Evaluating Course Credentials

Look for courses facilitated or created by licensed therapists, psychologists, or counselors specializing in anger management or behavioral health. Credentials indicate that the program content is grounded in psychological research and best practices.

Assessing Curriculum and Content

Common Techniques Taught in Free Anger Management Classes

Free anger management classes online typically introduce a variety of evidence-based techniques aimed at helping individuals manage their anger constructively. These methods focus on increasing self-awareness, developing emotional control, and improving interpersonal communication. Learning and practicing these skills can reduce the frequency and intensity of angry outbursts and promote healthier responses to challenging situations.

Cognitive Restructuring

This technique involves recognizing and challenging distorted or negative thought patterns that contribute to anger. Participants learn to replace irrational beliefs with more balanced and realistic

Relaxation Strategies

Relaxation methods such as deep breathing, progressive muscle relaxation, and mindfulness meditation help calm the physiological arousal associated with anger. Regular practice of these techniques can lower baseline stress levels and increase emotional resilience.

Effective Communication Skills

Courses often emphasize assertive communication as a means to express feelings and needs without aggression. Techniques include active listening, using “I” statements, and managing conflicts constructively.

Problem-Solving Skills

Participants learn to approach anger-provoking situations with a problem-solving mindset, identifying solutions rather than reacting impulsively. This enhances control over emotional responses and outcomes.

free anger management class online: Fanaticus Justine Gubar, 2015-06-04 In 2011, the San Francisco 49ers hosted the Oakland Raiders in a preseason matchup that would become a seminal moment for fan violence. During the game, seventy fans were ejected from the stadium, one person was beaten unconscious in the men's room, and two men were shot in the parking lot after the game. This is hardly an isolated incident. At any given game, fans get kicked out and arrested for acting out. In the spring of 2014 alone, soccer headlines screamed of a fan killed in Brazil, a supporter who punched a police horse in England, and three fans shot in Italy. But why do fans resort to such violence? What drives them to abandon societal norms and act out in unimaginable ways? *Fanaticus: Mischief and Madness in the Modern Sports Fan* explores the roots of extreme fanaticism, from organized thuggery to digital hate speech. Justine Gubar divulges outrageous and often shocking incidents, including first-hand accounts from both the transgressors and victims. Gubar reaches back into ancient times, providing a history of fan violence throughout the ages before delving into events of misbehavior, violence, and hatred in the United States and around the world. She revisits several notorious riots and tragedies throughout the United States, Europe, Asia, and Latin America in order to understand mayhem on a global scale. In addition, Gubar investigates the sports leagues and the security and beverage industries so as to explain the roots of fan misbehavior and to dispel common myths that are often invoked to understand the madness. Featuring original interviews with European football hooligans, rioting college students, stadium security experts, and many others, *Fanaticus* provides a rare window into what drives human behavior. Together, these voices create the fullest picture of modern fan violence ever written.

free anger management class online: *Doing Critical and Creative Research in Adult Education* Bernie Grummell, Fergal Finnegan, 2020-05-11 Scholarship on adult education has fueled a high level of methodological creativity and innovation in order to tackle a diverse range of issues in a wide range of settings and locations in a critical and participatory manner. Adult education research is marked by the desire to do research differently and to conduct critical research with rather than about people which requires theoretical and methodological creativity. This entails a particular approach to how we seek to know the world in collaboration with people, to rupture hierarchical relations and to create new collaborative spaces of learning and research that encompass the diversity of people's life experiences. *Doing Critical and Creative Research in Adult Education* brings together both leading and emerging scholars in adult education research in order to capture the vitality and complexity of contemporary adult education research. This includes contributions on biographical, narrative, embodied, arts and media-based and ethnographic methods alongside the critical use of quantitative and mixed methods. This distinctive and rich methodological contribution has a general relevance and usefulness for all researchers and students in the social science and humanities, which draws attention to the importance of critical and creative participatory learning processes in human life and learning.

free anger management class online: *Handbook of Research on Student-Centered Strategies in Online Adult Learning Environments* Fitzgerald, Carlton J., Laurian-Fitzgerald, Simona, Popa, Carmen, 2018-06-08 As traditional classroom settings are transitioning to online environments, teachers now face the challenge of using this medium to promote effective learning strategies, especially when teaching older age groups. Because adult learners bring a different set of understandings and skills to education than younger students, such as more job and life experiences, the one-size-fits-all approach to teaching does not work, thus pushing educators to create a student-centered approach for each learner. *The Handbook of Research on Student-Centered Strategies in Online Adult Learning Environments* is an important resource providing readers with multiple perspectives to approach issues often associated with adult learners in an online environment. This publication highlights current research on topics including, but not limited to, online competency-based education, nontraditional adult learners, virtual classrooms in public universities, and teacher training for online education. This book is a vital reference for online trainers, adult educators, university administrators, researchers, and other academic professionals looking for emerging information on utilizing online classrooms and environments in student-centered adult education.
