Services Offered at Frederick Health Orthopedics & Sports Medicine

Frederick Health Orthopedics & Sports Medicine provides a wide range of services designed to address various orthopedic and sports-related health concerns. The clinic's comprehensive offerings include both non-surgical and surgical interventions, aiming to restore function and enhance quality of life for patients of all ages.

Orthopedic Surgery

The orthopedic surgeons at Frederick Health specialize in minimally invasive and traditional surgical procedures. These surgeries target issues such as joint replacement, fracture repair, ligament reconstruction, and arthroscopic procedures. The surgical team is skilled in the latest techniques to ensure optimal outcomes and faster recovery times.

Sports Medicine

Sports medicine specialists focus on diagnosing and treating injuries related to athletic activities. This includes sprains, strains, tendonitis, and overuse injuries. The team collaborates closely with athletes to develop injury prevention strategies and performance enhancement plans.

Non-Surgical Treatments

For patients who do not require surgery, Frederick Health Orthopedics & Sports Medicine offers conservative treatment options such as medication management, corticosteroid injections, bracing, and physical therapy referrals. These treatments aim to alleviate pain and improve joint function without invasive procedures.

Pain Management

Managing chronic pain is a critical component of orthopedic care. The clinic employs various pain management techniques, including nerve blocks and regenerative medicine approaches like platelet-rich plasma (PRP) therapy and stem cell treatments, to reduce inflammation and promote healing.

Common Conditions Treated

Frederick Health Orthopedics & Sports Medicine addresses a broad spectrum of musculoskeletal and sports-related conditions. The clinical expertise covers both acute injuries and chronic degenerative disorders affecting bones, joints, muscles, and connective tissues.

Arthritis and Joint Pain

Osteoarthritis and rheumatoid arthritis are common joint conditions treated at the center. Patients receive comprehensive evaluations and customized care plans that may include medication, physical therapy, or joint replacement surgery if necessary.

Sports Injuries

The facility treats a variety of sports-related injuries such as ACL tears, meniscus injuries, rotator cuff tears, and stress fractures. Prompt diagnosis and specialized treatment protocols are essential to ensure athletes return to their sport safely and efficiently.

Fractures and Traumatic Injuries

Bone fractures, dislocations, and soft tissue trauma resulting from accidents or impacts are managed with expert orthopedic care. Treatment involves immobilization, surgical repair if required, and rehabilitation to restore full function.

Spine Disorders

Conditions such as herniated discs, spinal stenosis, and degenerative disc disease are evaluated and treated by the orthopedic spine specialists. Both surgical and non-surgical options are considered based on the severity of the condition.

Advanced Diagnostic and Treatment Technologies

The integration of cutting-edge technology is a hallmark of Frederick Health Orthopedics & Sports Medicine. These advanced tools enhance diagnostic accuracy and improve treatment effectiveness, contributing to better patient outcomes.

Imaging and Diagnostic Tools

The clinic utilizes state-of-the-art imaging modalities including MRI, CT scans, digital X-rays, and ultrasound. These technologies enable precise visualization of musculoskeletal structures and facilitate accurate diagnosis.

Minimally Invasive Surgical Techniques

Arthroscopy and other minimally invasive procedures reduce surgical trauma, minimize scarring, and accelerate recovery. These techniques are widely used for joint repairs, ligament reconstructions, and cartilage restoration.

Regenerative Medicine

Regenerative therapies such as PRP and stem cell treatments are offered to promote tissue healing and reduce inflammation. These innovative approaches support natural recovery processes and may decrease the need for surgery.

Rehabilitation and Physical Therapy Programs

Effective rehabilitation is essential to the success of orthopedic and sports injury treatments. Frederick Health Orthopedics & Sports Medicine provides comprehensive physical therapy services designed to restore strength, flexibility, and function.

Customized Rehabilitation Plans

Therapists develop individualized rehabilitation programs based on the patient's specific injury, surgery, or condition. These plans include therapeutic exercises, manual therapy, and modalities such as ultrasound and electrical stimulation.

Sports Performance Enhancement

For athletes, specialized training programs focus on improving performance and preventing future injuries. These include strength conditioning, agility drills, and biomechanical assessments.

Patient Education and Support

Patient education plays a vital role in rehabilitation. The clinic provides resources and guidance to help patients understand their conditions, adhere to treatment protocols, and maintain long-term musculoskeletal health.
