Building and maintaining a private practice today requires initiative, creativity, and a willingness to adapt new tools, technologies, and techniques to your business. As a therapist, and a small business owner of a private practice, you face the challenges of fluctuating market trends, infrastructure inefficiencies, seismic changes in demographic populations, complex reimbursement systems, and technological advances which alter practice patterns. Your “therapist side” may be reluctant to think of yourself as a businessperson; however, if you are to keep offering your valuable services, you owe it to yourself and your clients to build the most effective and efficient practice possible. To do so, you need to take advantage of the latest technology. Tracy Todd presents a number of technologies that will help you build, maintain, and expand your practice. He clearly walks you through the (surprisingly easy) process of creating your own Web site, highlighting the usefulness of features such as online scheduling and payment systems. He also provides overviews of podcasting, videocasting, blogs, and electronic file management, pointing out the benefits of each, and how you can go about applying these tools to your practice. The result is a book that will help you streamline your administrative duties, while expanding your clinical reach—thus helping your practice thrive.

free mental health spreadsheet excel: Big Crime and Big Policing Tonita Murray, Elizabeth Kirley, Stephen Schneider, 2024-07-05 Following money over national borders, banking systems, casinos, and free trade zones, as well as the world of the corrupt elites, Big Crime and Big Policing brings new scholarly and practical insights into our understanding of the interplay of money, crime, and policing on the grand scale. In this wide-ranging volume, a mixed group of scholars and practitioners aim to show how money dictates the scope and nature of financial and corporate crimes, and the impact of these crimes on national economies, social institutions, and communal well-being alike. The book examines how the combined efforts of governments and international organizations fail to stop financial crime at its source and, despite apparently generous human and financial resources, police and law enforcement efforts ultimately fall short of defeating big crime and of meeting public safety needs. International in scope, Big Crime and Big Policing provides fresh reflection on a significant problem of our age, one that demands greater attention from governments and the public.

free mental health spreadsheet excel: Hallucinations: New Interventions Supporting People with Distressing Voices and/or Visions Simon McCarthy-Jones,, Mark Hayward, Flavie Waters, Iris E. Sommer, 2016-12-04 Hallucinations can occur across the five sensory modalities (auditory, visual, olfactory, tactile, and gustatory). Whilst they have the potential to be benign or even highly valued, they can often be devastating experiences associated with distress, impaired social and occupational functioning, self-harm and suicide. Those who experience hallucinations in this latter manner may do so within the context of a wide range of psychiatric diagnoses, including schizophrenia, bipolar disorder, borderline personality disorder, and post-traumatic stress disorder. The only routinely available interventions for people distressed by hallucinations are antipsychotic drugs, which date from the introduction of chlorpromazine in the 1950s, and manualized cognitive behavioral therapy, which originated in the 1990s. These interventions do not help all people distressed by hallucinations, and in the case of antipsychotic medication, come with notable side-effects. There has hence been great interest in new interventions to support people distressed by hallucinations. The goal of this Frontiers Research Topic is to present a collection of papers on new developments in clinical interventions for those distressed by hallucinations. In the psychiatric condition that remains most strongly associated with hallucinations, schizophrenia, the majority (~70%) of people will have experienced hallucinations in the auditory modality, approximately a third will have experienced visual hallucinations, and a smaller minority will have experienced hallucinations in other modalities. Consistent with this prevalence, this collection focusses on auditory and visual hallucinations. This is not to minimise the potential distress that can occur from hallucinations in other modalities. For example, tactile hallucinations, particularly when stemming from earlier experiences of sexual abuse, can be highly distressing, and improved ways to help sufferers of such experiences are also needed. In summary, this collection aims to result in an interdisciplinary collection of papers which will appeal to a wide readership, spanning all with an interest in this area.

free mental health spreadsheet excel: The Life-Course of Serious and Violent Youth Grown Up Evan McCuish, Patrick Lussier, Raymond Corrado, 2021-06-30 The Life-Course of Serious and Violent Youth Grown Up addresses significant gaps in the literature on youth involved in chronic, serious, and violent offending. Through longitudinal research and a long follow-up into adulthood, it challenges common perceptions about offending outcomes. Using theoretically grounded, methodologically sophisticated and empirically driven research, this book culminates 20 years of data emerging from the Incarcerated Serious and Violent Young Offender Study (ISVYOS). Initiated in 1998 to understand the origins of serious and violent youth offending, it follows 1,719 formerly incarcerated youth through adulthood and offers a contemporary perspective to questions

about chronic offending in adolescence and social and offending outcomes in adulthood. The authors provide a theoretically framed examination of new findings from the ISVYOS regarding participants' justice system involvement, from onset to persistence to desistance. Most participants experienced continued involvement in the justice system in adulthood. However, contrary to past literature, ISVYOS findings challenge static descriptions of chronic offending and notions of the youth super predator. ISVYOS findings also challenge assertions that experiences and risk factors in childhood and adolescence are not informative of adult justice system involvement. Together, the findings call for a more humanistic approach that recognizes that the complex lives of individuals formerly incarcerated in adolescence implies that desistance does not happen by default. This book will be of great interest to scholars, researchers, and students of forensic psychology, developmental and life course criminology, youth justice, and violent crime.
