

# franciscan pulmonary and sleep medicine silverdale

franciscan pulmonary and sleep medicine silverdale is a specialized healthcare provider dedicated to diagnosing and treating respiratory and sleep disorders in the Silverdale community and surrounding areas. The clinic offers comprehensive care for patients suffering from chronic lung diseases, sleep apnea, and other breathing-related conditions. With a team of experienced pulmonologists and sleep medicine specialists, franciscan pulmonary and sleep medicine silverdale employs advanced diagnostic tools and personalized treatment plans to improve patient outcomes. This article explores the various services available, the conditions treated, and the benefits of seeking care at this facility. Additionally, it highlights the importance of pulmonary and sleep health and the innovative approaches utilized by this center. The following sections will provide an in-depth look at the clinic's specialties, patient care philosophy, and how to access their services.

- Overview of Franciscan Pulmonary and Sleep Medicine Silverdale
- Services and Treatments Offered
- Common Pulmonary Conditions Treated
- Sleep Medicine and Disorders
- Diagnostic Procedures and Technology
- Patient Care and Support
- Accessing Care at Franciscan Pulmonary and Sleep Medicine Silverdale

## Overview of Franciscan Pulmonary and Sleep Medicine Silverdale

Franciscan pulmonary and sleep medicine silverdale is a leading medical practice focused on pulmonary and sleep health. The center is part of the Franciscan Health network, known for its commitment to high-quality, patient-centered care. Located conveniently in Silverdale, Washington, the clinic serves a broad range of patients, from children to adults, addressing complex respiratory and sleep-related conditions. The team at franciscan pulmonary and sleep medicine silverdale consists of board-certified pulmonologists, sleep specialists, respiratory therapists, and support staff dedicated to comprehensive evaluation and treatment.

The facility emphasizes a multidisciplinary approach to ensure all aspects of lung and sleep health are addressed. This includes collaboration with primary care providers, cardiologists, and other specialists to create tailored treatment plans. The clinic's mission includes improving quality of life by managing symptoms, enhancing lung function, and promoting restful sleep.

## **Services and Treatments Offered**

Franciscan pulmonary and sleep medicine silverdale offers an extensive range of services designed to diagnose, treat, and manage pulmonary and sleep disorders. Their comprehensive approach ensures that patients receive personalized care based on the latest medical guidelines and innovations.

### **Pulmonary Care Services**

The pulmonary care services focus on lung health, addressing conditions such as chronic obstructive pulmonary disease (COPD), asthma, interstitial lung diseases, and infections. Treatment plans may include medication management, pulmonary rehabilitation, and oxygen therapy.

### **Sleep Medicine Services**

The sleep medicine division specializes in diagnosing and managing sleep disorders like obstructive sleep apnea, insomnia, restless leg syndrome, and narcolepsy. Treatment modalities include CPAP therapy, oral appliances, lifestyle counseling, and behavioral therapy.

### **Additional Support Services**

Beyond direct treatments, the clinic provides patient education, nutritional counseling, and smoking cessation programs to support overall respiratory and sleep health. These supportive services are integral to achieving long-term wellness.

## **Common Pulmonary Conditions Treated**

Franciscan pulmonary and sleep medicine silverdale manages a variety of pulmonary diseases, ranging from acute infections to chronic illnesses. Understanding these conditions helps patients recognize symptoms early and seek timely care.

## **Chronic Obstructive Pulmonary Disease (COPD)**

COPD is a progressive lung disease characterized by airflow obstruction and breathing difficulties. The clinic offers comprehensive management including medication optimization, pulmonary rehabilitation, and oxygen therapy as needed.

## **Asthma**

Asthma treatment at franciscan pulmonary and sleep medicine silverdale involves controlling inflammation, preventing exacerbations, and educating patients on trigger avoidance and inhaler techniques.

## **Interstitial Lung Disease (ILD)**

ILD encompasses a group of disorders causing lung scarring and impaired oxygen exchange. The clinic provides diagnostic evaluation through imaging and biopsy and offers targeted therapies to slow disease progression.

## **Lung Infections and Other Conditions**

Patients with pneumonia, bronchitis, or other respiratory infections receive prompt evaluation and treatment. The clinic also addresses sleep-related breathing disorders with pulmonary implications.

## **Sleep Medicine and Disorders**

Sleep health is a vital component of overall wellness, and franciscan pulmonary and sleep medicine silverdale offers specialized care for a spectrum of sleep disorders. Proper diagnosis and tailored treatment contribute to improved daytime function and quality of life.

## **Obstructive Sleep Apnea (OSA)**

OSA is one of the most common sleep disorders treated at the center. It involves repeated airway obstruction during sleep, leading to disrupted rest and cardiovascular risks. The clinic performs sleep studies to diagnose OSA and offers CPAP therapy and alternative treatments.

## **Insomnia and Other Sleep Disorders**

Patients with difficulty initiating or maintaining sleep receive comprehensive evaluations to identify underlying causes. Treatments include

cognitive behavioral therapy for insomnia (CBT-I), medication management, and lifestyle modifications.

## **Restless Legs Syndrome and Narcolepsy**

Franciscan pulmonary and sleep medicine silverdale addresses less common but impactful sleep disorders such as restless legs syndrome and narcolepsy, providing diagnostic testing and individualized care plans.

## **Diagnostic Procedures and Technology**

The clinic utilizes state-of-the-art diagnostic tools to accurately identify pulmonary and sleep conditions, ensuring effective treatment planning. Advanced technology enhances patient comfort and diagnostic precision.

## **Spirometry and Pulmonary Function Testing**

Spirometry measures lung function and helps diagnose obstructive or restrictive lung diseases. It is a routine test performed at franciscan pulmonary and sleep medicine silverdale to monitor disease progression and response to therapy.

## **Sleep Studies and Polysomnography**

Sleep studies are conducted either in-lab or through home sleep testing devices. These assessments monitor breathing patterns, oxygen levels, and brain activity to diagnose sleep apnea and other disorders.

## **Imaging and Laboratory Tests**

Chest X-rays, CT scans, and blood tests complement the diagnostic process by providing detailed views of lung structures and identifying infections or inflammatory markers.

## **Patient Care and Support**

Franciscan pulmonary and sleep medicine silverdale prioritizes patient-centered care that extends beyond diagnosis and treatment. Education, counseling, and support resources are integral to the patient experience.

## **Education and Counseling**

Patients receive comprehensive information about their conditions, treatment options, and lifestyle adjustments. This empowers individuals to actively participate in their health management.

## **Pulmonary Rehabilitation Programs**

The clinic offers pulmonary rehabilitation to improve lung function, endurance, and quality of life for patients with chronic lung diseases. Programs include supervised exercise, breathing techniques, and nutritional guidance.

## **Support for Chronic Disease Management**

Ongoing support, including regular follow-ups and symptom monitoring, helps patients effectively manage chronic conditions and prevent complications.

## **Accessing Care at Franciscan Pulmonary and Sleep Medicine Silverdale**

Obtaining care at franciscan pulmonary and sleep medicine silverdale is streamlined to accommodate patient needs efficiently. The clinic accepts referrals from primary care providers and specialists and welcomes direct patient inquiries as well.

## **Appointment Scheduling and Locations**

The clinic offers flexible scheduling options, including same-day appointments for urgent concerns. The Silverdale location is accessible with ample parking and supportive facilities for patients with mobility challenges.

## **Insurance and Billing**

Franciscan pulmonary and sleep medicine silverdale participates with major insurance plans and provides transparent billing practices. Financial counselors are available to assist patients with insurance questions and payment options.

## **Patient Resources and Communication**

Patients can access educational materials, prepare for appointments, and communicate with care teams through patient portals and phone support. This enhances continuity and convenience of care.

- Comprehensive pulmonary and sleep disorder diagnosis and treatment
- Multidisciplinary team of specialists and support staff
- Advanced diagnostic technology including spirometry and sleep studies
- Personalized treatment plans including CPAP therapy and pulmonary rehabilitation
- Patient education, counseling, and chronic disease management support
- Convenient access and insurance assistance

## **Frequently Asked Questions**

### **What services does Franciscan Pulmonary and Sleep Medicine Silverdale offer?**

Franciscan Pulmonary and Sleep Medicine Silverdale provides comprehensive care for lung and sleep disorders, including diagnosis and treatment of conditions such as asthma, COPD, sleep apnea, and other pulmonary diseases.

### **How can I schedule an appointment at Franciscan Pulmonary and Sleep Medicine Silverdale?**

You can schedule an appointment by calling their office directly or through the Franciscan Health website's patient portal, where available.

### **Does Franciscan Pulmonary and Sleep Medicine Silverdale accept my insurance?**

Franciscan Pulmonary and Sleep Medicine Silverdale accepts a variety of insurance plans. It is recommended to contact their billing office or check their website to verify if your specific insurance is accepted.

## **What types of sleep studies are conducted at Franciscan Pulmonary and Sleep Medicine Silverdale?**

They offer in-lab polysomnography (sleep studies) as well as home sleep apnea testing to diagnose sleep disorders such as obstructive sleep apnea and other related conditions.

## **Who are the specialists at Franciscan Pulmonary and Sleep Medicine Silverdale?**

The center is staffed by board-certified pulmonologists and sleep medicine specialists who are experienced in managing complex pulmonary and sleep disorders.

## **What COVID-19 safety measures are in place at Franciscan Pulmonary and Sleep Medicine Silverdale?**

Franciscan Pulmonary and Sleep Medicine Silverdale follows strict COVID-19 protocols including mask requirements, social distancing, enhanced cleaning, and screening procedures to ensure patient and staff safety.

## **Additional Resources**

### *1. Franciscan Pulmonary Care: A Comprehensive Guide*

This book offers an in-depth look at pulmonary medicine practices at Franciscan Healthcare, focusing on the latest diagnostic and treatment techniques. It covers common respiratory disorders, patient management strategies, and the integration of technology in pulmonary care. A valuable resource for clinicians working in or interested in Franciscan pulmonary services.

### *2. Sleep Medicine in Silverdale: Innovations and Approaches*

Exploring the advancements in sleep medicine specific to the Silverdale region, this text highlights patient-centered care models and cutting-edge therapies. It discusses conditions such as sleep apnea, insomnia, and restless leg syndrome, emphasizing local case studies and treatment outcomes. Ideal for sleep specialists and healthcare providers in Silverdale.

### *3. Franciscan Respiratory Therapy: Clinical Protocols and Best Practices*

Designed for respiratory therapists and pulmonologists, this book details clinical protocols employed within Franciscan pulmonary units. It incorporates evidence-based practices for managing chronic lung diseases and acute respiratory conditions. The book also addresses interdisciplinary collaboration for enhanced patient outcomes.

### *4. Advances in Sleep Disorders: Franciscan Silverdale Perspectives*

This publication presents recent research and clinical findings from Franciscan Sleep Medicine professionals in Silverdale. It covers novel

diagnostic tools, therapeutic innovations, and patient education strategies. The content aims to improve understanding and management of complex sleep disorders.

*5. Integrative Pulmonary and Sleep Medicine at Franciscan Silverdale*

Focusing on the integration of pulmonary and sleep medicine, this book outlines comprehensive care approaches for patients with overlapping respiratory and sleep issues. It emphasizes coordinated care pathways and multidisciplinary team involvement. Readers will find practical guidance for managing co-morbid conditions effectively.

*6. The Franciscan Sleep Center Handbook: Silverdale Edition*

A practical manual for clinicians working at the Franciscan Sleep Center in Silverdale, this handbook covers diagnostic procedures, sleep study interpretations, and treatment planning. It includes protocols for common and complex sleep disorders. The user-friendly format supports daily clinical decision-making.

*7. Chronic Lung Disease Management in Franciscan Pulmonary Services*

This book delves into the management of chronic lung diseases such as COPD, asthma, and pulmonary fibrosis within the Franciscan healthcare system. It emphasizes personalized treatment plans and patient adherence strategies. Case studies from Silverdale clinics provide real-world context.

*8. Sleep Apnea Treatment Advances at Franciscan Silverdale*

Highlighting the latest treatment options for sleep apnea, this book reviews both CPAP therapy and alternative interventions available at Franciscan Silverdale. It explores patient compliance challenges and innovative solutions to improve therapeutic success. The text serves as a guide for sleep specialists and primary care providers alike.

*9. Patient-Centered Care in Pulmonary and Sleep Medicine: Franciscan Silverdale Approaches*

This volume focuses on enhancing patient experience and outcomes through personalized care in pulmonary and sleep medicine. It discusses communication strategies, cultural competency, and patient education initiatives specific to the Franciscan Silverdale community. Healthcare professionals will gain insights into fostering stronger patient relationships and improving care quality.

**franciscan pulmonary and sleep medicine silverdale: Critical Care Emergencies** Lillian Liang Emlet, 2023 Part of the What Do I Do Now: Emergency Medicine series, Critical Care Emergencies covers both common and unique critical, can't-miss diagnosis and management scenarios. This text will benefit any emergency medicine or acute care specialist seeking to manage critical care cases encountered in the Emergency Department.

**franciscan pulmonary and sleep medicine silverdale: Essentials of Sleep Medicine** M. Safwan Badr, 2011-11-06 Sleep disorders represent a major portion of the chief complaints seen by pulmonologists and other physicians. Sleep apnea and hypopnea syndrome for example, are common disorders with significant adverse health consequences. Sleep apnea is associated with increased cardiovascular mortality, impaired quality of life and increased motor vehicle accidents. In addition, sleep apnea often co-exists with other chronic conditions including obesity, the metabolic syndrome, and tobacco use disorder. Patients with sleep-related conditions often present with non-specific complaints that require a broad and detailed knowledge of the wide range of sleep disorders. In *Essentials of Sleep Medicine: An Approach for Clinical Pulmonology*, a concise, evidence-based review of sleep medicine for the pulmonologist is presented. Providing a focused, scientific basis for the effects of sleep on human physiology, especially cardiac and respiratory physiology, chapters also outline a differential diagnosis for common sleep complaints and an evidence-based approach to diagnosis and management. This includes a review of the current standards of practice and of emerging technology and unresolved issues awaiting further research. Each chapter includes a summary of current research and outlines future research directions and issues. In all, *Essentials of Sleep Medicine: An Approach for Clinical Pulmonology* provides a clear diagnostic and management program for all the different sleep disorders, with a major focus on respiratory disorders of sleep, and includes key points and summaries. Developed by an international group of renowned authors, *Essentials of Sleep Medicine: An Approach for Clinical Pulmonology* is an invaluable resource for pulmonologists, respiratory care practitioners, polysomnographic technologists, graduate students, clinical researchers, and other health professionals seeking an in-depth review of sleep medicine.

**franciscan pulmonary and sleep medicine silverdale: Complex Sleep Breathing Disorders** Christine Won, 2021-01-05 This book is a clinically relevant and educational resource for sleep specialists, practitioners, and sleep or pulmonary trainees in the management of complicated sleep disordered breathing. It tackles complicated sleep breathing disorders by discussing their epidemiology, pathophysiology, clinical significance, physical findings, and their diagnosis and management. Organized into 21 chapters, opening chapters cover a variety of sleep apnea manifestations including hypercapnic obstructive sleep apnea, complex breathing disorders and strokes. Subsequent chapters discuss detailed approaches to PAP titrations based on best evidence, current guidelines, or expert opinion. Treatment options, complications, comorbidities, and sleep apnea in specific demographics such as pregnant women are also addressed. *Complex Sleep Breathing Disorders: A Clinical Casebook of Challenging Patients* is a necessary resource for all sleep trainees and pulmonary fellows, as well as a resource for sleep specialists including sleep technicians.

**franciscan pulmonary and sleep medicine silverdale: Noninvasive Ventilation, An Issue of Sleep Medicine Clinics, E-Book** Amen Sergew, Lisa Wolfe, 2020-11-11 This issue of *Sleep Medicine Clinics*, guest-edited by Drs. Amen Sergew and Lisa F. Wolfe, focuses on Noninvasive Ventilation and Sleep Medicine. This issue is one of four selected each year by series Consulting Editor, Dr. Teofilo Lee-Chiong. Articles include: Obesity hypoventilation - Traditional vs Non Traditional Populations; Spinal cord injury; Peri-Operative Care and Medication Related Hypoventilation; Lifetime Care of Duchenne Muscular Dystrophy; Management of Chronic Respiratory Failure in COPD - High and Low Intensity Ventilation; Management of Rare Causes Pediatric Chronic Respiratory Failure; Noninvasive Ventilator Management of ALS - Bulbar vs non Bulbar; Parsonage Turner; Noninvasive Ventilator Devices and Modes; Tailoring the Sleep Lab for Chronic Respiratory Failure; Long-Term Follow Up of Noninvasive Ventilation: Downloads and Troubleshooting; Extubating to Noninvasive Ventilation - NIV from ICU to Home; and From Tracheostomy to Noninvasive Ventilation - NIV from

Long Term Acute Care to Home.

**franciscan pulmonary and sleep medicine silverdale: Multi-perspective Management of Sleep Disorders, An Issue of Sleep Medicine Clinics** Brendon Yee, Stephen McNamara, Amanda Piper, 2024-08-07 In this issue of Sleep Medicine Clinics, guest editors Drs. Brendon Yee, Stephen McNamara, and Amanda Piper bring their considerable expertise to the topic of Multi-Perspective Management of Sleep Disorders. Top experts discuss the pathophysiology of chronic respiratory failure (hypercapnic); assessment (including diagnostic tests) of chronic hypercapnic respiratory failure; overlap syndrome; managing heart failure in patients with chronic respiratory failure; the impact of new drugs in improving and maintaining respiratory function; and much more. - Contains 13 relevant, practice-oriented topics including interfaces for NIV; initiation of NIV; telemonitoring NIV; the role of high flow nasal therapy in chronic respiratory failure; airway clearance in NMD; NIV and quality of life; and more. - Provides in-depth clinical reviews on multi-perspective management of sleep disorders, offering actionable insights for clinical practice. - Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant, topic-based reviews.

**franciscan pulmonary and sleep medicine silverdale: Noninvasive Ventilation in Sleep Medicine and Pulmonary Critical Care** Antonio M. Esquinas, Giuseppe Fiorentino, Giuseppe Insalaco, Bushra Mina, Jun Duan, Maria Cristina Mondardini, Fabio Caramelli, 2020-05-28 This book is an introduction to a comprehensive analysis of recent advances and clinical research in noninvasive mechanical ventilation (NIV) in Pulmonary, Critical Care, and Sleep Medicine. The objective of the book is to increase the knowledge and understanding of the reader in the best clinical practice in three main sections. A selected international group of experts in the field of noninvasive ventilation formed a panel to provide an update on the recent literature in the application and efficient utilization of NIV in Pulmonary, Critical Care, and Sleep Medicine. Each particular section will discuss the application of NIV in different disease process. The authors summarized the main results of the recent trials, clinical and technological advances, expert opinions, and practical guidelines. Chapters, summarized by expert committee, provide a “deep and exhaustive critical analysis and summary” of the recent advances in the field of NIV, presented as key points and/recommendations for the best clinical practice from articles published in the last decade. The content of the book will serve as a resource and a tool to the practicing physicians toward NIV. Main objective is to increase their proficiency in management of different pathophysiological aspects of the respiratory system. In this line, the book offers to the readers, who are seeking the latest recommendations, the future research directions in noninvasive mechanical ventilation. Table of contents describe and analyze, the items trend setters in noninvasive ventilation, organized in three main sections, “pulmonary”, “critical care” and “sleep medicine”, using the primary keyword related with term “noninvasive mechanical ventilation” as search term associated with “secondary keywords” studies from a period of 2018 to 2019. This searching methodology and analysis define this unique book to the approach in noninvasive mechanical ventilation for best clinical practice, research, clinical study designs and critical analysis, how noninvasive ventilation is current and trending. Based on this form of conception of book updated, editors and authors consider that this book opens a new and original vision for adequate knowledge and deep updated based on key publications in the period under review, very useful for clinical practice, studies designs and potential new trends in the use of noninvasive ventilation. As such, it is a unique update book resource in noninvasive ventilation in pulmonary, critical care and sleep medicine that may influence current clinical practice and future studies. With ultimate goal is better care and outcome for our patients.

**franciscan pulmonary and sleep medicine silverdale: Sleep-Disordered Breathing: Beyond Obstructive Sleep Apnea, An Issue of Clinics in Chest Medicine, An Issue of Clinics in Chest Medicine** Carolyn D'Ambrosio, 2014-09-28 Dr. Carolyn D'Ambrosio has put together an expert panel of authors covering topics such as: Sleep and Respiratory Physiology in Adults, Sleep

and Respiratory Physiology in Children, Asthma, Cystic Fibrosis, Restrictive Lung Disease, Lung Transplantation, Pulmonary Hypertension and Congestive Heart Failure, Neurologic Conditions, Central Congenital Hypoventilation Syndrome, and more!

**franciscan pulmonary and sleep medicine silverdale:** ERS Handbook of Respiratory Sleep Medicine Maria R. Bonsignore, Winfried Randerath, Sophia E. Schiza, Anita K. Simonds, 2023-03-01 Sleep medicine is a multidisciplinary field, with patients referred to specialising physicians from all areas of medicine. The new edition of the ERS Handbook of Respiratory Sleep Medicine is truly reflective of this diversity, covering everything from neurobiology to digital health. Broad in scope but easy to use, the book is broken down into 17 sections, including diagnosis and management, neuromuscular disorders, hypoventilation syndromes, nonrespiratory sleep disorders, and paediatrics. The Editors have brought together expert authors to create a book that focuses on practical aspects, with tips and advice based on clinical practice and the latest guidelines. This book will be invaluable to experienced sleep specialists, trainees and nurses alike.

**franciscan pulmonary and sleep medicine silverdale:** *Overlap of respiratory problems with sleep disordered breathing, An Issue of Sleep Medicine Clinics* Krishna M. Sundar, 2024-05-04 In this issue of Sleep Medicine Clinics, guest editor Dr. Krishna M. Sundar brings his considerable expertise to the topic of Overlap of Respiratory Problems with Sleep Disordered Breathing. Given the rising prevalence of obesity and increasing demand for chronic respiratory support in pulmonary and chest wall disorders, this issue offers articles from top experts on seamlessly integrating the management of sleep-disordered breathing with novel ventilatory strategies employed for chronic respiratory failure. - Contains 15 relevant, practice-oriented topics including mechanical interactions between upper airway and lower airways that affect propensity to sleep-disordered breathing; effects of sleep apnea on airway immunity and susceptibility to infection; epigenetic alterations, oxidative stress and telomere shortening from OSA: implications for chronic lung disease; obstructive sleep apnea and chronic cough; and more. - Provides in-depth clinical reviews on overlap of respiratory problems with sleep disordered breathing, offering actionable insights for clinical practice. - Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant, topic-based reviews.

**franciscan pulmonary and sleep medicine silverdale:** Sleep Related Breathing Disorders Hartmut Zwick, 1992-07 The Austrian Pneumological Society held its 33th Workshop on Clinical Respiratory Physiology at Graz, November 1st - 3rd, 1990. Sleep related breathing disorders have been known for many years to be an important cause of daytime disability I a huge amount of literature about this topic has been written in the last ten or fifteen years. Because of the practical relevance owing to the high competence of the authors we hope that the lectures and discussions we had at Graz will enjoy and inform the interested reader. I want to express my deep gratitude to all the authors for providing us with the manuscripts and graphs. I am especially grateful to Mrs. H. Weber for her secretarial work and to Mrs. Mag. A. Lahrman-Ramharter for correcting the written version of the speeches and preparing a manuscript that was ready for the press. Prim. Dr. Hartmut Zwick Contents Douglas J. Inpatient sleep medicine consultation service is a new subspecialty that can greatly enhance the care of patients with complex sleep related respiratory disorders as well as provide a smooth transition to outpatient management. Many common sleep-related respiratory conditions are encountered in the hospital setting, and these patients benefit from specialized inpatient management by experts in pulmonology and sleep medicine. Contains 14 relevant, practice-oriented topics including heart failure and CSA; cardiac arrhythmias and sleep disorders; non-invasive ventilation in ALS; obesity hypoventilation syndrome; hypercapnic COPD and overlap syndrome; opioids and respiratory-related consequences; and more Provides in-depth clinical reviews on hospital sleep medicine and non-invasive ventilation, offering actionable insights for clinical practice Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant, topic-based reviews

**franciscan pulmonary and sleep medicine silverdale:** The Transition of Respiratory Care: from Child to Adult Alexandra M. Nanzer, Peter J. Barry, Brian D. Kent, 2024-06-01 One in five adolescents have special healthcare needs; one in 10 face limitations to daily activities due to chronic illness or disability. Taken alongside the ever-changing societal landscape and the multifaceted psychological aspects of adolescence, these statistics underline the need to recognise adolescents and young adults as a distinct patient population with unique healthcare needs. This Monograph addresses this need. Opening with chapters that discuss health inequalities, adolescent psychology and treatment adherence, the book goes on to cover specific respiratory diseases and the requirements of their adolescent subjects. Readers will find this Monograph a useful and interesting insight into adolescent health.

**franciscan pulmonary and sleep medicine silverdale:** *Sleep Disordered Breathing in Children* Leila Kheirandish-Gozal, David Gozal, 2012-07-17 Sleep Disordered Breathing in Children: A Comprehensive Clinical Guide to Evaluation and Treatment is a comprehensive, timely and up-to-date review of pediatric sleep disordered breathing (SDB) and offers a thorough focus on several key areas: namely, the normal development and maturation of the airway and breathing during sleep, the techniques that are in place for assessment of SDB in children, the clinical manifestations and characteristics of several pediatric populations at risk for SDB, the implications of SDB in various end-organ systems, and, finally, a critical review of the evidence on current therapeutic approaches. This unique and complete text is of welcome interest to all practicing physicians and healthcare professionals who evaluate children with sleep problems -- namely pulmonologists, pediatricians, sleep physicians, pediatric neurologists, pediatric otolaryngologists, and family practitioners, as well as clinical researchers, pediatric nurse practitioners and respiratory therapists. Written by a distinguished and international panel of authors who are renowned experts in their field and who offer an expanded view of the problems associated with SDB, Sleep Disordered Breathing in Children: A Comprehensive Clinical Guide to Evaluation and Treatment is an indispensable resource for all physicians who evaluate children for sleep-disordered breathing.
