

fred hutchinson cancer research center address

fred hutchinson cancer research center address is an essential piece of information for patients, researchers, and visitors seeking to connect with one of the leading cancer research institutions in the United States. Located in Seattle, Washington, the Fred Hutchinson Cancer Research Center is renowned for its groundbreaking work in cancer treatment, prevention, and research. This article provides a comprehensive overview of the Fred Hutchinson Cancer Research Center address, including its exact location, how to reach the facility, and related logistical details. Additionally, the article explores the center's history, mission, and key services, offering valuable insights for those interested in oncology research and care. Understanding the center's physical location and operational context can facilitate better access and engagement with its resources. The following sections will guide readers through important aspects related to the Fred Hutchinson Cancer Research Center address and its significance.

- Fred Hutchinson Cancer Research Center Address and Location Details
- How to Get to Fred Hutchinson Cancer Research Center
- Overview of Fred Hutchinson Cancer Research Center
- Key Services and Research Areas at Fred Hutchinson
- Visitor Information and Contact Details

Fred Hutchinson Cancer Research Center Address and Location Details

The Fred Hutchinson Cancer Research Center is situated in the vibrant city of Seattle, Washington. The precise **fred hutchinson cancer research center address** is 1100 Fairview Avenue North, Seattle, WA 98109. This location places the center in the South Lake Union neighborhood, a hub for medical research and biotechnology. The facility occupies a modern campus designed to support extensive scientific research and patient care activities. Knowing this address is crucial for scheduling appointments, attending research meetings, or participating in clinical trials. The center's proximity to other prominent medical institutions in Seattle enhances collaboration and access to specialized resources.

Campus Layout and Surrounding Area

The Fred Hutchinson campus comprises several interconnected buildings equipped with state-of-the-art laboratories, clinical trial units, and administrative offices. Surrounded by green spaces and urban amenities, the location offers a conducive environment for both work and recovery. The

neighborhood is well-served by public transportation and includes various dining and accommodation options for visitors and patients.

Mailing and Shipping Address

For correspondence and delivery purposes, the Fred Hutchinson Cancer Research Center uses the same mailing address as its physical location. It is important to include specific department names or personnel when sending mail to ensure proper handling. The general mailing address is as follows:

- Fred Hutchinson Cancer Research Center
- 1100 Fairview Avenue North
- Seattle, WA 98109

How to Get to Fred Hutchinson Cancer Research Center

Accessing the Fred Hutchinson Cancer Research Center is straightforward due to its central location within Seattle's medical district. Visitors can choose from several transportation options depending on their starting point and preferences. This section outlines the most common ways to reach the center, including driving directions, public transit routes, and parking information.

By Car

For those driving to the Fred Hutchinson Cancer Research Center, the address to input into GPS devices is 1100 Fairview Avenue North, Seattle, WA 98109. The center offers visitor parking, although spaces may be limited during peak hours. Nearby parking garages and street parking are also available, but visitors should check regulations to avoid fines. The center encourages carpooling and ride-sharing to reduce congestion.

Public Transportation Options

Seattle's public transit system provides convenient access to the Fred Hutchinson Cancer Research Center. Several bus routes stop near the campus, and the South Lake Union Streetcar offers a direct connection to surrounding neighborhoods. Utilizing public transit can alleviate parking challenges and reduce travel costs for patients and visitors.

Walking and Biking

For individuals staying in nearby hotels or residences, walking or biking to the center is a healthy and environmentally friendly option. The neighborhood includes well-maintained sidewalks and bike lanes, promoting safe and easy access. Bike racks are available on campus for secure bicycle

storage.

Overview of Fred Hutchinson Cancer Research Center

The Fred Hutchinson Cancer Research Center is a world-class institution dedicated to advancing cancer research and treatment. Established in 1975, the center has grown to become a leader in scientific innovation, clinical trials, and education. Its mission focuses on discovering the causes of cancer and related diseases, developing effective therapies, and improving patient outcomes. Understanding the center's background contextualizes the importance of its physical location and the role it plays in global oncology efforts.

Historical Background

The center is named after Fred Hutchinson, a Major League Baseball pitcher and manager who succumbed to lung cancer. His legacy inspired the establishment of an institution committed to fighting cancer through research and patient care. Over the decades, Fred Hutchinson Cancer Research Center has contributed significantly to breakthroughs in bone marrow transplantation, cancer immunotherapy, and personalized medicine.

Research Focus and Achievements

The center specializes in various research domains, including molecular oncology, immunology, and epidemiology. Its multidisciplinary teams work collaboratively to translate laboratory findings into clinical applications. The Fred Hutchinson Cancer Research Center's address serves as a nexus for researchers, clinicians, and patients to intersect and advance cancer science.

Key Services and Research Areas at Fred Hutchinson

At the Fred Hutchinson Cancer Research Center, a broad spectrum of services supports its mission to combat cancer. These include patient care, clinical trials, scientific research, and educational programs. The center's address is not simply a location but a hub of cutting-edge activity that impacts thousands of lives annually.

Clinical Trials and Patient Care

The center conducts numerous clinical trials aimed at testing new therapies and treatment protocols. Patients from across the nation visit the Seattle campus to participate in these trials under expert supervision. The clinical facilities are integrated with research laboratories, allowing seamless translation of innovations into patient care.

Laboratory Research and Innovation

Fred Hutchinson's laboratories focus on genetics, immunotherapy, and cancer biology. Researchers utilize advanced technologies to uncover mechanisms driving cancer development and resistance. The collaborative environment fostered at the center's address enables rapid scientific progress.

Educational and Outreach Programs

The center also offers educational initiatives for healthcare professionals, students, and the community. These programs aim to disseminate knowledge about cancer prevention, early detection, and treatment advances. Hosting seminars, workshops, and public lectures, the center helps raise awareness and build expertise within the field.

Visitor Information and Contact Details

Visitors planning to go to the Fred Hutchinson Cancer Research Center should be aware of important logistical details to ensure a smooth experience. This section provides guidance on visiting hours, contact information, and available amenities.

Visiting Hours and Appointment Scheduling

The center operates during regular business hours, typically Monday through Friday from 8:00 AM to 5:00 PM. Specific departments may have varying schedules, so it is advisable to confirm appointments in advance. Patients and visitors should use the **fred hutchinson cancer research center address** when arranging transportation or correspondence.

Contact Information

For inquiries related to research, patient services, or general information, the center can be reached via phone or mail. The main phone number connects callers to reception and department directories. Using the official address ensures communication is directed appropriately.

Amenities and Accessibility

The campus is designed to be accessible to individuals with disabilities, featuring ramps, elevators, and designated parking spaces. On-site amenities include cafeterias, lounges, and information desks to assist visitors. Clear signage throughout the facility helps navigate the complex layout efficiently.

- Official Address: 1100 Fairview Avenue North, Seattle, WA 98109
- Main Phone Number: (206) 667-5000
- Visitor Parking: Available onsite and nearby

- Public Transit Access: Bus routes and South Lake Union Streetcar
- Accessibility Features: ADA-compliant facilities and services

Frequently Asked Questions

What is the address of Fred Hutchinson Cancer Research Center?

The Fred Hutchinson Cancer Research Center is located at 1100 Fairview Ave N, Seattle, WA 98109, USA.

Where can I find the Fred Hutchinson Cancer Research Center in Seattle?

You can find the Fred Hutchinson Cancer Research Center at 1100 Fairview Ave N, Seattle, Washington, 98109.

Is the Fred Hutchinson Cancer Research Center address in Seattle?

Yes, the Fred Hutchinson Cancer Research Center is located in Seattle, Washington at 1100 Fairview Ave N.

What is the mailing address for Fred Hutchinson Cancer Research Center?

The mailing address for Fred Hutchinson Cancer Research Center is 1100 Fairview Ave N, Seattle, WA 98109.

Can I visit Fred Hutchinson Cancer Research Center at 1100 Fairview Ave N?

Yes, the main campus of Fred Hutchinson Cancer Research Center is located at 1100 Fairview Ave N, Seattle, WA 98109, where visitors and patients can go.

How do I get directions to Fred Hutchinson Cancer Research Center?

You can get directions to Fred Hutchinson Cancer Research Center by entering 1100 Fairview Ave N, Seattle, WA 98109 into your GPS or map application.

Does Fred Hutchinson Cancer Research Center have multiple locations or just one address?

Fred Hutchinson Cancer Research Center primarily operates from its main campus located at 1100 Fairview Ave N, Seattle, WA 98109, though it may have affiliated sites.

Additional Resources

1. *Fred Hutchinson Cancer Research Center: Pioneering Cancer Research*

This book provides an in-depth look at the history and groundbreaking work conducted at the Fred Hutchinson Cancer Research Center. It explores the center's contributions to cancer treatment, including bone marrow transplantation and immunotherapy. Readers will gain insight into the innovative research approaches and the dedicated scientists behind these advancements.

2. *Mapping the Future of Cancer: Inside Fred Hutchinson's Labs*

Detailing the cutting-edge scientific research at Fred Hutchinson, this book delves into the latest discoveries in cancer biology and genetics. It highlights the collaborative environment that fosters innovation and the use of advanced technologies to understand and combat cancer. The book also discusses the center's role in shaping future cancer therapies.

3. *The Impact of Fred Hutchinson Cancer Research Center on Global Health*

This volume examines how Fred Hutchinson's research has influenced cancer treatment worldwide. It covers the center's partnerships, clinical trials, and outreach programs that improve patient outcomes globally. The book also reflects on the challenges and successes of translating research from the lab to the clinic.

4. *Innovations in Immunotherapy: Contributions from Fred Hutchinson*

Focusing on immunotherapy, this book showcases Fred Hutchinson's pioneering efforts in developing treatments that harness the immune system to fight cancer. It includes case studies of patients who benefited from these therapies and interviews with leading researchers. The narrative illustrates the evolution and promise of immunotherapy as a cancer treatment.

5. *Fred Hutchinson's Role in Hematologic Cancer Research*

Specializing in blood cancers, this book explores the center's extensive research on leukemia, lymphoma, and multiple myeloma. It provides detailed accounts of clinical trials and the development of novel therapies like bone marrow transplantation. The book is essential for understanding the progress and ongoing challenges in hematologic oncology.

6. *Environmental and Genetic Factors in Cancer: Insights from Fred Hutchinson*

This book investigates how Fred Hutchinson researchers study the interplay between genetics and environmental exposures in cancer risk. It highlights significant epidemiological studies and findings that have shaped cancer prevention strategies. The text offers a comprehensive overview of risk factors and their implications for public health.

7. *Translational Research at Fred Hutchinson: Bridging Lab and Clinic*

This publication emphasizes the center's approach to translational research, turning laboratory discoveries into practical treatments. It outlines the processes and milestones involved in developing new cancer therapies. The book underscores the importance of multidisciplinary collaboration in accelerating patient care advancements.

8. *The Fred Hutchinson Cancer Research Center Address and Its Community Impact*

Focusing on the center's location and its relationship with the local community, this book explores how Fred Hutchinson influences Seattle's healthcare landscape. It discusses community engagement, education initiatives, and partnerships that promote cancer awareness and support. The book highlights the symbiotic relationship between the institution and its surroundings.

9. *Future Directions in Cancer Research: Perspectives from Fred Hutchinson*

Looking ahead, this book presents expert opinions and forecasts on the future of cancer research at Fred Hutchinson. It discusses emerging technologies, potential breakthroughs, and strategic goals for the center. The book serves as a roadmap for understanding the evolving landscape of cancer science and treatment.

fred hutchinson cancer research center address: **Virtual Worlds** Jean-Claude Heudin, 2003-06-26 Virtual Worlds 2000 is the second in a series of international scientific conferences on virtual worlds held at the International Institute of Multimedia in Paris La Défense (Pôle Universitaire Léonard de Vinci). The term virtual worlds generally refers to virtual reality

applications or experiences. We extend the use of these terms to describe experiments that deal with the idea of synthesizing digital worlds on computers. Thus, virtual worlds could be defined as the study of computer programs that implement digital worlds. Constructing such complex artificial worlds seems to be extremely difficult to do in any sort of complete and realistic manner. Such a new discipline must benefit from a large amount of work in various fields: virtual reality and advanced computer graphics, artificial life and evolutionary computation, simulation of physical systems, and more. Whereas virtual reality has largely concerned itself with the design of 3D immersive graphical spaces, and artificial life with the simulation of living organisms, the field of virtual worlds, is concerned with the synthesis of digital universes considered as wholes, with their own physical and biological laws.

fred hutchinson cancer research center address: NK Cells and Other Natural Effector Cells Ronald B. Herberman, 2012-12-02 NK Cells and Other Natural Effector Cells reviews the state of knowledge on NK cells and other natural effector mechanisms. The coverage of immune effector systems ranges from basic studies on their nature, regulation, and mechanisms of action to important practical issues such as their role in host resistance, their modulation by therapeutic intervention, and alterations of their activity in disease. The book is organized into 12 parts. Parts I and II examine the characteristics of NK cells and other natural effector cells, respectively. Part III

focuses on the cell lineage of NK and related effector cells, providing evidence for or against T cell lineage, for or against macrophage lineage, and for or against other or separate lineage. Part IV deals with the genetics of natural resistance in the mouse and rat. Part V presents studies on the regulation of cytotoxic activity. Part VI examines the specificity of natural effector cells, covering the nature of target cell structures and the nature of recognition receptors in effector cells. Part VII discusses the cytotoxicity by cultured lymphoid cells while Part VIII turns to the mechanisms of cytotoxicity. Part IX deals with natural cell-mediated reactivity against primary tumor cells and against non-tumor targets. Part X examines NK cell tumors or the presence of NK cells at the site of tumor growth. Part XI presents clinical studies with natural effector cells. Part XII provides evidence for in vivo reactivity of natural effector cells.
