**free correctional officer training: *Behavioral Approaches to Crime and Delinquency*** Edward

K. Morris, Curtis J. Braukmann, 2012-12-06 The systematic application of behavioral psychology to crime and delinquency was begun only 20 years ago, yet it has already contributed significantly to our practical knowledge about prevention and correction and to our general understanding of a pressing social problem. In this handbook, we review and evaluate what has been accomplished to date, as well as what is currently at the leading edge of the field. We do so in order to present a clear, comprehensive, and systematic view of the field and to promote and encourage still more effective action and social policy reform in the future. The chapters in this text have been written by professionals who were among the original innovators in applying behavioral psychology to crime and delinquency and who continue to make critical contributions to the field's progress, and by a new generation of energetic, young professionals who are taking the field in important and innovative directions. The contributors have attempted to review and evaluate their areas with critical dispassion, to provide thorough but not overly specialized discussion of their material, and to draw implications for how research, application, and social policy might be improved in the future. For our part as editors, we have tried to foster integration across the chapters and to provide background and conceptual material of our own.

**free correctional officer training: Invisible Victims and the Pursuit of Justice: Analyzing**

**Frequently Victimized Yet Rarely Discussed Populations** Blasdel, Raleigh, Krieger-Sample, Laura, Kilburn, Michelle, 2021-06-18 Victims of crime may experience a wide variety of traumas that result in physical, sexual, financial, psychological, emotional, and/or social consequences. While the types of trauma can vary greatly and include lesser-known forms such as vicarious and secondary trauma, identifying and recognizing victims can be complicated. Throughout this book, experts and professionals from academia and the fields of criminal justice, social work, and mental health acknowledge victims historically overlooked by society, political movements, the media, and/or the criminal justice system - we acknowledge the invisible victims. *Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations* pioneers the assertion that our view of victims needs to be more inclusive by exploring invisible victims that are rarely, if ever, a focus of discussions in traditional victimology textbooks. To educate the reader and begin working toward positive change, each chapter identifies an invisible victim and provides the background, controversies, issues, solutions, and areas of future research. It is crucial to identify these gaps in the field as some of the most victimized populations remain absent from important dialogue on crime victims. This book is appropriate for a wide range of readership including but not limited to criminologists, victim service providers, psychologists, sociologists, social workers, advocate groups, law enforcement, lawyers, defense attorneys, criminal justice practitioners, academicians, researchers, and students studying criminology, criminal justice, victimology, social work, psychology, and social justice.

**free correctional officer training:** Empirical Studies in Applied Economics Jeffrey A. Dubin, 2012-12-06 *Empirical Studies In Applied Economics* presents nine previously unpublished analyses in monograph form. In this work, the topics are presented so that each chapter stands on its own. The emphasis is on the applications but attention is also given to the econometric and statistical issues for advanced readers. Econometric methods include multivariate regression analysis, limited dependent variable analysis, and other maximum likelihood techniques. The empirical topics include the measurement of competition and market power in natural gas transportation markets and in the pharmaceutical market for chemotherapy drugs. Additional topics include an empirical analysis of NFL football demand, the accuracy of an econometric model for mail demand, and the allocation of police services in rural Alaska. Other chapters consider the valuation of technology patents and the determination of patent scope, duration, and reasonable royalty, and the reaction of financial markets to health scares in the fast-food industry. Finally, two chapters are devoted to the theory and testing of synergistic health effects from the combined exposure to asbestos and cigarette smoking.

**free correctional officer training:** **The Prison Industry** Bianca Tylek, Worth Rises,, 2025-05-06 A meticulous exposé of who profits from incarceration, culminating in a compelling case for abolition Based on years of research by the criminal justice organization Worth Rises—best known for campaigns that have revolutionized prison telecom and made prison and jail communication free in cities and states around the country—*The Prison Industry* maps the range of ways in which private corporations, often with their government partners, make money off incarceration. It further details the gross extraction of wealth from incarcerated people and their families, who have been brutalized by overpolicing and mass surveillance. Chapters on labor,

telecom, healthcare, community corrections, and more explore the origin story of privatization for each sector and how much money is in it for the corporations involved. Stretching far beyond private prisons to look at all the sectors that benefit from incarceration, the authors illuminate the methods used to extract resources from public coffers and communities, which corporations are most active and how they partner with governments, and the harms these profit-based approaches to justice cause people, families, and communities. Ultimately, *The Prison Industry* makes a compelling case for dismantling the prison industry and prison abolition more broadly. It serves as a tool for the tearing down of our wholly oppressive carceral system—the ashes of which we can use to create a better world built on care, not cages.
