher education: *Quality Assurance and*

Accreditation in Higher Education Mustafa Kayyali, 2024-09-26 This book examines a wide range of topics within quality assurance at universities in order to present a conceptual, historical, and thematic mapping of academic and practical perspectives. As we navigate the complex tapestry of the twenty-first century, where change is constant, the global higher education landscape is undergoing profound shifts that define its present and signal its future. In this book, the author probes the mechanisms of quality assurance to not only ensure excellence but also resonate as responses to the contemporary landscape shaped by the challenges of globalization, technological advancement, and societal transformation.

framework for information literacy for higher education: The New Information Literacy Instruction Patrick Ragains, M. Sandra Wood, 2015-11-05 The new ACRL information literacy concepts brings renewed interest in information literacy instruction and skills for librarians. The New Information Literacy Instruction: Best Practices offers guidance in planning for and implementing information literacy instruction programs in a wide range of instructional situations, including: Course-related instructionFreshman composition coursesProfessional medical educationNew course development and deliveryOne-shot sessionsFormal, credit coursesDistance educationVisual literacyand moreAs librarians take a new look at information literacy instruction, this essential book will help guide you in creating and maintaining a quality instruction program.

framework for information literacy for higher education: *Teaching and Learning Practices for Academic Freedom* Enakshi Sengupta, Patrick Blessinger, 2020-11-23 Although academic freedom in teaching and learning methods is crucial to a nation's growth, the concept comes with numerous misnomers and is subjected to much academic debate and doubt. This volume maps out how truth and intellectual integrity remain the fundamental principle on which the foundation of a university should be laid.

framework for information literacy for higher education: <u>Teaching Information Literacy Reframed</u> Joanna M. Burkhardt, 2017-11-21 The six threshold concepts outlined in the Framework for Information Literacy for Higher Education are not simply a revision of ACRL's previous Information Literacy Competency Standards for Higher Education. They are instead an altogether new way of looking at information literacy. In this important new book, bestselling author and expert instructional librarian Burkhardt decodes the Framework, putting its conceptual approach into straightforward language while offering more than 50 classroom-ready Framework-based exercises. Guiding instructors towards helping students cross each threshold, this book discusses the history of the development of the Framework document and briefly deconstructs the six threshold concepts; thoroughly addresses each threshold concept, scaffolding from the beginner level to the intermediate level; includes exercises that can be used in the one-shot timeframe as well as others designed for longer class sessions and semester-long courses; offers best practices in creating learning outcomes, assessments, rubrics, and teaching tricks and tips; and looks at how learning, memory, and transfer of learning applies to the teaching of information literacy. Offering a solid starting point for understanding and teaching the six threshold concepts in the Framework, Burkhardt's guidance will help instructors create their own local information literacy programs.

framework for information literacy for higher education: Metaliteracy in Practice Trudi E. Jacobson , Thomas P. Mackey, 2017-11-22

framework for information literacy for higher education: Supporting Transfer Student Success Peggy L. Nuhn, Karen F. Kaufmann, 2020-11-06 This research-based book with practical applications teaches academic librarians to support their transfer students effectively at both universities and community colleges, even when transfer students' information literacy needs differ from those of other students. Colleges and universities across the United States serve a large and growing population of transfer students. Current estimates suggest that more than one third of college students transfer from one institution of higher education to another at least once. At some institutions, transfer students compose up to fifty to sixty percent of the new incoming class. Academic librarians' understanding of the demographics and potential needs of transfer students is essential to supporting their success and mitigating transfer shock. Just as public libraries often

bridge gaps between individuals and services, academic libraries can proactively support the often unique needs of transfer students by spearheading textbook affordability initiatives, developing innovative programming, and making appropriate referrals to non-library student services. In this practical guide to supporting transfer students, authors Peggy L. Nuhn and Karen F. Kaufmann teach academic librarians how to optimize information literacy instruction, support research, help reduce stress, and connect the library to virtual students. They emphasize the importance of establishing partnerships with feeder institutions and other campus departments to best support transfer student success.

framework for information literacy for higher education: Computer Science and Educational Informatization Jianhou Gan, Yi Pan, Juxiang Zhou, Dong Liu, Xianhua Song, Zeguang Lu, 2024-01-09 These two volumes constitute the revised selected papers of the 5th International Conference, CSEI 2023, held in Kunming, China, during August 11–13, 2023. The 76 full papers and the 21 short papers included in this volume were carefully reviewed and selected from 297 submissions. They focus on computer science, education informatization and engineering education, innovative application for the deeper integration of education practice and information technology, educational informatization and big data for education.

framework for information literacy for higher education: The Community College Library Janet Pinkley, Kaela Casey, 2022-04-13 Community colleges are a cornerstone of higher education and serve the unique needs of the communities in which they reside. In 2019, community colleges accounted for 41 percent of all undergraduate students in the United States. Community college librarians are engaged in meaningful work designing and delivering library programs and services that meet the needs of their diverse populations and support student learning. The Community College Library series is meant to lift the voices of community college librarians and highlight their creativity, tenacity, and commitment to students. The Community College Library: Reference and Instruction collects research, programs, and new approaches to reference and instruction implemented by community college librarians around the U.S. Chapters include sample activities and materials and cover topics including using race-centered and trauma-informed practices in the reference interview; incorporating online workshops into an existing information literacy program; and using student-driven pedagogy to navigate the early stages of research. This book demonstrates the innovative and replicable ways community college librarians are meeting the information and research needs of their college population both in person and remotely, all while providing a safe, inclusive space for students to explore and learn.

framework for information literacy for higher education: Teaching Undergraduate Political Methodology Brown, Mitchell, Nordyke, Shane, Thies, Cameron G., 2022-08-12 Providing expert advice from established scholars in the field of political science, this engaging book imparts informative guidance on teaching research methods across the undergraduate curriculum. Written in a concise yet comprehensive style, it illustrates practical and conceptual advice, alongside more detailed chapters focussing on the different aspects of teaching political methodology.

framework for information literacy for higher education: The Reinvention of the U.S. Academic Library Donald A. Barclay, 2025-07-10 Focusing on U.S. academic libraries, Rewiring the Academic Library begins by providing a concise history of the traditional role and function of academic libraries from their earliest times up to the dawn of Digital Age and the spread of digital technology into all aspects of academic research and scholarly communication.

framework for information literacy for higher education: Teaching Information Literacy and Writing Studies Grace Veach, 2018-09-15 This volume, edited by Grace Veach, explores leading approaches to foregrounding information literacy in first-year college writing courses. Chapters describe cross-disciplinary efforts underway across higher education, as well as innovative approaches of both writing professors and librarians in the classroom. This seminal work unpacks the disciplinary implications for information literacy and writing studies as they encounter one another in theory and practice, during a time when fact or truth is less important than fitting a predetermined message. Topics include reading and writing through the lens of information literacy,

curriculum design, specific writing tasks, transfer, and assessment.
